WHY ECO FRIENDLY ?

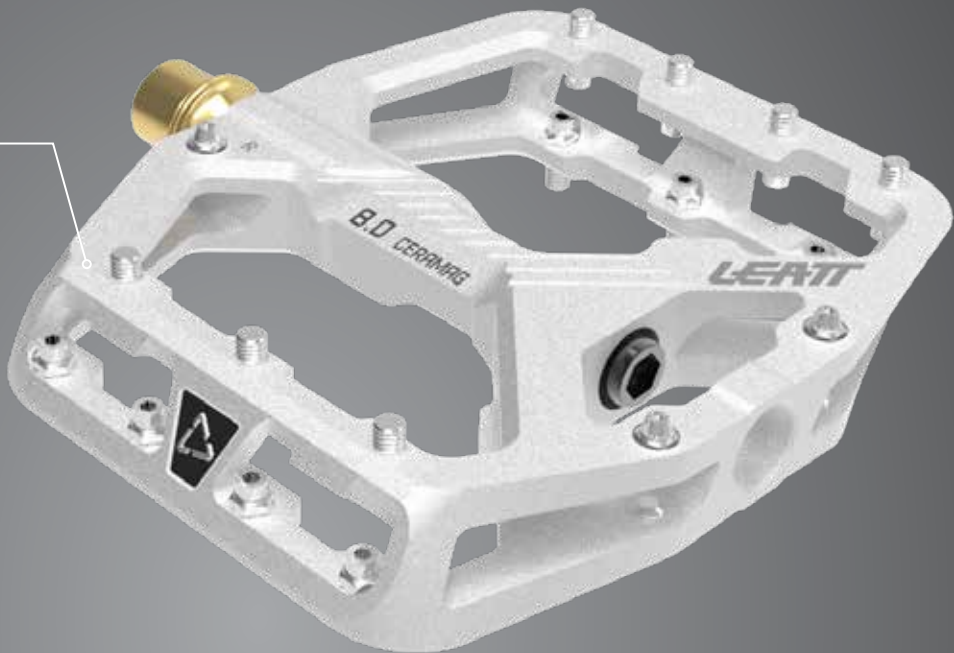

As the lightest structural metal, magnesium is also considered one of the most environmentally friendly materials. Its elements are abundantly found on Earth and are effortlessly sourced from minerals, brines, and seawater, making it a nearly limitless resource.

Magnesium allows Leatt to experience the future of sustainable performance, unlocking the perfect blend of strength, weight savings, and riding characteristics. Leatt fully capitalizes on these properties to elevate your ride when designing our components.

FEATURES

8.0Ti & 8.0

KEY FEATURES

- CeraMAG - Ceramic coated magnesium alloy
 - The lightest structural metal
 - High strength
 - 100% recyclable
- Ceramic coating for maximum wear-resistance and corrosion-resistance
- Ultimate durability with quad lip seal & triple-bearings system (lightweight self-lubricating bushing, needle and sealed ball bearings)
- Engineered rotational resistance prevents the pedals from spinning too quickly, making it easier to reposition your feet during slips
- Chamfered leading-edge platform helps deflect rock strikes

AVAILABLE SIZES: (L X W X H)

- #Narrow 114mm x 100mm x 16mm
- #Wide 114mm x 107mm x 16mm

STANCE WIDTH:

KEY FEATURES

- CeraMAG Magnesium, superior strength, lighter weight than aluminum, and effective vibration dampening properties.
- Mute vibrations, reducing fatigue, and improving comfort and control.
- CNC machined from our ultra-lightweight Ceramag alloy, offering exceptional performance with signature Leatt style.
- 210° handlebar wrap to spread the clamping force evenly, reducing the risk of damaging the handlebar.
- Zero-gap construction ensures easy installation, better pressure distribution, and strength where it matters most.
- Extra-wide clamping platform for maximum control and steering precision.
- Ceramic coating for high wear resistance
- Tested to the EFBE EPAC GRAVITY TRI-TEST® standard (category 5), the ultimate benchmark for strength and durability for all riding styles.
- Top cap, 2.5mm spacer, and steerer tube seal cap are included for a complete setup.

