

WORKBOOK

AUTUMN/WINTER 2026

TESTED BY AUSTRALIA FOR 35 YEARS

There are few landscapes more extreme, diverse or remote than Australia. Born from these rugged terrains, Sea to Summit has spent 35 years designing and testing gear to withstand the toughest conditions—here and anywhere on the planet.

Whether your adventure is extreme or laid back, you can trust our gear that's been proven in Australia's harshest environments.

A man and a woman are standing in a desert landscape with tall, dry grass and red soil. The man is on the left, wearing a cap and a dark shirt, holding a cup and a shovel. The woman is on the right, wearing a light blue shirt and dark pants, holding a cup. In the foreground, there is a small campfire with flames. To the right, there are several black folding chairs. The background shows more of the desert landscape with some trees and bushes.

DESIGN COMES FIRST

Sea to Summit, like many globally recognised outdoor brands, began with humble roots. In 1983, at just 17, Roland Tyson began making outdoor gear on an old industrial sewing machine.

Roland's design philosophy was simple: good gear works.

From his home in Perth, Western Australia, he honed his sewing skills, building gear tested on his own adventures. Roland had a unique ability to build products that were simple, practical and reliable—gear that made his travels smoother and more comfortable. Australia's remote Outback and later the Himalayas helped to continually refine the designs.

In 1991, Roland outfitted an expedition from sea level to the peak of Everest, and Sea to Summit as a gear manufacturer was born.

The company truly took shape in 1993, when his partner Penny Sanderson joined him in both outdoor exploration and managing the rapidly growing company.

Today, Roland remains Sea to Summit's chief designer, and the inspiration behind many of its most successful products.

Over the past 35 years, Sea to Summit has evolved, but one thing remains constant: simple, reliable, durable and practical gear remains at the heart of Sea to Summit's success worldwide.

Here's to the next 35 years and beyond.

SUSTAINABILITY

AND OUR JOURNEY TO BE A 'BUSINESS FOR GOOD'

Our love of the outdoors drives innovation, exploration, and adventure. It also compels us to make meaningful steps towards improving our environmental and social impact.

Innovation is at the heart of what we do. A key aspect of that is ensuring our products are built to last and are easily repaired.

The most sustainable product is the one that does not need to be replaced.

We're on a journey to become a certified B Corp, embedding sustainable thinking into every part of our business. This means holding ourselves accountable not only for what we make, but for how we operate - from our supply chain to our community involvement.

When we introduce meaningful lower-impact improvements to our products, we will highlight them as part of our broader, ongoing commitment to being a business for good. These improvements alone don't define our brand or our products.

Transparency and accountability in the steps we take are essential for making real progress and creating lasting change.

OUR COMMITMENTS IN ACTION

PLANET

As part of our Greenhouse Gas (GHG) measurement programme, we've committed to science-based aligned targets for the reduction of carbon emissions and an action plan to meet them.

Our action plan will focus on reducing our GHG emissions through material choices and lower-impact manufacturing techniques, renewable energy, low-emission transport logistics and vehicle electrification.

PRODUCT & PACKAGING

These are the areas where we can make the most direct impact.

As the following pages show, we are committed to increasing our use of recycled and recyclable materials, bluesign APPROVED fabrics, and adopting more sustainable manufacturing practices.

These are important milestones, and they mark just the beginning of our journey.

PEOPLE

It's important that we take care of the people who work for us and work with us.

Working from different locations improves autonomy and collaboration across global teams. Parental leave helps build healthy families. We've implemented both globally.

We continue to work with third-party auditors to confirm our SA8000 Social Accountability Labour Standard-based factory code of conduct throughout our supply chain.

PURPOSE

We support biodiversity conservation and responsible outdoor ethics through non-profit partnerships that preserve the places we play—and access to it.

Some of our partners globally include: Leave No Trace, The Australian Wildlife Conservancy, The Conservation Alliance, European Outdoor Conservation Association, City Kids, Bibbulmun Track Foundation and Munda Biddi Trail Foundation.

IMPACT STANDARDS & CERTIFICATIONS WE SUPPORT

RECYCLED CLAIM STANDARD

- Global, voluntary third-party certification.
- Verifies recycled content and ensures traceability throughout the supply chain.
- Promotes consistent definitions of 'recycled' materials, enabling brands and consumers to make informed purchasing decisions.

SOLUTION DYED

- Traditional dyeing uses water and chemicals in a dye bath to colour fabric, consuming more resources and creating waste.
- Solution dyeing integrates colour at the chip level, reducing water, chemical waste and energy use while enhancing durability and colourfastness.

FOREST STEWARDSHIP COUNCIL & KERBSIDE RECYCLABLE PACKAGING

- The FSC certifies wood and paper products sourced from responsibly managed forests that meet strict environmental, social, and economic standards.
- We use FSC-certified card-based packaging which is also easily recyclable through kerbside collection.

RESPONSIBLE DOWN STANDARD

- Global, voluntary third-party certification.
- Ensures animal welfare and ethical practices in the down and feather supply chain.
- Guarantees traceability, prohibits live-plucking and force-feeding, and supports ethical sourcing and responsible farming practices.

BLUESIGN APPROVED FABRICS

- Swiss-based voluntary third-party chemicals management certification.
- Certifies textiles, ensuring minimal environmental impact and resource conservation.
- Prevents the use of hazardous chemicals, promotes fair labour practices, and ensures transparency and accountability throughout the supply chain.

1% FOR THE PLANET®

- A global movement of people and businesses working together to drive environmental impact.
- One percent of each Revive product supports grassroots organisations focused on protecting biodiversity, endangered ecosystems, and wildlife.

IMPACT STANDARDS & CERTIFICATIONS WE SUPPORT

AUSTRALASIAN RECYCLING LABEL

- Provides clear recycling instructions on packaging, helping consumers dispose of materials responsibly.
- It promotes correct recycling practices, reducing contamination and improving recycling outcomes.

PFAS (PER- AND POLYFLUORINATED CHEMICAL/SUBSTANCES)

- Persistent 'forever chemicals' that don't degrade, causing long-term contamination of ecosystems and water supplies.
- We use non-PFAS chemistry for water and stain resistance.
- Our products contain no intentionally-added PFAS.

AUSTRALIAN PACKAGING COVENANT

- National regulatory framework guiding Australian businesses and governments in reducing packaging waste and improving recycling rates.
- Compliance with APCO ensures our packaging meets strict environmental standards and we share the responsibility for its impact.

FLAME RETARDANTS

- Many flame retardants are persistent 'forever chemicals' that do not break down in the environment, leading to long-term contamination of ecosystems.
- We use durable materials that naturally meet flame resistance standards.

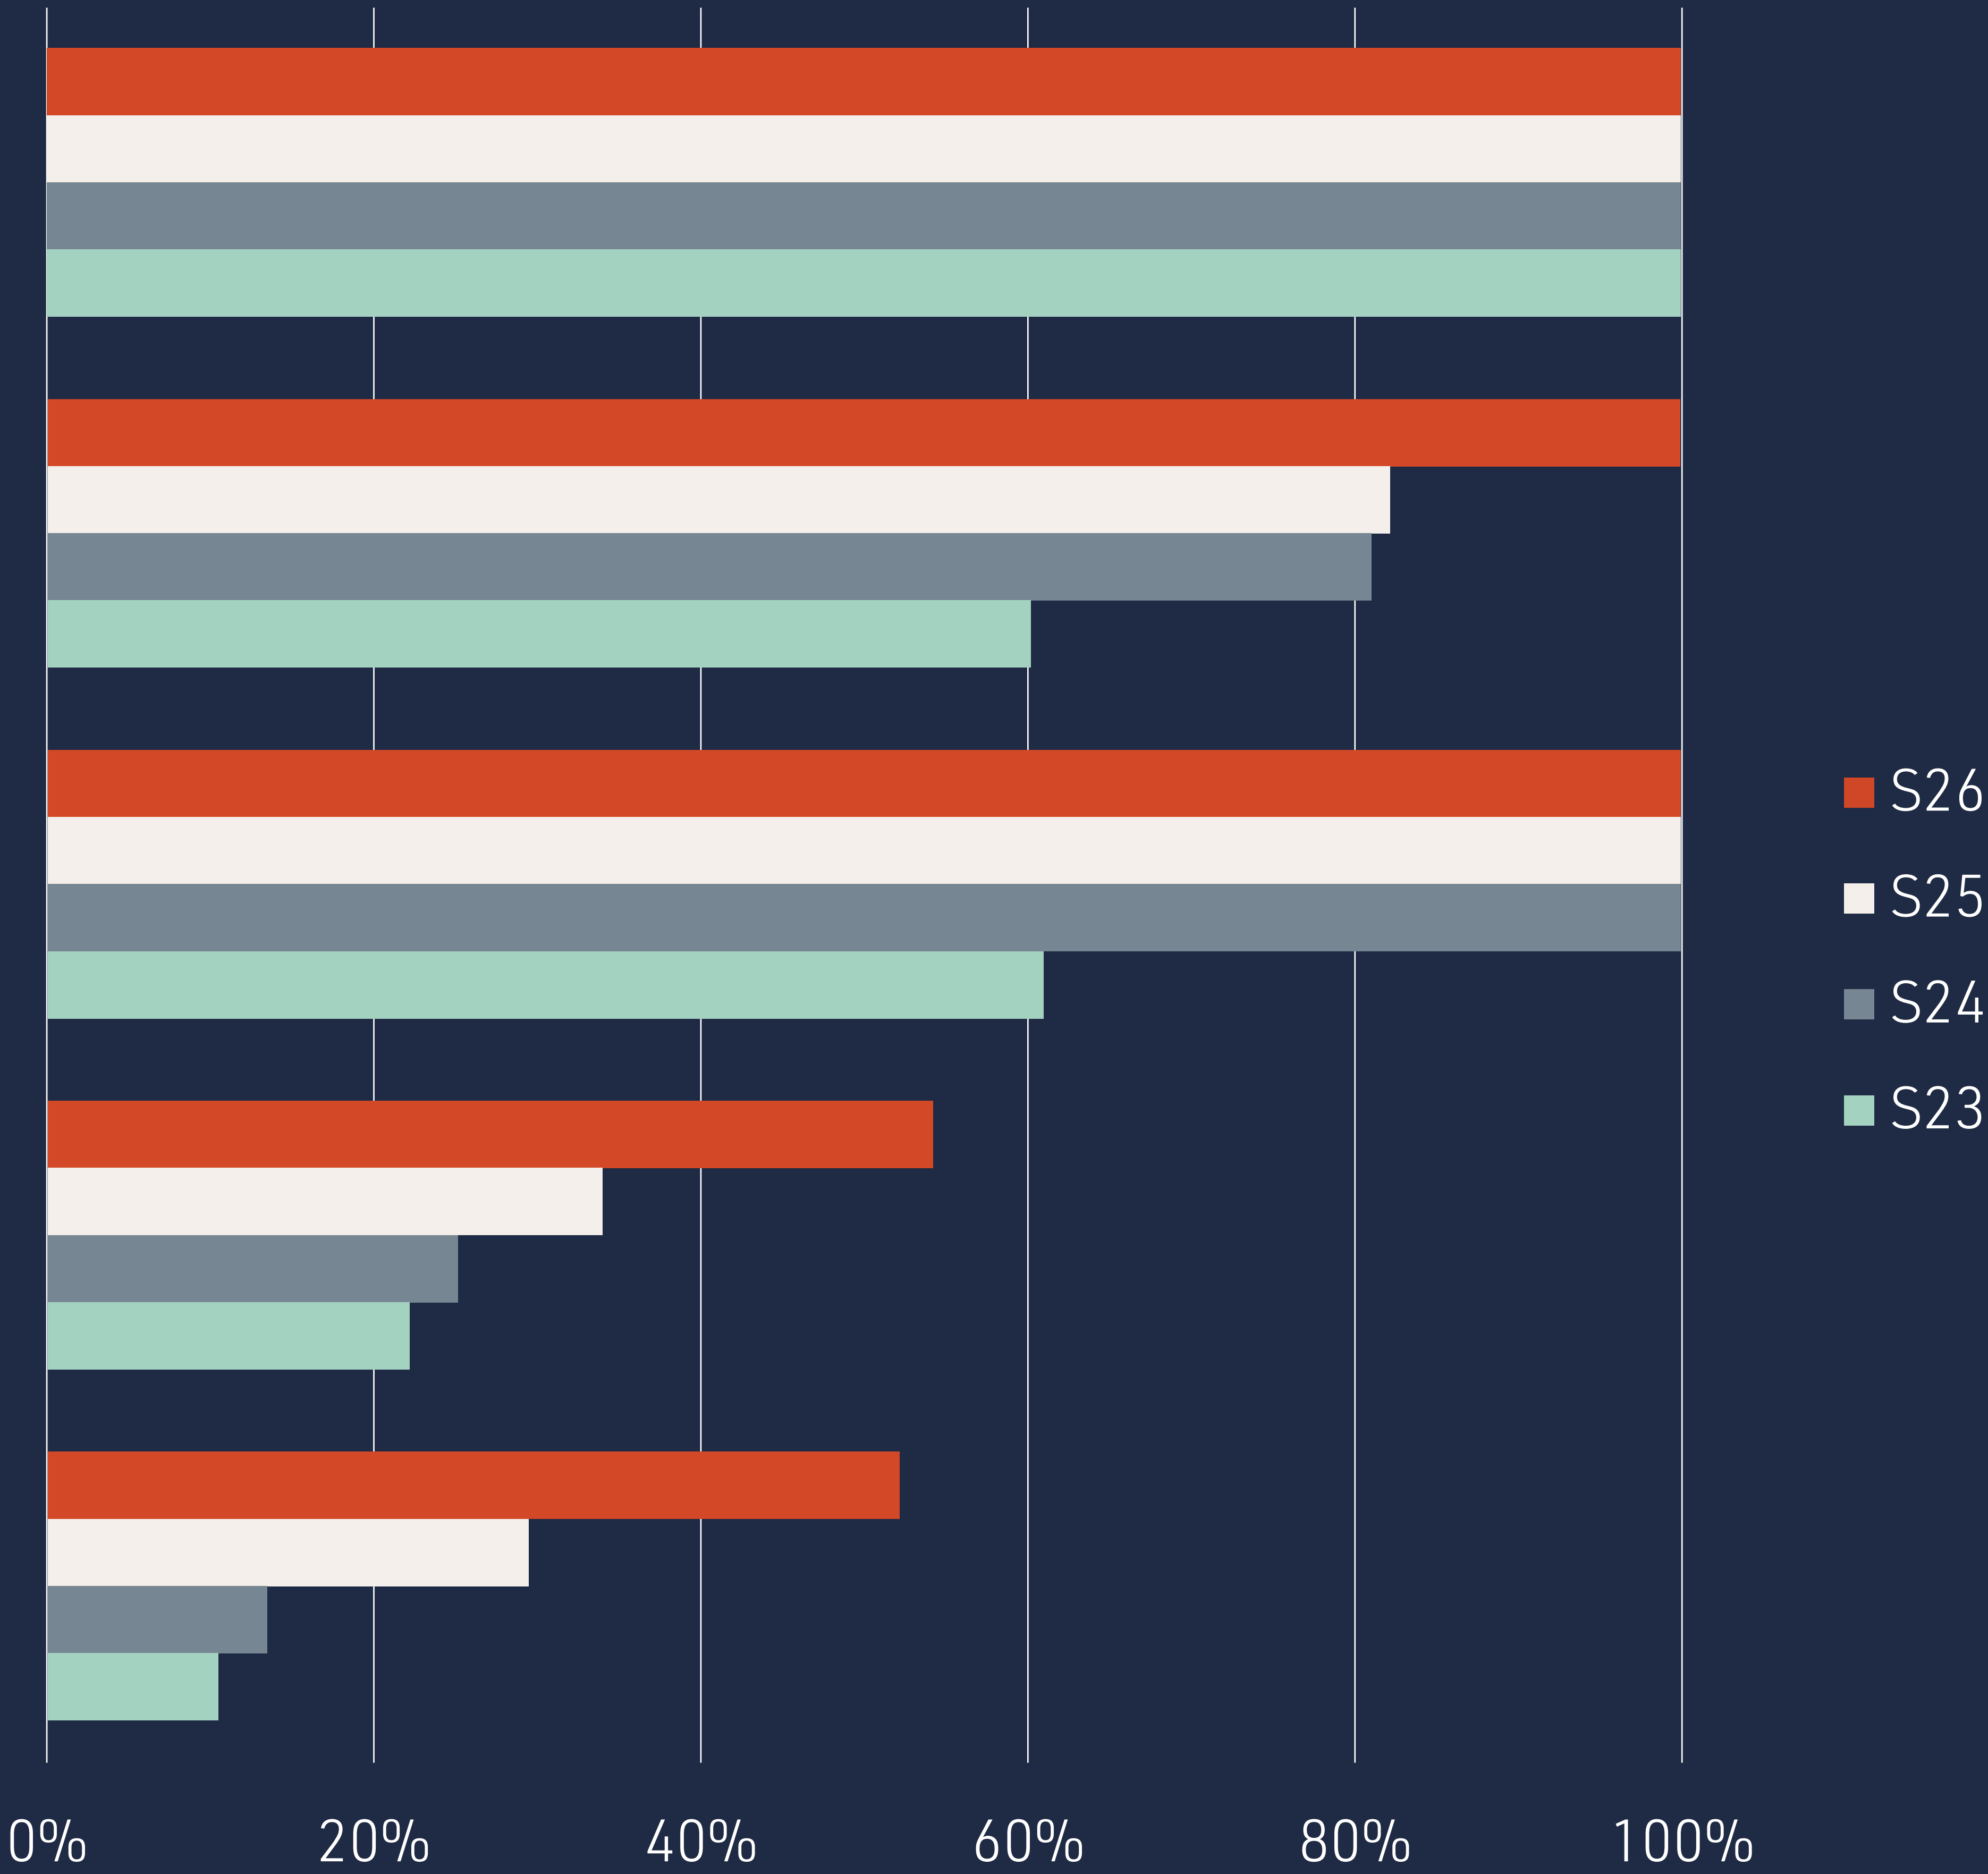

BPA (BISPHENOL A)

- BPA is a chemical commonly used in polymers and is linked to potential health and environmental risks.
- All our food-grade camp kitchen products are made from materials that do not contain BPA.

