# ENDURANCE HELMETS

## ENDURANCE HELMET TECHNOLOGY

Fidlock magnetic closure system.

Anti-microbial fabric which prevents the build-up of unpleasant smells.

Fidlock magnetic closure system.

Helmet replacement program for helmets owned under 3 years.

Reduced brain acceleration and brain rotational acceleration.

BOA Helmet fit system for precision, comfort and effortless adjustability

**3 YEAR****HELMET REPLACEMENT PROGRAM**[www.leatt.com/helmet-replacement-program](http://www.leatt.com/helmet-replacement-program)

Sometimes an accident or impact is severe enough to damage your helmet to the extent that it may need to be replaced. This would occur when any of the safety features (such as the impact liner, 360° Turbine Technology, or the helmet shell) are compromised and the helmet is no longer able to function as designed. For your safety, it is essential that you don't continue to use a damaged helmet.

# 360° TURBINE

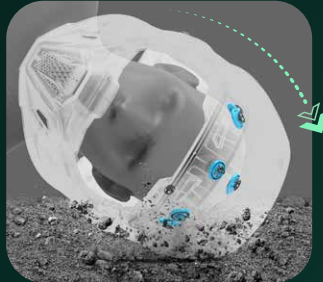

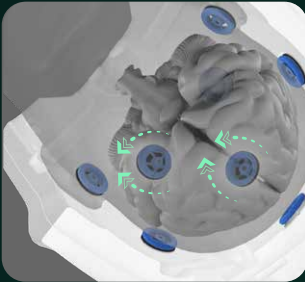

## TECHNOLOGY

Turbine discs housed within the helmet improve rider safety, by helping to reduce both low impact energy associated with concussion and brain rotational acceleration.

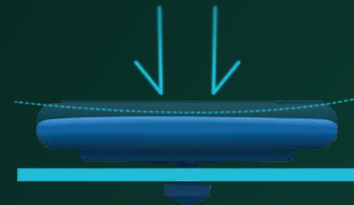

### ROTATION PROTECTION

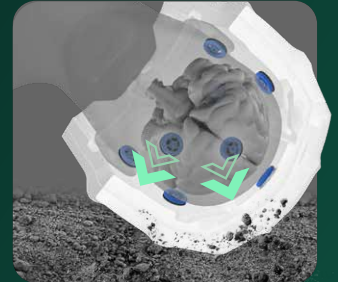

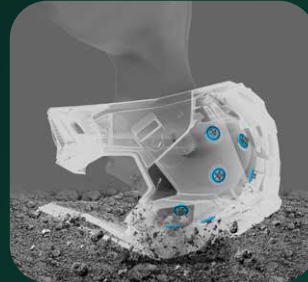

The optimally designed turbine discs enable the helmet to move slightly on the head upon impact, reducing peak acceleration to the head & brain.

### LOW IMPACT PROTECTION

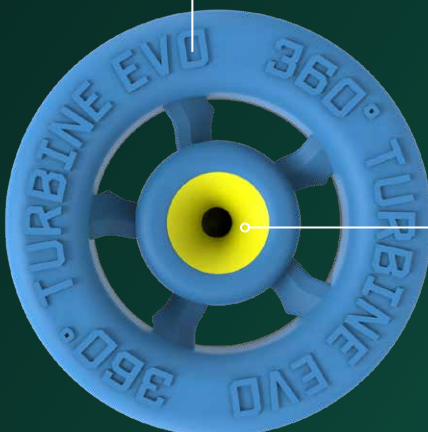

The special energy absorbing material in the turbines absorbs low impact energy associated with concussion.

