INFORMATION >

*PRICES ARE TARGET MSRP

ENVIRONMENTAL IMPACT

At Osprey, we strive to be not only innovators of high-quality products, but responsible citizens who tread lightly as we cherish the world we live, work and play in. More information on our sustainable priorities is listed to the right.

SOURCING RECYCLED MATERIALS

- Diverts material away from landfills and oceans.
- Lowers dependence on petroleum as a source for raw materials and reduces the impacts of exploration, extraction and refining.
- Reduces CO₂ emissions from the manufacturing of plastic resins by at least 60% when compared with virgin counterparts, as indicated by the U.S. EPA.*
- Promotes markets for recycled material and contributes toward building a circular economy.

USING bluesign® APPROVED FABRICS

- Avoids harmful substances that pose a risk to people and the environment at each step of the supply chain.
- Ensures approved chemical products and raw materials are used throughout the value chain.
- Guarantees a high level of consumer safety.
- Promotes responsible use of resources.

APPLYING DURABLE WATER REPELLANT (DWR) TREATMENT MADE WITHOUT PFAS

- Repels water while being a prudent alternative to treatments containing PFAS.
- Helps reduce contribution to the use of persistent per- and polyfluoroalkyl substances (PFAS) that build up in the environment without breaking down.
- From Spring 2022, Osprey has exclusively used DWR treatments made without PFAS on all new, redesigned and carryover products. Osprey products are compliant with the CA PFAS regulation AB-1817 as of 10/10/23.

ALL MIGHTY GUARANTEE™

- Any reason. Any product.™ Any era. Osprey will repair any damage or defect free of charge — whether it was produced in 1974 or yesterday.
- Sources durable, high-spec materials that are carefully selected for their specific use case.
- Sets rigorous standards for pack functionality, durability and repairability with the intention of providing products that can be used and loved for lifetimes.
- Gives repairable packs a second wind, extending their useful life for years to come and ensuring the original resources invested are put to their greatest use.

*U.S. Environmental Protection Agency (2020) Documentation for Greenhouse Gas Emission and Energy Factors Used in the Waste Reduction Model (Exhibit 5-14). Studied resins include HDPE, PP, PET (used to make polyester fabric)

**Excludes Poco Child Carrier and Accessories, Raptor Pro and Soelden/Sopris Pro, which carry a limited five- or seven-year AMG depending on their practical lifespan

bluesign® EXPLAINED

Since becoming bluesign® System Partner in 2021, the bluesign® system has provided us the necessary tools for the promotion, adoption and implementation of safe chemicals usage and responsible practices throughout our supply chain, focused on resources, people and the environment. With its holistic approach based on Input Stream Management, the bluesign® system reduces the impact on people and on the environment, ensures responsible use of resources and guarantees a high level of consumer safety.

bluesign®
APPROVED

Textiles and components carrying the bluesign® approved label meet the strict safety and environmental requirements of the bluesign® criteria. These articles are made from bluesign® approved chemical products and raw materials and are produced in ways to lower the impact on people and the environment.

- High level of consumer safety
- Produced in ways to lower the impact on people and the environment
- Made from approved chemical products and raw material

bluesign®
PRODUCT

Consumer products carrying the bluesign® product label meet the strict safety and environmental requirements of the bluesign® criteria, as a whole. These products are made of bluesign® approved fabric and components and are produced in a resource-conserving way to lower the impact on people and the environment.

- A minimum of 90% bluesign® approved fabrics/ yarns
- A minimum of 20% bluesign® approved components
- Any remaining fabrics, materials or components must come from a qualified supplier
- Manufacturing adheres to selected International Labour Organization standards

OUR PROGRESS, SEASON BY SEASON

Since becoming a bluesign® System Partner, eliminating PFAS-based DWR in 100% of our textile products and increasing our investment in recycled fabrics, we continue to contribute to reduce environmental impacts and produce more sustainable products.

- Percentage of textile products with 100% recycled content in main body fabric.
- Percentage of textile products with bluesign® approved main body fabric.
- Percentage of lined textile products with 100% recycled content in the liner fabric.**
- Percentage of lined textile products with bluesign® approved liner fabrics.**

*Percentages are based on the number of styles in each season
**Liner fabric percentage calculations introduced in S24

Aether | Ariel Family Overview

AETHER | ARIEL PLUS

AETHER | ARIEL

AETHER | ARIEL PRO

Aether | Ariel Plus

More than an all-around backpacking pack, the Aether/Ariel Plus blazes the trail for those in search of a customisable, perfect-fitting pack that's capable of carrying larger and heavier loads. An adjustable Custom Fit-on-the-Fly® Shoulder Strap and Hipbelt allow users to calibrate the perfect fit. With a highly proficient suspension and a selection of larger volume styles, the Aether/Ariel Plus Series offers an impressive carrying ability to support the heaviest of loads. A full-range of features—like a DayLid daypack, Stow-on-the-Go trekking pole attachment and reliable high-tenacity durable nylon fabrics—make life on the trail easier.

Photo | Nathaniel Wilder

Key Attributes

CUSTOM FIT

A Custom Fit-on-the-Fly Hipbelt, Custom Fit-on-the-Fly Shoulder Strap and adjustable torso length allow for a fine-tuned fit for a variety of body shapes and sizes.

AIRSCAPE™ SUSPENSION

An injection-molded, die-cut foam AirScape backpanel creates a breathable, close-to-body fit.

LOAD CAPACITY

Our largest volume packs provide a stable close-to-body carry, ideal for managing heavier loads when the trail gets technical.

DURABLE

Durable for extended use on the most rugged trails.

INCLUDED DAYLID

Remove and quickly convert the top lid to a roomy daypack for side excursions.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Aether | Ariel Plus fabric section and on individual product hangtags at the point of sale.

Features

SHARED

- + Removable top lid converts to DayLid daypack
- + Included raincover
- + Stow-on-the-Go trekking pole attachment
- + Floating top lid with lash points
- + Integrated FlapJacket cover for lidless use
- + Dual front panel zippered pockets for easy-access storage
- + Large front panel zip access to main compartment
- + Fabric reinforced front shove-it pocket
- + Large dual-access stretch mesh side water bottle pockets
- + Dual upper/lower side compression straps
- + Dual front panel compression straps with StraightJacket compression
- + Dual zippered hipbelt pockets
- + Dual ice axe loops with bungee tie-offs
- + Zippered sleeping bag compartment with removable divider
- + Removable sleeping pad straps
- + Internal hydration reservoir sleeve

Carry

LIGHTWIRE SUSPENSION

- + 3.5 mm (4.0 mm on Aether/Ariel Plus 85L, 100L) LightWire peripheral frame effectively transfers load to hipbelt

AIRSCAPE BACKPANEL

- + Injection-molded, die-cut foam AirScape framesheet maintains comfortable back contact with ventilated airflow channels and maximum stability for carrying heavy loads
- + Mesh-covered foam lumbar for supportive, lightweight and comfortable contact surfaces

HARNESS

- + Easily adjustable harness system for various torso lengths
- + Custom Fit-on-the-Fly Shoulder Straps included

CUSTOM FIT-ON-THE-FLY SHOULDER STRAP

- + Custom Fit-on-the-Fly Shoulder Straps allow for a precise shoulder wrap and fit
- + Spacer mesh fabric provides a soft and comfortable contact surface

CUSTOM FIT-ON-THE-FLY HIPBELT

- + Extendable Custom Fit-on-the-Fly Hipbelt offers a precise fit for varying waist sizes
- + Incremental length and angle adjustments allow for a fine-tuned fit
- + Crossbody ErgoPull hipbelt pulls weight into lumbar when hipbelt is tightened

ENHANCED LOAD TRANSFER

- + The Custom Fit-on-the-Fly Hipbelt integrates the LightWire frame into the adjustment system—creating a better distribution of weight and, in turn, a better carry.

Aether | Ariel Pro

WOMEN'S-
SPECIFIC
FIT

Going light is relative. Wilderness climbing objectives, winter camping, extended backpacking in remote places—the simple truth is these trips require us to carry some of our heaviest loads. For the experienced backpacker, guide, mountaineer or adventurer, there's no better tool for the job than the Aether/Ariel Pro, featuring our most advanced fabrics, streamlined features and the comfort and durability demanded by expert outdoor professionals and enthusiasts everywhere.

PHOTO: MATTHEW TANGEMAN

Key Attributes

MAXIMUM CARRY, MINIMAL WEIGHT

Combines our most capable load-bearing suspension with a versatile, simplified, strippable bag design that reduces pack weight to a minimum. Carry the lightest pack possible, without compromising on comfort, custom fit and heavy-weight capability.

UP-SPEC SUSPENSION

Benefit from our most heavy-duty, fully customisable backpacking suspension system in a more lightweight, streamlined package. custom fit and heavy-weight capability.

PRO-WORTHY DURABILITY

Constructed with our technical NanoFly™ fabric, which is reinforced with a triple-grid UHMWPE ripstop for outstanding strength and durability for the those who are roughest on their gear.

CUSTOMISABLE CARRY

Versatile bag design features strippable components, including the toplid, hipbelt pockets and side compression straps, so you can tune your pack depending on what your adventure requires.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Aether | Ariel Pro fabric section and on individual product hangtags at the point of sale.

Atmos | Aura AG

We continue to perfect our best-selling pack series, the Atmos/Aura AG Series. Providing outstanding ventilation and fit for modern backpacking trips up to a week or more in duration and featuring AntiGravity technology—a continuous backpanel of lightweight mesh—that wraps the user in supreme comfort.

Photo | Dan Holz

Key Attributes

FINE-TUNED FIT

Fit-on-the-Fly harness and hipbelt offer improved comfort and a precise fit for a range of sizes.

INTEGRATED RAINCOVER

Keeps pack and gear dry in inclement weather.

ENHANCED ORGANISATION

Large, curved side zip access into main compartment on both sides.

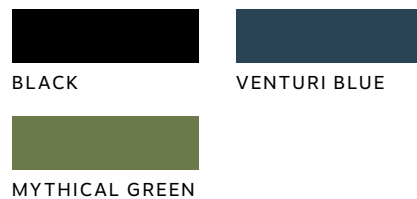

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Features

SHARED FEATURES

- + Included raincover made with bluesign® approved fabrics and treated with DWR made without PFAS
- + Curved zip access on each side panel
- + Floating top lid with lash points
- + Fabric reinforced front shove-it pocket
- + Tall dual-access side water bottle pockets
- + Dual upper/lower side compression straps
- + Dual zippered hipbelt pockets
- + Dual ice axe loops with upper compression strap capture
- + Zippered sleeping bag compartment with removable divider
- + Removable sleeping pad straps
- + Internal hydration reservoir sleeve with centre back exit port
- + Stow-on-the Go trekking pole attachment system

ATMOS | AURA AG 65

- + Two zippered front pockets provide additional organisation options

Carry

ANTIGRAVITY SUSPENSION

- + 4 mm powder coated full peripheral frame
- + Easy to access and operate cam-lock torso adjustment system
- + Frame sizing allows for two size per gender fit

ANTIGRAVITY BACKPANEL

- + Two-tone spacer mesh adds strength
- + Silicone print in lumbar zone adds grip for load transfer and comfort

ANTIGRAVITY HARNESS

- + Fit-on-the-Fly harness expands the fit range
- + Die-cut foam lower and mesh ExoForm wrap upper

HIPBELT

- + Revolutionary AG system seamlessly extends the tensioned backpanel into the hipbelt
- + Hipbelt overlay is integrated into the frame to ensure consistent load transfer
- + Extendable Custom Fit-on-the-Fly Hipbelt offers a precise fit for varying waist sizes
- + Incremental length and angle adjustments allow for a fine-tuned fit
- + Crossbody ErgoPull design pulls weight into lumbar when hipbelt is tightened

Atmos | Aura AG LT

Less is more with the Atmos | Aura AG LT, which delivers our body-hugging AntiGravity suspension in a streamlined silhouette for technical backpackers. Lighter than its original counterpart, this pack delivers a thoughtfully simple feature-set while AntiGravity suspension—a continuous backpanel of lightweight mesh—keeps comfort at the forefront of the experience.

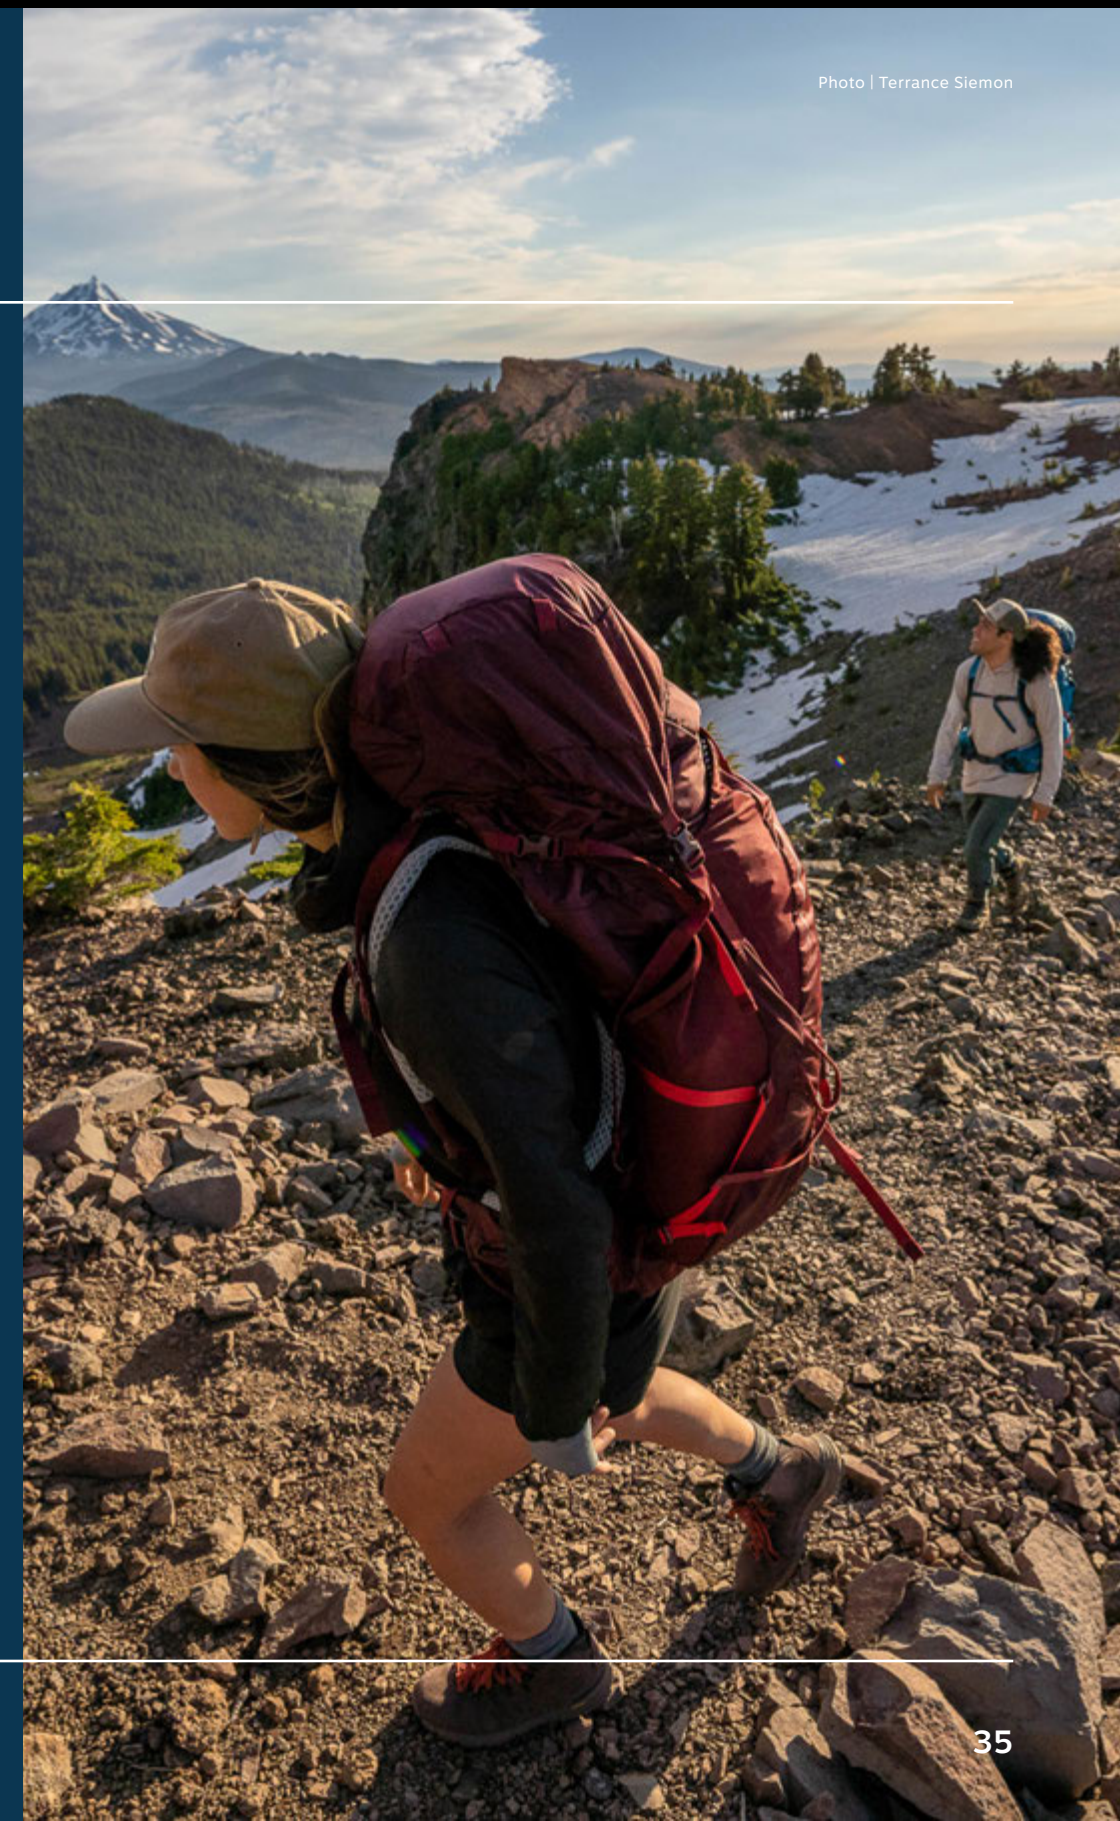

Photo | Terrance Siemon

Key Attributes

ANTIGRAVITY SUSPENSION

Seamless suspended mesh disperses and balances the load while a Fit-on-the-Fly hipbelt delivers a precise fit for a range of sizes.