PRODUCT & PACKAGING

These key indicators reflect our efforts to reduce our impact.
The goal is less—we can all do more.

	AIM	HOW WE ACHIEVE IT
	Ensure animal welfare in our supply chain	Use Responsible Down Standard (RDS) Certified Virgin Down in Sleeping Bags and Quilts
	Reduce packaging waste and choose responsibly sourced materials	Use Forest Stewardship Council (FSC) certified card for packaging, ensuring it is kerbside recyclable
	Reduce chemical use impacts on the environment and human health	Use non-PFAS chemistry
	Reduce chemical use impacts on the environment and human health	Increase use of bluesign APPROVED materials
 	Reduce resource consumption, energy use and waste	Increase use of Recycled Claim Standard (RCS) certified fabrics, Solution Dyeing and other lower-impact manufacturing methods

Graph note: Shown as % of total Soft Goods or applicable SKUs
Graph note 2: S23-S24 non-PFC used, S25-S26 non-PFAS used

WARRANTIES

SEA TO SUMMIT GUARANTEE

We stand behind our products and strive to exceed expectations. For over 35 years, Sea to Summit has designed and built award-winning gear that's continuously tested in the Australian outback and demanding environments around the world. We guarantee our products against manufacturing defects within a reasonable time from purchase—and we strive to keep the claim process straightforward.

Customer satisfaction is our ultimate priority. While we advocate, educate and promote simple care and maintenance to extend a product's usable life, in instances of a manufacturing defect we replace, repair, or provide credit for the item. This is assessed on an individual, case-by-case basis. Put simply, we always do what we know is right to build products and relationships that last.

WHAT'S REASONABLE?

Environmental Wear and Tear

Our products are engineered using quality materials that are specific to the end-use. Normal wear and tear and the breakdown of materials due to age, use, or environmental conditions are not covered under our guarantee.

Accidental Damage

Damage due to improper use or care, accident, or negligence is not covered under our guarantee. However, we always aim to exceed expectations, so we'll look to assist with a functional repair whenever possible.

NEW
IN AW2026

TALUS AND MERIDIAN DUFFLE BAGS

Your Adventure. Your Way

Built for rugged travel and easy packing, these duffles combine expedition-ready toughness with smart organisation. Oversized zips and a wide D-shaped lid give fast access to your gear, while padded bases and reinforced fabrics protect against the knocks of adventure. Switch from hand grip to backpack carry in seconds, and trust recycled, lower-impact materials to deliver durability that goes the distance.

SENTINEL XP TENTS

Liveable. Reliable. Ready.

Goes where other 3-season tents can't. Engineered for 80+ km/h winds and heavy rain, the Sentinel XP combines storm-ready strength with everyday liveability. Vertical walls, smart ventilation and versatile set-ups keep you comfortable from stargazing nights to sealed-tight storms, while DAC poles and a fast-drying Ultra-Sil LS fly ensure a reliable pitch in all conditions.

TRAVEL PILLOWS

From the Terminal to the Trail

Ultralight, packable and designed for upright sleep, Aeros Travel Pillows keep your head supported without pushing it forward. Choose from Ultralight, Premium, or Down comfort options. Durable, quick to inflate, adjustable for firmness, and fast to deflate with the mini XPRESS valve – perfect for travel.

PILLOWS WHAT'S NEW IN AW2026

From the Terminal to the Trail

Comfort means different things to different people. We offer the most comprehensive range of pillows, each crafted for comfort. From ultralight to super plush and from terminals to trailheads - we've got you covered.

PillowLock

Now supplied with every Aeros pillow (excepting Travel pillows), this unique hook-and-loop system keeps your pillow attached to your sleeping mat throughout the night.

Memory Foam Comfort

Built into the non-travel shaped Aeros Premium and Memory Lux pillows, a layer of memory foam takes sleep comfort to the next level.

Lower Impact Materials

Use of RCS-certified recycled face fabrics and upcycled foam offcuts maintain the level of comfort you expect from a Sea to Summit pillow - while reducing their impact.

AEROS ULTRALIGHT PILLOW

Ultra comfortable. Ultra packable. Ultralight.

Air Supported Comfort

Ultralight yet soft, the brushed recycled face fabric is comfortable against the skin and packs down to the size of an egg.

Keep Your Pillow in Place

Having your pillow slide off the mat in the middle of the night is one of camping's biggest frustrations. The included PillowLock solves the problem without adding extra weight.

Fits Inside Sleeping Bag Hoods

The contoured pillow shape supports a variety of sleep positions and is designed to fit inside the hood of a sleeping bag.

Built for Better Performance

High quality materials including an upgrade to hydrolysis-resistant TPU polyether laminate for durability and trouble-free usage.

Recycled face fabric

Polyether TPU laminate

Easy Inflation and deflation with mini XPRESS valve

PillowLock patches attach the pillow to your mat

Slides into Sleeping Bag Hoods

AEROS ULTRALIGHT TRAVEL PILLOW

Travel Lighter. Travel Smarter. Travel Comfortably.

Ultralight and Packable

Instead of hanging off the side of your carry-on, the Aeros Ultralight Travel Pillow packs down compactly and hygienically into its pocket-sized stuff sack.

Ergonomic Shape for Sleeping Upright

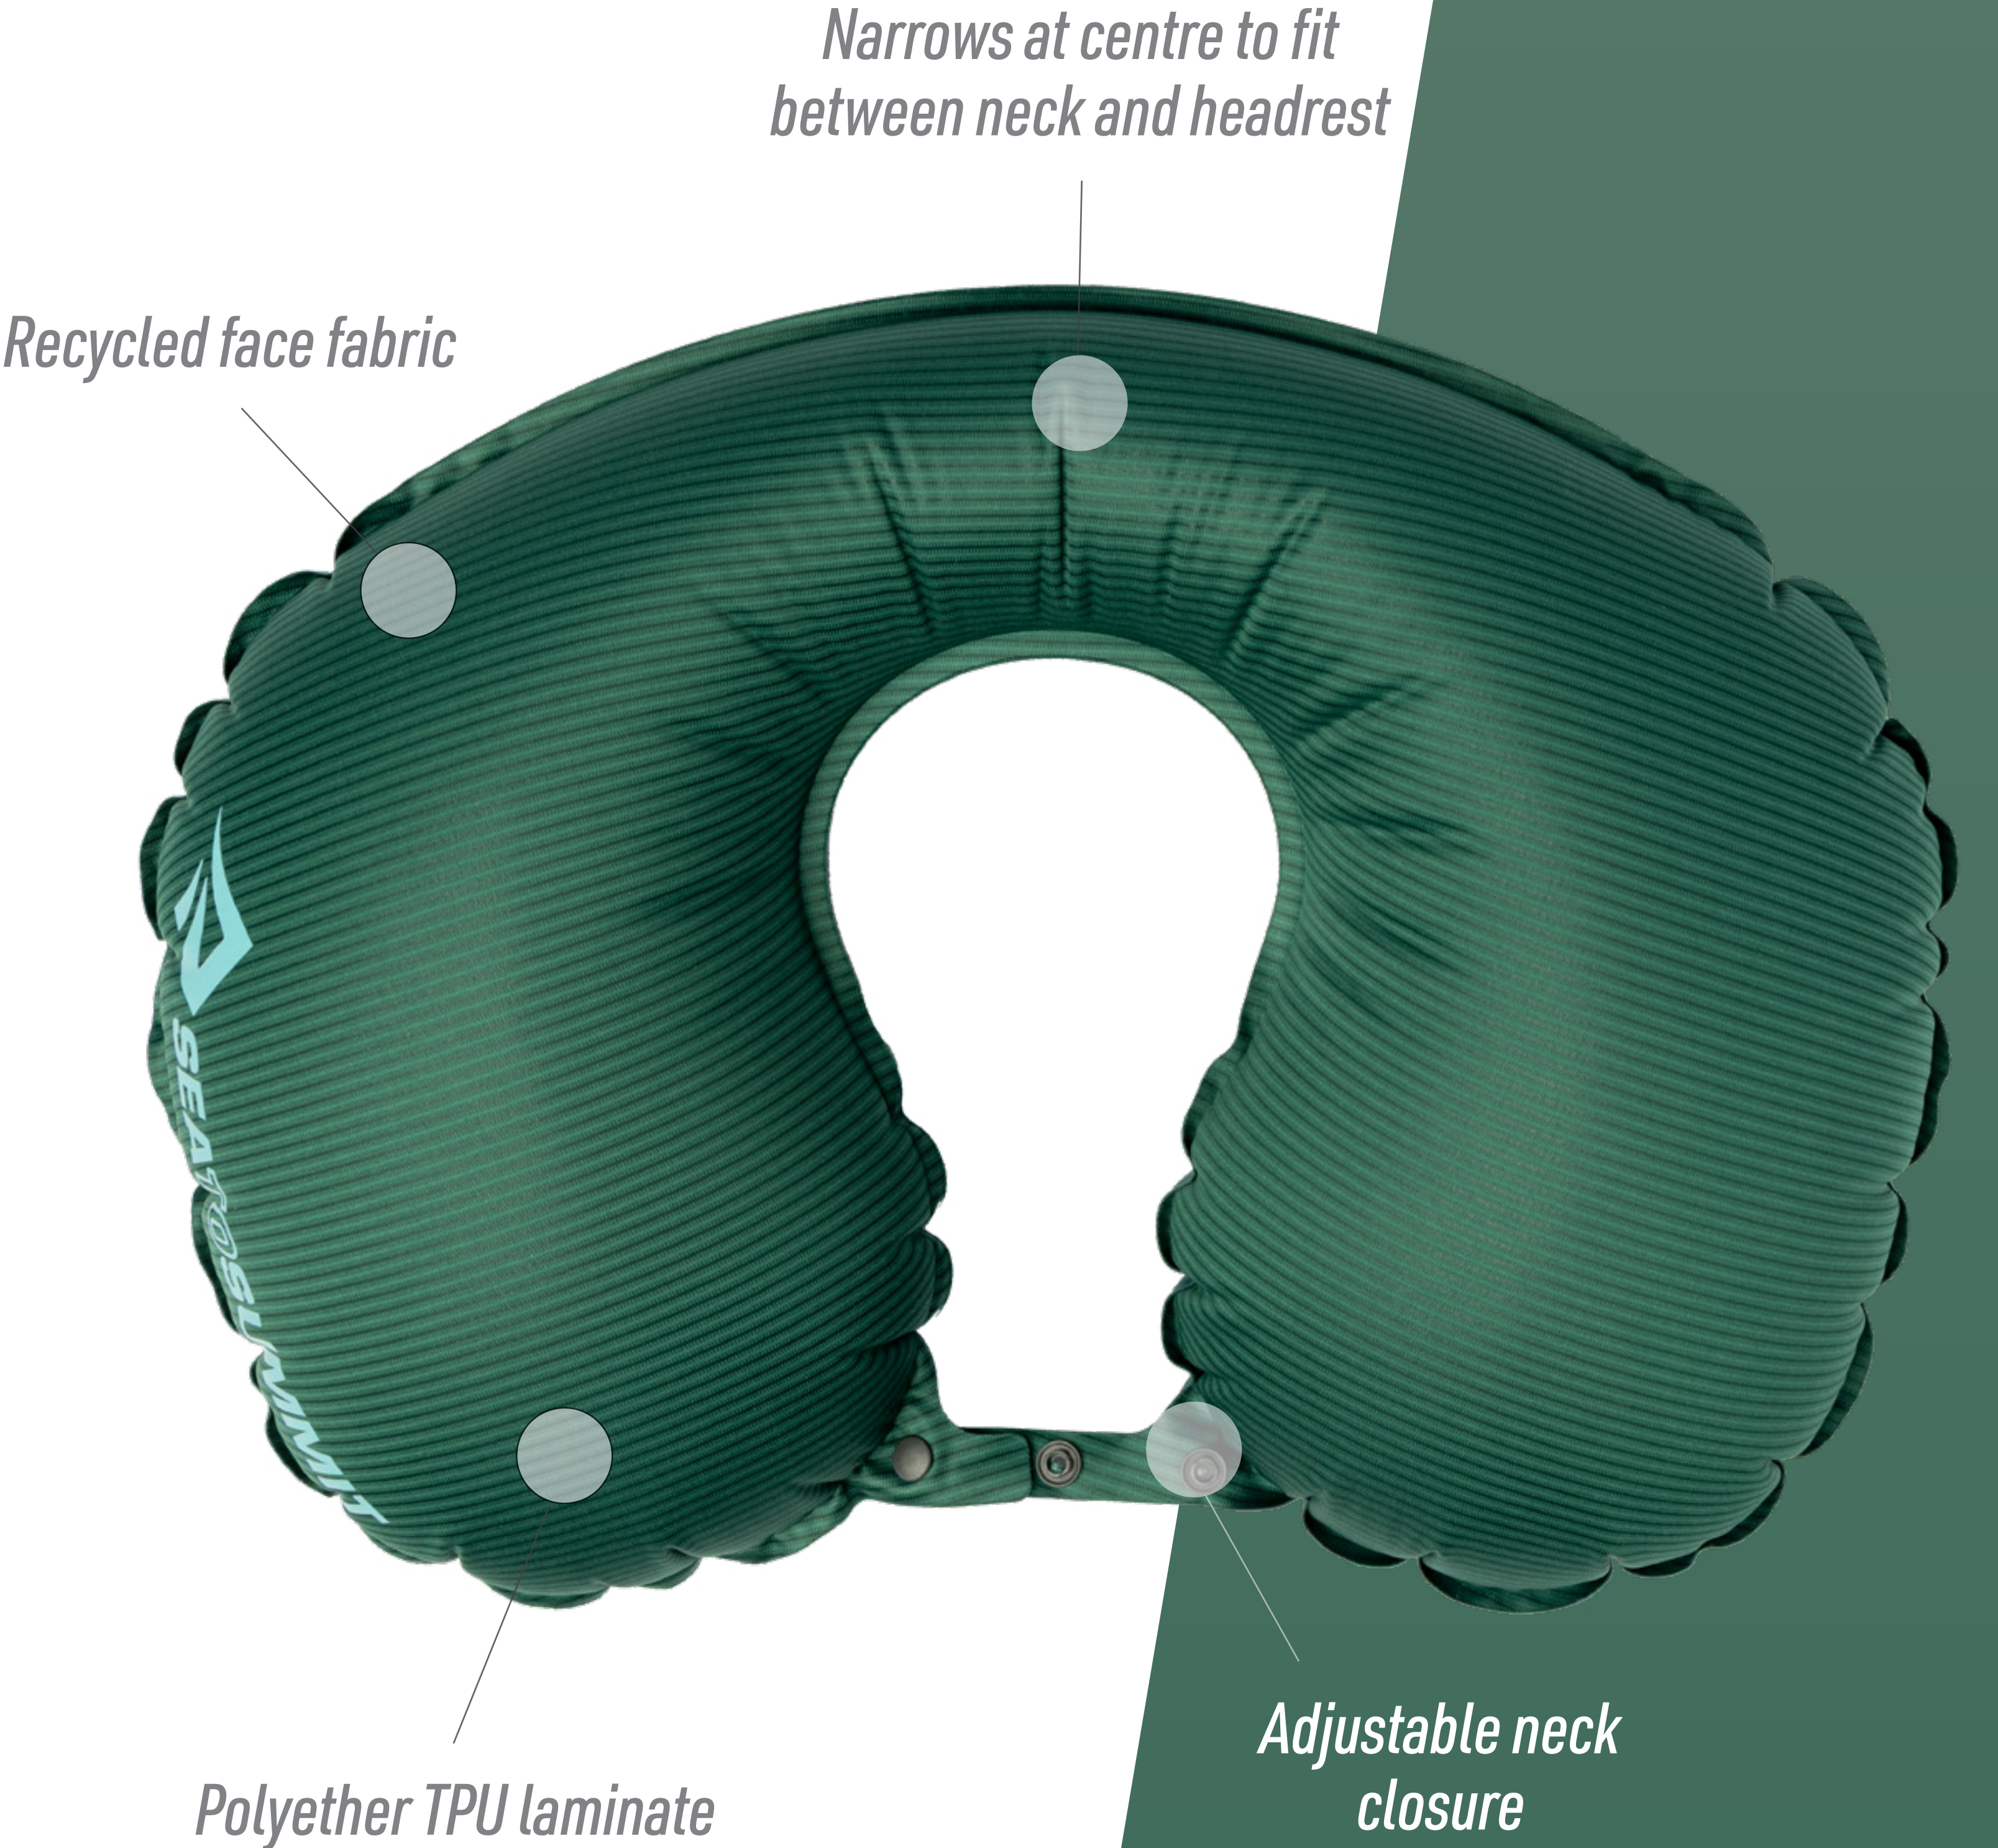

Wedge-shaped and thicker at the sides to keep your head upright, yet thin at the back to prevent pushing your head forward when reclined in an airline seat. A snap connection at the front keeps the pillow securely around your neck.

