

A man and a woman are posing against a solid yellow background. The man, on the left, has curly hair and a beard, wearing a black long-sleeved athletic top. The woman, on the right, has long blonde hair and is wearing a white long-sleeved athletic top. They are both looking directly at the camera. The man's arms are raised, and his hands are clasped behind the woman's head. The woman's arms are also raised, and her hands are clasped behind the man's head. Large, white, stylized numbers '1', '2', and '3' are visible in the background, partially obscured by the models. The text 'super.natural' is overlaid in the center in a white, lowercase, sans-serif font.

BASE LAYER

Merino sheep possess a light, ultra-breathable coat that shields them from the scorching summer sun. As winter arrives, they naturally grow an extra layer of wool, enabling them to endure very cold temperatures. Inspired by nature’s adaptability, super.natural offers a range of merino-mix base layers in various styles: short and long sleeves, pants, and different fabric weights – all crafted to regulate your body’s temperature, regardless of weather conditions or climate zones.

GRAMMAGES

■ SIERRA 140

The Sierra Nevada, characterized by gentle warmth and scorching heat, inspires our SIERRA 140 collection. Crafted from 140g lightweight fabric, these base layers are exceptionally breathable, odor-resistant, and moisture-resistant.

■ TUNDRA 175

Our TUNDRA 175 collection is a versatile companion year-round. Whether you’re hiking, skiing, or simply enjoying the outdoors, the 175g midweight fiber ensures pleasantly light comfort in any environment.

■ ARCTIC 230

For harsh winter conditions with icy temperatures, our ARCTIC 230 collection offers unparalleled warmth and protection. Our 230g heavyweight fiber delivers dependable insulation even in the most extreme cold.

■ BASE+ 255

For those who feel the chill even more – our Base+ delivers unmatched warmth and softness on the coldest days. Crafted with our innovative WOOL SUPER.BRUSH fabric, it’s brushed inner layer offers extra insulation and comfort.

■ MERINO.LUX

MERINO.LUX stands for elegant comfort. Crafted from a premium 220g blend of finest merino wool (16.5µ) and Lycra, it offers a flattering fit. Ideal for fitted silhouettes and elevated baselayers: soft and stretchy with a touch of elegance.

■ BIO BASE

BIO BASE is our most natural take on performance wear. Made from 100% natural fibers, this fabric is breathable, soft, and naturally temperature-regulating. Free from synthetics, it is ideal for conscious layering.

BASE LAYER

Merino sheep possess a light, ultra-breathable coat that shields them from the scorching summer sun. As winter arrives, they naturally grow an extra layer of wool, enabling them to endure very cold temperatures. Inspired by nature’s adaptability, super.natural offers a range of merino-mix base layers in various styles: short and long sleeves, pants, and different fabric weights – all crafted to regulate your body’s temperature, regardless of weather conditions or climate zones.

GRAMMAGES

■ SIERRA 140

The Sierra Nevada, characterized by gentle warmth and scorching heat, inspires our SIERRA 140 collection. Crafted from 140g lightweight fabric, these base layers are exceptionally breathable, odor-resistant, and moisture-resistant.

■ TUNDRA 175

Our TUNDRA 175 collection is a versatile companion year-round. Whether you’re hiking, skiing, or simply enjoying the outdoors, the 175g midweight fiber ensures pleasantly light comfort in any environment.

■ ARCTIC 230

For harsh winter conditions with icy temperatures, our ARCTIC 230 collection offers unparalleled warmth and protection. Our 230g heavyweight fiber delivers dependable insulation even in the most extreme cold.

■ BASE+ 255

For those who feel the chill even more – our Base+ delivers unmatched warmth and softness on the coldest days. Crafted with our innovative WOOL SUPER.BRUSH fabric, it’s brushed inner layer offers extra insulation and comfort.

■ MERINO.LUX

MERINO.LUX stands for elegant comfort. Crafted from a premium 220g blend of finest merino wool (16.5µ) and Lycra, it offers a flattering fit. Ideal for fitted silhouettes and elevated baselayers: soft and stretchy with a touch of elegance.

■ BIO BASE

BIO BASE is our most natural take on performance wear. Made from 100% natural fibers, this fabric is breathable, soft, and naturally temperature-regulating. Free from synthetics, it is ideal for conscious layering.