# NEW 360° TURBINE EVO

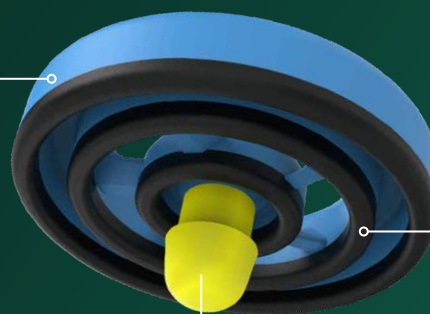

#### ABSORB

#### SLIDE

### KEY FEATURES

- **360° Turbine EVO Tech** - Next generation of reduced peak brain, low speed and rotational acceleration. New triple density Turbines that absorb, flex and slide, even better than previous generation.
- **Rotation protection:** The optimally designed, triple density turbine discs enable the helmet to move slightly on the head upon impact, helping to reduce peak acceleration to the head & brain
- **Low impact protection:** The special energy absorbing material in the turbines absorbs low impact energy associated with concussion
- **PowerBridge** in-molded force absorber
- **Aero shell shape**, reduces drag
- **Inside Channeling**, for max air flow
- **BOA® FS2 Helmet Fit System**
- **State of the art** comfort and adjustability.
- **FIDLOCK** magnetic buckle
- **Flat Lock Divider**
- **Soft touch** and moisture wicking chin straps
- **Moisture wicking**, breathable, anti-odor and washable inner liner
- **Eyewear docking port** with anti-slip function
- **3-year Leatt Helmet Replacement Program.**

### AVAILABLE SIZES:

GEAR

## GEAR TECHNOLOGY

### GEAR FIT GUIDE

**REGULAR FIT**

Straight fit for regular sized riders.

Looser than race fit, this the classic fit gives more space for upper body protection. Pants have slightly more room, ensuring a comfortable fit over knee pads.

**REGULAR FIT GEAR:** ELEMENTS

**SLIM FIT**

A close fitting, tailored fit that mirrors your body's silhouette.

**SLIM FIT GEAR:** TRAIL

**SKIN FIT**

Drawing inspiration from competition, race fit prioritizes a close stretch fit to enhance aerodynamic performance.

The 3D design and stretch fabric allows the jersey and pant to stretch comfortably, accommodating slimline body protection and knee braces.

**SKIN FIT GEAR:** ENDURANCE

## HELMETS

### TRAIL HELMET TECHNOLOGY

Fidlock magnetic closure system.

Anti-microbial fabric which prevents the build-up of unpleasant smells.

Helmet replacement program for helmets owned under 3 years.

Reduced brain acceleration and brain rotational acceleration.

**3YEAR**  
HELMET REPLACEMENT PROGRAM  
[www.leatt.com/helmet-replacement-program](http://www.leatt.com/helmet-replacement-program)

Sometimes an accident or impact is severe enough to damage your helmet to the extent that it may need to be replaced. This would occur when any of the safety features (such as the impact liner, 360° Turbine Technology, or the helmet shell) are compromised and the helmet is no longer able to function as designed. For your safety, it is essential that you don't continue to use a damaged helmet.

# HELMET TRAIL 3.0 FEATURES

## KEY FEATURES

- **360° Turbines Technology:**
  - Helps reduce peak brain acceleration at impact speeds associated with concussion
  - Helps reduce peak brain rotational acceleration
- **PowerBridge** in-molded force absorber
- **In-molded impact foam** for great energy absorption
- **MaxiFlow** air channels effective even at low speed
- **Eyewear docking port** with anti-slip function
- **FIDLOCK** magnetic buckle
- **Strap divider and fit system** developed for custom fit, ease and comfort
- **Soft touch and moisture wicking chin straps**
- **Moisture wicking, breathable, anti-odor and washable inner liner**

## ALL-MTN HELMET TECHNOLOGY

NTA 8776

Protects against impact at higher speeds, ideal for e-bike riders.

Helmet replacement program for helmets owned under 3 years.

Anti-microbial fabric which prevents the build-up of unpleasant smells.

Reduced brain acceleration and brain rotational acceleration.

Fidlock magnetic closure system.

**3YEAR**

**HELMET REPLACEMENT PROGRAM**

[www.leatt.com/helmet-replacement-program](http://www.leatt.com/helmet-replacement-program)

Sometimes an accident or impact is severe enough to damage your helmet to the extent that it may need to be replaced. This would occur when any of the safety features (such as the impact liner, 360° Turbine Technology, or the helmet shell) are compromised and the helmet is no longer able to function as designed. For your safety, it is essential that you don't continue to use a damaged helmet.