Air Supported Comfort

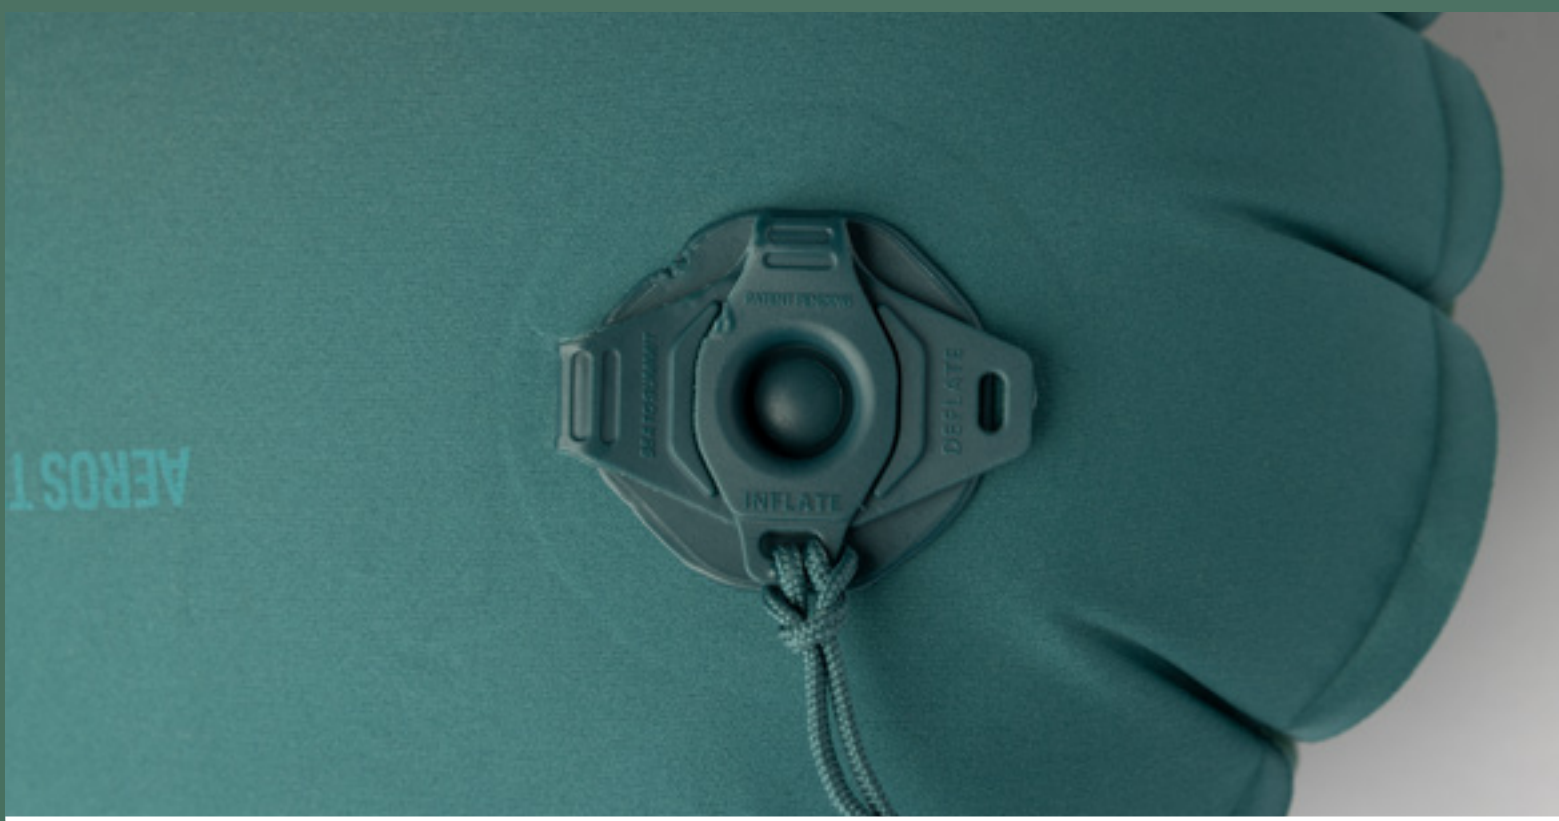

Ultralight yet soft, the brushed recycled face fabric is comfortable against the skin, making sleeping while travelling easy.

Built for Better Performance

High-quality materials include a hydrolysis-resistant TPU polyether bladder for durability and trouble-free use. Easy to inflate, adjustable for your preferred firmness, and quick to deflate via the mini XPRESS valve for fast transitions on and off the plane.

Ergonomic shape supports upright, comfortable sleep

Easy Inflation and deflation with mini XPRESS valve

Packs down small for easy travel

PILLOW DISPLAY FIXTURE

Boost Sales and Improve Merchandising.

Increase Customer Interaction

Pillows are easy to miss on the retail sales floor. Displayed correctly, having multiple pillows out of packaging for customers to touch and feel will boost sales by over 30%.

Silent Salesperson

Interchangeable graphics specific to each pillow clearly communicate the benefits of the pillow, helping turn shoppers into buyers.

Adapts to the Retail placement

Want to highlight pillows on a table top or at checkout? Do you want to make your pillow wall display more profitable? The Sea to Summit pillow display adapts to both wall and table tops seamlessly.

Durable Construction

Designed to survive years of retail use, the durable metal construction will be a trouble-free asset to your visual merchandising toolkit for years to come.

Works with all

TENTS

WHAT'S NEW IN 2026

Liveability Evolved

Liveability means many things: more useable head-and-shoulder room, weather protection, taller tent doors or better ventilation. Liveability does not appear on a spec page - but it has a big impact on the experience a shelter provides. Sea to Summit tents have been designed since day one to evolve all aspects of what it means to be comfortable in the outdoors.

Increased Weather Protection

Always evolving; the Telos and Ikos tents have revised Apex vents that can now be fully closed. The vent flaps now utilise more effective rain gutters and water resistant zippers. In the tarp realm, the Minimalist offers storm flaps that can seal off one end against the weather.

New Ultra-Sil LS Fabric

The new Ultra-Sil LS fabric absorbs less moisture, dries quicker and has a lower stretch making it easier to maintain a taut pitch.

RCS-recycled, bluesign APPROVED and non-PFAS, Ultra-Sil LS comprises of nylon with a grid of polyester yarns.

Sentinel: Go Where Other 3-Season Tents Can't

The new Sentinel XP tents are designed to push the boundaries of what a modern lightweight tent can do. Engineered for 80+ km/h winds and heavy rain, the Sentinel XP combines storm-ready strength with everyday liveability. Vertical walls, smart ventilation and versatile set-ups keep you comfortable in those regions of the world that demand more.

TENTS
TECH FEATURES

Hold Fast Clips and Adjustable Peg Loops

Easy to secure and unbreakable aluminium

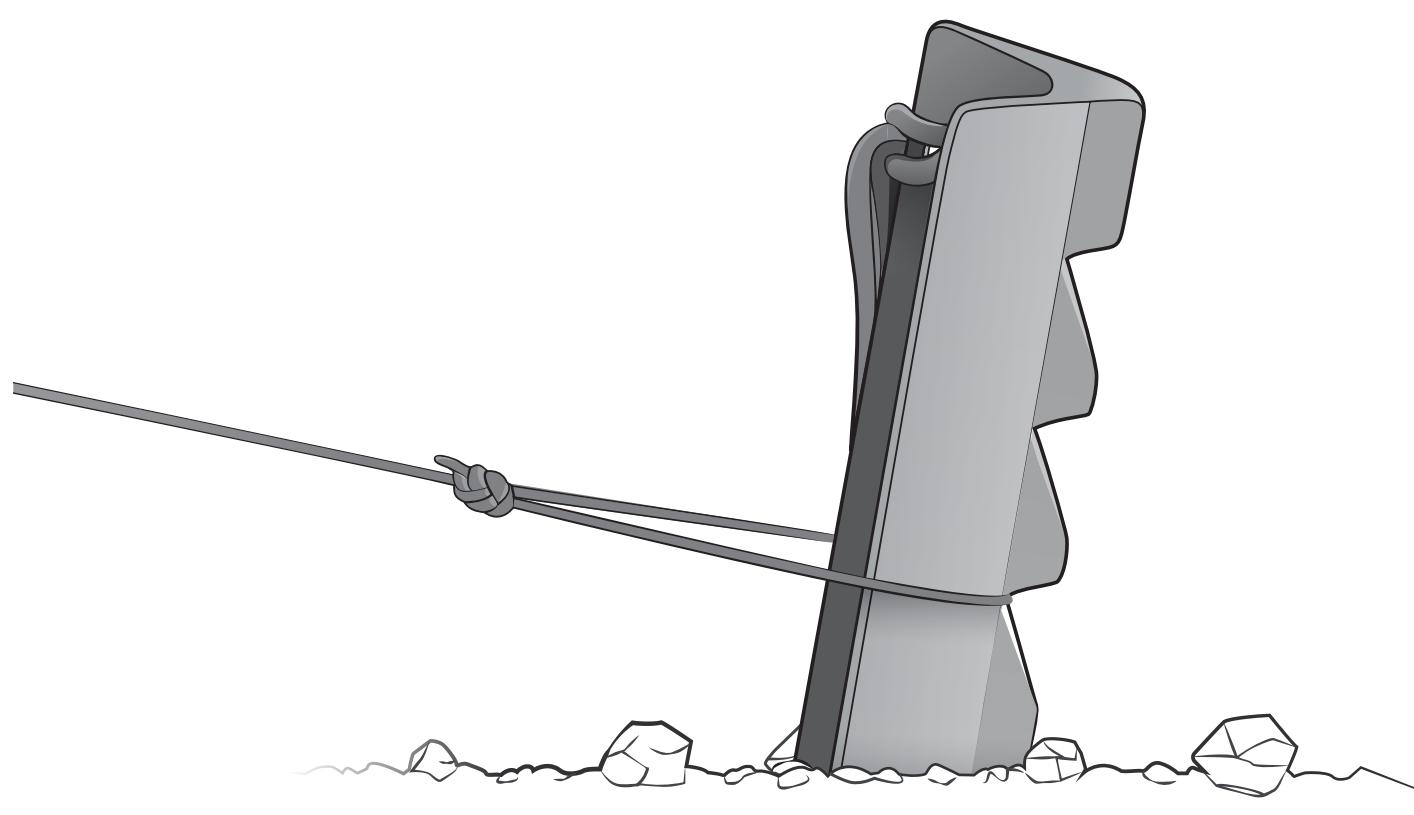

DAC Poles

NFL polesets in Telos. MX polesets in Ikos. Pressfit, NSL & MX polesets in Sentinel

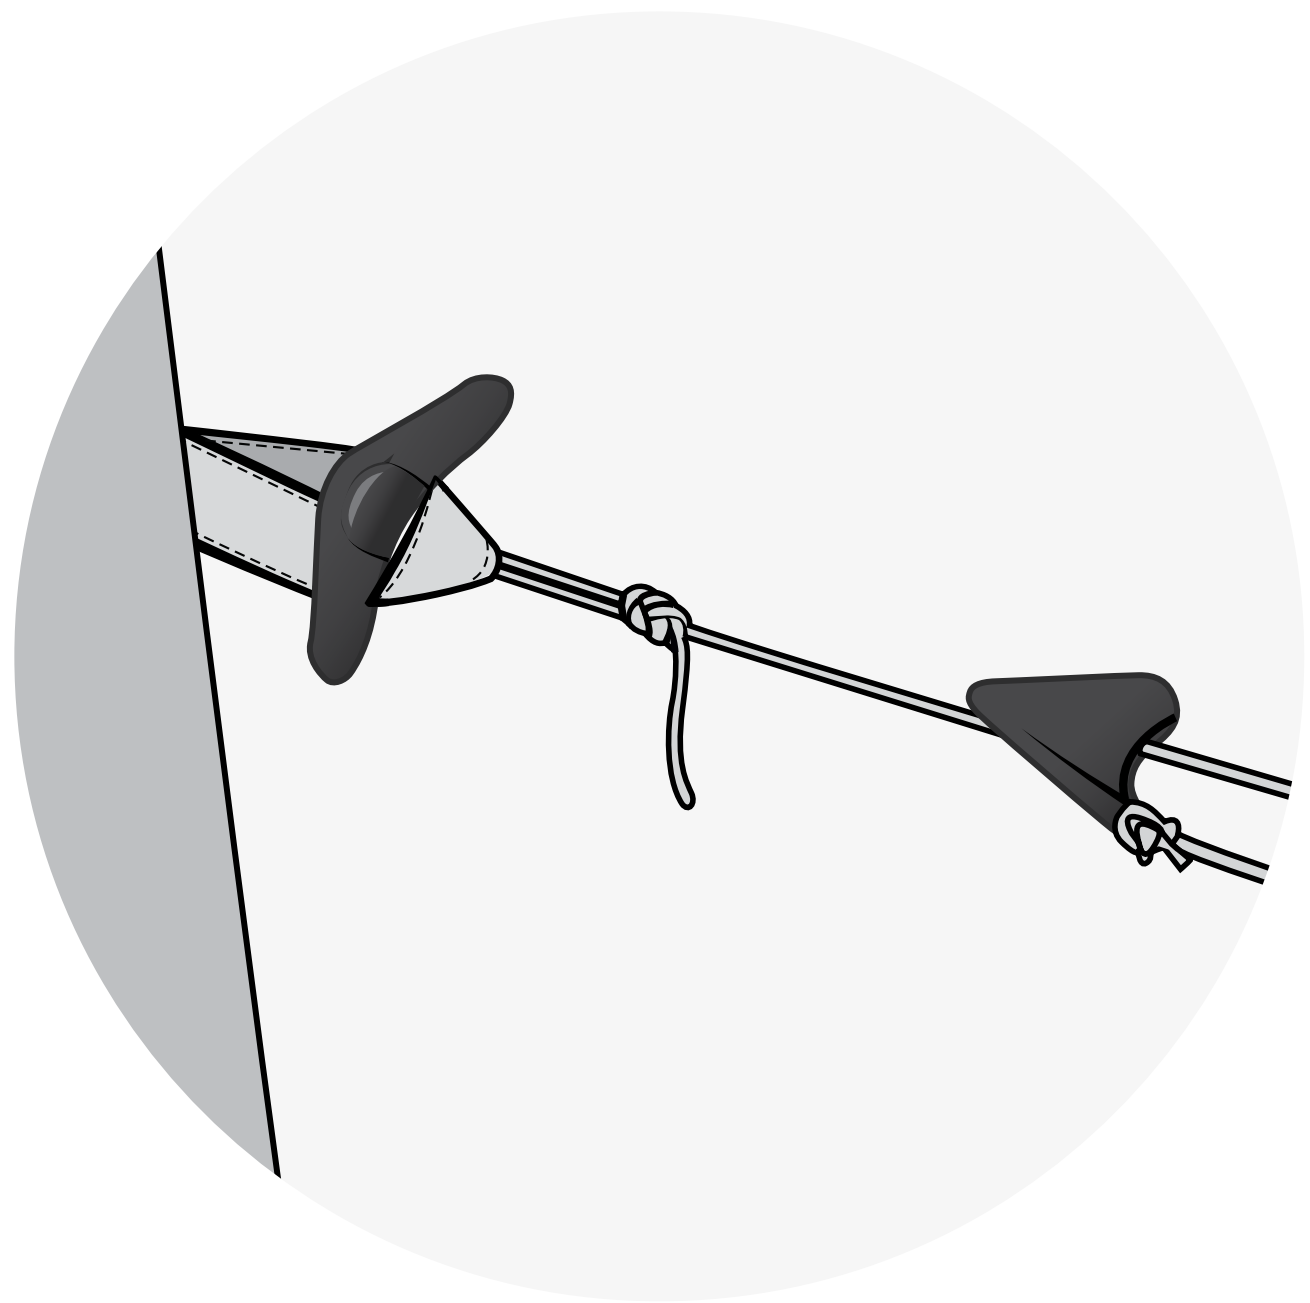

Light Bar

Add headlamps for a soft glow. Updated to be lighter and easier to attach

Ground Control Tent Pegs

7075-T6 Alloy TriPoint construction resists bending and provides a secure hold in varied ground conditions

Removeable Guylines

Secured with easy-to-use toggles. Remove when not needed

Ergonomic Compression Sacks

Easier to access and compress for compact storage

SENTINEL TENTS

WIND & WEATHER PERFORMANCE

Wind Tunnel Testing

The Sentinel XR stays standing in wind speeds exceeding 80kph / 50mph - Far beyond what a standard 3-Season tent can withstand.

