VENZO™ FRICTIONLESS FIBER CONSTRUCTION™

Heavyweight - 145 GSM (grams per square meter) for controlled muscle undulation and reduced drag

20MM SUPERSONIC FLEX BONDING

Advanced engineering allows fully bonded seams to conform and stretch with the swimmer's body, resulting in a precisely fitted, ultra compressive suit that won't restrict natural movement.

SURFACE LIFT TECHNOLOGY™

Surface Lift Technology prevents water from permeating the fabric, resulting in higher body position in the water.