LIGHTWEIGHT DESIGN

Essential features and full comfort in a streamlined and straightforward design.

INTEGRATED RAINCOVER

Keeps your pack and gear dry in inclement weather.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Exos | Eja Pro

Our ultralight thru-hiking backpack shaves almost one pound from the weight of our successful Exos/Eja Series and featuring a more fine-tuned adjustment system—the Exos/Eja Pro is the best thru-hiking pack we've built that's intended for lighter loads. Offering category leading comfort, advanced strippability and highly ventilated AirSpeed suspension in one volume with a removable lid for all thru-hikers.

Photo | Dan Holz

Key Attributes

AIRPEED™ SUSPENSION

A tensioned mesh backpanel keeps the weight off your back, enabling highly ventilated carrying comfort.

VOLUME FLEXIBILITY

Compression straps and removable lid allow for functional capacity adjustment.

ULTRALIGHTWEIGHT DESIGN

Lightweight fabrics deliver durable performance.

REMOVABLE LID

Pack sheds 74 g / 2.6 oz. when lid is removed. FlapJacket secures the main compartment access providing weather protection when lid isn't used.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Features

SHARED

- + Removable, floating single compartment top lid with key clip
- + Four webbing lash points on top lid
- + FlapJacket secures main compartment access and provides weather protection when lid isn't used. Removing top lid reduces carry capacity by 9 L and weight by 74 g
- + Internal hydration sleeve with centre back hose port and Osprey Hydraclip for easier reservoir hanging
- + Internal compression strap keeps loads stable
- + Large front fabric compression pocket with stretch side panels accommodates overloads
- + Multiple front panel lash points for securing extra gear
- + Lower side compression straps designed to capture sleeping pad on front panel
- + Deep, dual access stretch mesh side pockets
- + Dual ice axe loops with handle capture by upper compression straps

Carry

ULTRALIGHT AIRSPEED SUSPENSION

- + Ultralight AirSpeed Suspension
- + Lightweight injection-molded ladder provides 4" of torso adjustability
- + Two-sizes-per-gender design ensures perfect fit and allows for quick, easy adjustment
- + 3.5 mm powder-coated LightWire frame balances support and dynamic flex

BACKPANEL

- + 3D-tensioned breathable mesh backpanel ensures supportive fit
- + Silicone print on lumbar fabric enhances hipbelt grip

EXOFORM HARNESS

- + Shoulder straps combine reverse spacer mesh, die cut EVA foam and a unique structured 3D mesh to deliver excellent support and ventilation
- + Ventilated mesh yoke evenly distributes load for comfort while maintaining breathability
- + 15 mm adjustable slide sternum strap with rescue whistle

EXOFORM HIPBELT

- + EVA foam padded hipbelt offers dynamic stretch for a secure, dynamic fit
- + Zippered pocket provides secure storage
- + Open pocket provides quick access to stow snacks, wrappers, etc.

Kestrel | Kyte

Designed and built as durable workhorses, the Kestrel and Kyte are true rucksacks that eagerly carry gear off the beaten path into rugged, unpredictable backcountry terrain. With a close-to-body technical fit and a dependability you can trust days on end, these packs can handle scraping through sandstone canyons or scrambling over snow-covered peaks. The Kestrel and Kyte proudly wear their stains with age—these packs are made to last.

Photo | Terrance Siemon

Key Attributes

DURABILITY

Built to withstand every outdoor environment, from sandstone canyons to alder-filled alpine bushwhacks.

MADE FOR WORK

Made for big days with an integrated raincover, trekking pole attachment and easy-access organisation.

RAINCOVER INCLUDED

Because rain or shine, there is no excuse to not hit the trail.

AIRSCAPE BACKPANEL

An injection-molded AirScape backpanel offers adjustable torso lengths and provides a stable and breathable close-to-body carry even when the trail gets technical.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Rook | Renn™

WOMEN'S-
SPECIFIC
FIT

With a straightforward design and capable feature set, the Rook/Renn Series provides an exceptional opportunity for backpackers to experience the benefits of carrying an Osprey pack. Its AirSpeed suspension and harness provides exceptional ventilation and makes it easier than ever to dial in fit, and the integrated raincover has your back when showers loom overhead. The Rook/Renn Series provides quality carry, ventilation and the right features that backpackers will never second guess no matter their experience level.

PHOTO: MARK MCINNIS

Key Attributes

ADJUSTABLE AIRSPEED™ SUSPENSION

Tensioned backpanel can be easily adjusted to fit a wide range of torso lengths while providing ventilation to reduce sweating. The LightWire™ frame transfers loads to the hipbelt, taking the pressure off the user's shoulders and delivers a stable, comfortable carry.

LIGHTWEIGHT AND SIMPLE

Lightweight design with quality materials delivers a straightforward solution that can handle itself well on any trail.

INTEGRATED RAINCOVER

Hope for bluebird weather but know you're covered with our integrated and removable raincover that stows in its own pocket when the sun returns.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

TALON EARTH

Talon™ Earth

SPECIAL
EDITION

With Talon Earth, we've pushed our benchmark for sustainable pack design* without compromising the performance Talon is known for, making it our most sustainable technical and everyday daypack to date. A lightweight, ventilated and close-to-body fit moves with you on the most technical terrain due to a BioStretch harness, continuous-wrap hipbelt and AirScape™ backpanel, while urban touches, like its large padded laptop sleeve, help it blend in from trail to town.

*See the next page for details.

PHOTO: DAN HOLZ

TALON EARTH

PHOTO: HÁ NGUYEN

① bluesign® approved, 100% recycled nylon main body and bottom fabric

② Injection-molded AirScape™ framesheet is 100% recycled plastic

③ 35% of plastic hardware is comprised of bio-based POM plastic, made from captured agricultural methane

④ Mesh fabric made from a minimum of 75% recycled content

⑤ YKK Nautilon® zippers made from 50% recycled plastic

⑥ All DWR treatments made without PFAS

⑦ 100% recycled webbing

PHOTO: CHRISTIAN PALMER

Key Attributes

bluesign® PRODUCT

Beyond the fabric, Talon Earth earns more rigorous bluesign® product designation, exceeding their criteria* with a minimum of 90% bluesign® approved fabrics/yarns, a minimum of 20% bluesign® approved accessories and all remaining fabrics, materials or components being sourced from qualified suppliers.

REDUCING OCEAN WASTE

Main body and bottom fabrics are woven from 100% recycled, post-consumer nylon, made primarily from discarded fishing nets to reduce ocean plastics.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Talon Earth fabric section and on individual product hangtags at the point of sale.

TECHNICAL & FAST

Designed to be lightweight with a robust feature set for multi-sport use, this advanced pack is fine-tuned for fast movement in demanding environments.

DYNAMIC AIRSCAPE SUSPENSION

The AirScape backpanel combines an injection-molded framesheet for structure with die-cut foam for comfort and airflow, creating a breathable, close-to-body fit. The BioStretch harness and hipbelt, with a continuous lumbar-to-hipbelt wrap, keeps the pack secure while allowing for dynamic movement on even the most technical terrain.

- + Laptop/reservoir sleeve fits most devices up to 16" or 2.5 L reservoir (never at the same time)
- + Easy-access, expandable stretch mesh harness pocket
- + Dual-zippered fabric hipbelt pockets
- + Blinker light attachment

Carry

AIRSCAPE™ BACKPANEL

- + AirScape backpanel with die-cut foam provides a close-to-body stable fit while offering flexibility and ventilated airflow channels for active use
- + Mesh-covered foam lumbar for lightweight and comfortable contact surfaces

BIOSTRETCH HARNESS

- + Integrated BioStretch seams offer maximum flexibility without sacrificing stability for dynamic body movement
- + Spacermesh over die-cut foam provides breathable, comfortable contact surface
- + Harness system easily adjusts to fit various torso lengths
- + Adjustable sternum strap with safety whistle buckle

BIOSTRETCH HIPBELT

- + Seamless lumbar-to-hipbelt body wrap and BioStretch seams offer maximum flexibility without sacrificing stability for dynamic body movement
- + Spacermesh over die-cut foam provides breathable, comfortable contact surface
Crossbody ErgoPull hipbelt system to pull lumbar into body

WOMEN'S-SPECIFIC FIT

Velocity. It's right there in the name. Carrying the same light-and-fast multi-sport versatility that the Talon/Tempest name promises, this pack ups the ante on speed and efficiency for your pursuits, be it PR-setting, bagging peaks or linking quick laps on your splitboard or skis. With its running-vest inspired harness, flexible backpanel and lightweight design, it provides access to your most critical essentials without skipping a beat or weighing you down.

Key Attributes

UP YOUR TEMPO

Uniquely pairs the award-winning, multi-sport features of Talon/Tempest with a soft-flask compatible, running-vest inspired harness, providing elevated efficiency and versatility for fast movement across any landscape.

CATEGORY-LEADING FIT & COMFORT

Our revolutionary design allows for up to four inches of torso adjustment, guaranteeing that fit and function are uncompromised by the hybrid pack design. Tune it for your body and let the vest-style harness, pockets and hipbelt support you where they belong.

VERSATILE DESIGN

Dynamic fit and thoughtful features provide the Talon/Tempest Velocity with versatile multi-sport performance for fast-paced action, whether you're on foot, bike or skis. More flexible than other Talon/Tempest packs, the Velocity backpanel is designed to prioritize freedom of movement, no matter how you approach your objective.

RUNNING-VEST-INSPIRED HARNESS
Compatible with soft flasks

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

WOMEN'S-
SPECIFIC
FIT

Perfected even further, Talon/Tempest Pro has only gotten more capable with every iteration. A true quiver killer, with three available volumes that scale with the scope of your pursuits, it thrives in whatever situation and environment you throw it into. Built with uncompromised durability, lightweight form and robust function, it's the kind of pack experienced outdoorspeople will reach for, whether they're hauling gear into the alpine, cragging with a full rack of gear or tackling self-supported bikepacking trips—and reaching for the same pack for each adventure. If you're looking for a technical pack you'll never outgrow, reach for the Talon/Tempest Pro.

PHOTO: DAN HOLZ

Key Attributes

PRO-WORTHY DURABILITY

Constructed with our technical NanoFly™ fabric, which is reinforced with a triple-grid UHMWPE ripstop for outstanding strength, and extra-tough stretch pockets, this pack elevates our understanding of durability.

QUIVER-KILLING VERSATILITY

Talon/Tempest Pro are designed to be lightweight, fast moving and thoroughly featured to effectively adapt to the multi-sport demands of on-the-go adventurers and athletes.

CATEGORY-LEADING FRAMESHEET & TORSO ADJUSTMENT

Our innovative new torso adjustment and premium injection-molded framesheet provides just-right structure to the pack and allows for a more comprehensive fit across the full spectrum of torso range.

Features

TALON/TEMPEST PRO 40

- + Top-loading design with drawcord closure
- + Floating lid can be extended to accommodate overloads
- + Lid is removable with FlapJacket feature to secure pack when lidless
- + Internal compression strap effectively controls upper load
- + Internal hydration reservoir sleeve with centre pass through port
- + Large stretch-woven front panel pocket
- + Tuck-away ice axe attachments with bungee tie-off
- + Dual upper quick release side compression straps
- + Dual V-pull lower side compression straps
- + Stretch woven side pockets
- + Dual-zippered fabric hipbelt pockets
- + Removable accessory pad straps on lower front panel

TALON/TEMPEST PRO 30

- + Wide-mouth, bucket-style main compartment zip opening
- + PU laminated YKK RC external zippers provide extra weatherproofing
- + External top-panel zippered slash pocket
- + Internal zippered mesh pocket with key clip
- + Internal hydration reservoir sleeve with centre pass through port
- + Low-profile LidLock adapts to carry a range of helmets
- + Large stretch-woven front panel pocket
- + Tuck-away ice axe attachments with bungee tie-off
- + Dual, upper quick-release side compression straps
- + Dual V-pull lower side compression straps
- + Stretch-woven side pockets
- + Dual, zippered fabric hipbelt pockets
- + Blinker light attachment

TALON/TEMPEST PRO 20

- + Convenient panel access to main compartment
- + PU laminated YKK RC external zippers provide extra weatherproofing
- + External top-panel zippered slash pocket
- + Internal zippered mesh pocket with key clip
- + Internal hydration reservoir sleeve with centre pass through port
- + Low-profile LidLock adapts to carry a range of helmets
- + Large stretch-woven front panel pocket
- + Tuck-away ice axe attachments with bungee tie-off
- + Dual V-pull side compression straps
- + Stretch woven side pockets
- + Dual, zippered fabric hipbelt pockets
- + Blinker light attachment

Carry

LIGHTWIRE SUSPENSION

- + 4mm LightWire peripheral frame effectively transfers load to hipbelt (Talon/Tempest Pro 30 and 40 only)

AIRSCAPE BACKPANEL

- + Injection-molded AirScape framesheet with die-cut foam provides a supportive, close-to-body fit while offering flexibility and ventilated airflow channels for active use
- + Mesh-covered foam lumbar for lightweight and comfortable contact surfaces
- + Sliding yoke torso length system ensures precise, stable fit for all users and is easily adjusted with two webbing straps

BIOSTRETCH HARNESS

- + Integrated BioStretch seams offer maximum flexibility without sacrificing stability for dynamic body movement
- + Spacermesh is wrapped over die-cut foam to provide a breathable, comfortable contact surface
- + Adjustable sternum strap with safety whistle buckle

BIOSTRETCH HIPBELT

- + Seamless lumbar-to-hipbelt body wrap and BioStretch seams offer maximum flexibility without sacrificing stability for dynamic body movement
- + Spacermesh wrapped over die-cut foam to provide a breathable, comfortable contact surface
- + Crossbody ErgoPull hipbelt system pulls the lumbar into the body for stability

Talon | Tempest

WOMEN'S-
SPECIFIC
FIT

One of the most versatile technical pack series ever created, the Talon/Tempest is designed for dynamic body movement, whether you're bagging peaks or bikepacking. A lightweight, ventilated and close-to-body fit moves with you on the most technical terrain due to a BioStretch harness, continuous-wrap hipbelt and an injection-molded, die-cut foam AirScape™ backpanel. The Talon/Tempest Series ranges from lumbar packs to ultralight backpacks with each style offering not only optimal stability, but sustainable recycled fabric and appropriate features—all in a lightweight package to support big and small adventures alike.

PHOTO: DAN HOLZ

Key Attributes

DYNAMIC AIRSCAPE™ SUSPENSION

The AirScape backpanel combines an injection-molded framesheet for structure with die-cut foam for comfort and airflow, creating a breathable, close-to-body fit. The BioStretch harness and hipbelt, with a continuous lumbar-to-hipbelt wrap, keeps the pack secure while allowing for dynamic movement on even the most technical terrain.

TECHNICAL & FAST

Designed to be lightweight with a robust feature set for multi-sport use, this advanced pack is fine-tuned for fast movement in demanding environments.

STABLE FIT & CARRY

With its close-to-body fit, gender-specific sizing and adjustable torso lengths, Talon/Tempest prioritizes superior fit for efficient and, ultimately, safer movement on the trails.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Stratos | Sirrus™

WOMEN'S-
SPECIFIC
FIT

The Stratos/Sirrus Series is a full featured hiking pack made with durable, high tenacity nylon that offers outstanding performance in a rugged, traditional design. A molded ladder torso adjustment system dials in comfort and a tensioned mesh AirSpeed backpanel offers premium breathability.