Water Proof Floor

Designed to be waterproof in the wettest of conditions - the 40D Polycarbonate coated nylon floor is tested to an incredible 25,000mm hydrostatic head.

AirLift Vent

Provides lift in high wind speeds, increasing tent stability.

Dual Point, Self-Equalising Guy Lines

Distributes wind loading forces over a broader area for increased strength.

Trekking Pole Brace

Trekking Poles can be secured under the AirLift vent to provide additional support.

High Fabric Panelling on Inner Tent

Better protection from wind, blowing sand and rain splashback in heavy downpours.

SENTINEL TENTS

WET WEATHER LIVEABILITY

Large Internal Volume

Steep walls, a high ceiling and rectangular floorplan maximise interior volume and comfort while you wait out the weather.

Internal Organisation

Extra large gear pouches and smaller essential pockets keep your tent neat and tidy.

External Storage

Twin vestibules offer generous, weather-protected space for packs, boots, and wet gear.

Dry Setup & Take Down

Pitch fly-first or pack down the inner separately with the fly still up - the Sentinel's design keeps the tent interior dry even in wet conditions.

Covered Cross Ventilation

Airflow is essential for reducing condensation. Twin recessed AirLift vents beneath protective scoops keep air moving, even in rough weather.

SENTINEL TENTS

ADAPTABLE TO CHANGING CONDITIONS

Hangout Mode

The rainfly transforms into a weather-protected shelter for cooking or relaxing without having to retreat inside the tent.

Partial Fly Mode

In windy or uncertain weather, half the rainfly can be rolled back for ventilation and views, then quickly redeployed from inside the tent if rain arrives.

Full Fly Mode

The fully waterproof, seam-taped rainfly pitches low to block wind and rain for maximum weather protection.

Stargaze Mode

Sleep under the stars, with the rainfly ready to deploy in seconds if the weather turns.

Inner Only Mode

No-see-um mesh panels maximise airflow while protecting against biting insects.

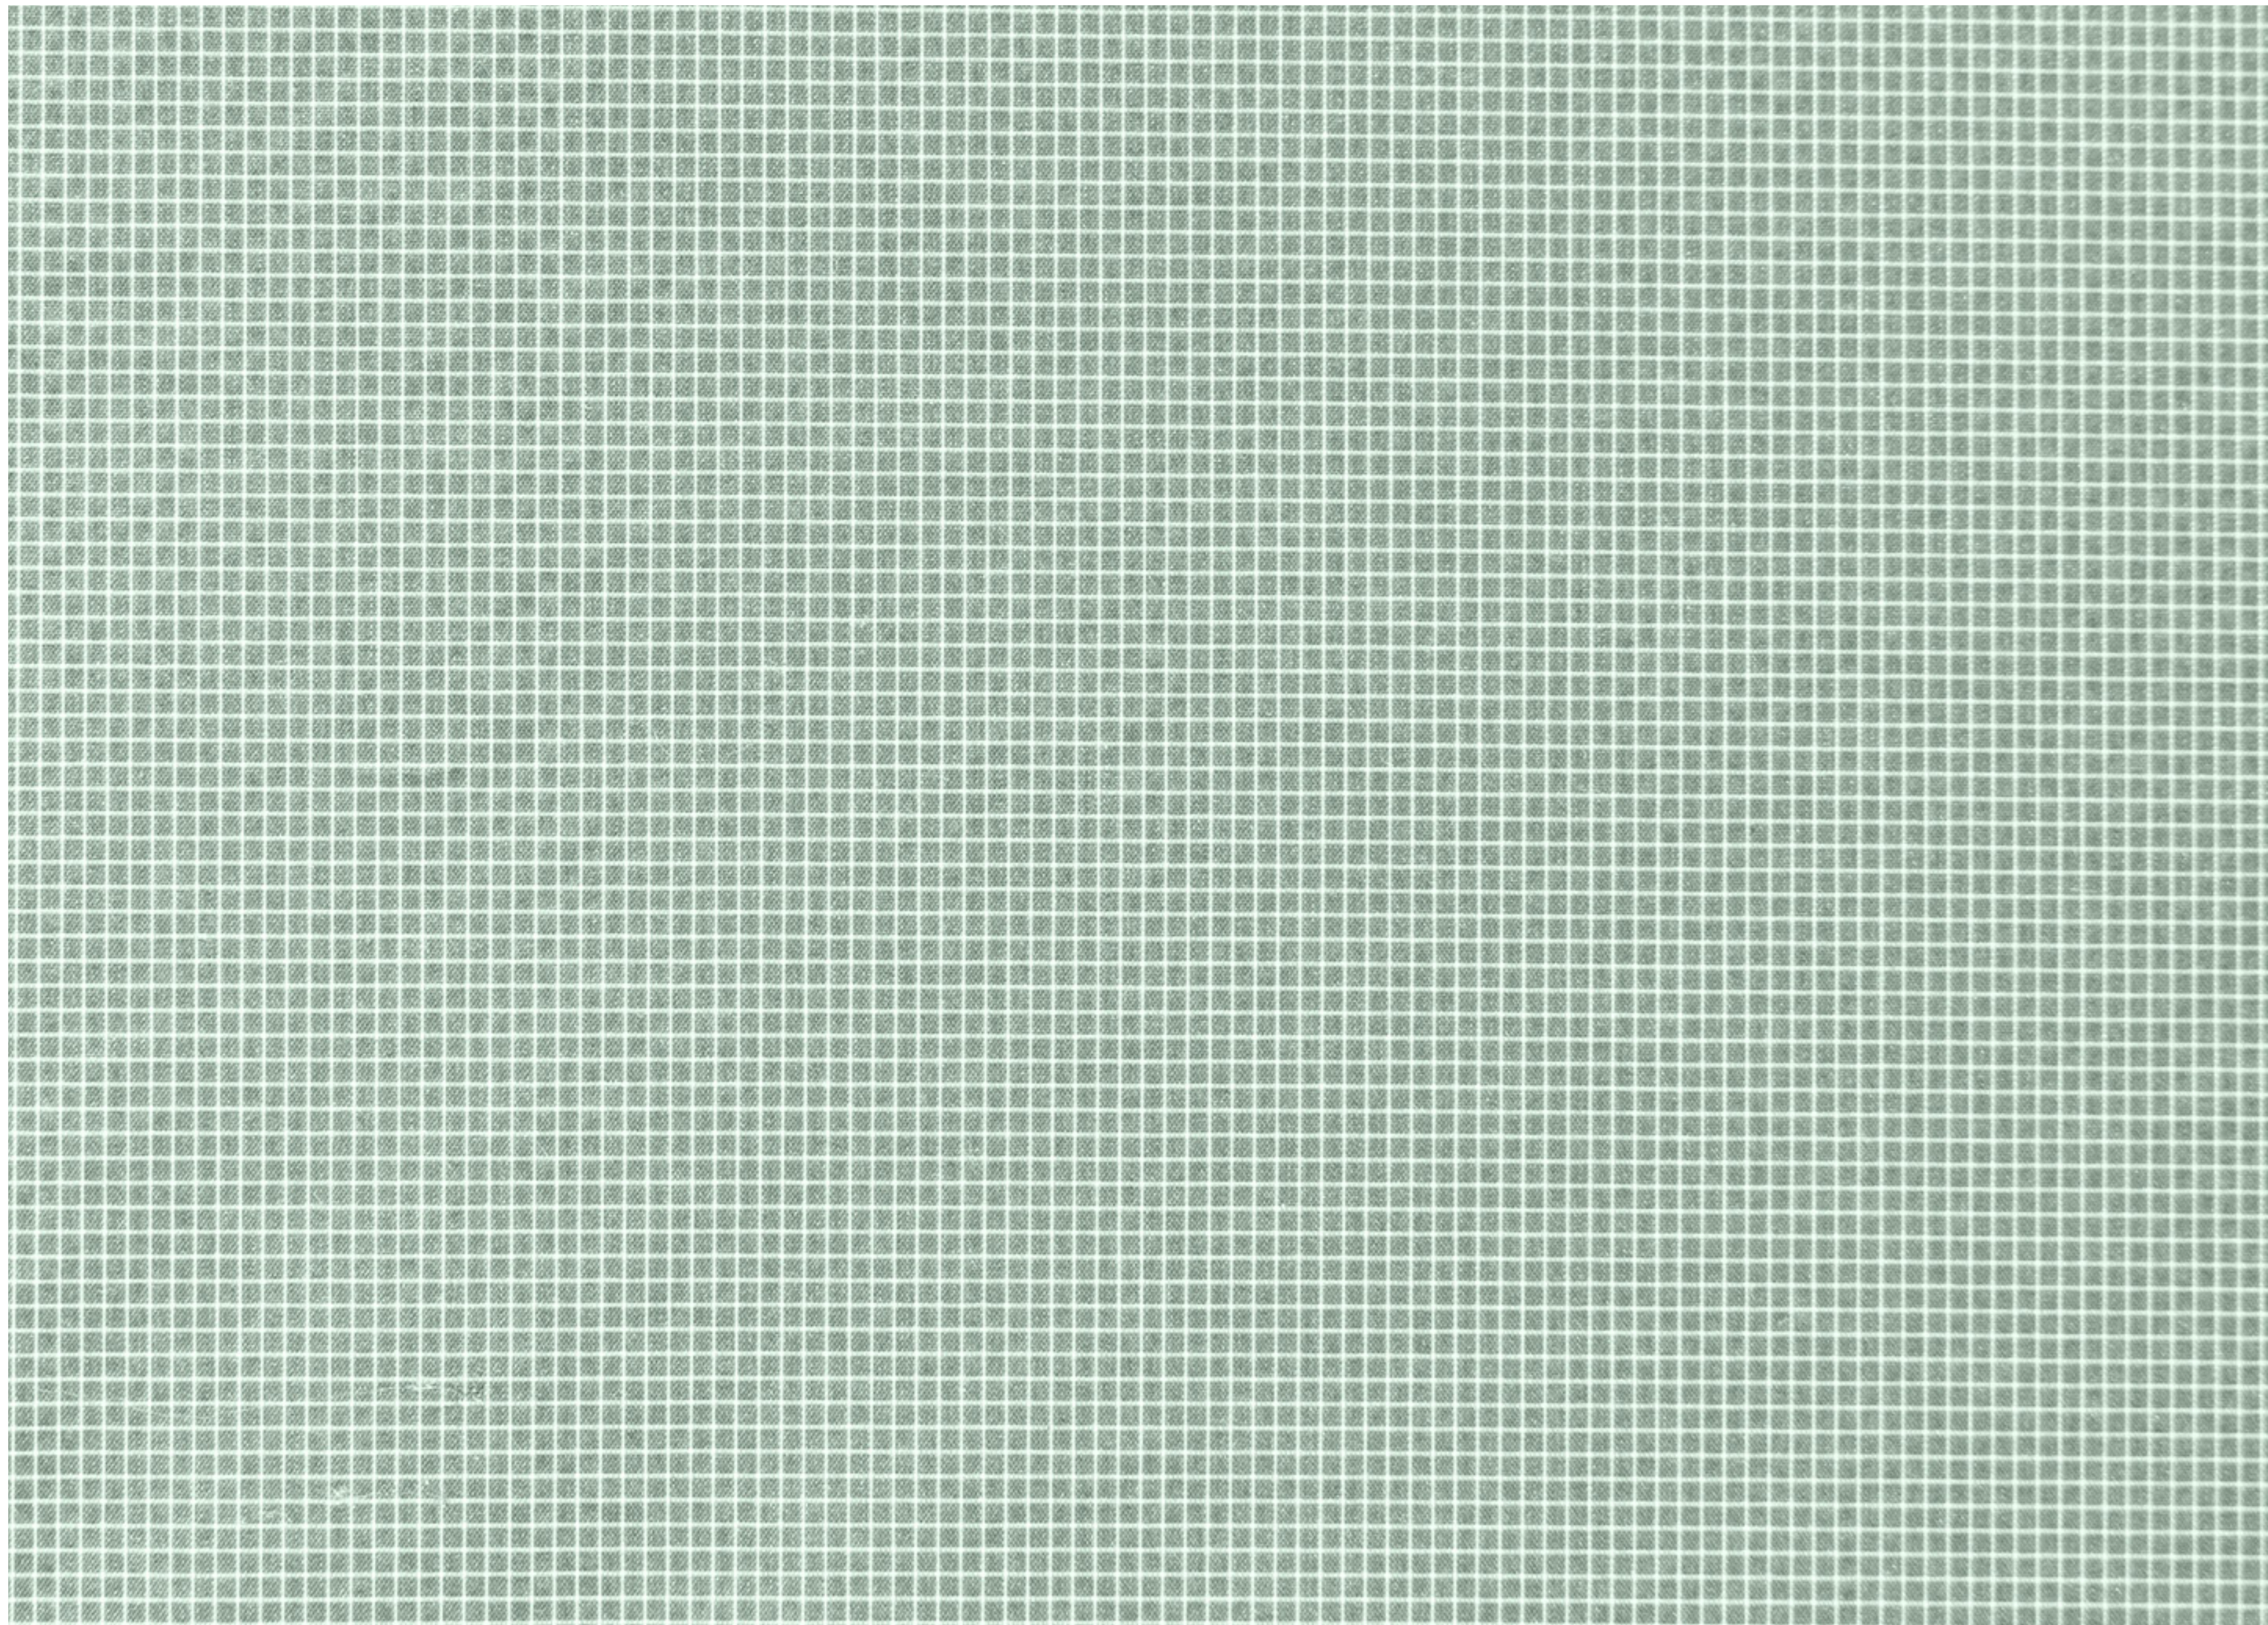

Fly Only Mode

Ultralight shelter setup using just the fly, with or without the footprint.