GRAVITY DIRECT MOUNT Ø35MM STEM FEATURES

6.0

KEY FEATURES

- Precision CNC-machined from 7075 aluminum
- Lightweight design without compromising on strength
- Attaches directly to a triple clamp/DH fork for sharper and more precise steering
- Adjustable in length and height (5mm each) to customize your fit
- The zero-gap faceplate and 200° handlebar wrap securely hold the handlebar, distributing clamping force evenly
- Our interlocking faceplate interface increases strength and makes installation easy
- Chamfering around the handlebar clamping area reduces stress on the handlebar during load-bearing
- Extra-wide 70mm clamping platform for unparalleled control and steering precision

AVAILABLE SIZES:

- BAR CLAMP DIAMETER: Ø35mm
- BAR CLAMP WIDTH: 70mm

PRODUCT WEIGHT:

- 174g including bolts, but excluding 5mm height adjustment spacer (20grams)

EASY MOUNTING

ZERO GAP INTERLOCKING FACE PLATE
Removes the installation guesswork

MAXIMUM CONTROL

EXTRA-WIDE 70MM CLAMP & 200° HANDLEBAR WRAP
Optimized handlebar connection for maximum steering precision

ADJUSTABLE LENGTH & HEIGHT

Tailored your riding position to the track

Specifications:

LENGTHS AVAILABLE:
2-Positions 45/55mm

STEERER CLAMP: IS direct mount

STACK: 5mm / + 5mm with spacer

MATERIAL: CNC Aluminum 7075-T6

HARDWARE: Black oxide steel

TORQUE SPEC: 6Nm.

FINISH: Shot peened anodized

INTENDED USE : Downhill / Freeride / E-bike

HANDLEBARS

HANDLEBARS

HANDLEBAR

LAUNCH CONTROL Ø35MM HANDLEBAR KIT FEATURES

6.0

KEY FEATURES

- Includes Reaflex 6.0 grips with energy-absorbing Reaflex gel, noticeably reducing vibrations transmitted to the rider, reducing hand fatigue and arm pumps
- Crafted from 7050 Aluminum for optimal balance of strength, weight, and durability
- Engineered for high toughness, enabling it to withstand sudden shocks and impacts without structural damage.
- Optimized wall thickness for reduced weight (±284g) and improved compliance.
- Shot-peened for increased fatigue strength and enhanced durability
- Wide clamping area
- Front and top centre guides make stem alignment and cut to length easy

AVAILABLE SIZES:

- #Mid 23/9°/800mm
- #Hi 38/9°/800mm

PRODUCT WEIGHT:

- Bar: 284g (23mm) / 285g (38mm)
- Grips: 106g (pair)

LIGHT AND STRONG

Crafted to out 7050 Aluminum for a sub 285g weight, tested to meet EFBE EPAC MTB-GRAVITY TRI-TEST CAT 5 standard

VERSATILE GEOMETRY

800mm wide, 35mm diameter with 9° Back sweep available two rise options (38mm / 23mm)

