

# AUTUMN WINTER 2025/2026

**SILVINI**<sup>®</sup>

TECHNICAL  
SPORTSWEAR

We design and manufacture professional cycling and ski apparel for maximum performance and comfort. We focus on various styles of cycling, from road & gravel, MTB & enduro to urban and offer wide selection for skiers: cross-country, ski touring, outdoor and lifestyle.

®

We put great emphasis on technology. We believe in research and development of materials and innovations that enable cyclists and skiers to rise to the top. We make all our clothing from carefully selected materials, taking into account the specific form of both sports.

The birth of SILVINI was led by Jessie and Dušan, who invited their friends Jan and Claudio to join them. Although we come from different parts of the world, we are united by our passion for sport and our desire to produce sportswear that combines perfect functionality, original design and uncompromising comfort. And so, in 2009, SILVINI was born — a Czech brand based in the heart of Europe with an international reach.

SILVINI CREW

The right clothing is essential for successful cross-country skiing. It requires functional materials that are breathable, lightweight, and wind-resistant. In our XC SKIING collection, we prioritize tried-and-tested fabrics such as Softshell Light and Quatroflex Shell, which are used throughout the entire range. These materials offer excellent protection against harsh weather while their anatomically shaped design ensures freedom of movement, enhancing both your comfort and performance on the skis.

KEEP CALM, XC SKIING ON

**FOR MAXIMUM  
PERFORMANCE  
AND ADVENTURE**

SPOTTED BY MOUNTAINS

**WINTER SILENCE AND  
PEACE. JUST YOU  
AND THE MOUNTAINS...**

...and the weather, which can change in an instant. Snow, frost or sunny weather. Whether it's extreme cold or unexpected snowfall, our Ski Touring products will ensure you comfort and protection, with an emphasis on breathability, resistance to harsh weather and freedom of movement. Weight and compactness are key factors to meet all demanding challenges. We solved these complex tasks in cooperation with top textile manufacturers who have extensive experience in the field of material development with focus on extreme conditions and ecology. Our SASSOLUNGO jacket and FISCALINO vest use a combination of Pertex® Quantum NetPlus® and PrimaLoft® Active Evolve recycled materials.

# SKI TOURING

24-39

:PERTEX:  :

# NETPLUS® MATERIAL IS MADE FROM 100% POST CONSUMER RECYCLED FISHING NET.

PERTEX. WEAVING HIGH-PERFORMANCE  
FABRICS FOR OUTDOOR PEOPLE SINCE 1979.

**100%**

Recycled fishing nets

**68%**

Energy reduction

**67%**

Fossil fuel reduction

**20%**

GHG emission reduction

**70%**

Water reduction

**100%**

Traceable supply chain

The Pertex NetPlus collection is supporting cleaner communities and ocean by diverting an existing waste stream. By replacing new plastics with post consumer recycled NetPlus, we are able to prevent a harmful waste and reduce the need to extract fossil fuels.

Through this collection we are working to set an industry standard for the way recycled materials are used, continuing to push forward with a positive impact approach to sourcing the materials required to make our products.

#### PROTECTS ENVIRONMENT

Prevents the most harmful form of plastic pollution, fishing nets, from entering the ocean environment.

#### EMPOWERS COMMUNITY

Allocates funds to partnering nonprofits to improve quality of life for communities, supporting an ethical supply chain that benefits all shareholders.

#### 3RD PARTY VERIFIED

A robust, proven supply chain that is third-party audited and GRS certified for material traceability.

OUR NEW GENERATION

## KEEP IT FUN & FUNCTIONAL

Windproof and warm materials, modern colours, reflective elements and attention to comfort – all these features characterise our winter kids' collection, which can be enjoyed during various winter sports and outdoor activities.

THE COLORS AND SCENTS OF AUTUMN  
FROM THE SADDLE OF A BIKE

## ENJOY YOUR CYCLING ADVENTURE TO THE FULLEST

The autumn cycling collection is based on reliable products that should not be missing in your equipment. Thanks to them, you don't have to worry about unpredictable weather and you can go for a ride with the confidence that you will stay dry and warm throughout the day. Be the master of the situation and take advantage of all the possibilities that our autumn collection offers you.

# LOVE FOR DETAIL

# MATERIALS

Very strong material excellent in its resistance to abrasion. It is a two-layer material that substitutes real leather. Brushed synthetic leather is breathable and treated by sanding technology. Surface is brushed which ensures soft and pleasant look.