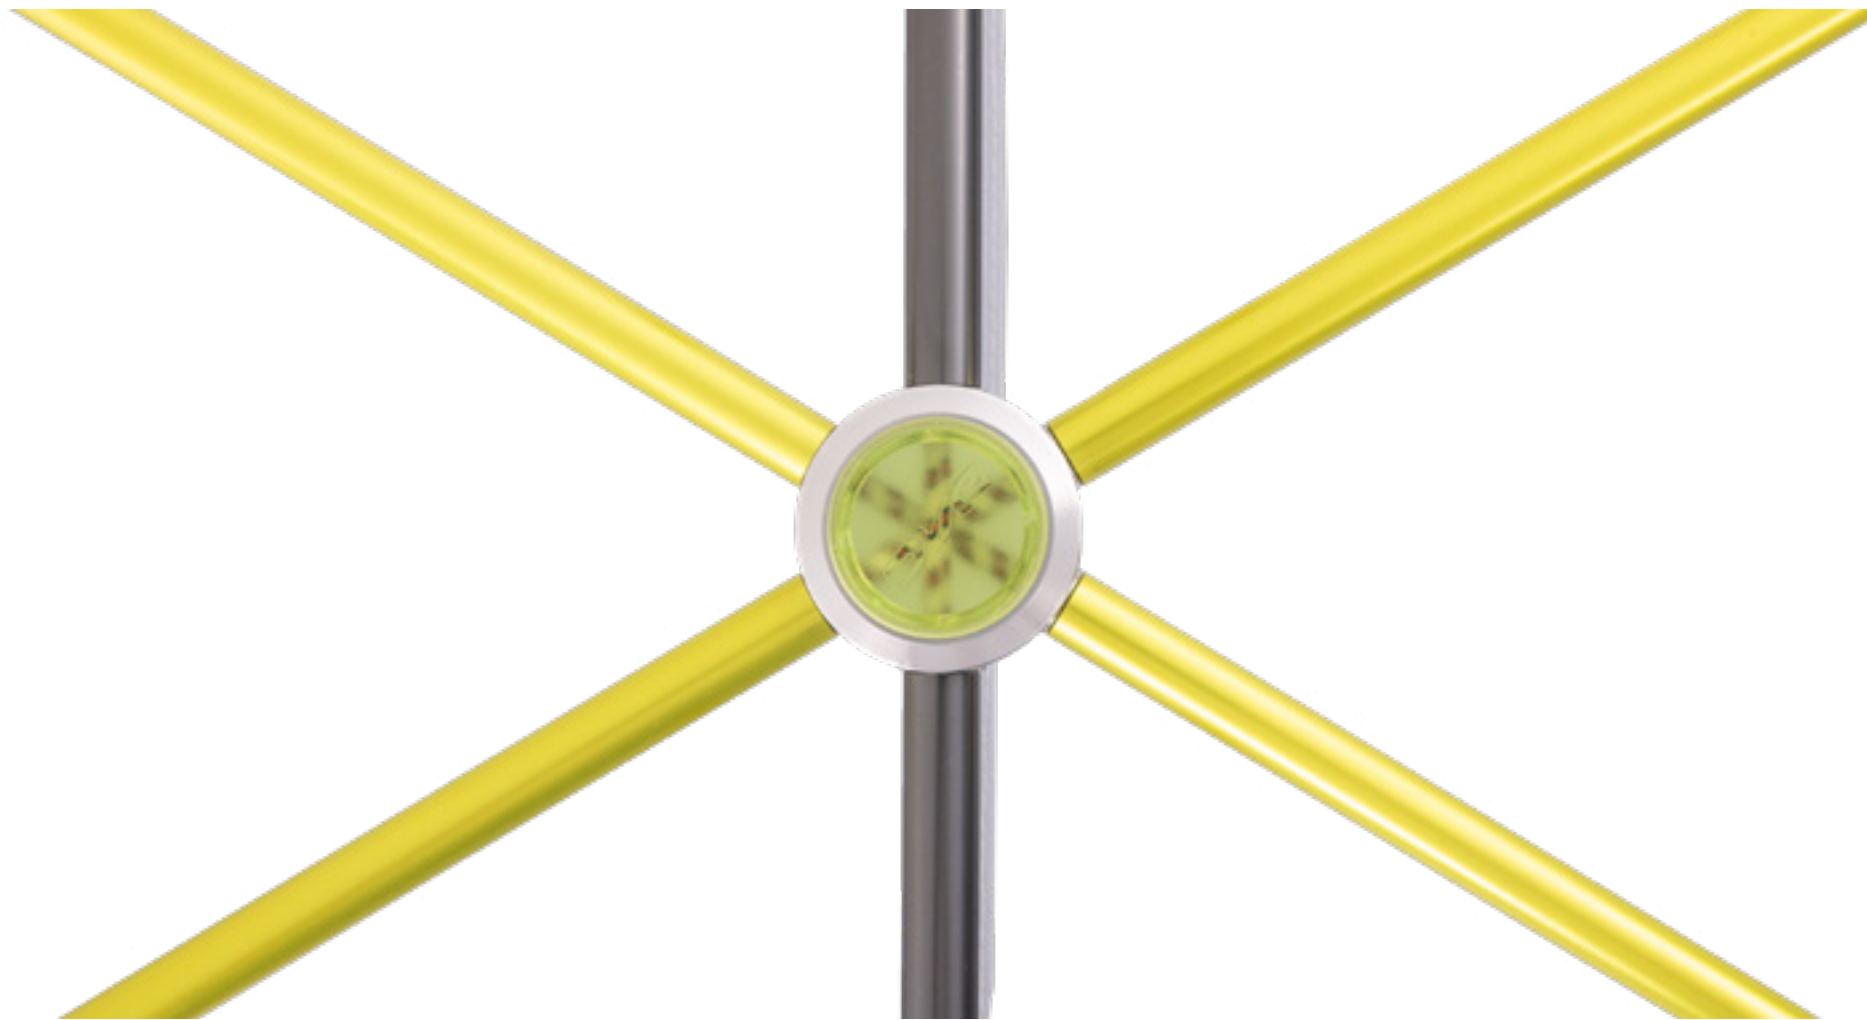

SENTINEL TENTS

BETTER PITCH & MATERIALS

Ultra-Sil LS Fabric

This new for 2026 rainfly fabric reduces water absorbtion, dries faster and delivers 2x better shape retention when wet than standard nylon rainflys.

Hex Hub Architecture

Strong, simple, and fast to pitch with DAC polesets and a central apex hub.

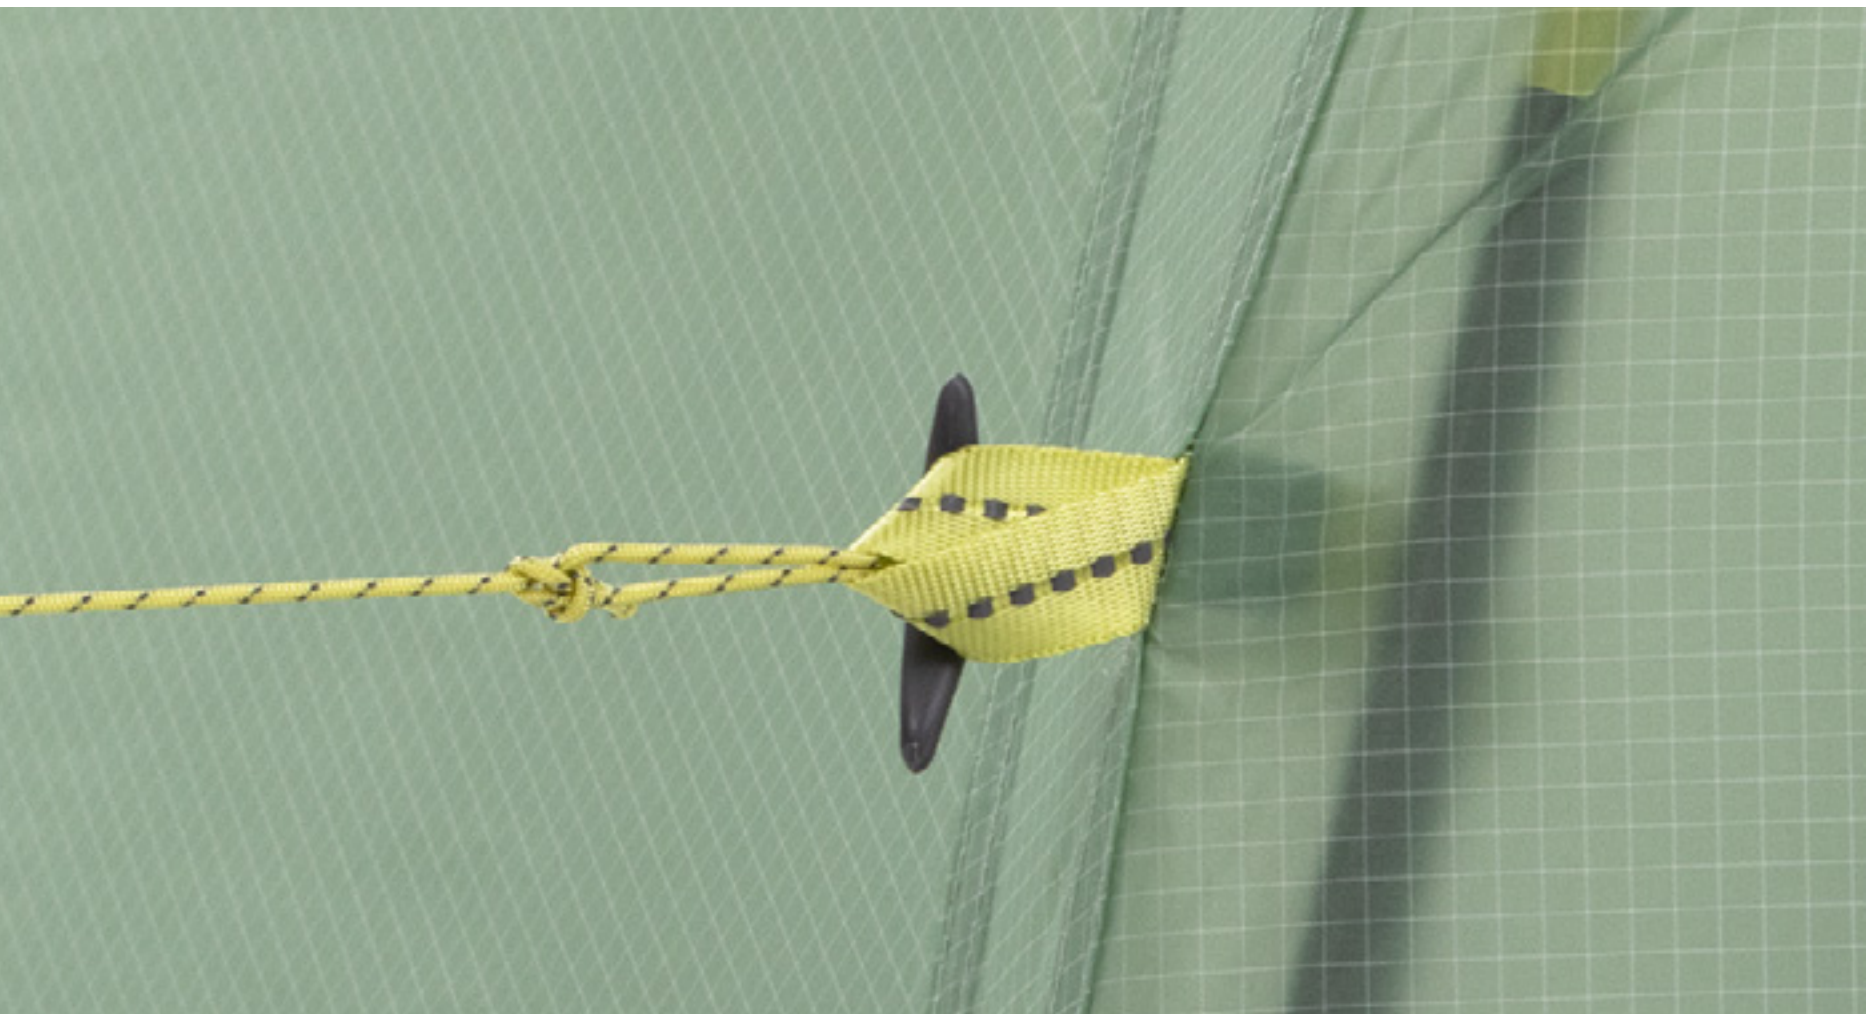

Reliable in the Field

Metal hardware that won't fail when it counts.

Adjustable Peg Loops

Easily tension the tent and fine-tune peg positions to avoid rocks or roots.