WIDE CLAMPING AREA

100mm to fit any style of stem and Torsional stiffness

ROBUST FINISHING

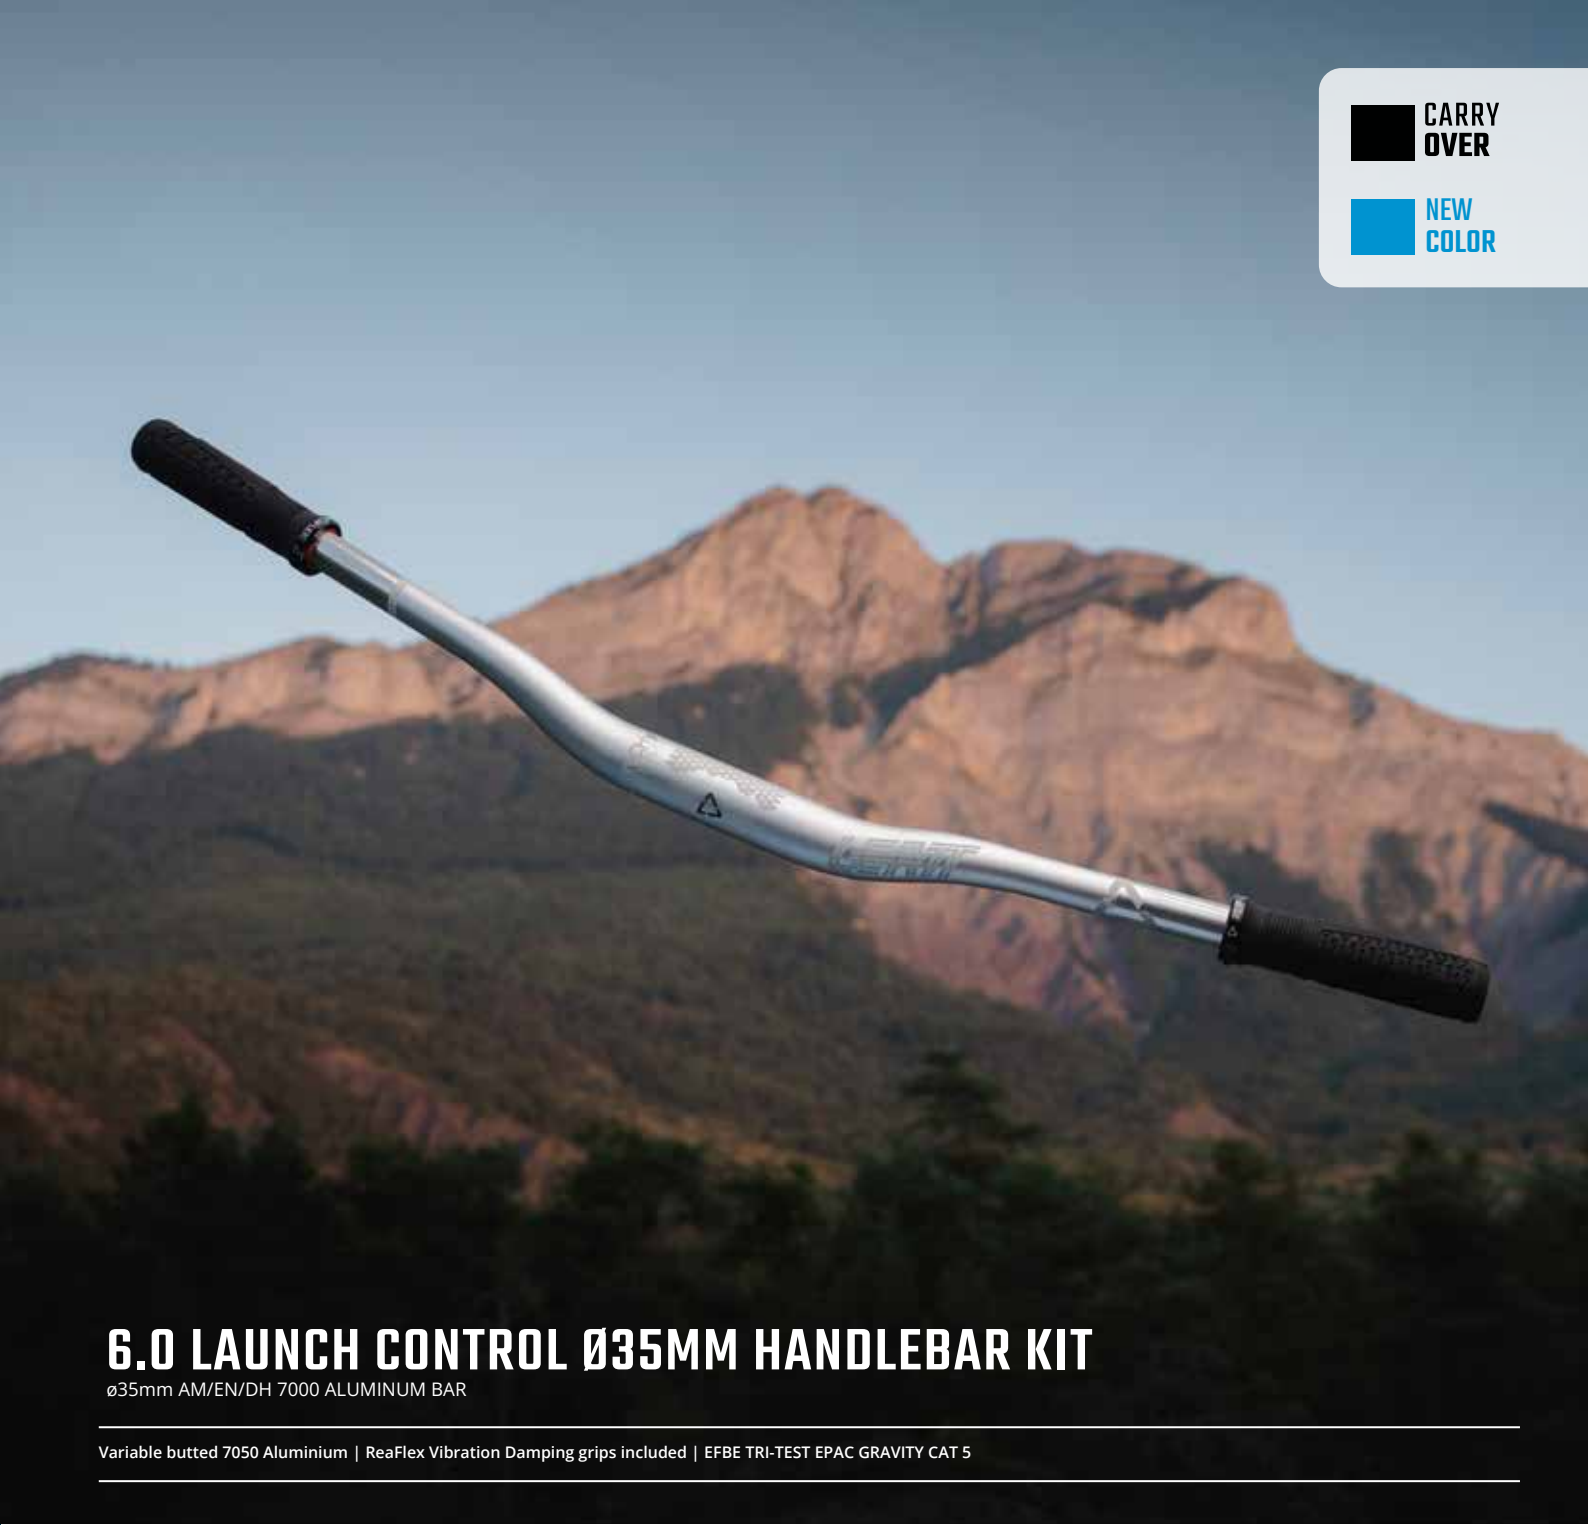

Increases durability and resistance to fatigue

REAFLEX 6.0 GRIPS INCLUDED MAXIMUM VIBRATION DAMPING

Infused with Reaflex energy absorbing anti-vibration material, improving control while reducing hand fatigue and arm pumps

LAUNCH CONTROL Ø31.8MM HANDLEBAR KIT FEATURES

6.0

KEY FEATURES

- New 31.8mm clamp diameter for better compliance and comfort.
- Includes Reaflex Grips, engineered to absorb vibrations and fight hand fatigue.
- Premium 7050 Aluminum. Aggressively butted for optimal compliance, lightweight durability, and strength.
- Wide clamping area (100mm), increasing control and space for mounting accessories.
- Easy setup with clear alignment marks for stem and lever adjustments. Cut lines make shortening the bar a breeze.
- Ergonomic design available in 2 rises (23/38mm) with an 800mm width, 9° backsweep, and 5° upsweep for natural wrist and elbow alignment.