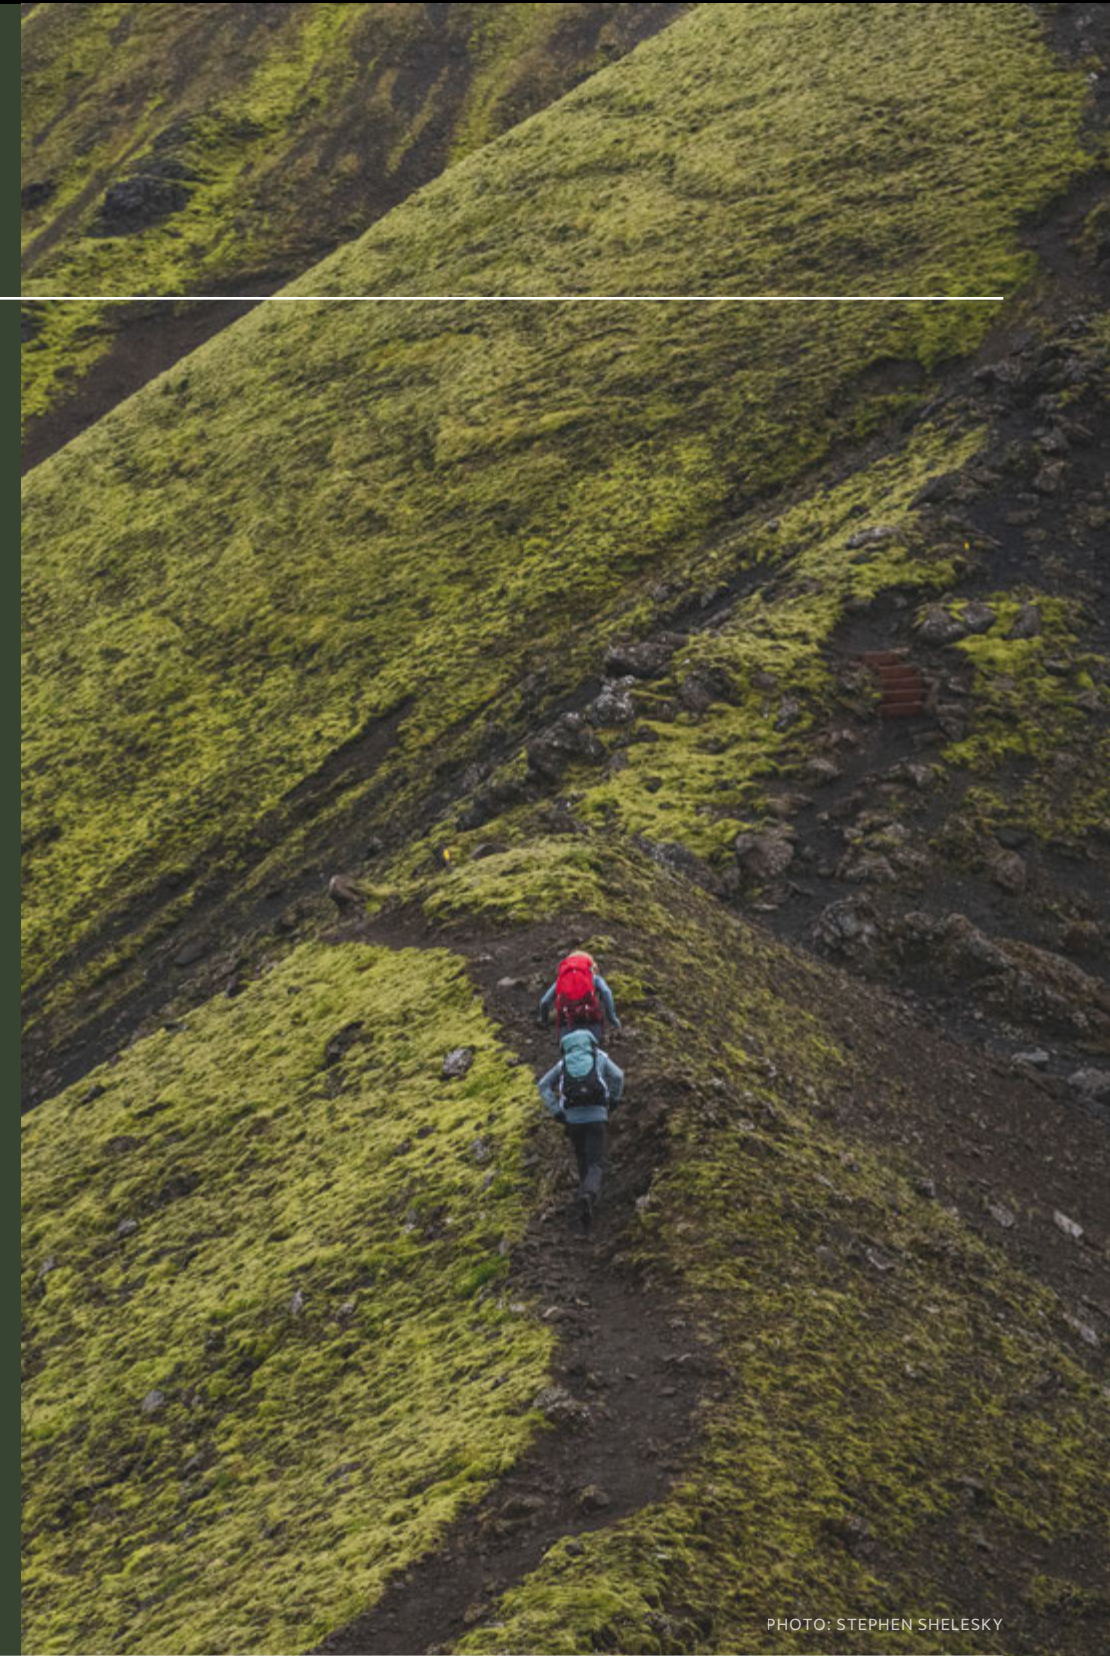

PHOTO: STEPHEN SHELESKY

Key Attributes

AIRSPEED™ VENTILATION

Adjustable injection-molded suspension system with 3D-tensioned mesh provides breathable support and great fit and carry.

COMPREHENSIVE FIT

Taller, wider frame geometry combines with molded ladder torso adjustment system to extend fit range.

INCLUDED RAINCOVER

Keeps pack and gear dry in inclement weather.

MINIMALISTIC DESIGN

Clean, uncluttered designs are easy to use and understand.

HIGHLY BREATHABLE SUSPENSION

A tensioned-mesh AirSpeed™ backpanel keeps the weight off your back, enabling highly ventilated carrying comfort.

RAINCOVER INCLUDED

Stored in zippered pocket at base of pack made from bluesign® approved materials, DWR treatment made without PFAS.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Features

SHARED

- + Included raincover made with bluesign® approved fabric and treated with DWR made without PFAS, stored in zippered pocket at base of pack
- + Extra-tall stretch mesh side pockets keep contents secure
- + External access zip pocket with key clip keeps small, essential items handy
- + Dual upper side compression straps with trekking pole capture
- + Dual trekking pole loops
- + Internal reservoir sleeve with hose port in backpanel and Osprey Hydraclip for easily hanging a reservoir
- + Adjustable sternum strap with rescue whistle

HIKELITE 32

- + Bucket-style, zip-top main compartment opening
- + Padded hipbelt with one zippered pocket and one stretch mesh open pocket
- + Front fabric shove-it pocket with stretch panels to help manage overloads
- + Lower compression straps for additional load control

HIKELITE 28

- + Traditional panel loader design with convenient zip access to main compartment
- + Padded hipbelt with one zippered pocket and one stretch mesh open pocket
- + Front fabric shove-it pocket with stretch panels to help manage overloads
- + Lower compression straps for additional load control

HIKELITE 26

- + Traditional panel loader design with convenient zip access to main compartment
- + Front fabric shove-it pocket
- + Dual lower compression straps for additional load control
- + Removable webbing hipbelt

HIKELITE 18

- + Traditional panel loader design with convenient zip access to main compartment
- + Removable webbing hipbelt

Carry

AIRSPED SUSPENSION

- + LightWire alloy frame creates low profile air space optimizing pack balance and ventilation

BACKPANEL

- + 3D-tensioned breathable mesh backpanel ensures supportive fit and excellent ventilation

HARNESS

- + Fixed BioStretch harness uses elastic binding to deliver maximum flexibility without sacrificing stability for dynamic body movement
- + Spacer mesh over die-cut foam provides breathable, comfortable contact surface
- + Adjustable sternum strap with rescue whistle

HIPBELT

- + Removable 25 mm web belt provides extra stability (18 L and 26 L)
- + Padded hipbelt with die-cut foam for added comfort and load support (28 L and 32 L)

- + 18 L and 26 L offer a single unisex size
- + 28 L and 32 L are available in two unisex sizes: S/M fits 15-19" torso, M/L fits 18-22" torso

Fabric

- MAIN BODY FABRIC bluesign® approved 100% recycled 100D high-tenacity nylon, DWR treatment made without PFAS
- BOTTOM FABRIC bluesign® approved 100% recycled 420D nylon, DWR treatment made without PFAS
- MAIN LINER FABRIC bluesign® approved 100% recycled 70D nylon, DWR treatment made without PFAS

Snow Category Overview

SOELDEN | SOPRIS PRO

BACKCOUNTRY SKIING/SNOWBOARDING
LIGHTWEIGHT TOURING

Avalanche airbag packs designed for highly experienced backcountry skiers/boarders in avalanche territory.

SOELDEN | SOPRIS

BACKCOUNTRY SKIING/SNOWBOARDING
LIGHTWEIGHT TOURING

Backcountry ski packs for lightweight touring and fast-and-light snow days for experienced skiers and splitboarders.

FIRN **NEW**

SKI MOUNTAINEERING

Flexible, vest-style fit packs for super light ski mountaineering missions that involve quickly transitioning between skinning, scrambling and descending.

KAMBER | KRESTA

BACKCOUNTRY SKIING/SNOWBOARDING

Small to mid-sized ski packs capable of handling a full load in or out of bounds.

GLADE

WINTER HYDRATION

Slim hydration packs for winter sports enthusiasts who ski, snowboard, fat bike, cross-country ski or snowshoe.

Soelden | Sopris Pro

AVALANCHE AIRBAG PACK

The Soelden/Sopris Pro Avalanche Airbag Pack is a technical backcountry pack equipped with an Alpride E2 electronic avalanche airbag system. It offers a best-in-class fit and function in a durable, lightweight package. High-performance gear can be mission critical for backcountry touring and the Alpride E2 supercapacitor technology outperforms in weight, ease of use and is non-hazardous travel-ready.

Photo | Oskar Enander

Soelden | Sopris Pro

CONSUMER PROFILE

- + Highly experienced backcountry skiers/boarders in avalanche territory
- + Places high value on personal safety and wants the best tech from a trusted brand
- + Seeking solitude or exercise by heli, cat or a relentless grind up a skin track

Key Attributes

UPDATED ALPRIDE E2 AIRBAG SYSTEM INCLUDED

A reliable, lightweight easy-to-use airbag system—with new LCD display and automatic pressure relief valve—that is fast to recharge and travel-ready.

- + E2 compressor is 40% smaller than E1
- + E2 kit airbag is 4.9 oz. lighter than E1
- + E2 airbag balloon is 12 litres larger than E1

BUILT FOR BACKCOUNTRY

Designed with lightweight features for long ascents and stable fit for dynamic movement on the descent.

SNOW-SPECIFIC FEATURES

Equipped with the necessary snow-specific feature set and intuitive access to safety avalanche gear.

STABLE FIT & CARRY

Gender-specific sizing and superior fit for efficient and ultimately safer movement in the mountains.

NANOFly FABRIC

Our NanoFly fabric integrates ultra-high-molecular-weight polyethylene (UHMWPE), creating an incredibly light fabric with remarkable abrasion resistance.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Soelden | Sopris Pro fabric section and on individual product hangtags at the point of sale.

WOMEN'S-SPECIFIC FIT

Soelden/Sopris Pro Alpride E2 Airbag System

TRAVELS EASY

Supercapacitor technology is non-hazardous for flight and lighter weight than Li-Ion

CHARGED FOR ALL SEASON

IMPROVED AA batteries compartment. Two AA batteries can charge the unit in 40 minutes or keep it charged for three months.

FAST RECHARGING

IMPROVED faster charging USB -C vs micro-USB on E1. Recharge with USB for multiple inflation tests at zero cost.

LIGHTEST AIRBAG FAN SYSTEM

At 2.513 lbs. / 1.14 kg. it is the lightest electrical system on the market

RELIABLE AND EASY TO USE

- + NEW deflation knob with external access
- + Auto-test LED indicators show constant monitoring of system for total safety
- + Adjustable activation handle for varying torso heights
- + TÜV-certified (certifies the strength and effectiveness of the full system)

KEY FEATURES

- LCD Display - shows charge/energy levels of Super Capacitors and AA batteries
- Automatic Pressure Relief Valve - relieves airbag pressure three minutes after inflation

Firn

NEW

Built for steep and fast ascents, late-season slush-tracks and pre-work up-and-downs, the Firn is the ideal companion for the skimo athlete who quickly transitions between skinning, scrambling and descending. With a flexible, snowshedding backpanel that moves rapidly with the body and a flexible, vest-style fit that remains stable enough to support touring skis and a full touring load, this lightweight yet durable pack was made for more than pristine backcountry slopes.

CONSUMER PROFILE:

- Fitness-minded and experienced, intrepid winter athlete
- Tours, skis and climbs socially
- Values quality, lightweight equipment and makes educated purchases

PHOTO: LAIM DORAN

Key Attributes

VEST-STYLE FIT

A close-to-body harness with organisational pockets for food, soft flask, a headlamp or tech.

SKI LASSO CARRY SYSTEM

An ambidextrous, easy to use system for stowing skis on the pack without taking the pack off. Can be removed or tucked away when not in use.

ALPINE-SPECIFIC FEATURES

Flexible yet stable snowshedding backpanel, one-handed direct-access crampon pocket, space for avy equipment and lightweight, durable carbonate-coated fabric.

HIGHLIGHTS

- Brand-new series
- Ultra-stable, close-to-body carry with snowshedding backpanel
- Vest-style fit with accessible and organised pockets
- Innovative ambidextrous ski lasso carrying system
- Direct-access crampon pocket
- Avalanche equipment pocket
- Durable, lightweight carbonate-coated fabric

Glade

Glade is the hydration pack for winter sports enthusiasts. Available in two volumes, the slim profile provides safe lift riding and stable carry whether skiing, snowboarding, fat biking, cross-country skiing or snowshoeing. Ensuring hydration remains a top priority, these packs are equipped with a 2.5-litre reservoir and insulated hose to keep water flowing in cold conditions.

PHOTO: JASON HUMMEL

Key Attributes

RESERVOIR INCLUDED

2.5 L reservoir, insulated reservoir hose and bite valve cover included.

BUILT FOR CONSISTENT USE

Constructed with durable high tenacity nylon to withstand regular use.

DYNAMIC MOVEMENT

Stable fit for active use, whether snowboarding, cross-country skiing, fat biking or snowshoeing.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Glade fabric section and on individual product hangtags at the point of sale.

Zealot

It's not about how hard you climb, but how smart you climb. Built with durable, bluesign® approved recycled ballistic nylon and high tenacity nylon ripstop, the Zealot thrives at the gym, on the road or at the crag. An molded-EVA backpanel maximizes comfort on long approaches while intentional organisation tames belay gloves, maps, shoes and snacks so you find them when you need them and leave with everything that came with you. With two volumes and accessories to support all needs, the Zealot eases the journey and helps you stay focused on the climb.

CLIMB

Zealot

**CONSUMER PROFILE**

- + Comfort, carry and organisation are essential
- + Climbers who appreciate well thought out access to the gear they need on a regular basis
- + Values highly durable gear that'll serve them year after year

Key Attributes

ACCESS/ORGANISATION

Intentional climbing-specific organisation to keep gear in its place from route to route.

LOAD CARRY

Molded-EVA backpanel with HDPE framesheet carries heavy, bulky gear comfortably while maintaining stability.

DURABILITY

Ballistic and high tenacity nylon ripstop will survive and thrive years of getting dropped down and dragged across grit, rocks and roots.

INCLUDED ROPE TARP

with end tie off loops Doubles as a crag-deck to keep items organised, dust free, and protected while you're on route.

*45L only

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Features

ZEALOT 45

- + Top load, cinch closure and access to the main compartment
- + Duffel-like front panel main compartment access, with zip mesh pocket organisation
- + Internal side panel zip pocket
- + Side panel zip pocket with key fob
- + Stowaway cinch flap cover and rope carry flap
- + Front panel zip pocket for guide book, maps, etc.
- + Durable, protective, compressible foam sidewalls with compression straps
- + Tote-like grab handles near duffel opening for quick and secure shuttling to the next, nearby route
- + Front panel upper attachment loops for belay gloves, GPS/tracker units, water bottle attachment or other small things on the approach or at the crag
- + Included: rope tarp with rope end tie off loops; this also doubles as a “crag deck” to organise gear, dust off your feet as you change your shoes, leave your hat and sunglasses while on route, make a sandwich, etc.

ZEALOT 30

- + Roll top closure with vertical zip to expand access and visibility into the main compartment; with adjustable webbing and aluminum hook
- + Large front panel zip compartment to keep gear/ gym specific items separate from the everyday compartment – so your chalk and stinky shoes don't mingle with your laptop or snacks
- + Dual front panel pockets; one with a zipper closure, one open/drop-in
- + Internal multi-function pocket for laptop or reservoir (never both)
- + Internal org pockets with key fob
- + Loop for blinky light attachment (light not included)

ZEALOT CHALK BAG

- + Secure cinch closure
- + Soft internal fleece-y liner
- + Adjustable web belt
- + Zip pocket

Carry

BACKPANEL

- + 30L & 45L: molded-EVA backpanel with HDPE framesheet
- + LightWire peripheral frame adds stiffness to support heavier loads without collapse

HIPBELT

- + 30L: Removable web belt
- + 45L: EVA foam with a zip hipbelt pocket

HARNESS

- + 30L & 45L: EVA foam and spacer mesh with adjustable and removable sternum strap

Duro™ | Dyna

Born and raised among the tallest peaks of the Colorado Rockies, the Duro | Dyna Family has grown to support runners all over the world in various disciplines and terrain. Whether you're looking for a podium, fastest known time or beautiful activity as the sun rises, Osprey keeps you comfortable, in rhythm and hydrated no matter the distance.