Light, quick-drying material, which thanks to its porous texture, wicks away sweat perfectly. It is a mesh material that is pleasant to the touch and also does not absorb water.

It is a synthetic filling material made of hollow fiber, which is very easy to maintain and has good heat-insulating properties. The material is very soft and light.

Very strong and durable woven material. It is waterproof and keeps its shape, has good thermal insulation properties. This fabric is known for its durability even when exposed to wear and tear.

Pertex® is a certified, extremely light material with many advantages. Pertex® Quantum fabric is recycled material, which is precisely made from incredibly fine yarns and is designed to trap still air and improve insulation performance. A durable water repellent (DWR) finish repels light rain and snow and provides additional weather protection.

Insulated material with combed inner side, effective for sweat drainage and thermal insulation. It has high thermal calorific value and adaptability in movement.

Durable three-layer material with membrane with parameters: Water column: 20,000 mm, Breathability: 20,000 g/m<sup>2</sup>/24h. It is suitable for extreme windy and rainy conditions even during active movement thanks to its excellent breathability. At the same time, the membrane protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

Evolve Insulation Active

It is a synthetic warm lining with the properties of Primaloft®. It's advantages are extreme thermal insulation properties and excellent breathability. Compared to other synthetic fibers, it is characterized by great lightness, softness and compressibility.

Gold Insulation Active

It is a synthetic filling material that is very easy to maintain. It's advantage is extreme heat-insulating properties. Compared to other synthetic fibers, Primaloft® repels water and is characterized by great lightness, softness, compressibility and the ability to return to its original shape. Primaloft® Gold ensures the highest possible insulation and thermoregulation.

Silver Insulation Active

It is a synthetic filling material that is very easy to maintain. It's advantage are very good heat-insulating properties. Compared to other synthetic fibers, Primaloft® repels water and is characterized by great lightness, softness, compressibility and the ability to return to its original shape.

Insulated material with combed inner side, effective for thermal insulation and improvement of body thermoregulation. It is a light fabric that wicks away moisture from the body, has great thermal conductivity and adaptability in movement.

Elastic three-layer material with membrane and parameters: Water column: 10,000 mm, Breathability: 20,000 g/m<sup>2</sup>/24h. It is suitable for windy and rainy conditions even during active movement thanks to its excellent elasticity. At the same time, the membrane protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

Elastic three-layer material with a membrane with parameters: Water column: 10,000 mm, Breathability: 10,000 g/m<sup>2</sup>/24h. It is suitable for rainy conditions, at the same time it protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

Elastic three-layer material with a membrane with parameters: Water column: 10,000 mm, Breathability: 15,000 g/m<sup>2</sup>/24h. It is suitable for wind and rain even during more active movement thanks to good breathability. At the same time, the membrane protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

Four-way densely woven, elastic material, partly water-resistant, which adapts to the figure and allows freedom of movement. It excels in its good breathability and retainability to its shape. It is wind resistant, which prevents from unwanted heat leakages.

Four-way densely woven, elastic material, partly water-resistant, which adapts to the figure and allows freedom of movement. It excels in its good breathability and retainability to its shape. It is wind resistant, which prevents from unwanted heat leakages.

Light, four-way elastic material that adapts to the figure and allows freedom of movement. It excels in its excellent breathability and retainability to its shape, it has good thermal insulation properties. The material does not have a combed inner side and is soft to the touch.

Elastic three-layer windproof material made of light fabric which adapts to the figure. It is slightly water-repellent and thus protects the user against the penetration of wind into the lower layers of clothing and thus prevents from unwanted heat leakage.

Lightweight, quick-drying, woven material with high breathability that flows down the body. The material is very strong, but at the same time thin and has a long lifespan.

Woven, quick-drying material with high breathability that allows freedom of movement. The material is very strong, but at the same time flexible and has a long lifespan.

Woven, quick-drying material with high breathability that prevents from wind penetration into the lower layers of clothing and thus prevents from unwanted heat leakage. The material is very strong, but at the same time light and has a long lifespan.

A world-famous Japanese brand of zippers of the highest quality and perfect workmanship. The zippers do not get stuck and have a long lifespan.

# SILVINI CREW

We prepare the collections and test their functionality and design together with professional athletes.