AVAILABLE SIZES:

- #Mid 23/9°/800mm
- #Hi 38/9°/800mm

GRIPS

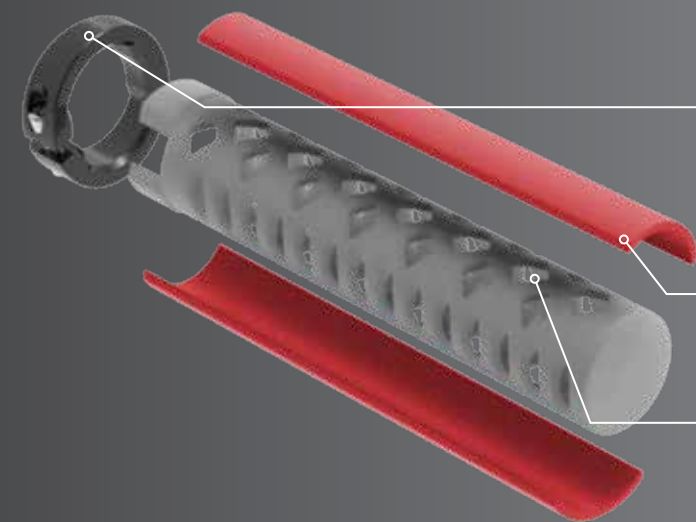

GRIP TECHNOLOGY

REAFLEX

Vibration-dampening gel that absorbs energy and cuts down arm fatigue

REAFLEX GRIP

REAFLEX GRIP
REAFLEX GRIP
REAFLEX GRIP
REAFLEX GRIP

5 DIFFERENT GRIPS AVAILABLE
3 Grip patterns
2 of them in 2 different widths

SINGLE RING
More useable grip space

REAFLEX VIBRATION DAMPING
Non-Newtonian material absorbs shock, reducing hand fatigue.

LATTICE CORE
Hollow core design adds more energy-absorbing material between the handlebar and your hand.