**3YEAR****HELMET REPLACEMENT PROGRAM**[www.leatt.com/helmet-replacement-program](http://www.leatt.com/helmet-replacement-program)

Sometimes an accident or impact is severe enough to damage your helmet to the extent that it may need to be replaced. This would occur when any of the safety features (such as the impact liner, 360° Turbine Technology, or the helmet shell) are compromised and the helmet is no longer able to function as designed. For your safety, it is essential that you don't continue to use a damaged helmet.

# GRAVITY 8.0 HELMET FEATURES

## KEY FEATURES

- **Composite shell**
  - Impact absorbing foam in 4 densities for ultimate reduction of forces to head and brain.
- **360° Turbine Technology:**
  - **Rotation protection:** The optimally designed turbine discs enable the helmet to move slightly on the head upon impact, helping to reduce peak acceleration to the head & brain.
  - **Low impact protection:** The special energy absorbing material in the turbines absorbs low impact energy associated with concussion.
- Incredible comfort due to Pro-Fit™ modulating comfort liner
- Moisture wicking, breathable, anti-odor and washable liner fabric
- Optimal neck brace compatibility
- Maximized ventilation effective even at very low speeds
- Visor with breakaway function for rotational reduction in a crash
- Emergency cheek pad removal
- Hydration ready (with optional hands-free kit)
- Certified and tested:
  - ASTM F1952-10, EN1078, CPSC 1203, AS/NZS 2063:2008.
  - Not certified for, but would pass Motorcycle ECE 22.05 according to Leatt Lab tests (FYI: by law a helmet can not be certified as a Bicycle AND Motorcycle helmet at the same time)

## GEAR TECHNOLOGY

### GEAR FIT GUIDE

#### REGULAR FIT

Straight fit for regular sized riders. Looser than race fit, this the classic fit gives more space for upper body protection. Pants have slightly more room, ensuring a comfortable fit over knee pads.

#### SLIM FIT

A close fitting, tailored fit that mirrors your body's silhouette

#### SKIN FIT

Drawing inspiration from competition, race fit prioritizes a close stretch fit to enhance aerodynamic performance. The 3D design and stretch fabric allows the jersey and pant to stretch comfortably, accommodating slimline body protection and knee braces

### GEAR TECHNOLOGY

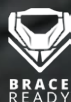

Anti-microbial fabric which prevents the build-up of unpleasant smells

Engineered ventilation for delivering effective breath-ability.

Mesh material for superior temperature control.

A neck collar designed for versatility to accommodate neck brace compatibility

An additional layer of protective film bonded on to protect from abrasion.

YKK zippers guarantee high quality products.

# COWEAVE TECHNOLOGY

SEAMLESS 3D FABRIC MIX

## COWEAVE WILL INTEGRATE DEFLECTION MATERIAL

In the overall construction of the Pants & Jersey

### Advantages:

- Higher comfort, thanks to fewer seams, 4-way flex and 3D pattern
- Combination with DeFlexion also increases the base material's protection in specific areas, while the segments with full DeFlexion will offer maximum cut and abrasion resistance, without effecting stretch.

## TRANSITION BETWEEN FABRICS & CHARACTERISTICS WITHOUT SEAMS

# 8.0 GRAVITY JERSEY & PANTS FEATURES

## JERSEY FEATURES:

- **FIT:** Body is regular fit with skin fit sleeves in compression knit, giving a vest + base layer look & feel; seamless, welded collarless neck opening; developed with Pivot Factory Racing pro riders; designed to promote racing and speed

WOMEN'S GEAR

## WOMEN'S GEAR TECHNOLOGY

### GEAR FIT GUIDE

#### REGULAR FIT

Straight fit for regular sized riders. Looser than race fit, this the classic fit gives more space for upper body protection. Pants have slightly more room, ensuring a comfortable fit over knee pads.

#### SLIM FIT

A close fitting, tailored fit that mirrors your body's silhouette

#### SKIN FIT

Drawing inspiration from competition, race fit prioritizes a close stretch fit to enhance aerodynamic performance. The 3D design and stretch fabric allows the jersey and pant to stretch comfortably, accommodating slimline body protection and knee braces

### GEAR TECHNOLOGY

Anti-microbial fabric which prevents the build-up of unpleasant smells

A neck collar designed for versatility to accommodate neck brace compatibility

Engineered ventilation for delivering effective breath-ability.