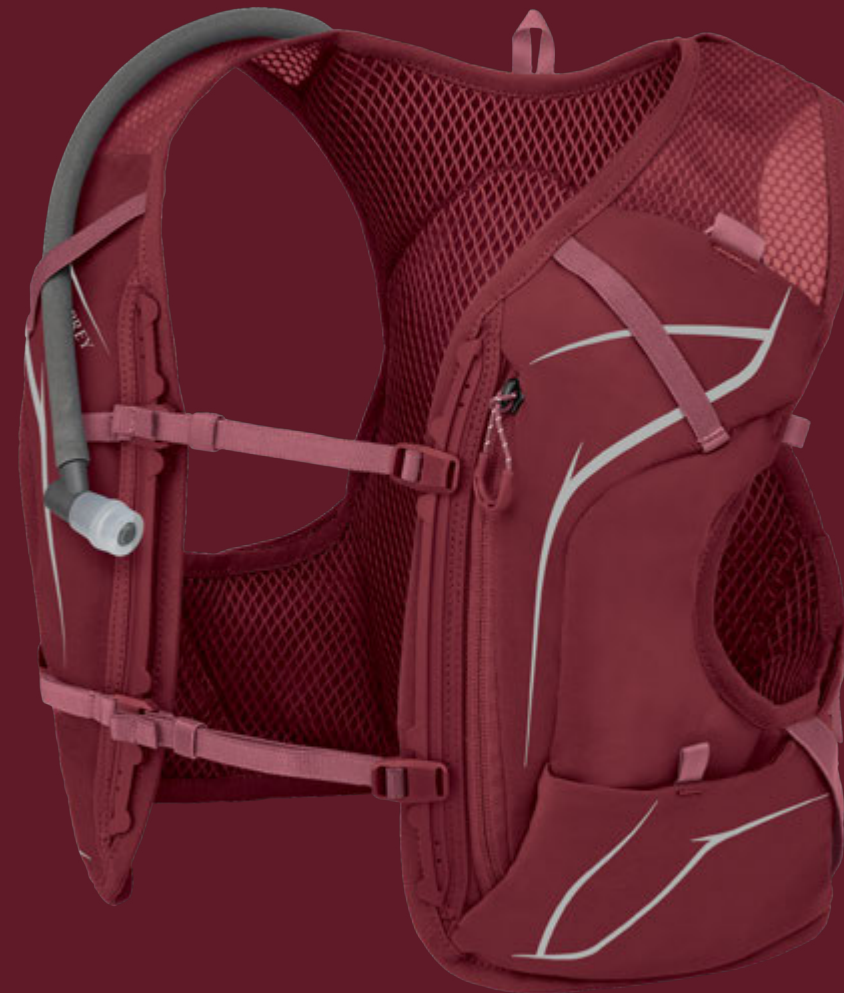

PHOTO: MATTHEW TRAPPE

Key Attributes

SPEED & STABILITY

Designed for a close to body fit, Duro/Dyna provides bounce-free fit that's lightweight and stays out of the way of your running goals.

EASY ESSENTIALS ACCESS

Smart pocketing keeps your essentials, like hydration, gels, whistle and phone, accessible while out on the trail or around the neighborhood.

STAY SEEN

Reflective graphics are intended to help keep you visible for those early morning runs or overnight epics.

HYDRATION INCLUDED*

From handhelds to vestpacks, stay hydrated whether you're enjoying a fun run at the park or running unsupported ultras. *Excluding Duro/Dyna LT Belt

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Features

DURO/DYNA 15 W/ RESERVOIR

- + Two extra-large stretch mesh soft flask/food harness pockets
- + Four lower stretch mesh food/supplement harness pockets
- + Vertical zippered harness slash pocket for valuables or phone
- + Hydration sleeve with direct-zip access and hose path for easy loading
- + Hydraulics 2.5L LT run-specific reservoir included
- + Large front panel zippered compartment
- + Stretch mesh front pocket for quickly stashing extra gear
- + Snap-in adjustable/removable dual chest straps for customised stability
- + Trekking pole/ice axe attachment
- + Tuckaway safety whistle
- + Two extra-large zippered lower hip pockets
- + Two open stretch mesh hip pockets

DURO/DYNA 6 W/ 1.5L LT RESERVOIR

- + Two extra-large stretch mesh soft flask/food harness pockets
- + Four lower stretch mesh food/supplement harness pockets
- + Vertical zippered harness slash pocket for valuables or phone
- + Hydration sleeve with direct-zip access and hose path for easy loading
- + Hydraulics 1.5L LT run-specific reservoir included
- + Front panel zippered compartment
- + Stretch mesh front pocket for quickly stashing extra gear
- + Snap-in adjustable/removable dual chest straps for customised stability
- + Trekking pole/ice axe attachment
- + Tuckaway safety whistle
- + Two open stretch mesh side panel pockets

DURO/DYNA 1.5 W/ 1.5L LT RESERVOIR

- + Two extra-large stretch mesh soft flask/food harness pockets
- + Two lower stretch mesh food/supplement harness pockets
- + Vertical zippered harness slash pocket for valuables or phone
- + Hydration sleeve with direct-zip access and hose path for easy loading
- + Hydraulics 1.5L LT run-specific reservoir included
- + Front panel bungee storage
- + Stretch mesh front pocket for quickly stashing extra gear
- + Snap-in adjustable/removable dual chest straps for customised stability
- + Trekking pole/ice axe attachment
- + Tuckaway safety whistle
- + Two open stretch mesh side panel pockets

DURO/DYNA LT W/ TWO 360 ML FLASKS

- + Two extra-large stretch mesh soft flask/food harness pockets
- + Two Hydraulics 360 mL Soft Flasks included
- + Two lower stretch mesh food/supplement harness pockets
- + Vertical zippered harness slash pocket for valuables or phone
- + Snap-in adjustable/removable dual chest straps for customised stability
- + Tuckaway safety whistle
- + Large dual-entry stretch mesh rear pocket

Features

DURO/DYNA BELT

- + 100% mesh construction for full breathability
- + Two Hydraulics 360 mL Soft Flasks included
- + Dual angled bottle sleeves with retaining straps
- + Dual open mesh hip pockets for food/trash
- + Zippered rear pocket with internal organisation
- + Padded mesh wings with dual ErgoPull hipbelt
- + External storage loops for trekking poles/wet clothing

DURO/DYNA LT BELT

- + Left-side zippered pocket for small valuables: key, cash, card
- + Right side open pocket for small essentials: headtorch, energy gel.
- + Main rear pocket for lightweight wind-shell or gloves
- + Rear phone stabilizer pocket
- + Differentiated grab-tabs for easy behind-the-back pocket identification
- + Reflective graphics
- + Glove-friendly buckle and zipper pull

DURO/DYNA HANDHELD W/ 360 ML FLASK

- + Hydraulics 360 mL Soft Flask included
- + Soft Flask stabilizing jacket
- + Ambidextrous-handed fit, palm or top-of-hand fit
- + Small zippered mesh pocket with safety whistle zipper pull
- + Small stretch mesh shove-it pocket

HYDRAULICS 360 ML & 500 ML SOFT FLASKS

Included with Duro/Dyna product but also sold separately for resupplies and additional water volume storage.

SPECIAL EDITION 1.5 & 2.5LT RESERVOIRS

Only included with Duro/Dyna product, not sold separately. Lightweight and more compact for integrated run-specific fit and function with the Duro/Dyna products.

- + Lightweight, narrow fit sealing slider
- + Minimalist pourshield for easy water transfer/filling
- + Included insulated hose to keep water protected from sun and body heat
- + Special graphics to match the pack by the pack designer

Carry

BACKPANEL

- + 3D Spacermesh bodywrap for lightweight padding, full ventilation and soft irritation-free contact surface
- + 15L only - Supportive foam backpanel and extended hipwings for larger gear needs
- + LT only – Minimalist body contact for minimalist fit/maximum ventilation

HARNESS

- + Adjustable and removable dual chest straps for additional stability
- + Front harness gear- and food-organisation pockets
- + Airmesh bodywrap for maximum ventilation, stability control and soft irritation-free contact surface
- + Multiple sizes and gender-specific fit for long trail comfort

BELTS

- + 3D spacermesh bodywrap for lightweight padding, full ventilation and soft, irritation-free contact
- + Wide and adjustable webbing strap with large glove-friendly buckle

Fabric

MAIN BODY FABRIC

bluesign® approved 100% recycled 320 nylon stretch mesh, DWR treatment made without PFAS

Vestpack Sizing

The Duro/Dyna 6, 1.5 and LT come in six sizes: men's S, M, L and women's S, M, L; the Duro/Dyna 15 comes in four sizes: men's S/M and M/L and women's S/M and M/L. Based on torso length and chest circumference, these packs are sized like apparel. The surface area of the harness evenly distributes the weight of the pack on both the smaller and larger volumes.

Measurements should be taken at widest part of chest slightly below armpits.

MEN'S DURO 15

SIZE	INCHES	CENTIMETERS

ESCAPIST™

Escapist

Bikepackers, embrace gear management like never before. Spanning three packs and five styles of frame bag, the new Escapist Family empowers you to build a custom, comprehensive bikepacking system that can be mixed and matched to fit you, your bike and how you ride just right. Whether you're looking to keep the essentials stored directly on your bike for supported missions or extend your mileage off the beaten path with the addition of bikepacking packs, Escapist is designed to keep you comfortable, your gear protected and the world of possibility in front of you.

PHOTO: TERRANCE SIEMON

ESCAPIST ON-BODY

Key Attributes

EXCELLENT ORGANISATION AND STORAGE

With three volumes, expansive hipbelt pockets, fast-access stash pockets in a reachable position on the sides, significant internal organisation pockets, pouches and entry points and a large front stretch shove-it pocket, the Escapist is a range of packs built to keep you organised and carry everything you need for life on the trail.

BIKE-SPECIFIC TOUCHES

Leaning into its element, Escapist Packs feature reflective material that extends under the pack to keep you visible in any riding position. Other features, like our lidlock helmet attachment, blinky light attachment, an extra-high visibility rain-cover, webbing keepers and glove-compatible buckles help keep this pack as refined as possible for the discerning rider.

BIKE-TO-HIKE FIT

The ultimate in versatility while retaining performance, the cleverly designed dropped-lumbar keeps the weight of the pack centred on the sit-bones, while the split upper back-panel allows an aggressive riding posture while keeping a bigger, heavier pack in a comfortable position on the body. Crank down the load-lifters and Escapist transforms into a highly capable hiking pack.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Escapist fabric section and on individual product hangtags at the point of sale.

ESCAPIST ON-BIKE

Key Attributes

CURATED BIKEPACKING SYSTEM

Thoughtfully designed as a modular bikepacking system, Escapist On-Bike frame bags accommodate any rider, any adventure. Mix and match different combinations to fit your needs, from short gravel grinds to multi-day epics.

MULTI-FRAME COMPATIBILITY

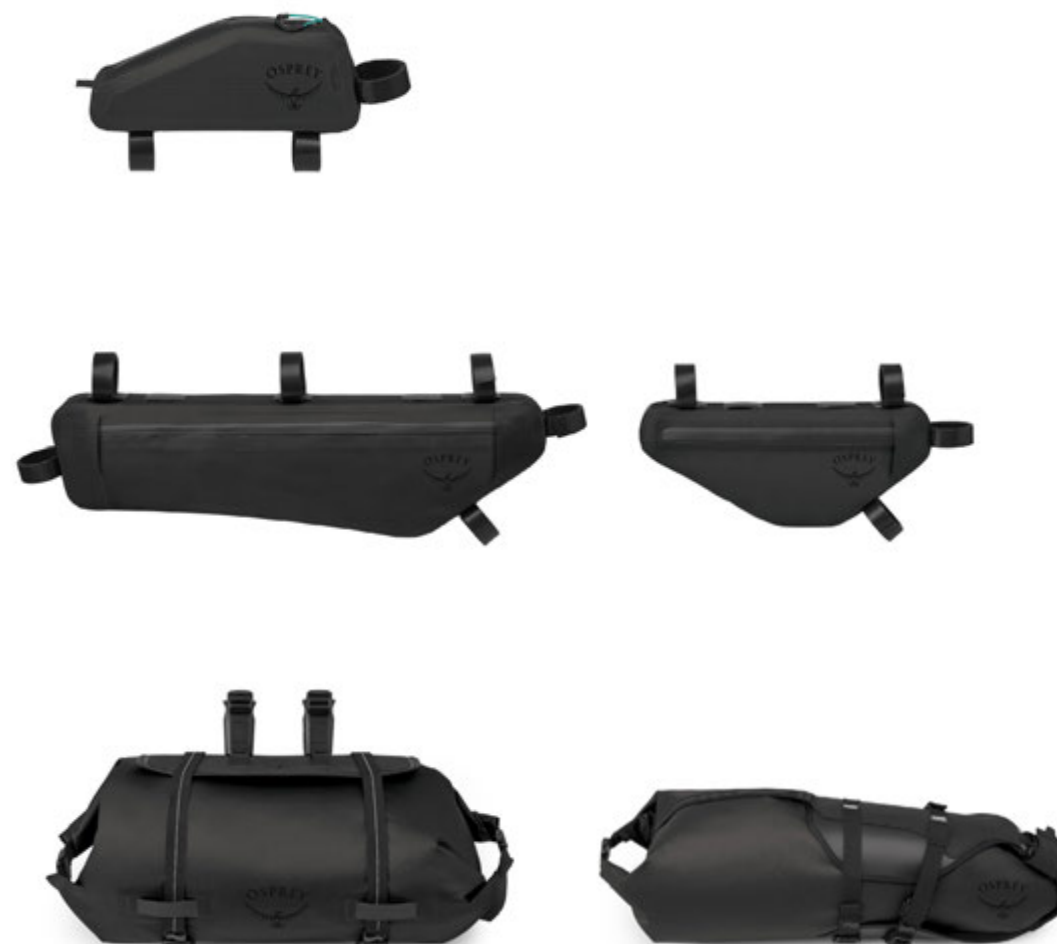

By using an innovative holster system for the handlebar and saddle bags, and a cleverly shaped half-frame bag which can be rotated to mount facing either way, the Escapist On-Bike bags are designed to fit the widest array of bike frames and sizes possible. Our handlebar bag fits most conventional bars, including drop bars. The Saddle Bag is compatible with rigid seatposts, or can be adapted for dropper posts with aftermarket sleeves.

HIGHLY WATER RESISTANT PROTECTION

Keeping your gear dry in variable conditions, the Escapist On-Bike bags are highly water resistant with rugged, water-shedding main fabrics, RF welded seams and water-proof zippers. The Handlebar Bag and Saddle Bag feature innovative, covered air purge holes to vent out pressure and increase compression and stability.

RIDER-FOCUSED DESIGN

Keep life convenient in the saddle: reflective hits for visibility, double-ended and glove-friendly zips for easy access, multi-position, soft hook-and-loop attachments help look after your bike and external lashing loops for additional functionality.

Features

ESCAPIST HANDLEBAR BAG:

- + Waterproof dual-roll closure dry bag
- + Purge patch system allows air to escape without a bulky valve, while keeping water out
- + Handlebar cradle system with secure flexible mounting point
- + Aluminium reinforcement keeps compression even and helps reduce sway
- + Front reflective compression straps
- + Secure lashing/attachment points
- + Over-stem strap to prevent downward rotation
- + Headtube strap for stability
- + Glove-friendly buckles

ESCAPIST SADDLE BAG

- + Waterproof tapered dry bag
- + Purge patch system allows air to escape without a bulky valve, while keeping water out
- + Under-saddle cradle system
- + Double-wrap seat-post attachment strap
- + Aluminium reinforcement keeps compression even and helps reduce sway
- + Dual side compression straps
- + Front reflective compression straps
- + Glove-friendly buckles

ESCAPIST FRAME BAGS

- + 3 sizes to accommodate a wide range of frame sizes and shapes
- + Structured outer allows easier packing and accessibility
- + Right-side double-ended zippers for easy front or back access while riding
- + Left-side organiser panel with internal slots for small essentials
- + Waterproof zippers
- + Multiple, variable attachment points with soft anti-scratch hook-and-loop straps
- + Bright zipper pulls with deep slider garages

ESCAPIST WEDGE BAG

- + Shaped steeper on one end than the other. Can be flipped to suit a variety of frame shapes
- + Both-side zipper access
- + Waterproof zippers
- + Multiple, variable attachment points with soft anti-scratch hook-and-loop straps
- + Bright zipper pulls with deep slider garages
- + Structured outer allows easier packing and accessibility

ESCAPIST TOP TUBE BAG

- + Single vertical access point
- + Cable exit port for light/computer charging
- + Multiple, variable attachment points with soft anti-scratch hook-and-loop straps
- + Waterproof zippers
- + Bright zipper pulls with deep slider garages
- + Structured outer allows easier packing and accessibility

Seral | Savu

The Seral and Savu lumbar packs are perfect for the mountain biking minimalist. Supremely stable for laps on local singletrack or gravel trails, this off-the-back hydration solution provides carry for a few key essentials and water. The Seral Series includes a lumbar reservoir while the Savu Series offers water bottle(s) carry.

Photo | Robb Thompson

Key Attributes

LUMBAR CARRY

For riders who prefer the off-the-back hydration carry and minimalism provided by lumbar packs.