SOFT GRIP INTERFACE
Balance grip and durability

6.0 OG REAFLEX
2 Diameters
Regular 33/31mm & Thin 31/29mm

6.0 DIAMOND WAFFLE
2 Diameters
Thick 33/35mm & Thin 29/31mm

6.0 HALF WAFFLE
1 Diameter
30mm diameter

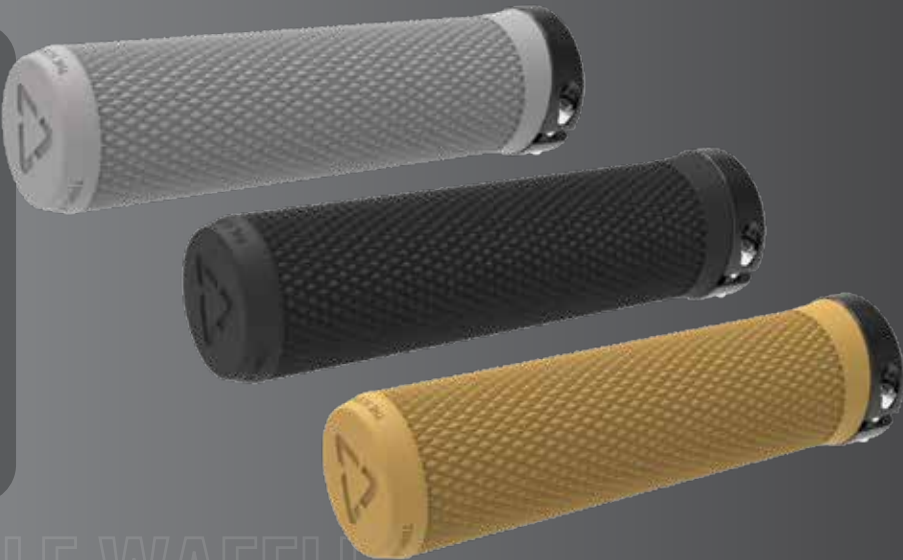

REAFLEX

REAFLEX OG GRIPS

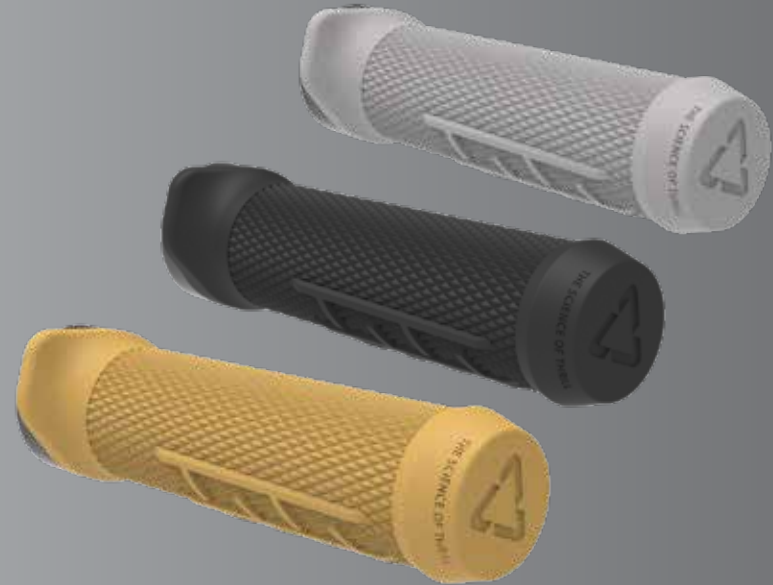

- **Available in-**
Regular : 33/31mm & Thin : 31/29mm
- **Single lock ring-**
Easy install and more grip space
- **Variable Diameter taper profile-**
More material on the outer edge reduces hand pressure and enhances further damping
- **Central bump pad palm support-**
Reduces hand fatigue and improves impact protection
- **Soft flexible ribs**
Around the thumb and forefinger area improve grip and prevent slipping
- **Half Waffle & Triangular Blocks**
Provides extra finger traction and control

REAFLEX 6.0 DIAMOND

- **Energy-absorbing ReaFlex gel-**
Infused into the grip core to reduce vibration, lessening arm pump and hand fatigue.
- **Non-directional full diamond pattern-**
Works great with and without gloves. Can be rotate to extend grip life.
- **Super soft, 15A-**
TPR overlay provides maximum grip.
- **2 Diameters-**
Thin (29/31mm) and Thick (33/35mm).
- **Single inboard lock ring-**
Enhances usable grip space and makes installation easy.

REAFLEX 6.0 HALF WAFFLE

- **ReaFlex gel & lattice core-**
Absorbs vibrations, reducing arm pump and hand fatigue.
- **Finger Ribbed-**
Strategically place ribs boosts traction and control.
- **Low profile Flanged-**
Helps hand placement without interfering with the controls
- **Super soft 15A TPR-**
Maximum grip, no slipping.
- **Available in a 30/32mm diameter profile-**
Perfect balance of control and comfort.
- **Single lock ring-**
Easy install and more grip space

REAFLEX GRIPS

6.0

KEY FEATURES

- The grip core is infused with Leatt's energy-absorbing non-newtonian ReaFlex gel, noticeably reducing vibrations transmitted to the rider and decreasing hand fatigue and arm pumps
- Soft TPR overlay for improved tactile feel and balanced durability
- A single inboard lock ring enhances usable grip space. Installation and positioning are made easy with a 3mm allen wrench to prevent rounding bolts
- Bump protection bar ends protect handlebars, cars, and walls

AVAILABLE SIZES:

- #Thin Ø29mm
- #Regular Ø31mm
- #Thick Ø33mm

STEADYSIP CONVERTIBLE WATER BOTTLE FEATURES

750ml & 600ml

KEY FEATURES

- Innovative water dispensing system designed with safety in mind.
- Upright drinking helps you keep your eyes on the trail while drinking.
- The triple valve system assures easy sipping with a constant and steady flow of water:
 - The Hydrapak BLASTER™ bite valve self-seals after each sip.
 - A second, internal valve prevents water from coming back down the straw, keeping water ready and requiring less effort for water to move up.
 - A third Anti-vacuum valve equalizes internal pressure, popping the bottle back to shape faster.
- Includes Hydrapak drink tube extension. Very helpful wearing a full-face helmet.
- The lipped cap provides extra grip to remove the bottle from the holder.
- TasteRight plastic is odorless and without aftertaste.
- The wide fill opening makes it ice cube friendly.
- Disassembles for easy cleaning

AVAILABLE SIZES:

- 600ml
- 750ml

PRODUCT WEIGHT:

- 600ml: 69g
- 750ml: 75g

Specifications:

CAP: SteadySip triple valve upright drinking w/ drinking straw

SPOUT: replaceable Hydrapak silicone BLASTER™ bite valve W/ adjustable drink tube extension

BOTTLE MATERIAL: TasteRight polypropylene

CAPACITY: 600ml (20 oz) / 750ml (25 oz)

