GRITT TECH

VISCO CLEAN

ViscoClean™

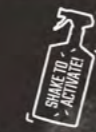

Our unique ViscoClean™ formula has been specially developed to cling perfectly to any surface. Thanks to its advanced consistency, it flows up to 18 times slower than standard cleaners, allowing the liquid gel to work longer and more effectively.

Maximum cleaning power — no product wasted.

CHERRY SCENT

Loaded with cherries — get ready for a sweet, juicy ride!

SHAKE TO ACTIVATE

If you see shake and activate graphic, know that shaking the bottle will unleash the magic inside. Mixing the ingredients enhances their effect, blending natural sediments for maximum performance. Just shake and watch, as the liquid transforms into a liquid gel, like water turning into wine.

BIKESAFE

Every one of our products is safe for all surfaces on your vehicles. We've tested them in the lab, on numerous bikes and motorcycles, and across a wide range of materials. Our athletes have put each formula to the test. Chrome, carbon, anodized metal, plastics, go ahead, try us!

TrueBIO - truly biodegradable.

When we say our product is biodegradable, we truly mean it. Every single ingredient of TrueBIO has been carefully selected to naturally break down in the environment — leaving nothing harmful behind.

PFAS FREE

Products with this label are PFAS free.

NEXT-GEN POLYMERS

Powered by Next-Gen polymers, it leaves a smart protective layer that makes water and dirt slide off easily — keeping your ride cleaner for longer.

CERAMIC

Ceramic technology with Hexagonal Boron Nitride (h-BN), which reduces wear by around 70%, offers high physical stability, reducing friction to a minimum and giving you more watts on every ride, a quieter drivetrain, and longer-lasting smooth performance in all conditions.

PTFE

Teflon technology creates a durable, exceptionally smooth coating that reduces friction between metal components, repels contaminants, and extends chain life.

NO CORROSION

Anti-corrosion additives that protect metal parts from rust and wear, extending the life of your components.

NO ODOR

Neutralizes unwanted smells

GRITT RANGE TECH OVERVIEW

Bottles with MTB oils and wax are equipped with a special tip featuring a dosing head. You no longer need to put the cap aside, look for it, and screw it back on. Simply turn the head to the left to lubricate the chain, and when you're done, turn it to the right to close the valve in the head.

Special safety trigger designed for maximum protection during transport, this trigger system prevents any leakage or accidental spraying. It features a secure thread both on the bottle and the trigger itself.

Transparent safety clip at the base that must be removed before first use — locking the trigger to avoid accidental pressing.

The nozzle comes pre-set to the "OFF" position for additional safety and peace of mind.

Ergonomic bottle design for a natural hand fit.

The bottle is fully transparent, allowing the contents to be clearly visible.

In aerosols where maximum surface coverage is needed, we use standard button nozzles.

Simply press the action button to start, while the protective cap prevents accidental use.

Each nozzle is secured with a safety pin to prevent accidental use. Simply remove it to start spraying.

We use professional-grade nozzles that give you two application options.

Precision and accurate surface coverage, while the folded tube lets you spray wide areas quickly and efficiently.

A SLEEK 400 ML STEEL AEROSOL CAN, DESIGNED IN A SLIM-FIT FORM THAT SITS PERFECTLY IN YOUR HAND AND STANDS OUT ELEGANTLY ON ANY STORE SHELF.

BIKE WASH TRUE BIO SPRAY 1L

MY BIKE SMELLS BETTER THAN YOURS.