RIDE STABILITY

Our bike-specific, angled hipbelt and compression straps provide stability and comfort by keeping the pack close to your body.

INCLUDED RESERVOIR (SERAL)

A dedicated hydration compartment stores an included Hydraulics® LT 1.5 L Lumbar Reservoir for short to medium rides and compresses for stable carry.

BOTTLE CARRY (SAVU)

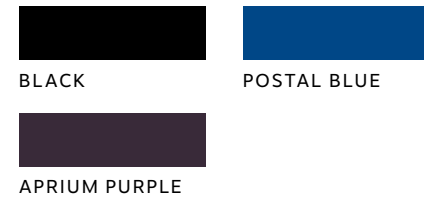

Stable lumbar carry with easy access to your water bottles. Compress the bottle pockets for short rides without water to maintain stability and keep the pack close to your body. Water bottles not included.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Seral | Savu fabric section and on individual product hangtags at the point of sale.

Poco™ Child Carriers

NEW

UPDATED

Whether it's a big or small adventure, the Poco child carrier nurtures discovery and redefines family adventure. Carrying a child on your back in a supportive, innately safe and comfortable carrier allows you to have a shared point of view while giving you the freedom and mobility to adventure together. The addition of two new silhouettes this season allows for new shared experiences while giving children a new perspective of the world around them.

CONSUMER PROFILE:

- Parents, family or friends who want to adventure with children
- Ability to share adventures, from town to trail to travel
- Prioritize an active, healthy lifestyle for both adult and baby

POCO SLT **NEW**

EVERYDAY/TRAVEL

Lightweight and approachably priced for new users.

COMPATIBLE: Poco Carry Case, Poco Raincover,

Poco LT Sunshade

Key Attributes

HIGHLIGHTS

- Unique double halo harness offers elevated child safety and ease of loading and unloading
- Adjustable suspension and padded cockpit provide enhanced comfort and fit
- Fully removeable and washable cockpit on Poco Premium
- New Poco SLT offers approachable price point with essential features

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Poco Child Carrier fabric section and on individual product hangtags at the point of sale.

Key Attributes

P O C O P R E M I U M & P O C O

BUILT-IN SUNSHADE

The built-in sunshade easily stores and deploys from a dedicated zippered pocket for convenient UPF 50 sun protection.

DELUXE CHILD COCKPIT

A fully framed and padded cockpit surrounds the adjustable Double Halo harness and child seat for safety. Soft contact surfaces, anatomical fit and ventilated side panels provide comfort. Removable, machine washable cockpit on Poco Premium and drool pad on Poco.

ADJUSTABLE FIT

6"/15 cm of torso length adjustment quickly and easily fits to a variety of body types while on the go. Poco Premium includes Fit-on-the-Fly hipbelt for a wider fit range.

AIRSPED SUSPENSION

A continuous panel of lightweight tensioned mesh extends from the top of the backpanel to the lumbar. The seamless structure contours automatically to the body, providing outstanding fit, excellent ventilation and unrestricted movement when wearing the carrier.

P O C O L T & P O C O S L T

SUNSHADE

The built-in sunshade easily stores and deploys from a dedicated zippered pocket for convenient UPF 50 sun protection. (Poco SLT is sunshade compatible.)

LIGHTWEIGHT FOLDING FRAME

Our patented lightweight stainless steel frame folds smaller than other standard child carriers making it easy to travel with and store. The frame locks in place to fully support the child and provide a stable platform to set the child carrier down.

ADJUSTABLE FIT

6"/15 cm of torso length adjustment quickly and easily fits to a variety of body types while on the go.

AIRSCAPE SUSPENSION

Mesh-covered, extra deep ridged foam allows maximum ventilation and comfortable contact surfaces.

HYDRATION COMPATIBLE

An included Osprey Hydraulics LT 1.5L reservoir with the HydraJet 12L or an easy add-on for the Jet 18L.

AIRSCAPE BACKPANEL

Ventilated and close-to-body carry allows dynamic body movement whether skipping, hiking or biking down the trail.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Talon | Tempest JR

The Talon/Tempest is one of the most versatile technical pack series ever created—and the Talon/Tempest Jr. delivers it all in a pint-sized package. A BioStretch harness and AirScape backpanel provide the same ventilated close-to-body fit for kids as it does for adults. With side stretch mesh pockets, a bike helmet attachment and external hydration reservoir sleeve, the Talon/Tempest Jr. is ready for adventure. This lightweight pack offers max stability, sustainable recycled fabric and all the right features to be at home hiking, biking and more.

Photo | Dan Holz

Key Attributes

AIRSCAPE SUSPENSION

An injection-molded, die-cut foam AirScape backpanel creates a breathable, close-to-body fit. A flexible BioStretch harness and hipbelt, with a continuous lumbar-to-hipbelt wrap, allow for dynamic movement.

LIGHT AND FAST

A lightweight pack series designed with optimal stability for dynamic movement even on the most technical terrain

MULTI-SPORT

From top-loaders to lumbar packs and everything in between, the Talon/Tempest Series accommodates the needs of hikers, bikers and more.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Daylite™ JR

NEW
COLOUR

With the same expectations as its adult counterpart, the Daylite JR pack does it all and does it right. Offering a straightforward feature set in a small package, including a ventilated backpanel, dual side mesh pockets for water bottles or treasures found on the trail, hydration compatible interior sleeve, built-in whistle and internal name tag. An integrated handle gives adults an easy grab-and-go option while simple pockets, bright colours and fun graphics compel kids to reach for this pack again and again.

Downburst™

Embrace your adventure, rain and shine, with the all-new Downburst Series. Leading the waterproof daypack category, Downburst pairs our highly comfortable and breathable AirSpeed suspension with a waterproof main compartment and quick-dry external materials, delivering the capable fit and stability Osprey is known for while leaving nowhere for water to hide. Soak up every moment you have outdoors, and not a drop more.

PHOTO: DYLAN GIALANELLA

Key Attributes

FULL WATERPROOF CONSTRUCTION

The entire pack's interior is thoroughly protected—from a light drizzle to heavy showers—with an IPX5 waterproof (non-submersible) rating thanks to its fully RF-welded, TPU-laminated construction.

CATEGORY-LEADING FIT & COMFORT

Adjustable AirSpeed suspension provides category-leading fit, comfort and ventilation, designed to dry out quick whether you're hiking in heat and humidity, or through a downpour.

NO-COMPROMISE GEAR CARRY

For quick-access essentials and drying raincoats, non-waterproof pocketing on the pack's exterior, including bottle pockets, a large backpanel stash pocket and an external hydration sleeve, are made of breathable, water-shedding materials that'll dry quick.

WOMEN'S-SPECIFIC FIT

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Downburst fabric section and on individual product hangtags at the point of sale.

Wildwater

Built for the hardcore rafter, kayaker and overlander but ideal for the casual beach-goer, paddle boarder and boater as well, our Wildwater Dry Bags expand the range of waterproof storage options for anyone who needs to keep gear dry and protected. Constructed with waterproof non-submersible (IPX5) technology, these durable dry bags are intended to be used on their own outside of a pack.

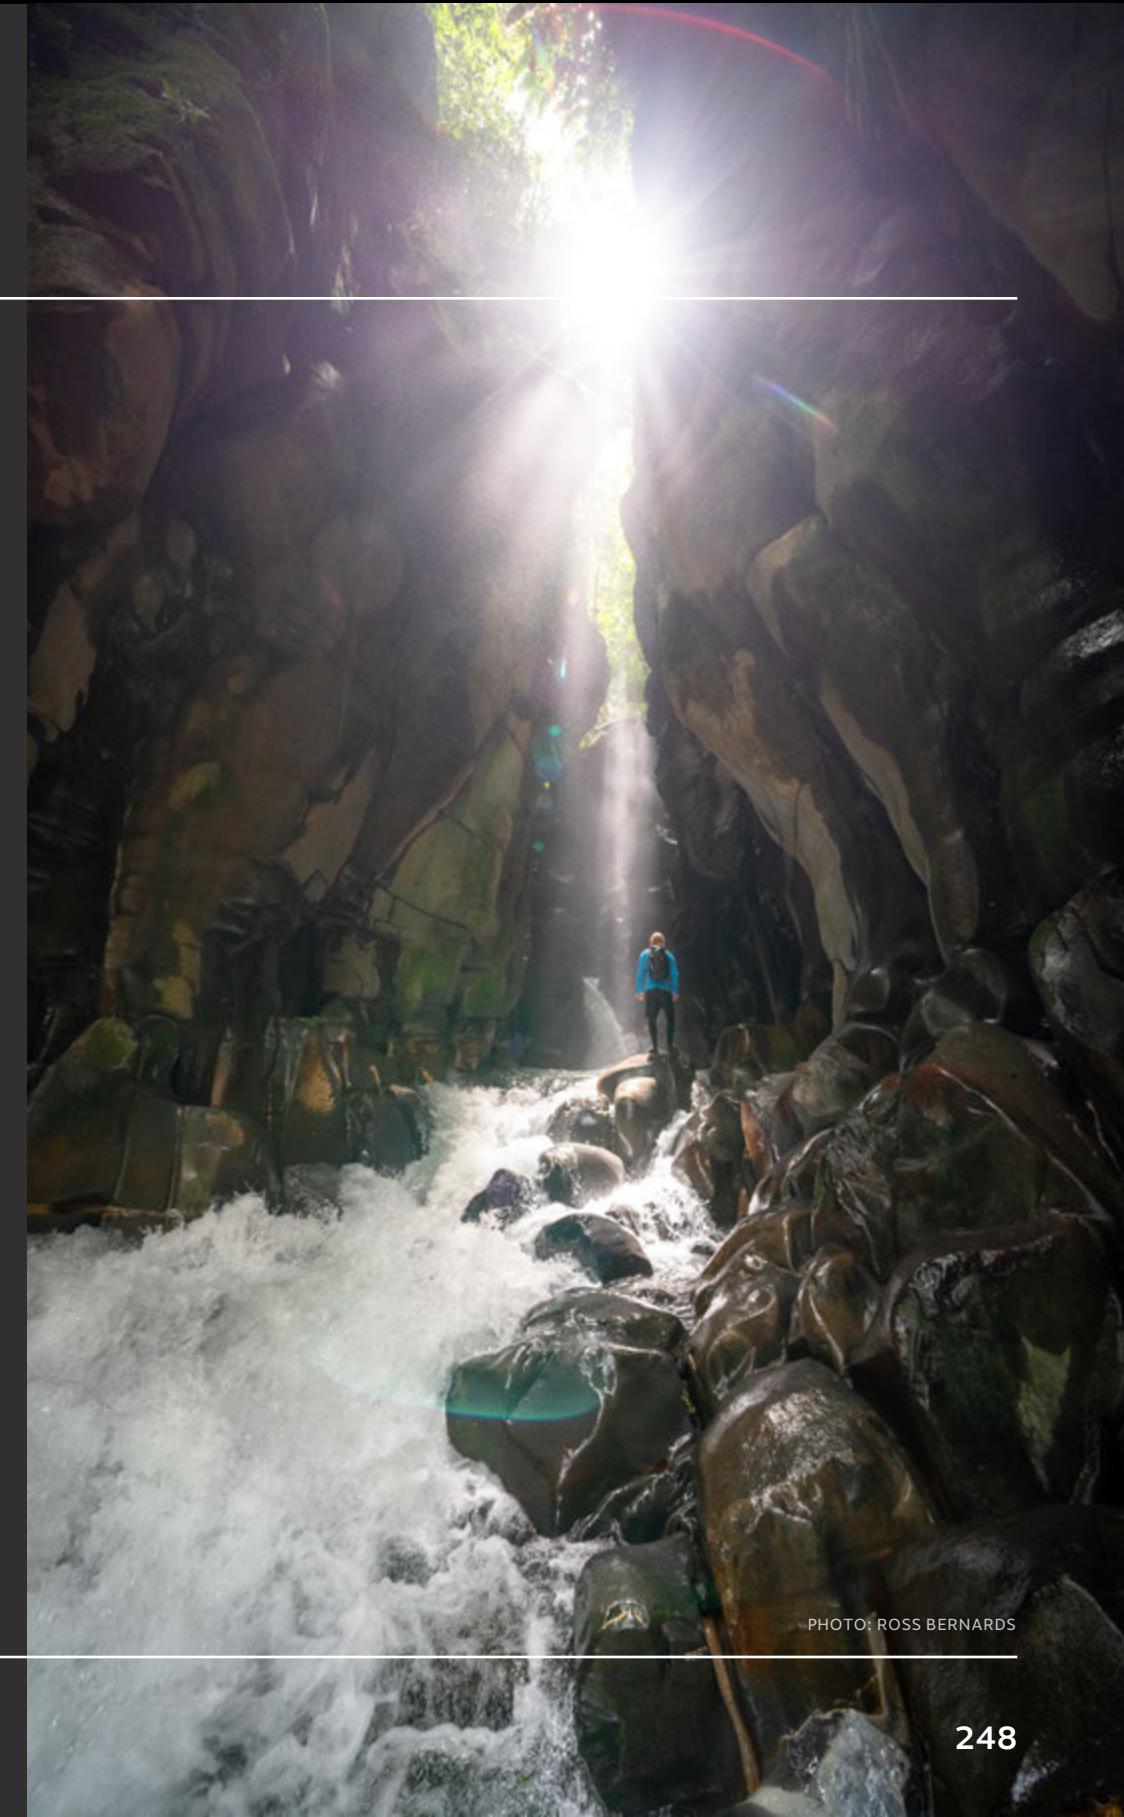

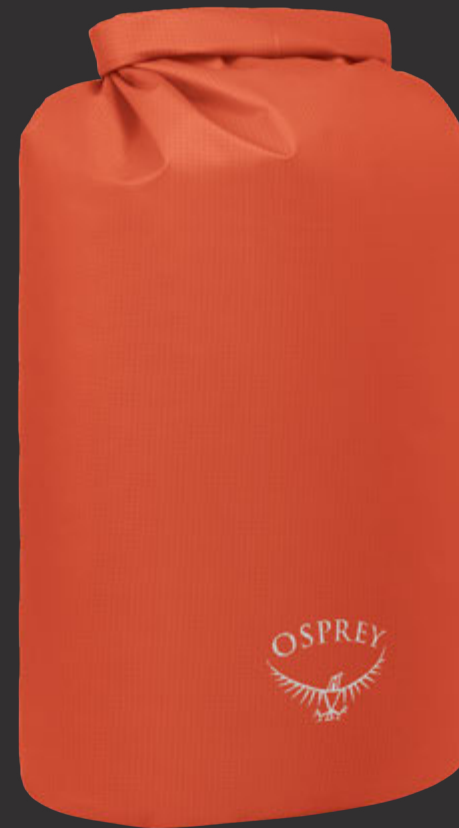

PHOTO: ROSS BERNARDS

Key Attributes

IPX5 WATERPROOF RATING

Waterproof Non-Submersible. Resists low-pressure water spray from any angle with welded seam construction.

DURABLE & SUSTAINABLE

Constructed with double-sided ether-based TPU over 210D 100% recycled nylon and fully RF welded to keep your gear protected for years to come.

VERSATILITY

Take the Wildwater Dry Bag on all your water adventures. Featuring an included shoulder strap as well as upper and lower D-rings that double as lash points.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Transporter WP Duffel

An expedition gear-hauler, the Transporter Waterproof Duffel is waterproof submersible (IPX7) for the heavy-duty user. Be it whitewater rafting, diving expeditions or river camping, this duffel is ready to go anywhere water protection is paramount.

Transporter WP Duffel

CONSUMER PROFILE

- + Works or plays in extreme, wet environments
- + Requires highly durable, waterproof gear

Key Attributes

TRAVEL-READY

Multiple lash points make it easy to attach bag on a vehicle, raft, pack animal, etc.

CARRY OPTIONS

Fully removable backpack straps/carry handles with durable non-corroding aluminum hardware.

WATERPROOF RATING

IPX7 rating - Waterproof Submersible
(Can be submersed in one meter of water for 30 minutes)

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Transporter Waterproof fabric section and on individual product hangtags at the point of sale.

NANOTOUGH™ COATED FABRIC

Tests roughly five times as durable than our other PU-coated fabrics.

SUPERIOR WATER RESISTANCE

Carbonate coated fabrics are roughly 50% more water resistant than normal PU-coated fabrics.

LASER-CUT DETAILS

Laser cutters provide detailed precision throughout the construction.

A R C H E O N

CUSTOM EVA FOAM BACKPANEL

Compression-molded EVA foam backpanel provides a comfortable carry, breathability, structure and clean aesthetics

100% RECYCLED SEATBELT-STYLE WEBBING

Durable seatbelt-style webbing has a premium feel and distributes weight comfortably.

TECH ORGANISATION

Tech-oriented pocketing and organisation, like the Tech Stash Pockets found in the packs and laptop sleeves, help protect and keep your devices accessible.

Archeon™

More of a unique pack system than a series of standalone products, Archeon revolutionizes the way we look at our everyday carry. Designed to adapt seamlessly in dynamic urban environments, each silhouette brings something valuable to your carry—but their full potential is unlocked when they interact and stack features with one another. Pair up in-series accessories and packs in novel ways for a truly custom, modular solution that'll inspire gear envy wherever you go.