# MERINO WOOL – A MARVEL OF NATURE

Merino sheep, originating from North Africa, are one of the oldest and most resilient breeds globally, renowned for their unique attributes. Well-suited to various climates, they endure both icy cold and intense heat with ease. Their natural fur texture enables them to handle temperature fluctuations of up to 40 degrees – a quality beneficial to humans as well. Merino wool provides a cooling effect in warmer temperatures and warmth on colder days.

Sourced mulesing-free and cruelty-free, the fine merino wool is obtained from living sheep, ensuring ecological sustainability as the sheep’s fur naturally regrows. At super.natural, we prioritize ethical sourcing, obtaining our merino wool from African farms and partnering with the German worsted yarn manufacturer Südwolle. Südwolle, a leader in worsted fabrics, adheres to stringent eco-certifications such as Bluesign and Oeko-Tex standards.

## THE IDEA

Founded in Switzerland in 2012, super.natural aims to harness the advantages of merino wool and synthetic fiber. Our brand ethos, #merinomadebetter, embodies the seamless integration of natural and synthetic fibers, offering maximum comfort and functionality. The blend of merino wool and synthetic fiber eliminates the drawbacks of each, resulting in the perfect fusion of both materials.

## THE PRODUCTS

Our foundational BASE products, comprising 50% merino wool and 50% Polyester, underpin the super.natural brand. However, recognizing the versatility of this unique fiber blend, we have expanded beyond solely sportswear. Our timeless collection caters to everyday wear, providing an irresistible blend of comfort, style, and functionality for any wardrobe.

## COMFY TO WEAR, EASY TO CARE.

Merino wool can absorb up to a third of its own weight in moisture, while polyester speeds up the removal of the moisture from the material. This combination offers you optimal comfort – with no trace of dampness.

The innovative combination of fibers can withstand a regular wash up to 40° C – no need for a separate wool wash. Our merino mix is incredible easy to care for.

The stabilising effect of the synthetic fibers means you can also put super.natural products in the dryer.

The fiber mix combines the natural elasticity of merino wool with the durability of polyester, enabling a uniquely stable shape and impressive longevity.

The tightly-knit connection between the materials creates an extremely soft surface that doesn't itch and offers incredible natural comfort.

The antibacterial effect of the enzyme keratin, which is a natural component of merino wool, prevents unpleasant odors from developing – even after profuse sweating or wearing the product multiple times.

Merino wool regulates temperature: it cools you down in hot temperatures and during increased activity, and warms you up in cold weather or when you take a break.

## STILL HAVE QUESTIONS?

You might find the answer you're looking for here:

### Do merino mix products start to smell more quickly than 100% merino?

Merino mix products can remove existing moisture from the material more quickly than 100% merino wool. To benefit from merino wool's antibacterial effect, you only need a proportion of 30% wool. The rapid moisture transportation of our fiber mix removes bacteria from what would be a fertile breeding ground, meaning unpleasant smells develop much more slowly. You won't have to worry about odors even after sweat-inducing activities or wearing the items multiple times.

### What is mulesing? Is this procedure also a problem with super.natural products?

Mulesing, an unpleasant procedure to prevent flystrike in merino sheep, predominantly occurs in Australia. It involves the removal of strips of skin from around the hind legs and buttocks of the sheep – an incredibly painful process and a very controversial topic in sheep farming. To counteract the issue of mulesing, the wool used in super.natural products comes exclusively from African farms. As the flies are not present in this region, mulesing is not necessary.

### How do I look after super.natural products properly?

super.natural products can simply be put in the washing machine at 40° C, and can even be tumble dried. Unlike 100% merino wool products, they can be cared for just like your usual clothes without the risk of shrinkage or of holes appearing. However, to best protect the odor-blocking enzymes in the merino fibers, it is recommended to use a wool detergent.

### Why don't super.natural products itch?

The quality of wool is measured using its fiber strength. That means that the thinner the fibers, the softer it feels, and the higher the quality. super.natural uses merino wool with a measurement of 17 microns, which puts the wool in the 'fine' quality class. As a comparison, conventional sheep's wool measures at 30-50 microns.