WEIGHT: 69g (600ml) / 75g (750ml)

SAFETY: food safe, BPA, BPS, BPF, Phthalates free

STEADY SIP TRIPLE VALVE SYSTEM

Effortless sipping with steady water flow, self-sealing bite valve, anti-backflow mechanism, and quick shape recovery

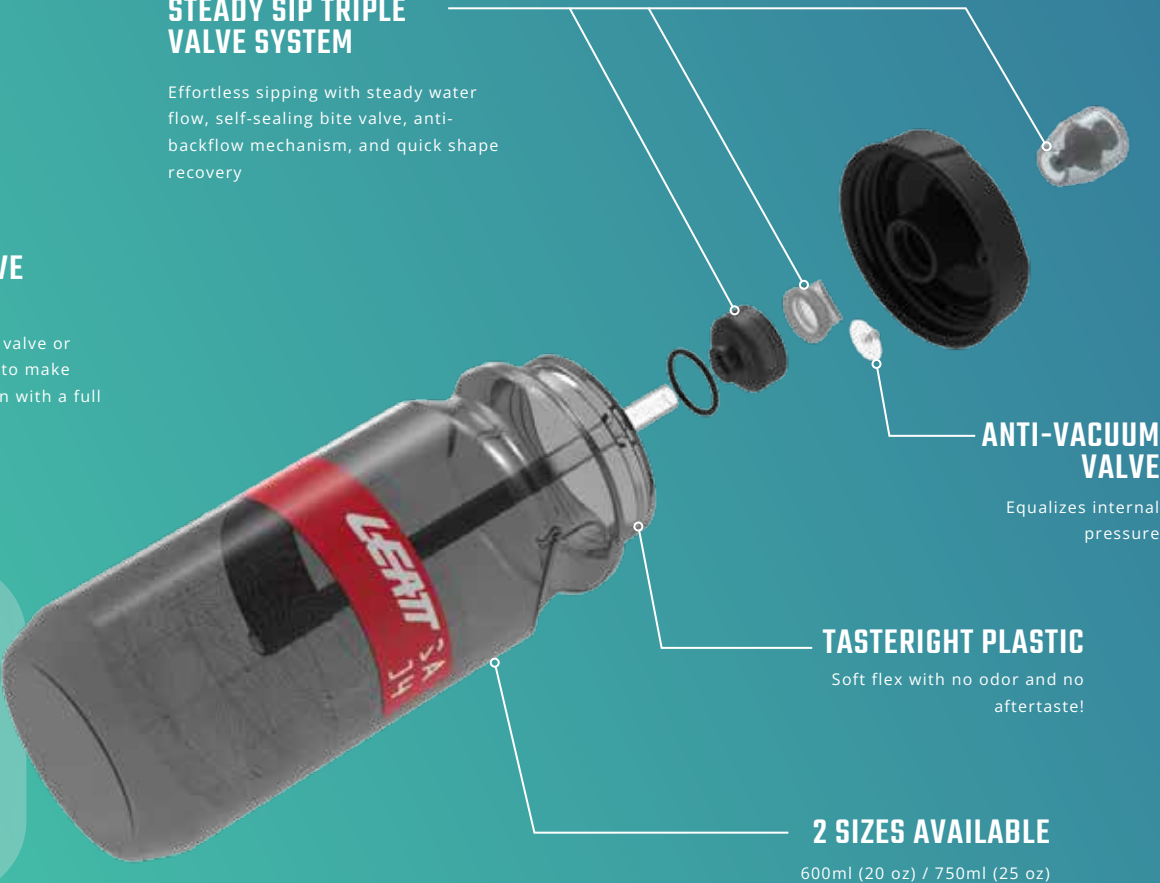

HYDRAPAK VALVE & EXTENSION

Choose between a bite valve or a drink tube extension, to make hydration a breeze even with a full face-helmet

SAFETY INCREASE:

Upright drinking minimizes head movement and helps you keep your eyes on the trail or road, while drinking.

Minimize distraction, maximize riding safety.

ANTI-VACUUM VALVE

Equalizes internal pressure

TASTERIGHT PLASTIC

Soft flex with no odor and no aftertaste!