PHOTO: TERRANCE SIEMON

Key Attributes

CUSTOM MODULAR SYSTEM

While exceptionally functional on their own, each Archeon pack and accessory interacts for enhanced utility. Serving as a natural foundation, the backpacks accept each component of the series with clever, quick-release accessory straps that allow you to combine and reconfigure your carry to meet the demands of your day.

NANOTOUGH™ COATED FABRIC

Archeon owes its unique aesthetic to a remarkably strong, bluesign® approved, NanoTough™ coating. How strong? It remained intact for so many cycles during abrasion testing that we finally had to call it quits. This superior durability comes with improved water resistance as well, helping protect valuable electronics from the elements.

**Excluding Archeon Chest Rig, Laptop Case, Pouch, Sling 7*

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Archeon fabric section and on individual product hangtags at the point of sale.

TECHNOPHILE TESTED

Designed for the most tech-heavy users, Archeon features premium pocketing and organisation for cables, devices and laptops. Tech Stash Pockets, included in each pack as well as the laptop sleeves, expands to accommodate anything—from a phone to a mini drone and everywhere in-between.

PREMIUM TACTILE QUALITY

Archeon makes use of industry-leading materials and construction techniques like precision laser-cutters, advanced synthetic rubber, CNC machined aluminum, 100% recycled high tenacity nylon, premium 100% recycled seat-belt-style webbing and form-fitting, compression-molded EVA backpanels. The takeaway? It's the foundation of a modern everyday carry.

HIGHLIGHTS

- Brand-new pack family
- Modular system offers unique upsell opportunity
- Pilot program for state-of-the-art carbonate coated fabrics

Aoede

NEW

A stylish and versatile collection of around-town bags, the Aoede Series offers clean and minimalistic aesthetics that reflect personal identity and lifestyle. Easily transitions from midtown to workplace, while professional enough to accompany a business trip. Four silhouettes offer a polished daily solution to street-style functionality.

PHOTO: MOLLY PORTER

STYLISH AND DURABLE

Constructed with bluesign® approved 840D “junior” ballistic main body fabric with bluesign® approved 200D mixed mélangé liner fabric for a visually interesting interior every opening.

EVERYDAY COMFORT

Soft, comfortable webbing with a strong weave similar to a seatbelt for stylish carry that doesn’t sacrifice strength.

REFINED AESTHETICS

Featuring subtle yet distinctive branding, such as sophisticated muted zippers, pulls and logos.

A O E D E

MODERN

MEETS

VERSATILITY

SLEEK HARDWARE

The YKK reversed racquet coil zippers allow for long, smooth running openings.

3-IN-1 CARRY

Aoede Briefpack offers three separate carry options:

- Backpack carry with AirScape backpack panel and tuck-away harness
- Brief carry with adjustable, removeable shoulder strap
- Hand carry with top and side grab handles

LAPTOP PROTECTION

Aoede Briefpack, Daypack and Messenger silhouettes offer a padded laptop sleeve to keep your essential equipment protected from the wear and tear of commuting.

Key Attributes

URBAN VERSATILITY

Stylish enough for everyday, around-town carry, yet professional enough for a business trip.

MINIMALISTIC AESTHETICS

Offering clean and minimal silhouettes that reflect personal identity and lifestyle.

LAPTOP SLEEVE

Internal laptop/document sleeve offered in Briefpack, Daypack and Messenger styles.

CARRY COMFORT

Featuring AirSpeed and AirScape backpanels to maximize everyday comfortable carry.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Aoede fabric section and on individual product hangtags at the point of sale.

Key Attributes

SUSTAINABLE DESIGN†

Constructed with refined-yet-durable bluesign® approved, 100% recycled polyester main body fabric. Built to last from a brand committed to quality design and high manufacturing standards.

SIMPLE FEATURE SET

Delivering a straightforward and intuitive feature set with an understated, comfortable carry.

EVERYDAY ORGANISATION

Durability and organisation for all your daily essentials—laptop, phone, etc. It's as much about what you carry as the bag you carry.

BEAUTIFULLY FUNCTIONAL

Clean lines, minimal depth, beautiful fabrics and hardware combined with utilitarian function.

**Excluding Osprey Arcane accessories*

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Osprey Arcane fabric section and on individual product hangtags at the point of sale.

Transporter Packs

The Transporter Packs are built to get you from point A to B and handle anything that comes your way throughout the day. Featuring rugged, reliable and highly water-resistant fabrics with a comfortable carry and unique silhouettes—they're the perfect packs to reflect the modern urban lifestyle.

Photo | Carson Brown

Key Attributes

AIRSCAPE BACKPANEL

Mesh-covered ridged foam provides breathable all-day carry comfort.

RELIABLE PROTECTION

TPU-coated 100% recycled polyester provides highly durable, weatherproof protection for everyday essentials.

100% RECYCLED CONTENT

Each Transporter Pack is made in-part by recycled bottles, helping give purpose to post-consumer materials.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Transporter Packs fabric section and on individual product hangtags at the point of sale.

Key Attributes

EVERYDAY NEEDS

Available in a variety of volumes with unique organisation and feature sets to carry you through the day—wherever it takes you.

ORGANISATION

Multiple organisation pockets, side stretch mesh pockets and a dedicated, padded laptop and document sleeve give you quick access to all your daily items.

OUTDOOR APTITUDE

Designed with comfortable, capable suspension and the same commitment to fit, features and fabrics as our technical packs.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the 24/7 fabric section and on individual product hangtags at the point of sale.

Features

Radial

Intentional design is intelligent design, and bike commuters need to be ready to handle anything as they travel through town. The Radial provides commute-specific features like a high-visibility raincover, padded laptop sleeve, and organisation for electronics and bike gear. Offering more than the competition, we also include an AirSpeed™ backpanel for enhanced ventilation, a comfortable harness that moves as you ride and the delightfully unexpected Kickstand to keep your pack upright and your gear off the floor.

PHOTO: TERRANCE SIEMON

Key Attributes

BIKE COMMUTE-SPECIFIC FEATURES

Built-in raincover, LidLock helmet carry, separate compartment for dirty clothes or shoes, loop for blinky light attachment, and reflective prints and zipper pulls.

KICKSTAND

Whether full or empty, the pack stays upright thanks to an integrated kickstand.

AIRSPEED® SUSPENSION

Allows ventilation even when carrying heavy laptops and other electronics.

Adjustable Torso Length: 17-22" | 43-56 cm

EXPANSION

26L to 34L zippered pack expansion increases volume on days that call for extra gear.

INCLUDED RAINCOVER

The integrated high-visibility raincover keeps your gear dry and helps you stay seen on the road.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Metron

The Metron Series is designed for urban bike commuters who need a comfortable pack that includes subtle technical features with an aesthetic that matches their own. You'll find safety-focused features like a high-visibility raincover to stay seen, safe and dry, tuck-away helmet net, padded laptop sleeve and organisation for your gear. StraightJacket compression provides the flexibility to reduce volume and stabilize smaller loads, and all of these features plus our AirScape backpanel and unique styling make the Metron more than just a bike pack.

Daylite

Daylite Series Overview

Daylite Packs

Key Attributes

VERSATILE

Accommodates a kaleidoscopic range of activities from day hikes to farmers markets to travel—and able to handle years of every-day wear and tear.

PACKED WITH PERSONALITY

From conventional colours to playful hues and seasonal prints, Daylite is here to extend your personality and accentuate your style.

COMPATIBLE

Daylite and Daylite Plus are compatible as an attachment to several Osprey travel and backpacking bags for additional storage and carry options.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Daylite Earth

SPECIAL
EDITION

Embodying simplicity and versatility, the introduction of Daylite Earth shows us how we can apply thoughtful sustainability to everyday decisions as our most sustainable lifestyle pack to date*. Daylite embodies the value of versatility: simple, technical enough for the trail, and casual enough for everyday use and familiar enough for travel abroad or down the road. The delightful crossover of technical, lifestyle and travel means it can be used every day, everywhere: on a day hike, as a travel bag, at the market or on the go. *See the next page for details.

Key Attributes

bluesign® PRODUCT

Beyond the fabric, Daylite Earth earns more rigorous bluesign® product designation, exceeding their criteria* with a minimum of 90% bluesign® approved fabrics/yarns, a minimum of 20% bluesign® approved accessories and all remaining fabrics, materials or components being sourced from qualified suppliers.

REDUCING OCEAN WASTE

Main body and bottom fabrics are woven from 100% recycled, post-consumer polyester, made from ocean-bound PET bottles to reduce ocean plastics.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Daylite Earth fabric section and on individual product hangtags at the point of sale.

Sojourn™ Family

Backcountry skiing in British Columbia or alpine climbing in Chamonix, the Sojourn Family is designed for travelers whose destination has no limits. Built for heavy-duty use with Osprey's time-tested StraightJacket compression and foam padded sidewalls that provide security and protection for gear in transit. Rolling bags are built on our proven HighRoad Chassis with oversized wheels that smooth out rough terrain and feature an all-new, patent-pending buttonless grip. With three different styles that have the space for bulky items and amenities like buttonless grip, Travel Sentry luggage identification and add-a-bag compatibility, the Sojourn collection answers your travel needs.

PHOTO: BEN MATHEWS

MORE RUGGED

On our Sojourn and Sojourn Shuttle styles, an extra-wide chassis stabilizes large loads while oversized wheels make easy work of rough terrain.

SMARTER

Travel Sentry® ID, a luggage identification service, is included on each Sojourn piece to help reconnect you with your bag if it becomes lost.

MORE EXPERIENCED

Across the Sojourn collection, our iconic StraightJacket compression straps with padded sidewalls protect your possessions and keep loads under control.

SOJOURN: A LITTLE MORE

MORE DURABLE

Constructed with heavy-duty recycled materials and treated with PFAS-free DWR.

MORE COURAGEOUS

When the road ends, a harness and hipbelt deploy at a moment's notice for backpack-style carry and tuck away when the bag is checked.

MORE CONVENIENT

The Sojourn Shuttle offers clever travel-specific features like a buttonless trolley handle, dual tube trolley and add-a-bag compatibility.

Sojourn Family Positioning

Key Attributes

STRAIGHTJACKET PROTECTION

Our iconic StraightJacket compression straps with padded sidewalls offer a flexible and secure option to protect contents and keep loads under control. When not fully stuffed, bag compresses to a smaller size.

HIGHROAD CHASSIS*

Extra-wide chassis stabilizes large loads while extra-large wheels keep up with heavy-duty use—and keep you rolling on the roughest of surfaces.

*Sojourn & Sojourn Shuttle styles

STOWAWAY HARNESS & HIPBELT*

Harness and hipbelt deploy at a moment's notice for backpack-style carry and quickly disappear into the backpanel for safekeeping when the bag is checked.

*Sojourn & Sojourn Porter styles

ENHANCED USER EXPERIENCE

Sojourn Shuttle feature a dual tube trolley, buttonless grip, add-a-bag compatibility and Travel Sentry® luggage identification.

SUSTAINABLE & DURABLE BUILD

Constructed with heavy-duty bluesign® approved, 100% recycled high tenacity and ballistic fabrics, using DWR treatments made without PFAS.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Sojourn Family fabric section and on individual product hangtags at the point of sale.

Ozone

The all-new Ozone Series combines cutting-edge technology with an ultralight yet durable aluminum frame and sustainable materials—establishing sophisticated, forward-looking and remarkably lightweight luggage pieces that seal the Ozone’s position as the leading travel group. Offering just the right amount of organisation and style, this series attracts travelers of all types who know lightweight and capacity never go out of style—from the hard-working road warrior to the wanderlust.

Ozone

Ozone

CONSUMER PROFILE

- + Frequent fliers, travelers and globetrotters
- + Values ease of transport and lightweight luggage
- + Wants a complete system for their travel needs

Key Attributes

EXCEPTIONALLY LIGHTWEIGHT

Everything that's needed, and nothing that isn't, in the lightest possible package. Ozone represents a leap forward in lightweight luggage design; reimagining frame construction and materials, new exclusive ultralightweight fabrics, and integrated handles.

CHECK OR CARRY-ON

With two wheeled carry-ons that maximize overhead space, laptop packs that take advantage of under seat storage, and a large checked bag with an ultralightweight 4-wheel chassis, it's the perfect kit for all your travels.

ORGANISATION

Featuring just the right amount of organisation for on-the-go essentials, including laptop sleeves on all carry-ons.

**Excluding Ozone 2-wheel & Ozone 4-wheel*

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Farpoint™ | Fairview™ Family

Compared to traditional luggage, travel packs deliver freedom. Freedom to move nimbly and seek adventure. Our Farpoint and Fairview Family blurs the line between technical backpacks and travel luggage, providing feature-rich solutions with tangible benefits like smart organisation and ease of packing. In addition, they are lightweight and comfortable to carry whether wheeled or worn on your back.

Farpoint | Fairview Travel Pack

Lightweight and streamlined, the Farpoint/Fairview Series is an ideal travel pack for fast-moving globetrotters. Despite their minimalist weights, these full-featured packs offer plenty of organisation and lots of useful features as well as highly capable backpack suspension. The Farpoint 40's compact size ensures carry-on compliance on most flights.

Key Attributes

LIGHTWEIGHT AND DURABLE

Durable fabrics in high-wear areas combine with smart design to create a lightweight and tough travel pack that will last a lifetime.

STOWAWAY HARNESS AND HIPBELT

The harness stows away for safekeeping while checked and deploys quickly for any path or trail.

COMFORTABLE FIT

The Farpoint/Fairview Series offers a comfortable, gender-specific fit for every adventure.

DETACHABLE DAYPACK (*70/55L ONLY)

Detachable daypack provides additional storage and organisation ideal for day trips or carry-on.

**Excluding Farpoint/Fairview Trek & Farpoint/Fairview Wheeled Travel Pack*

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Farpoint | Fairview Travel Pack fabric section and on individual product hangtags at the point of sale.

FARPOINT FAIRVIEW TRAVEL DAYPACK	O/S	915	15	1.19 lbs. 0.54 kg.	18.5h x 11w x 8d in. 47h x 28w x 20d cm	-	Reservoir Raincover S	Laptop Sleeve

* Volume and weight measurements include the Farpoint daypack; dimension measurements DO NOT include the Farpoint daypack.

† The Farpoint/Fairview 55 can be carried on in two pieces; the body as an overhead and the pack as a personal item.

Farpoint | Fairview Trek

The Farpoint/Fairview Trek packs are purpose-built for adventure travel that involves extended time on the trail. With smart organisation that makes it easy to find your gear, a highly ventilated AirSpeed backpanel for humid climates and an easily adjustable suspension for the perfect fit, there's no better option.

Photo | Sam Rouda

Key Attributes

BACKPACKING MEETS TRAVEL

Backpack-style carry keeps your load stable on your back while travel-specific features make it easy to stay organised.

AIRCOVER™ INCLUDED

An AirPorter and a raincover in one—the AirCover protects your pack both when you check it in and when the skies open up.

AIRSPEED SUSPENSION

Tensioned mesh backpanel keeps the weight off the back, enabling highly ventilated carrying comfort.

FARPOINT/FAIRVIEW TRAVEL OR DAYLITE PACK COMPATIBLE

Webbing straps on the front panel of the pack come in handy when you need to bring an additional Farpoint/Fairview or Daylite pack.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Farpoint | Fairview Trek fabric section and on individual product hangtags at the point of sale.

Farpoint | Fairview Wheeled

Offering the same promise of mobility and freedom as the rest of the Farpoint/Fairview Family, the Wheeled Travel Packs give you the choice between energy-saving wheels or a capable, lightweight suspension when the path forward gets rough.

Photo | Terrance Siemon

Key Attributes

WHEELED OR CARRIED CONVENIENCE

Wheel the pack when the path allows or quickly deploy the stowaway harness and hipbelt for a comfortable backpack-style carry when conditions demand.

LIGHTWEIGHT AND DURABLE

Durable fabrics in high-wear areas combine with smart design to create a lightweight and tough travel pack that will last a lifetime.

COMPATIBLE WITH THE NEW FARPOINT/ FAIRVIEW TRAVEL OR DAYLITE PACKS

Webbing straps on the front panel of the pack come in handy when you need to bring an additional Farpoint/Fairview or Daylite pack.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Transporter 4-Wheel

These premium hard-shell luggage pieces deliver a fully custom design true to Osprey's DNA—it's all in the details. The durable outer shell is sustainably crafted from 80% post-consumer recycled polycarbonate with a gasketed frame closure for maximum weatherproof protection. Multi-position trolley handle and oversized 70mm wheels with aluminum reinforcement provide impressive rolling performance over almost any surface while molded rails provide lashing points and extra protection.

PHOTO: KAARE IVERSON

Hardside Key Attributes

CUSTOM DESIGNED

100% custom design - shell, hardware and components.

RUGGED EXTERIOR

Constructed with a durable 80% recycled post-consumer polycarbonate shell.

HIGHLY WATER RESISTANT

A weatherproof shell made with gasketed frame for maximum water resistance (no zippers).

EASY TO ROLL

Oversized 70 mm dual spinner wheels at the corners with aluminum reinforcement allow capable, smooth travel on any surface.

CUSTOMISABLE ORGANISATION

Unique interior components like a LightWire mesh divider, modular tie down straps and an included pocket with multiple attachment points allows the user to configure their case to the journey.

CARRY-ON CONVENIENCE

The Transporter 4 Wheeled Hardside 22"/40L is sized to fit most major airline's overhead bin requirements. Suitably portable for trips by car and train as well.

Hybrid Key Attributes

CUSTOM DESIGNED

100% custom design - shell, hardware and components.