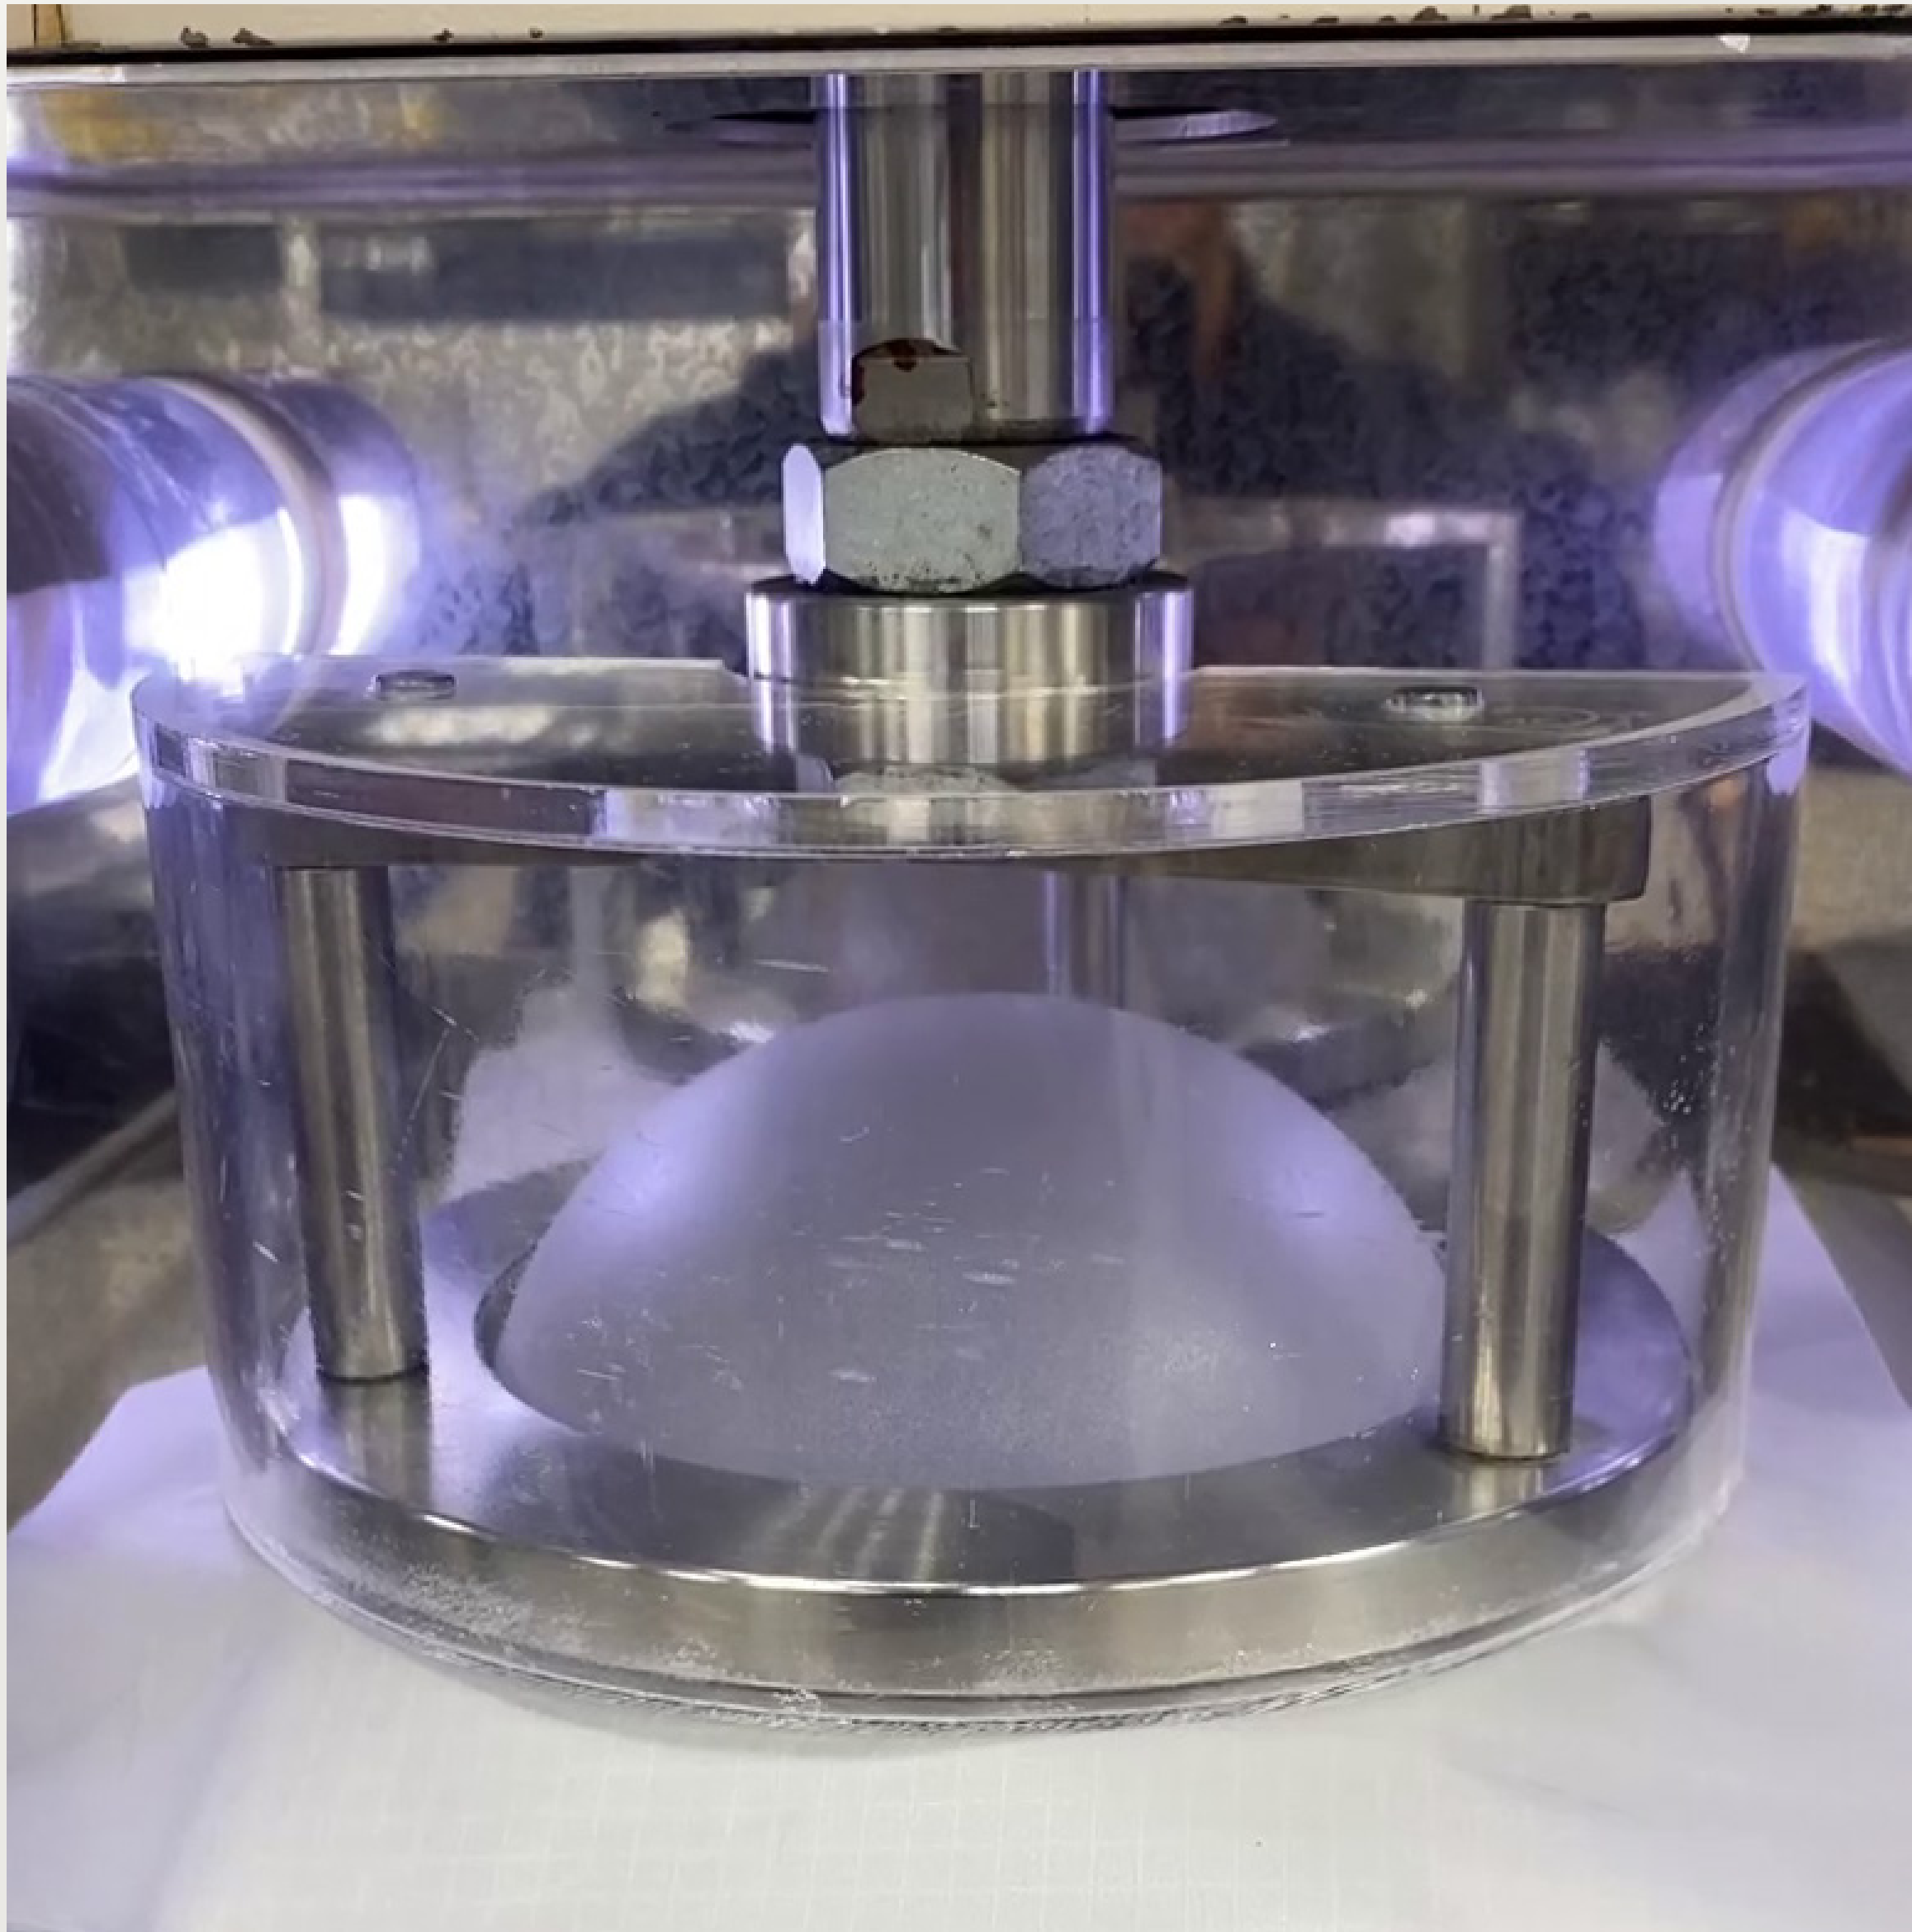

Adjustable & Removable Guylines

Boomerang Toggles make deploying or stowing guylines fast and easy.

SENTINEL TENTS

PRODUCT TESTING

Performance Verified in Lab and Field.

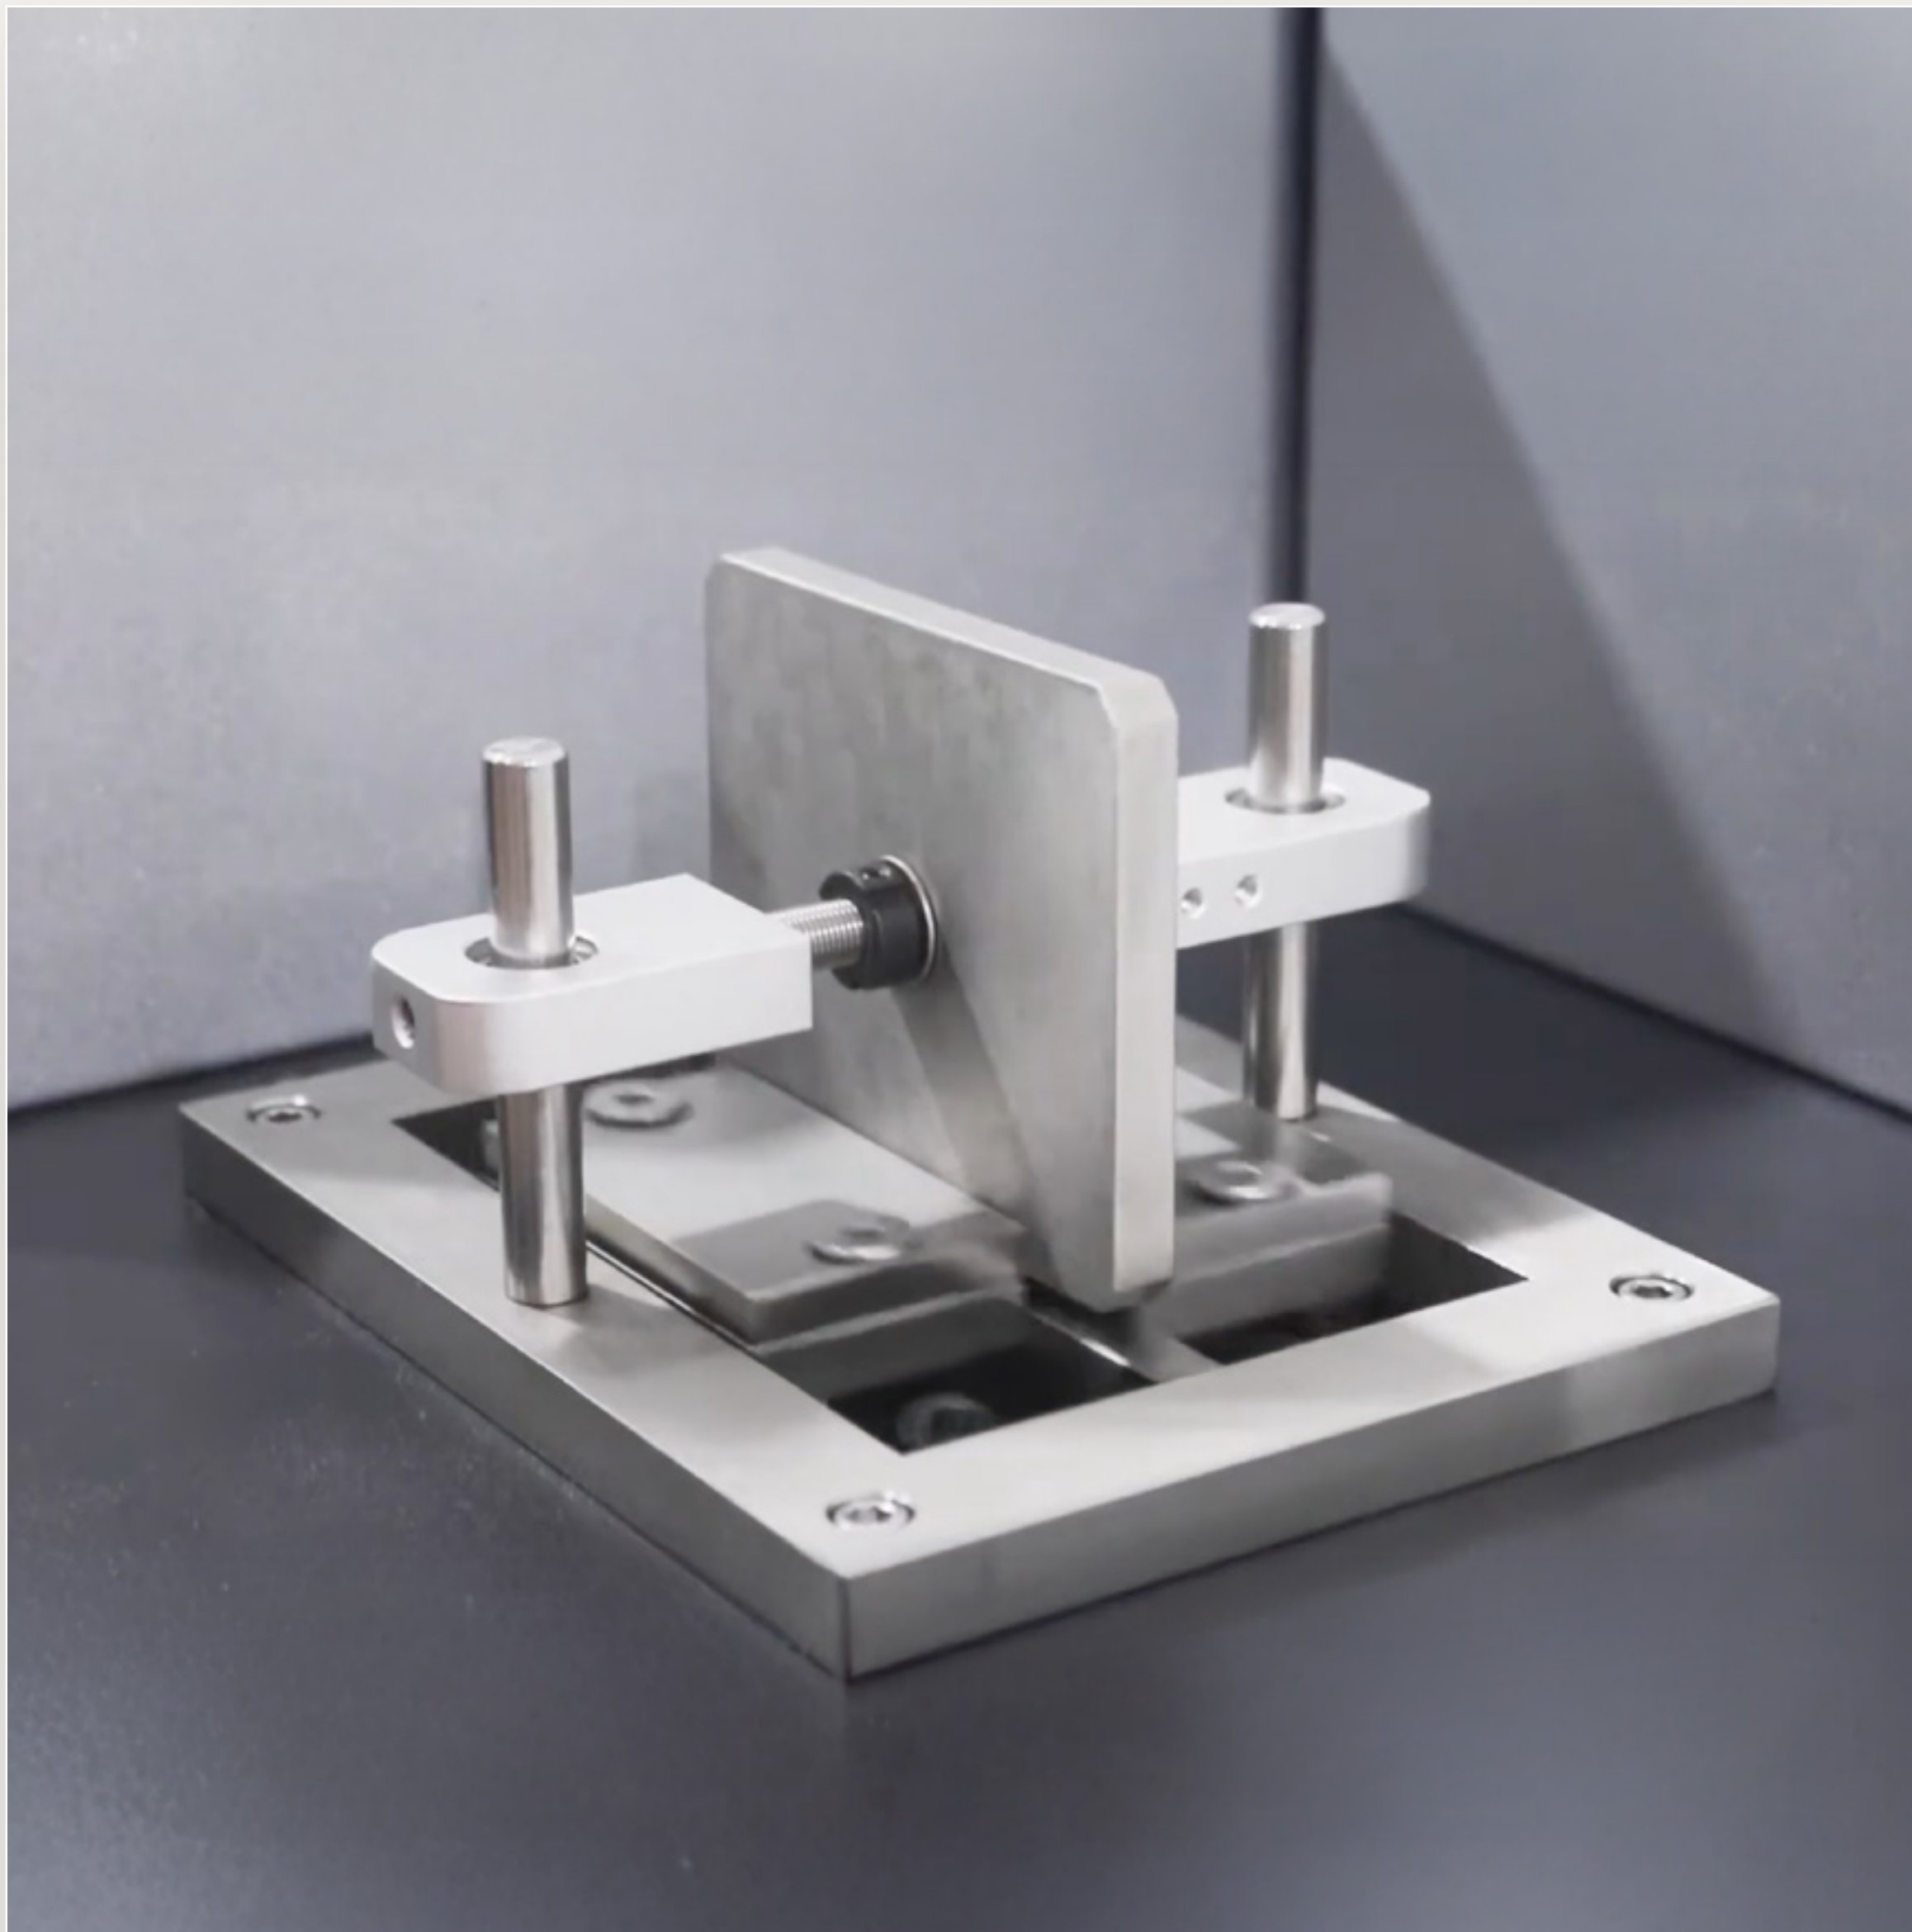

Waterhead Testing (ISO 811)

The tent floor fabric is tested to ISO 811 standards, measuring the pressure at which water penetrates. The Sentinel's floor achieves a 25,000 mm hydrostatic head, ensuring a fully waterproof barrier against ground moisture.