An additional layer of protective film bonded on to protect from abrasion.

Mesh material for superior temperature control.

YKK zippers guarantee high quality products.

GEAR

## GEAR TECHNOLOGY

### GEAR FIT GUIDE

#### REGULAR FIT

Straight fit for regular sized riders. Looser than race fit, this the classic fit gives more space for upper body protection. Pants have slightly more room, ensuring a comfortable fit over knee pads.

#### SLIM FIT

A close fitting, tailored fit that mirrors your body's silhouette

#### SKIN FIT

Drawing inspiration from competition, race fit prioritizes a close stretch fit to enhance aerodynamic performance. The 3D design and stretch fabric allows the jersey and pant to stretch comfortably, accommodating slimline body protection and knee braces

## GEAR TECHNOLOGY

Anti-microbial fabric which prevents the build-up of unpleasant smells

Engineered ventilation for delivering effective breath-ability.

Mesh material for superior temperature control.

Highly breathable lightweight fabric engineered to maximize airflow.

A neck collar designed for versatility to accommodate neck brace compatibility

An additional layer of protective film bonded on to protect from abrasion.

YKK zippers guarantee high quality products.

## URBAN HELMET TECHNOLOGY

Reduced brain acceleration and brain rotational acceleration.

Helmet replacement program for helmets owned under 3 years.

**3YEAR**

HELMET REPLACEMENT PROGRAM

[www.leatt.com/helmet-replacement-program](http://www.leatt.com/helmet-replacement-program)

Sometimes an accident or impact is severe enough to damage your helmet to the extent that it may need to be replaced. This would occur when any of the safety features (such as the impact liner, 360° Turbine Technology, or the helmet shell) are compromised and the helmet is no longer able to function as designed. For your safety, it is essential that you don't continue to use a damaged helmet.

## SHOE TECHNOLOGY OVERVIEW

### RIDEGRIP™ COMPOUND

A tougher, Leatt Lab compound sole for durability and great bike control

### RIDEGRIP™ PRO COMPOUND

Softer, tackier Leatt Lab compound sole for superior bike feel and control

### WAFFLE GRIP

Optimized WaffleGrip pattern in pedal area for maximum pin grip

### WAFFLE GRIP PRO

A new optimized grip pattern for shorter pins and more extreme terrain

### HYDRADRI MEMBRANE

HydraDri membrane waterproof bootie construction

### COMPRESSION LACES

For secure fitment

### MOZ CABLE LACING

Enables micro-adjustments for the perfect fit and comfort

### BOA FIT SYSTEM

Delivers micro-adjustable, precision fit engineered to perform in the toughest conditions.

### SPEED LACE SYSTEM

Easy to use on and off the bike, even with gloves on

### CLIPLESS

A large cleat box allows individual rider preferences for incredible bike control, using clip pedals

### FLAT

For riding with flat pedals

# RIDEGRIP™ PRO

## TOUGHER RIDEGRIP

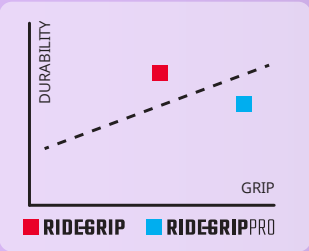

Compound increases durability

## RIDEGRIP PRO

Has a 20% Softer compound compared to RideGrip

## OPTIMAL BALANCE

Grip vs Abrasion resistance.

## GRIP & DURABILITY RATIO

## SOFTER RUBBER

Allows the shoe to flex and grip the entire pedal platform

## RIDEGRIP PRO COMPOUND

A new optimized grip pattern for shorter pins and more extreme terrain. This softer compound feels more tacky and delivers ultimate bike control

# WAFFLEGRIP

ALLOWS THE PEDAL PINS TO DIG DEEPER INTO THE RUBBER

BETTER SUITED FOR SHORTER PINS

## WAFFLEGRIP PATTERN

Concave waffle pattern with good stability and pedal feel. Demands long pins. Great abrasion resistance on and off the bike.

## WAFFLEGRIP PRO PATTERN

Inverted waffle combined with very tacky rubber locks in the pedals pins and offer great bike traction