HYBRID DESIGN

A bottom/backside hard shell offers extra durability and protection while a TPU coated fabric front and numerous pockets, easy access to your belongings, and an extra 5L expansion option. This hybrid design offers durability and protection in a lightweight package at just 6.5lbs / 3kg.

RUGGED EXTERIOR

Constructed with a durable 80% recycled polycarbonate bottom/back shell, and TPU coated 450D recycled polyester front panel.

36L + 5L EXPANSION*

A zipper expansion provides an additional 5L of packing capacity.

EASY TO ROLL

Oversized 70 mm dual spinner wheels at the corners with aluminum reinforcement allow capable, smooth travel on any surface.

CARRY-ON CONVENIENCE

The Transporter 4 Wheeled Hybrid 22"/36+5L is a globally accepted carry-on size and is sized to fit most major airline's overhead bin requirements: 21.5 x 14 x 9 in. / 55 x 35 x 23 cm. Suitably portable for trips by car and train as well.

* May exceed carry-on restrictions when expanded

Hardside Features

EXTERIOR FEATURES

- + Extremely durable, tough as nails, 80% recycled post-consumer polycarbonate shell
- + Unique, gasketed, latch closure provides IPX4 waterproof protection
- + Exterior molded daisy chain rail system provides tie-down lashing points and extra protection
- + Multi-position trolley handle for easy 2- and 4-wheel hauling
- + Oversized 70 mm dual spinner wheels with aluminum reinforcement provide impressive rolling performance
- + Lock loops molded into frame for security (TSA lock sold separately)

INTERIOR FEATURES

- + Customisable interior attachment points allow for a personalized packing solution by removing or adding the included LightWire mesh divider, internal compression straps, a zippered pocket and additional Transporter Swap-N-Go accessories (sold separately)
- + Removable zippered pocket with webbing loops converts to a waist or over-the-shoulder day pouch (belt not included)
- + Modular tie-down compression straps secure clothes and other items
- + A LightWire mesh divider to keep items secure and neat

Hybrid Features

EXTERIOR FEATURES

- + Globally accepted carry-on size: 21.5 x 14 x 9 in. / 55 x 35 x 23 cm. (Meets most airline requirements.)
- + Extremely durable, 80% recycled post-consumer polycarbonate bottom/back shell combined with a TPU coated 450D recycled polyester front panel.
- + Multi-position trolley handle for easy 2- and 4-wheel hauling
- + Oversized 70 mm dual spinner wheels with aluminum reinforcement provide impressive rolling performance
- + Convenient external access to a 3-1-1 toiletry pocket
- + #10 YKK dual locking zippers on main compartment (TSA lock sold separately)
- + Top and side grab handles

INTERIOR FEATURES

- + Large front panel pocket allows for easy access to a laptop, magazines, electronics and other small items
- + Padded laptop sleeve, fits up to most 16" laptops
- + Front panel interior zippered mesh and stretch organisation pockets with key clip
- + Main compartment zipper expansion provides an additional 5L of packing capacity*
- + Internal main compartment mesh divider keeps clothes and other contents in place
- + Under panel zippered mesh pocket for convenient packing of under garments, socks or other small items
- + Less is more, clean unlined interior allows for more room for packing

* May exceed carry-on restrictions when expanded

Carry

- + Multi-position trolley handle for easy 2- and 4-wheel hauling
- + Stable, dual tubing chassis made from aircraft grade 6061 aluminum alloy
- + Oversized 70 mm dual spinner wheels with aluminum reinforcement provide impressive rolling performance

Transporter Wheeled Duffel

The Transporter Wheeled Duffel can handle anything the world throws at it. It is the perfect solution for travelers who require luggage that never lets them down. When the load gets too heavy to shoulder, this bag's rolling prowess proves its mettle.

Key Attributes

RELIABLE PROTECTION

Rugged HighRoad Chassis, dual-sided TPU coating, burly hardware, oversized flap and design details that protect your gear from external elements.

GEAR HAULER

A workhorse duffel with a carry system that won't weigh you down, no matter the load.

HIGHROAD CHASSIS

A rugged chassis with large wheels for a smooth roll over any surface: cobblestone streets, gravel roads, carpeted airport terminals or icy sidewalks.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Transporter Duffel

These packs are at home in the beds of dusty and dented pickup trucks, tied to yaks on faint footpaths, under your bed or in your garage and everywhere in between. From loading a few racks of cams for trips to the creek, organizing your gear library at home or packing for the biggest trip of your life, the Transporter Series will take you there and bring your gear back safe.

Key Attributes

RELIABLE PROTECTION

Dual-sided TPU coating, burly hardware, oversized flap and design details that protect your gear from external elements.

GEAR HAULER

A workhorse duffel with a carry system that won't weigh you down, no matter the load.

TUCKAWAY HARNESS

Deployable backpack harness with sternum strap tucks away when not in use.

CONVENIENT ACCESS

Duffle-style opening provides large, easy access and ensures zipper durability. Heavy duty #10 YKK zipper glides easily and is protected by an oversized rain flap.

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

Daylite Travel

NEW

UPDATED

NEW
COLOUR

From wheeled duffels to carry-on travel packs, the Daylite Travel Series is made for life on the go. Whether exploring around town, getting away for the weekend or setting off on an extended road trip, these versatile travel and luggage pieces are along for the ride. Supremely versatile, priced approachably and sustainably crafted from bluesign® approved recycled materials.

**Daylite Travel**

Daylite Travel

Key Attributes

LIGHTWEIGHT & DURABLE

Constructed with up-spec'd fabrics and materials that balance durability with weight, Daylite Travel is designed to keep up with every mile of your journey without feeling bulky.

TRAVELS WITH EASE

With premium hardware on wheeled luggage, like a custom buttonless handle and upgraded wheels, comfortable AirScape backpanel suspension for travel packs and padded, structured bottoms for duffels, Daylite helps you travel without a hitch.

COLLAPSIBLE FOR CONVENIENCE STORAGE

Wheeled pieces feature a patented spring frame, allowing them to collapse for storage and transportation.

HIGHLIGHTS

- New colours
- New Wheeled Duffel 115L and Travel Pack 35L
- Redesigned wheeled duffels, travel packs and duffels

**Excluding Daylite Accessories*

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Daylite Wheeled, Daylite Travel Pack, and Daylite Duffel fabric sections and on individual product hangtags at the point of sale.

Daylite Accessories

Key Attributes

EVERYWHERE ORGANISATION

Often, the best solution is the simplest one. Putting convenience and versatility first, Daylite Accessories make it easy to stay organised wherever life takes you.

PRACTICAL DESIGN

Laptop sleeves with an easy-to-load, vertical orientation and soft-touch lining to protect your devices. A Powerhouse cable/electronics organiser to tame the tangle. Airy, ventilated packing cubes and stuff sacks that air out your clothes or gear while keeping you organised. Daylite Accessories make organisation accessible.

HIGHLIGHTS

- Brand new assortment within the Daylite Family
- Value-forward, competitive pricing

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

View additional details about the sustainable fabrics included in this product in the Daylite Accessories fabric section and on individual product hangtags at the point of sale.

A woman wearing a green cap, sunglasses, a grey long-sleeve shirt, a pink bandana, and tan pants stands on a grassy mountain ridge. She is holding a bright orange Osprey bag. In the foreground, a large purple backpack is visible. The background features rugged, rocky mountains under a sunset sky with soft, golden light.

Travel Accessories

PACK | PROTECT | ORGANISE

Introducing Osprey's comprehensive line of accessories for every traveler on any trip — destination: anywhere. Whether it's keeping your folded shirts neat or storing your filthy, smelly shoes separate from your pressed pants, these pieces make every step of your journey easier, leaving you with room for what really matters — memories.

Key Attributes

ULTRALIGHT PACKABLES

Easy-to-carry accessories for every trip, featuring taped seams and coated fabric. Self-stows in a built-in storage bag.

PACKING ORGANISATION

Small, ultralight, water-resistant packables to help you organise and protect valuables.

TRAVEL CUSTOMISATION

Customise your pack for easy identification and secure your checked piece for maximum protection.

- bluesign® approved main body fabrics
- 100% recycled main body fabrics
- DWR made without PFAS

Outdoor Accessories

PACK | PROTECT | ORGANISE

Backpacks are just the beginning of the journey. We make gear-carrying solutions — big and small. Before your gear ends up in a pack, these smartly designed accessories allow you to pack more efficiently, stay better organised and find and grab the gear you need when you need it.

Photo | Dan Holz

Key Attributes

ORGANISATION

Lightweight, coordinated items to organise your travel

PROTECTION

Smart solutions to protect your belongings, toiletries and checked bags

CONVENIENCE

Deploy extra space when you need it

**Excluding UL Stuff Tote, UL Stuff Waist Pack, HiVis Commuter Raincover*

Our holistic approach to sustainability uses high quality materials to lower our impact on the environment, promote a safe chemical process and care for the people in our supply chain.

[View additional details about the sustainable fabrics included in this product in the \[PRODUCT SERIES\] fabric section and on individual product hangtags at the point of sale.](#)

Hydraulics, Redesigned

A BRAND-NEW USER EXPERIENCE

From the handle to the hose and baffles to the bite valve, we thought through every interaction and aspect of our Hydraulics design to identify opportunities for a better user experience—redesigning, reshaping and updating to create our best reservoir series yet.

NEW HYDRACLIP
RESERVOIR HANGER

NEW OPENING DESIGN

NEW ERGONOMIC HANDLE

NEW BAFFLE & BACKER PLATE
(2 L & 3 L)

UPDATED MAGNET SYSTEM

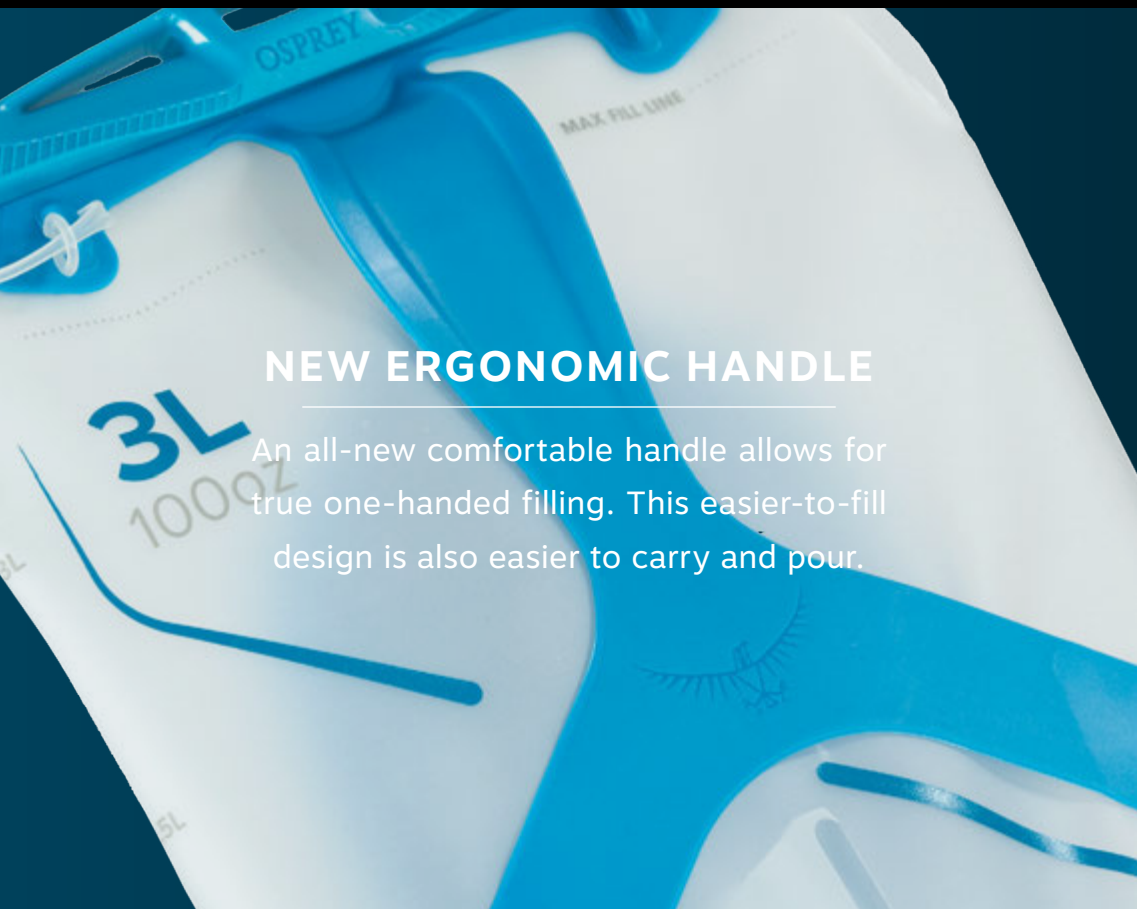

NEW BITE VALVE

PLUS:

- + Updated Hose
- + Updated Exit Port
- + Repositioned Quick Connect

PHOTO: TIM MARSHALL

[RESERVOIR DESIGNS PATENT PENDING]

NEW ERGONOMIC HANDLE

An all-new comfortable handle allows for true one-handed filling. This easier-to-fill design is also easier to carry and pour.

NEW BITE VALVE

An all-new compact bite valve preserves excellent water flow in a smaller package. Equipped with a new on/off lever that is thumb-operable and easy to regulate with one hand.

NEW OPENING DESIGN

A brand-new compact Slide-Seal™ opening allows for one-handed filling, removes bulkiness, slides into packs easier and seals securely. Our new HydraClip reservoir attachment seamlessly integrates with this new opening design.

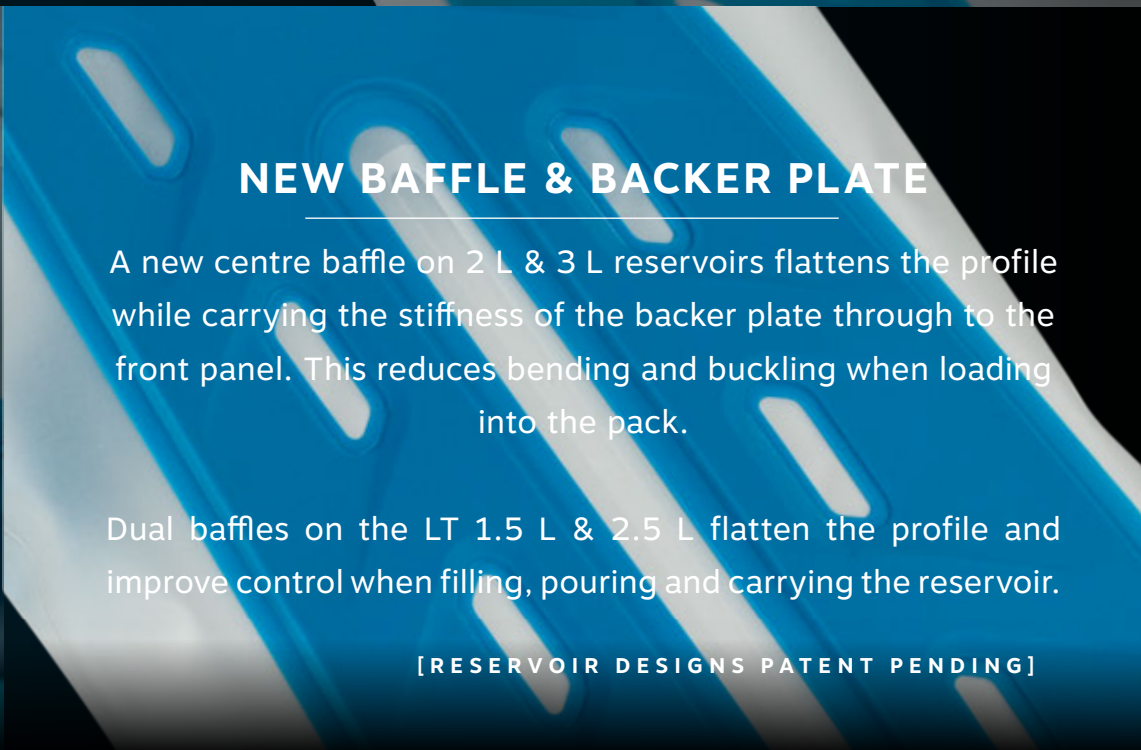

UPDATED MAGNET SYSTEM

All parts in this system, including the magnet, sternum slider and sternum buckle, have been updated to ensure a more secure hose capture.

NEW HYDRACLIP

An all-new thoughtfully designed reservoir attachment clip that is intuitive to operate and integrates seamlessly with current and past season reservoirs.

NEW BAFFLE & BACKER PLATE

A new centre baffle on 2 L & 3 L reservoirs flattens the profile while carrying the stiffness of the backer plate through to the front panel. This reduces bending and buckling when loading into the pack.

Dual baffles on the LT 1.5 L & 2.5 L flatten the profile and improve control when filling, pouring and carrying the reservoir.

Suspension Glossary

Suspension is a system of frames, stays, backpanels, load lifters, hipbelts and harnesses that connect the pack to the wearer.

Suspension systems serve dual purposes: first, effectively transferring the weight of the gear carried to the appropriate structures of the human body; second, the suspension allows the wearer to move freely and naturally with the pack instead of against it when hiking, mountain biking, running or scrambling. It takes the right combination of design and fit to develop a suspension system that allows the user to feel unencumbered.

3 **HARNESS / HIPBELT >**

4 **FRAME >**

5 **FRAMESHEET / STAY >**

6 **LOAD RANGE >**

SUSPENSION GLOSSARY

1 Suspension Categories

3 PILLARS OF FIT

TORSO LENGTH

Pack size is based on torso length.