Rain Ingress Testing

In controlled rain-room testing, the Sentinel endures 100 mm per hour (4 inches/hour) of simulated rainfall - well beyond typical storm intensity. The tent remains dry and stable throughout prolonged, adverse conditions.

Durability Testing (ISO 5981 Flex Abrasion)

Using an ISO 5981 flex abrasion machine, fabric samples are repeatedly bent under tension to simulate years of use. Results confirm the Sentinel's long-term durability and resistance to coating wear and delamination.

Field Testing

Beyond the lab, the Sentinel is field-tested across extreme environments, including the deserts of Western Australia. These real-world trials validate durability, weather protection, and usability in demanding conditions.

TENT SENTINEL XP1

Liveable. Reliable. Ready.

Wind and Weather Performance

Tested to 50+ mph / 80+ km/h winds with a waterproof floor rated to 25,000mm, the Sentinel XP stands firm when others fail. Self-equalising guylines and airfoil overhangs keep it secure when other 3-season tents can't.

Wet Weather Liveability

Comfortable even when tent-bound for days. Vertical walls, generous volume, lighter interior colours, cross-flow ventilation, big doors, and headroom make it reliably liveable. Dry set-up and takedown ease the hassle in wet climates.

Adaptable to Changing Conditions

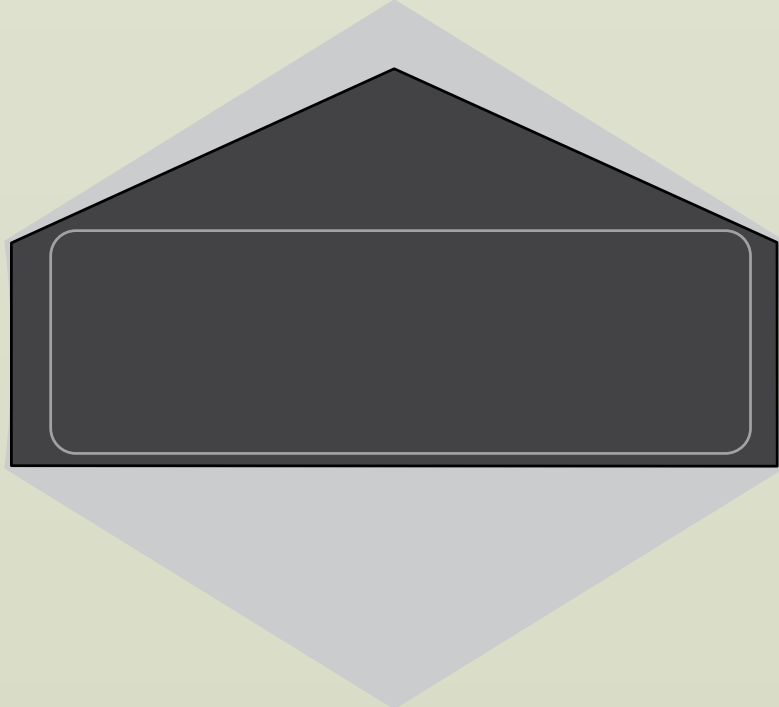

Weather shifts fast – your tent should too. Multiple set-ups provide ventilation and protection from sun, bugs, wind, and rain. Roll back the fly to stargaze, switch to hangout mode, or seal tight when storms roll in.

Better Pitch

Green-anodised DAC poles and bluesign APPROVED, recycled Ultra-Sil LS rainfly fabric reduce water absorption, dry fast, and keep a taut, reliable pitch with minimal stretch.

Tested to 50+mph/80+kmh winds in DAC wind tunnel

ULTRALIGHT RANGE

ULTRALIGHT MINIMALIST TARP

All the versatility of a flat tarp with improved weather protection.

Versatile Protection

Twin storm flaps can be closed to block wind and rain or opened to increase shade coverage, providing flexibility in changing conditions.

Improved Weather Resistance

The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch. Its curved catenary shape also reduces edge flutter in high winds.

Quick Adjustability

Easily pitched with hiking poles, it includes line tensioners at the reinforced tie-out points for quick adjustments beneath the tarp. Guy lines are also removable for tangle-free storage.

Lower-Impact Materials

Crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.

ULTRALIGHT ESCAPIST MESH BUG SHELTER

Adds protection to ultralight tarps.

Insect Protection

Featuring high-visibility 15D No-See-Um polyester mesh and a zippered door, the ultralight Escapist Mesh Bug Shelter provides essential protection from insects, mosquitoes, spiders and ants for long-distance hikers.

Waterproof Floor for Dry Comfort

The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric forms a bathtub-shaped floor that wraps around the shelter sides. Seam-taped, waterproof, quick-drying and with minimal fabric stretch, it ensures reliable protection from the ground up.

Simple Setup Options

The simple no-pole design easily hangs under Escapist and Minimalist tarps, offering reliable protection in buggy or wet environments. Its versatile setup also allows it to be pitched on its own using trekking poles, guy lines, tent stakes, or trees.

Lower-Impact Materials

The waterproof tub floor is crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.

ULTRALIGHT COMFORT TELOS EVO TR2 & TR3

Liveability evolved.

Most Liveable Lightweight Tent

Tension Ridge raises the tent's shape upwards for more usable head-and-shoulder space and creates truly higher doors for easier entry.

Adaptable to Changing Conditions

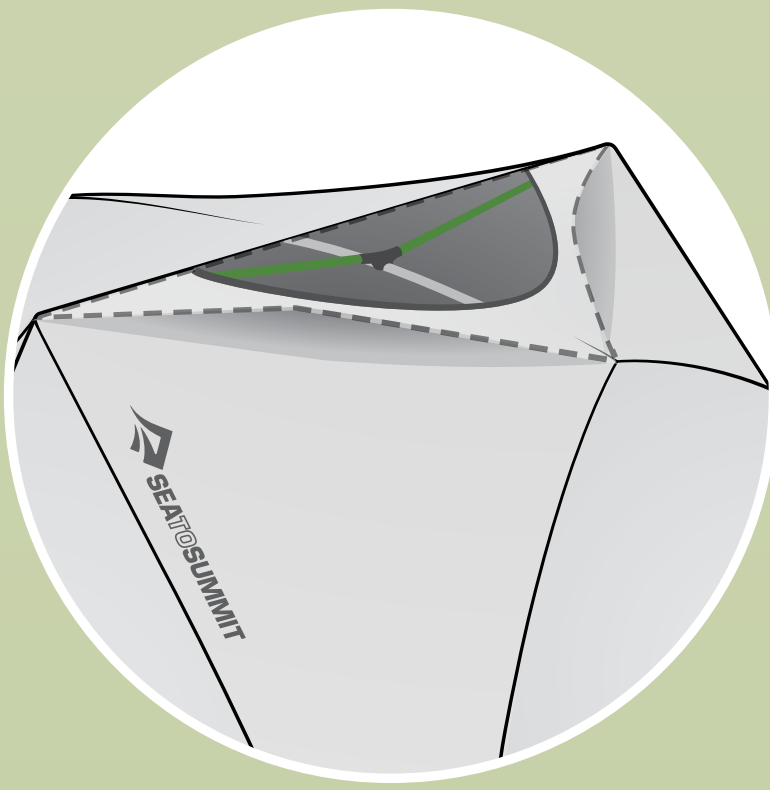

With multiple setup options, the tent can easily transform to provide shelter from the sun, wind, rain, bugs and cold, making it perfect for environments ranging from mountains to deserts and rainforests.

Upgraded Weather Resistance

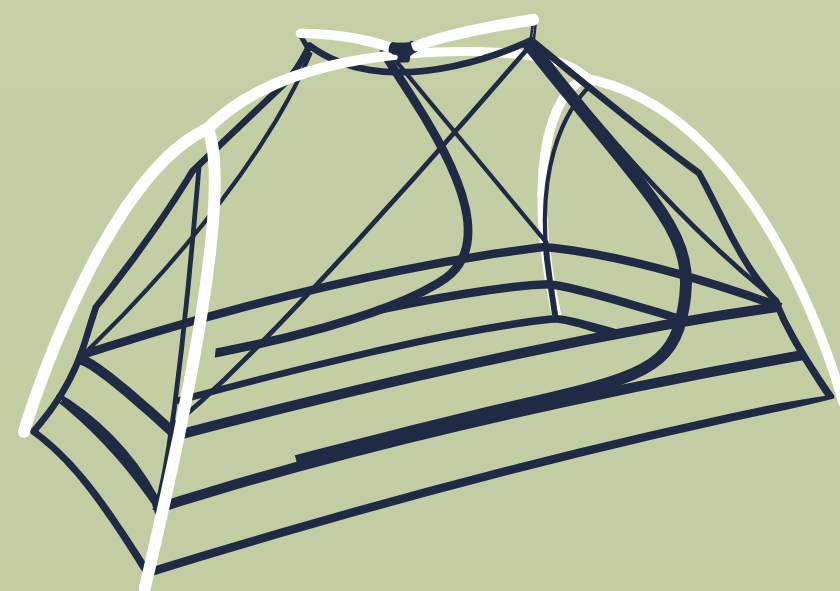

Now featuring a waterproof zipper and air vent scoops that close and secure, the improved Apex vent provides significantly better ventilation and condensation management compared to other designs.

Improved Pitch

Supported by a DAC NFL poleset, the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch.

Updated closeable Apex Vent with waterproof zipper

LIGHTWEIGHT

IKOS EVO TR2 & TR3

Rugged, lightweight and liveable.

Upgraded Weather Resistance

Now featuring a waterproof zipper and air vent scoops that close and secure, the improved Apex vent provides significantly better ventilation and condensation management compared to other designs.

Adaptable to Changing Conditions

With multiple setup options, the tent can easily transform to provide shelter from the sun, wind, rain, bugs and cold, making it perfect for environments ranging from mountain valleys to deserts and rainforests.

Liveability Evolved

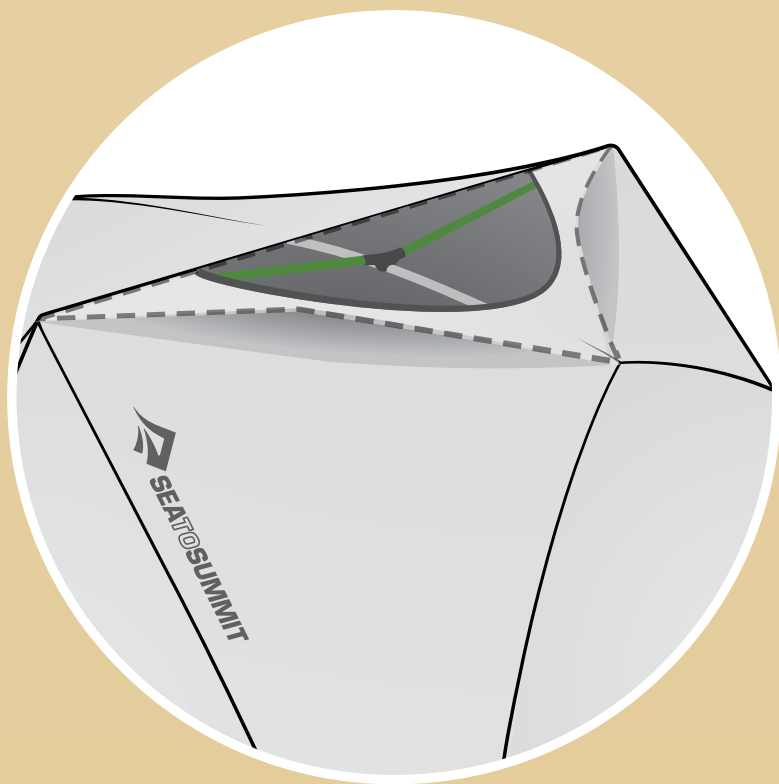

Tension Ridge raises the tent's shape upwards for more usable head-and-shoulder space and creates truly higher doors for easier entry.

User-Friendly Design

Symmetrical architecture, Hold Fast 'C' clips, and colour-coded poles simplify setup and takedown. The included Gear Loft and Lightbar keep the interior bright and organised, while the footprint (now also included) protects the floor and enables dry takedown and fly-only pitching.

Gear Loft and tent footprint included

Updated closeable Apex Vent with waterproof zipper

LIGHTWEIGHT IKOS EVO TR4

Durable and spacious liveability.

Excellent Weather Resistance

Now featuring a waterproof zipper and air vent scoops that close and secure, the improved Apex vent provides significantly better ventilation and condensation management compared to other designs.

