FW 2024

BORN IN OSLO - MADE FOR WEATHER - INSPIRED BY THE WORLD

ZERO DEGREES FOOTWEAR

We are proud of our famous heritage and breath-taking views, and equally proud of the modern urban landscape of our cities. We know the weather better than anyone, as well as the people who live in these cities. It's our mission to equip you in climate appropriate directional urban footwear, that is not just another hiking boot or trail runner. Functionality doesn't need to compromise appearance. Our range is robust enough for your frosty morning ride to the studio, yet stylish enough for post work drinks with friends.

FW 2024

The secret of GORE-TEX technology is its revolutionary membrane. The unique combination of waterproofness and breathability contributes to durable and highly comfortable boots. At ZERO°C shoes we challenge ourselves to implement GORE-TEX in products tailored to an urban, but weather exposed, environment.

FW 2024

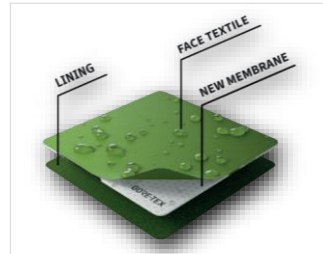

SUSTAINABILITY FEATURES

At Zero Degrees Footwear we're proud of our sustainability commitments and that our products are packed with more responsible materials, helping our customers to tread lightly.

RECYCLED OUTSOLES

Not all soles help reduce waste, but at Zero Degrees Shoes, all our outsoles contain up to 30% recycled rubber waste. Helping to reduce waste. Not all brands can make such sweeping statements, but we take our commitment seriously and try to adopt more environmental changes across our full collection.

GORE-TEX ePE

We are proud to be adopting GORE-TEX's new ePE membrane, a key milestone in its responsible performance journey, this membrane still has high performance, is incredibly durable, but also has a reduced carbon footprint and is PFC Free*

MAXIMISING RECYCLED MATERIALS

Did you know that all our laces, webbings and most of our upper materials contain recycled plastics? We're doing our bit to reduce plastic waste.

SESTRIERE GTX M

If you enjoy being outside wintertime this is your choice

Our SESTRIERE GTX styles is a tribute to, and developed in collaboration with our partner Tom Stiansen, legendary skier and outdoor person. To meet Tom's requirements for an ultimate outdoor winter product, we put focus on using GORE-TEX most insulative laminate to secure a warm and waterproof boot. The upper collar is made in soft textile materials to create comfort during use and still lock around the leg to avoid snow and water coming in. Low weight, but still a boot strong enough for rough outdoor use. A high shaft for Nordic winters with a lot of snow is a must.

PRODUCT FACTS:

- GORE-TEX makes this a waterproof and breathable sneaker
- Upper in engineered mesh with no-sew welding's
- IP EVA midsole is extremely light and comfortable
- Rubber outsole to secure grip
- Removable sock-liner, easy to take out wash and dry
- Sizes: 40 - 47

FASHION MEETS FUNCTION

We are committed to creating a design driven, robust and urban street style, while working hard to eliminate the existing trade-off between functional & fashionable footwear. We take our inspiration from international independent labels, pioneering sports brands, trends & niche collaborations. We only work with the best designers, using premium materials & outstanding manufacturing facilities, which ensures our competitive edge. Our product is different, and no details are overlooked. Our customers appreciate good design, and want to look relevant in Norway and beyond, regardless of the weather conditions.