HIPBELT

The hipbelt size and fit affects how the load transfers from the pack and carries on the hips.

SHOULDER STRAP

The harness size and/or length of the strap affects how the pack stabilizes and wraps around the shoulders.

> **FIXED SUSPENSION**
NO adjustment

A fixed suspension pack relies solely on sizing (S, M, L) for fit. There is no adjustability within the pack. These packs tend to be lighter in weight or of smaller volumes designed to carry lighter loads.

> NO adjustment

> NO adjustment

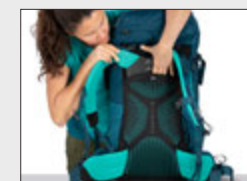

> NO adjustment

> **ADJUSTABLE**
SOME adjustment

Adjustable packs allow you to make some sizing adjustments to the torso length and/or hipbelt. These packs are usually mid-range in volume and weight.

>

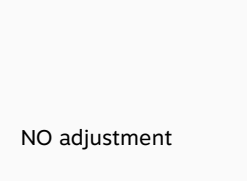

TORSO LENGTH ADJUSTABLE HARNESS

>

FIT-ON-THE-FLY HIPBELT
*included on select styles above

>

NO adjustment

> **CUSTOM FIT**
MOST adjustment

Custom-fit packs are designed to be fine-tuned to the individual. All three sizing components of the pack—torso length, hipbelt and shoulder strap—can be customised to accommodate individual body shapes and sizes. These packs tend to be mid-range to larger volume and are ideal when a more supportive carry is necessary.

SUSPENSION GLOSSARY

2 Backpanel

**AIRSCAPE**

We set a new standard in the industry with our lightweight mesh-covered 3D-foam backpanels. They keep the pack's weight close to your body for stability, provide cushioning and additional ventilation for a comfortable gear-carrying experience. The AirScape backpanel accomplishes this and more on both our large gear-hauling and lightweight technical packs.

**ANTIGRAVITY**

3D-suspended mesh contours and maps the parts of the human body it contacts. Seamless suspended mesh from the shoulder blades to the lumbar area continues into the hipbelt to disperse and balance the load like nothing ever has before.

**AIRSPPEED**

3D-suspended mesh eliminates foam backpanel material and prevents a sweaty back. The lightweight mesh is shaped and contoured to allow maximum airflow, optimal tension and load-carrying comfort that sets Osprey apart from other similar but less effective backpanel designs.

SUSPENSION GLOSSARY

3 Harness / Hipbelt

The harness and hipbelt are key contact points with the pack user, working with the backpanel to securely carry the load and transfer the weight to the shoulders and hips.

LOAD LIFTERS

These stabilize the load close to the back.

ERGOPULL

A cross-body pull effectively tightens the hipbelt.

INTERCHANGEABLE HARNESS & HIPBELTS

INTERCHANGEABLE CUSTOM-MOLDED

The Bioform and Isoform interchangeable harness and hipbelt can be removed and replaced with a different size to create a custom-fit pack. Interchangeable CM. hipbelts are custom-moldable in your retailer's Osprey custom-molding oven.

TIP: When replacing a hipbelt, it should always go in the pack "smiling."

FIT-ON-THE-FLY HARNESS & HIPBELTS

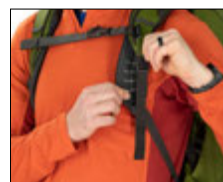

FIT-ON-THE-FLY HIPBELT

A fixed hipbelt with pads that can extend the length of the hipbelt to offer adjustability and accommodate different waist sizes.

CUSTOM FIT-ON-THE-FLY HIPBELT

A custom-fit, fully adjustable in-pack hipbelt that extends from the lumbar, allowing incremental length and angle adjustments for a precise fit and broader fit range.

FIT-ON-THE-FLY SHOULDER STRAP

A custom-fit, adjustable in-pack shoulder strap that allows incremental length and angle adjustments for a fine-tuned shoulder wrap and precise fit.

SUSPENSION GLOSSARY

4 Frame

A LightWire or tubular aluminum frame runs along the outside of the backpanel connecting the upper load lifters and the central core of the pack to the hipbelt to transition and spread the load. Allowing natural torsional movement, adjustable torsos, and varied load ranges and backpanel builds makes this suspension design truly innovative.

5 Framesheet/Stay

Effectively spreads and transitions the load across the entire body to the harness and hipbelt. It provides protection from objects in the pack poking you in the back and creates shape for the backpanel. With different material and stay options, we can make sure each individual pack has the right load carry for its intended use.

6 Load Range

Not an exact science but a combination of torso sizing, hipbelt sizing and stiffness, harness sizing and stiffness, frame type, framesheet type, stay type and intended use. Load range will vary based on the user, their experience, bone structure, body fat/muscle mass and their perception of comfort. Load ranges provide a starting point to help you determine what level of comfort you can expect from our packs given a specific load. This makes it easy to compare multiple packs and make the right decision for you based on the amount of gear you plan to carry.

Women's-Specific Fit

True function and comfort with style. We have over 20 years of experience designing packs just for women.

PACK SHAPE

The pack's shape is patterned to be more narrow with added depth in the right places. This allows greater freedom of movement and increases stability by lowering the position of the load to a more optimal centre of gravity. As a result, the load is more proportionately supported on the hips and along the structure of the back.

HARNESS

The shoulder harness is designed with thoughtful angle changes and varying padding thickness that anatomically fits a woman's neck, shoulders and chest. This design acknowledges where the load is carried on the body and the padding selected is chosen for increased comfort when carrying heavy loads. Our sternum strap is a key feature that equalizes pressure across the shoulder harness.

HIPBELT

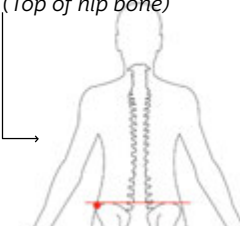

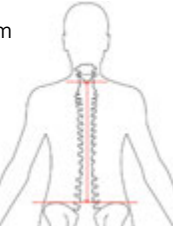

The hipbelt is designed with thoughtful angle changes and varying padding thickness for an anatomical fit. It is narrower in height for better comfort so it doesn't dig into the ribs or upper thighs when scrambling or climbing. Most importantly, women's hips are more conically shaped with a larger difference between the waist and hip measurements; we sculpt and angle our hipbelts accordingly for comfortable load transfer and optimal support. The padding selected is chosen for increased comfort when carrying heavy loads.

SIZING & FIT

Sizing Overview

MEASURING A CUSTOMER

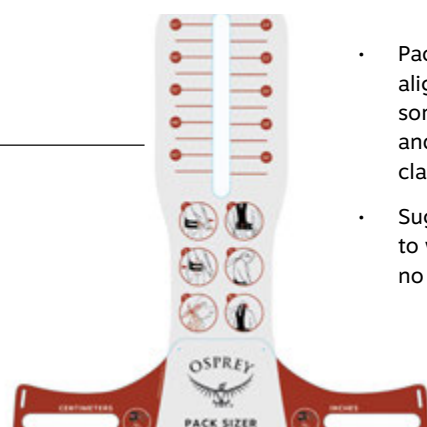

<p>1 Find iliac crest. (Top of hip bone)</p> 	<p>2 On back of neck, find C7 vertebra.</p> <p>Touch your chin to your chest and feel for the large protruding bone at the base of your neck.</p> 	<p>3 Measure from C7 vertebra to the iliac crest to determine torso length.</p> 
--	---	---

WOMEN'S-SPECIFIC FIT

- + Shorter torso length
- + Narrower, shorter harness with curves designed to accommodate most women's necks, shoulders and chests
- + A hipbelt designed to wrap naturally around the curves of a woman's hips, offering better load stabilization and support

OSPREY PACK SIZER

TORSO LENGTH
inches/centimeters

- Pack sizing does not necessarily align with our clothing size. This is sometimes confusing for customers and the Osprey pack sizer can help clarify the fit conversation.
- Suggest clothing that is equivalent to what they may wear backpacking: no extra jackets, belt buckles, etc.

HIPBELT SIZE
inches/centimeters

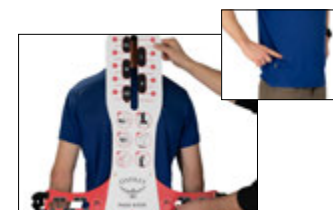

LOCATE SIZE LABEL ON PACK

A customer's measurements may correlate to various pack sizes depending on the model/style of the pack. Osprey technical backpacks have a sewn-in label on the bottom seam of the frame that lists the pack's size and torso range.

Many Osprey packs are available in multiple sizes to fit a range of torso lengths. To determine measurements, use an Osprey Pack Sizer.

INSTRUCTIONS FOR MEASURING WITH A PACK SIZER

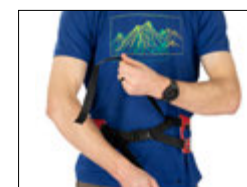

1 IDENTIFY THE CUSTOMER'S ILIAC CREST

Top shelf of hipbone.

2 CENTRE AND PUT ON PACK SIZER

Have the customer put on the pack sizer, aligning it to the centre of their back with the buckle over the belly button. The majority of the time, the hipbelt component of the pack sizer will naturally wrap over the iliac crest. Double check by having the customer touch the top of their iliac crest through the window in the sizer. If they can't, adjust accordingly.

3 TIGHTEN HIPBELT STRAPS

Make sure the customer pulls the hipbelt straps evenly so the fit tool is centred on the back and the buckle is centred with the same amount of webbing on each side. NOTE: Some customers may feel self-conscious about pulling the hipbelt tight. Emphasize that the hipbelt should be tight enough to carry heavy loads.

4 LOCATE C7 VERTEBRA

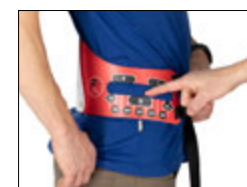

Ask the customer to stand up straight and look down at their toes. Be sure they are bending at their neck, not their back or waist. Locate the C7 vertebra, the large protruding bone at the base of the neck. The C7 is not always obvious; if not, look for where the trap muscles meet at the back of the neck.

5 MEASURE TORSO

Once you locate the C7, have the customer look "forward" NOT "up." Suggest they look "down the trail" or choose an item in the room that is in front of them about 10-20 feet away on the floor.

The torso measurement is the starting point for selecting a pack size. Inform the customer of their sizing by inches/cm. so they know their exact measurements and can choose the correlating pack size. This is helpful if they try on various models/styles.

6 LOCATE ILIAC CREST & MEASURE HIPBELT

Next, locate the iliac crest through the hole in the hipbelt on the sizer. If the iliac crest is hard to locate, a pant leg seam that runs along the median line of the body is a good visual cue. The hipbelt measurement is a secondary measurement and can determine if the customer may need a pack with an adjustable hipbelt.

SIZING & FIT

Backpack Fit

1. POSITION THE PACK

Completely loosen the pack's hipbelt, harness and load-lifter straps. Load the pack with 10-20 lbs./4-9kg. of gear. Put on the pack and make sure that the hipbelt is centered and rests over the user's hipbone. The hipbelt padding should sit halfway above and below the hipbone.

2. BUCKLE HIPBELT

Buckle and tighten the hipbelt using Osprey's signature cross body ErgoPull.

3. HIPBELT ADJUSTMENT

If the hipbelt is too large or does not offer the preferred amount of coverage around the hips, it may need to be adjusted. Depending on the pack style, the user may need a different size, different model, different-sized interchangeable Custom Fit hipbelt or an adjustment to Osprey's Fit-on-the-Fly hipbelt (imaged left).

4. TIGHTEN HARNESS

Tighten the shoulder harness straps by pulling them down and back.

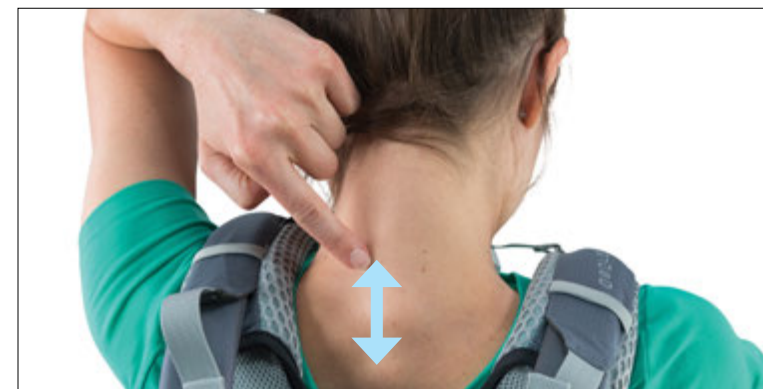

5. TIGHTEN LOAD LIFTERS

Tightening the load lifters will pull the pack close to the wearer's body to help stabilize the load. If the torso length on the pack is adjusted correctly, the load lifters will sit at an angle between 30-60 degrees and align naturally with the shoulder straps.

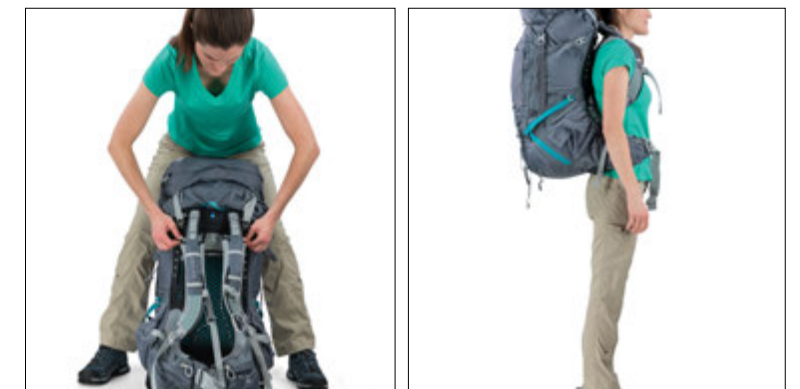

6. CHECK HARNESS FIT

The harness straps should wrap fully around the shoulders with no gaps between the pack and back. The padded part of the harness straps should end at 2"/5 cm. or more below the armpits without topping out and the sternum strap adjusted to approximately 2"/5 cm. below the collarbone.

7. CHECK TORSO LENGTH

Locate the harness yoke – this is where the harness straps come together near the base of the user's neck. Locate the C7 vertebra – the large protruding bone at the base of the neck. The user should stand up straight and look down at their feet. Once the C7 vertebra is located, the user should look forward or "down the trail." The yoke should be 1"/2.5 cm. - 2"/5 cm. below the C7 vertebra.

8. HARNESS TORSO LENGTH ADJUSTMENTS

If the distance is more or less than 2"/5 cm. from the C7 vertebra, and the pack features an adjustable harness, lengthen or shorten the backpanel and check the fit again. If after making adjustments, the harness is too small or large, consider a custom-fit pack with interchangeable components.

SIZING & FIT

Trail Running Vestpack Fit

1. POSITION THE PACK

This pack anchors to the rib cage to prevent unwanted bouncing. To do this, it needs to sit higher on your torso than a typical hiking pack. When first putting on your pack, make sure the top of the pack sits just below the base of your neck.

2. POSITION DUAL CHEST STRAPS

Buckle both sternum straps, leaving the webbing a little loose for now. The top chest strap should be positioned 1-2"/2.5-5 cm. below the collarbone. The bottom chest strap can be moved up toward the middle of the harness to accommodate free and easy breathing; however, keep it down low if pack stability is your primary concern. For women, adjust the chest strap position so that it fits comfortably and keeps the pack snug.

3. TIGHTEN CHEST STRAPS

Before tightening the chest straps, make sure you have completely loosened the under-arm side body straps on each side of the pack. With the chest strap positioned appropriately, pinch the end of the webbing with your thumb and index finger and pull the strap until the tension pulls the strap from your grasp. This helps avoid over-tightening the pack. Make small adjustments as necessary to ensure a secure fit.

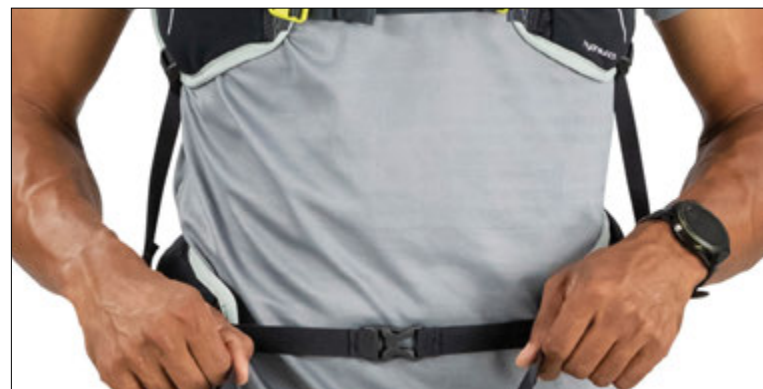

4. TIGHTEN SIDE BODY STRAPS

Pull the side body straps that connect the harness and pack under each arm. This will pull in the lower portion of the pack against the body and snug the pack around your rib cage. Double-check the chest harness strap positioning and tension to ensure optimal fit, comfort and stability.

5. TIGHTEN SHOULDER HARNESS STRAPS & HIPBELT (DURO/DYNA 15)

Cinch the harness to hipbelt strap after fitting the chest straps. Then, buckle and tighten the hipbelt buckle. It is not as important to place directly over the iliac crest (hip bone) as the weight is being supported by the shoulder harness.

6. RESERVOIR HOSE MAGNET PLACEMENT