User-Friendly Design

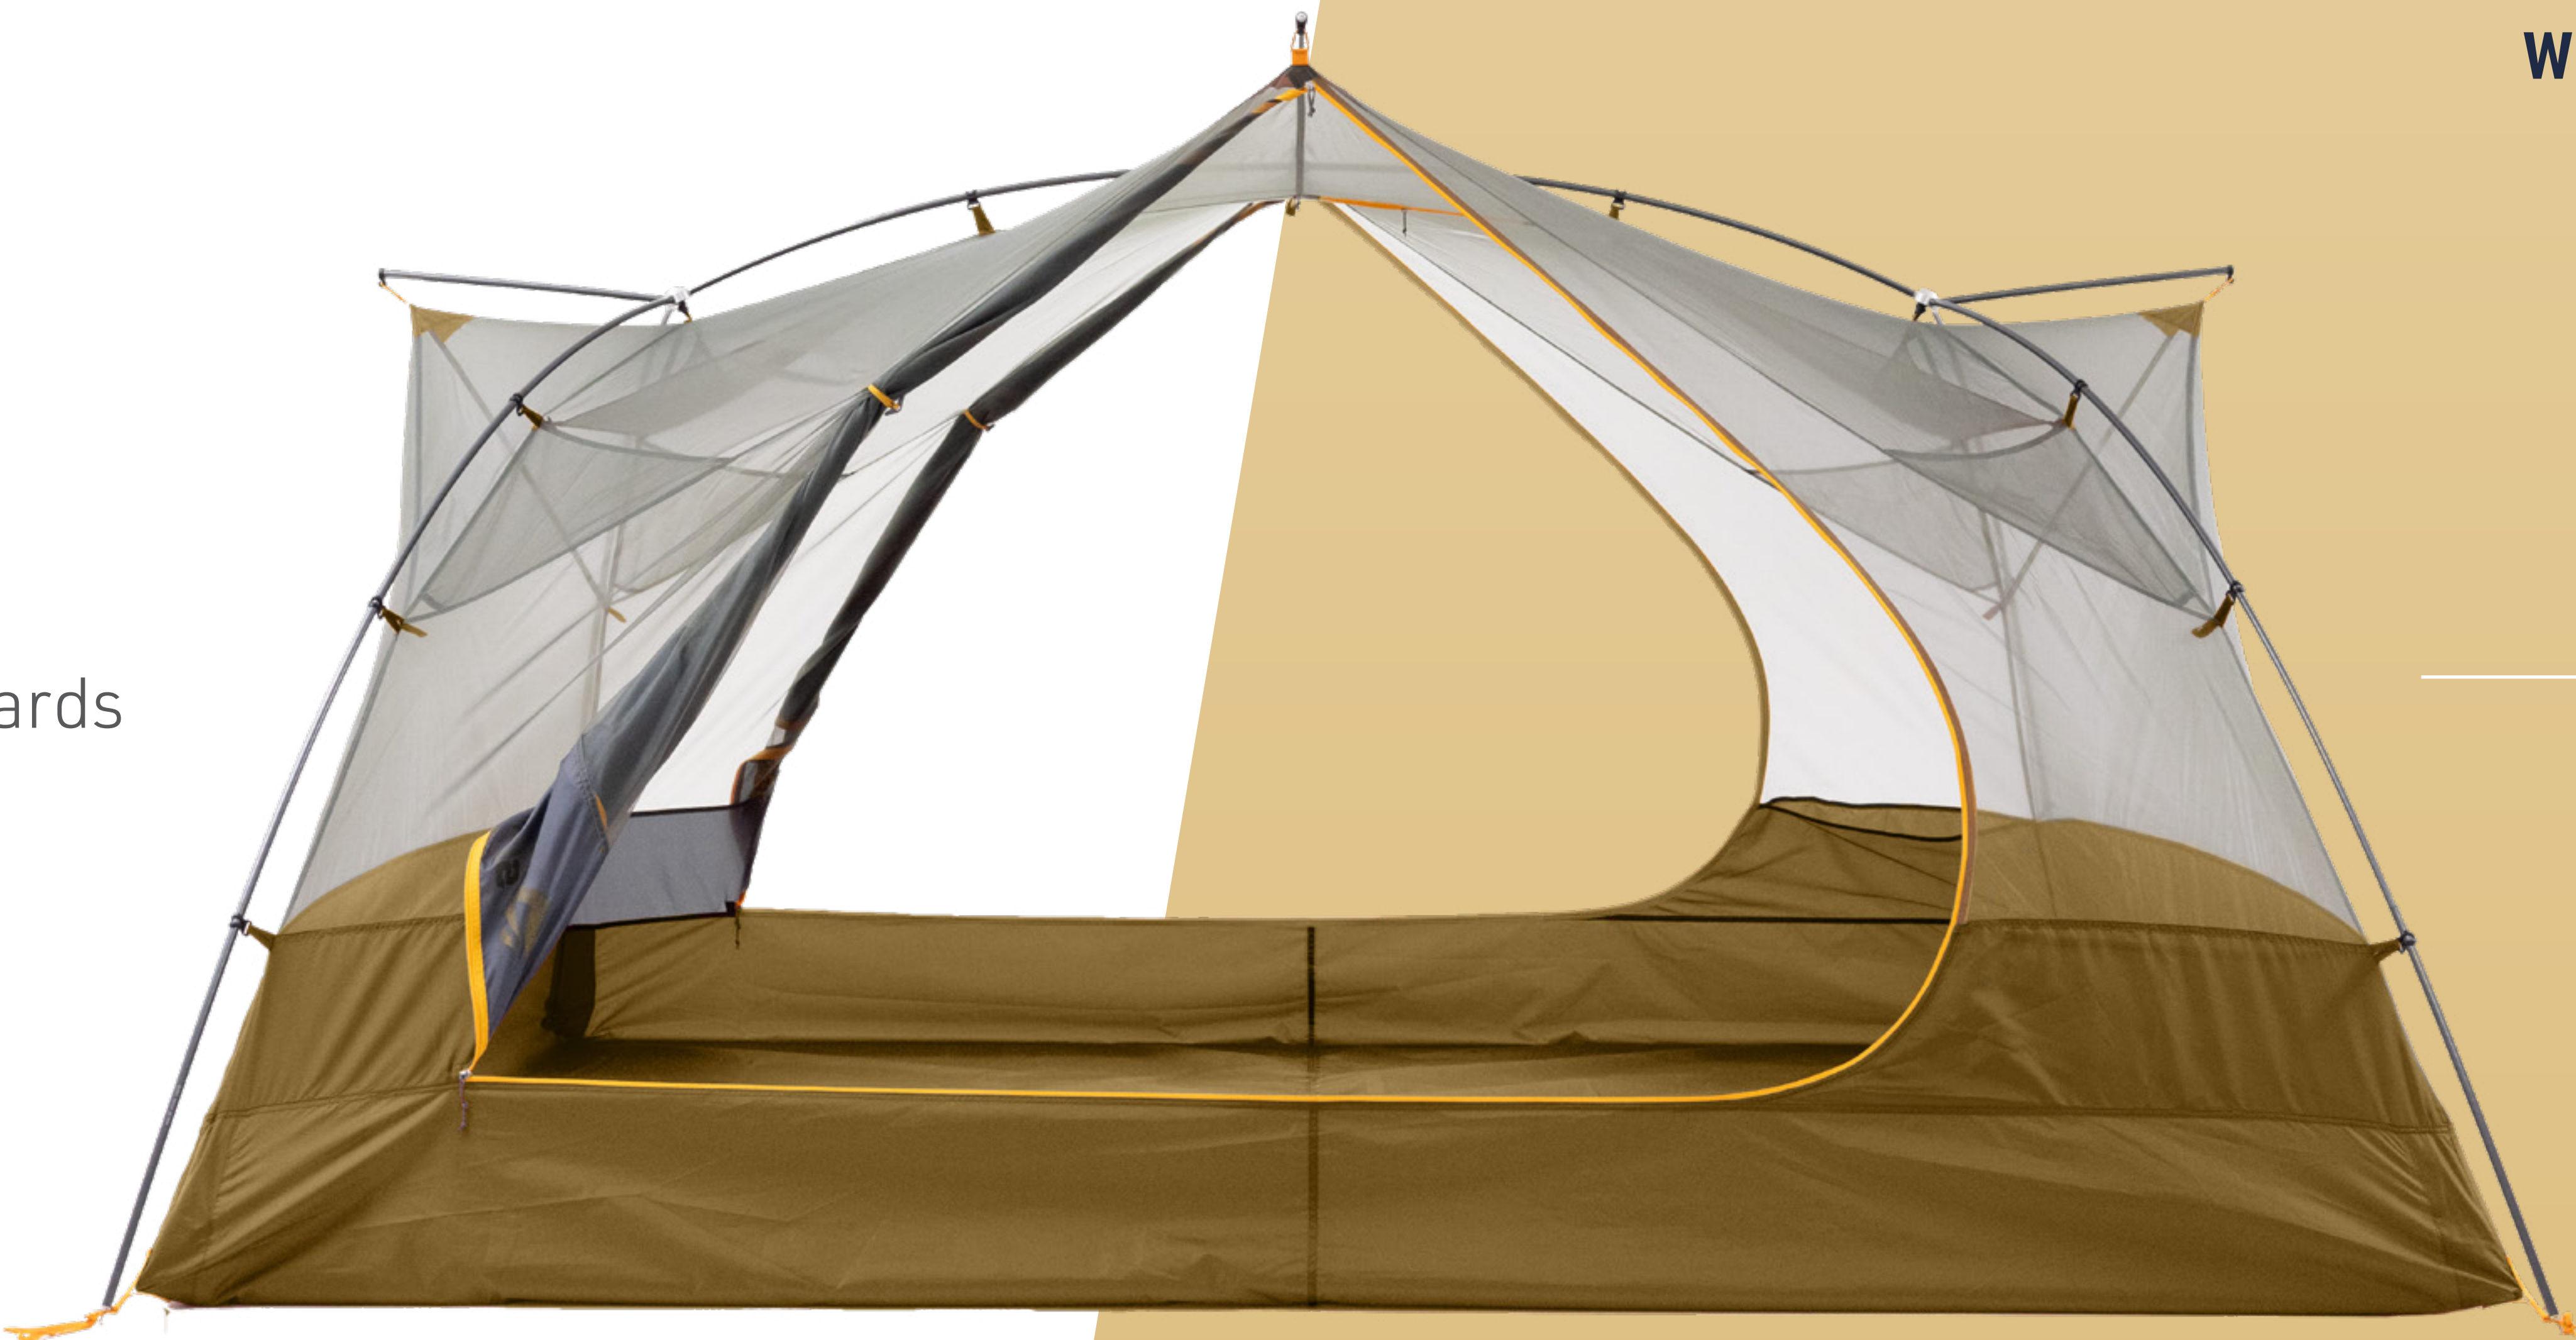

Symmetrical architecture, Hold Fast 'C' clips, and colour-coded poles simplify setup and takedown. The included Gear Loft organises the interior, while the footprint (now also included) protects the floor and enables dry takedown and fly-only pitching.

Spacious Liveability

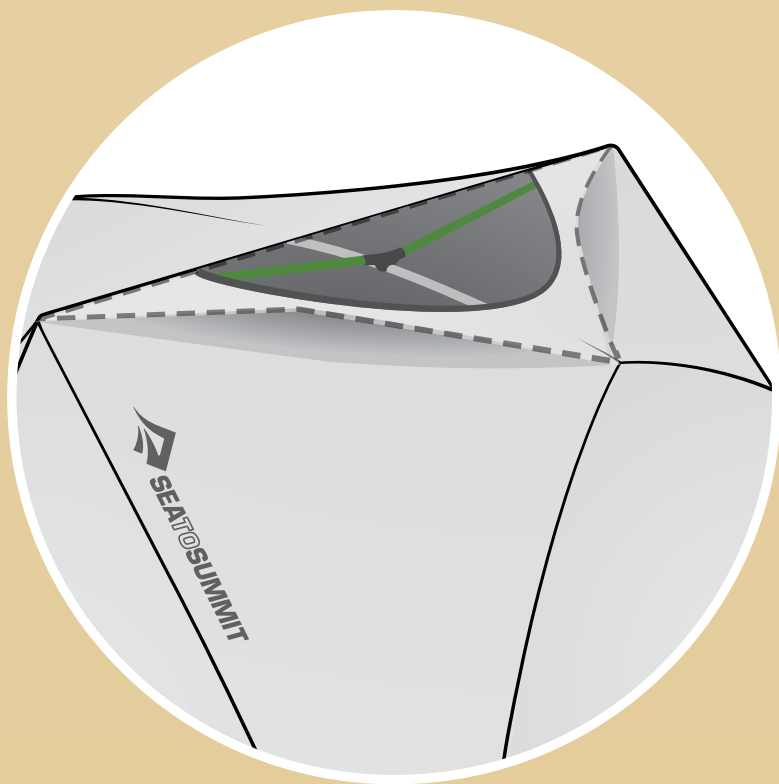

Vertical sidewalls and Tension Ridge architecture raises the tent's shape upwards and outwards for more usable internal volume, creating a truly liveable and spacious 4-person tent.

Adaptable to Changing Conditions

With multiple setup options, the tent can easily transform to provide shelter from the sun, wind, rain, bugs and cold, making it perfect for environments ranging from mountain valleys to deserts and rainforests.

Gear Loft and tent footprint included

Updated closeable Apex Vent with waterproof zipper

Telos TR3

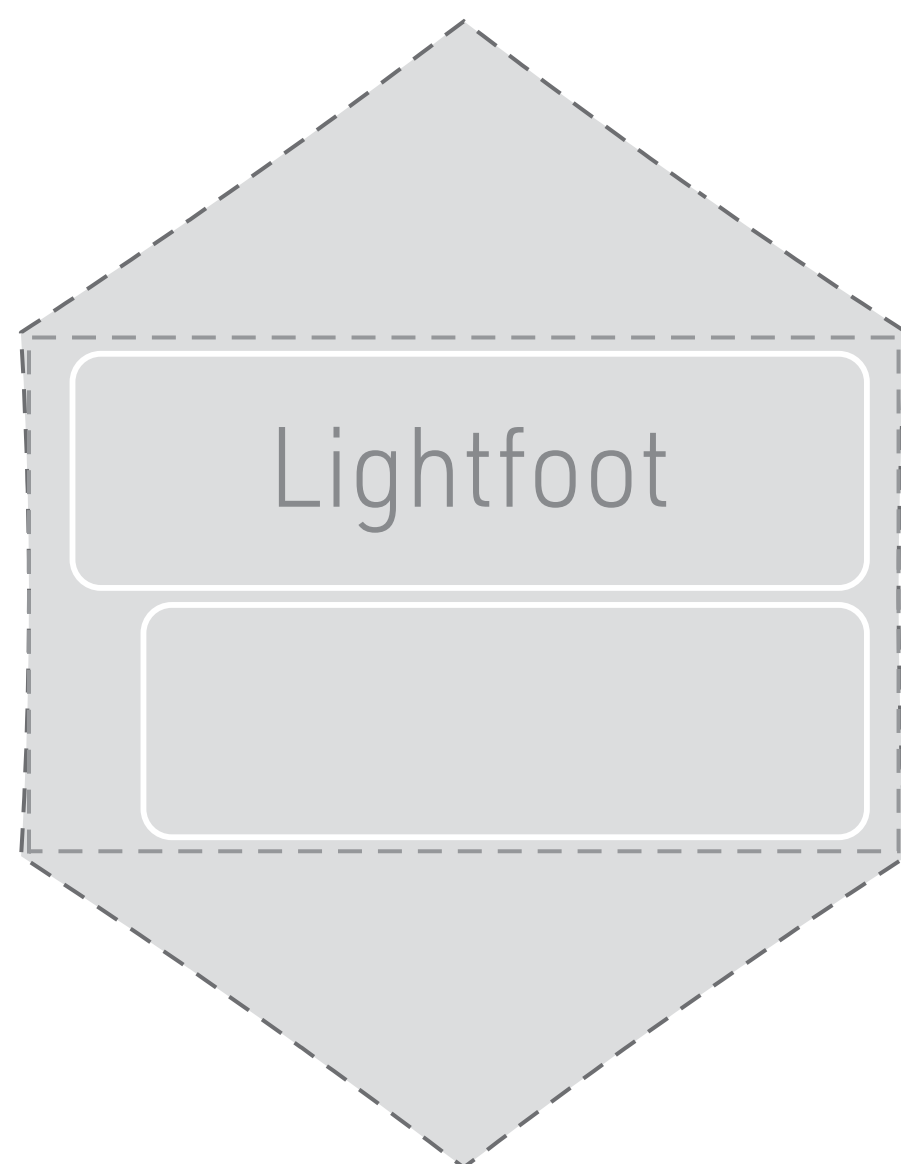

Sentinel Tent LIGHTFOOT FOOTPRINT

The minimalist Lightfoot covers the outline of your tent tub floor.

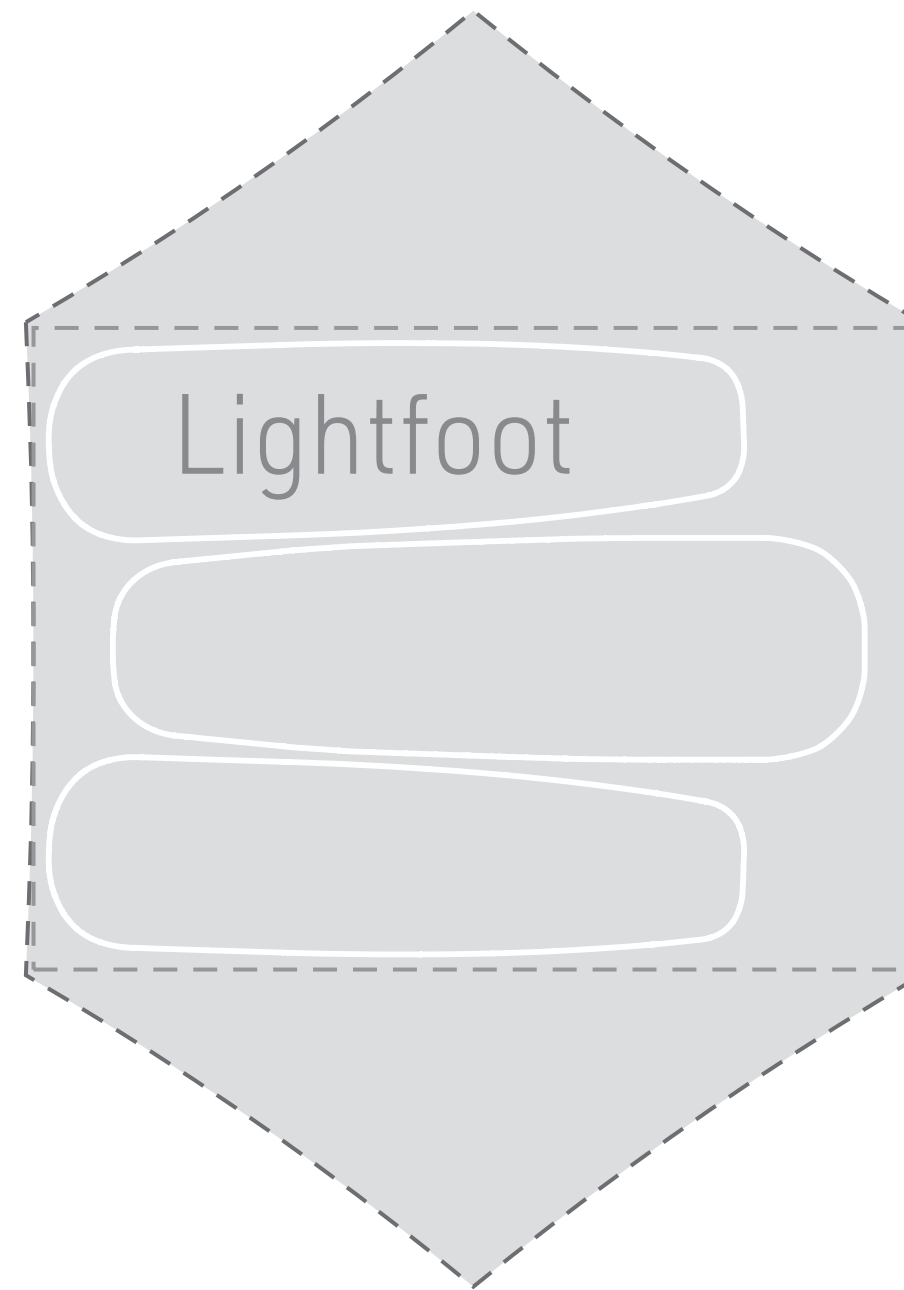

Sentinel XP1

Sentinel XP1

Sentinel XP1

Protect your tent floor from abrasion tears and dirt with our durable and lightweight footprints.

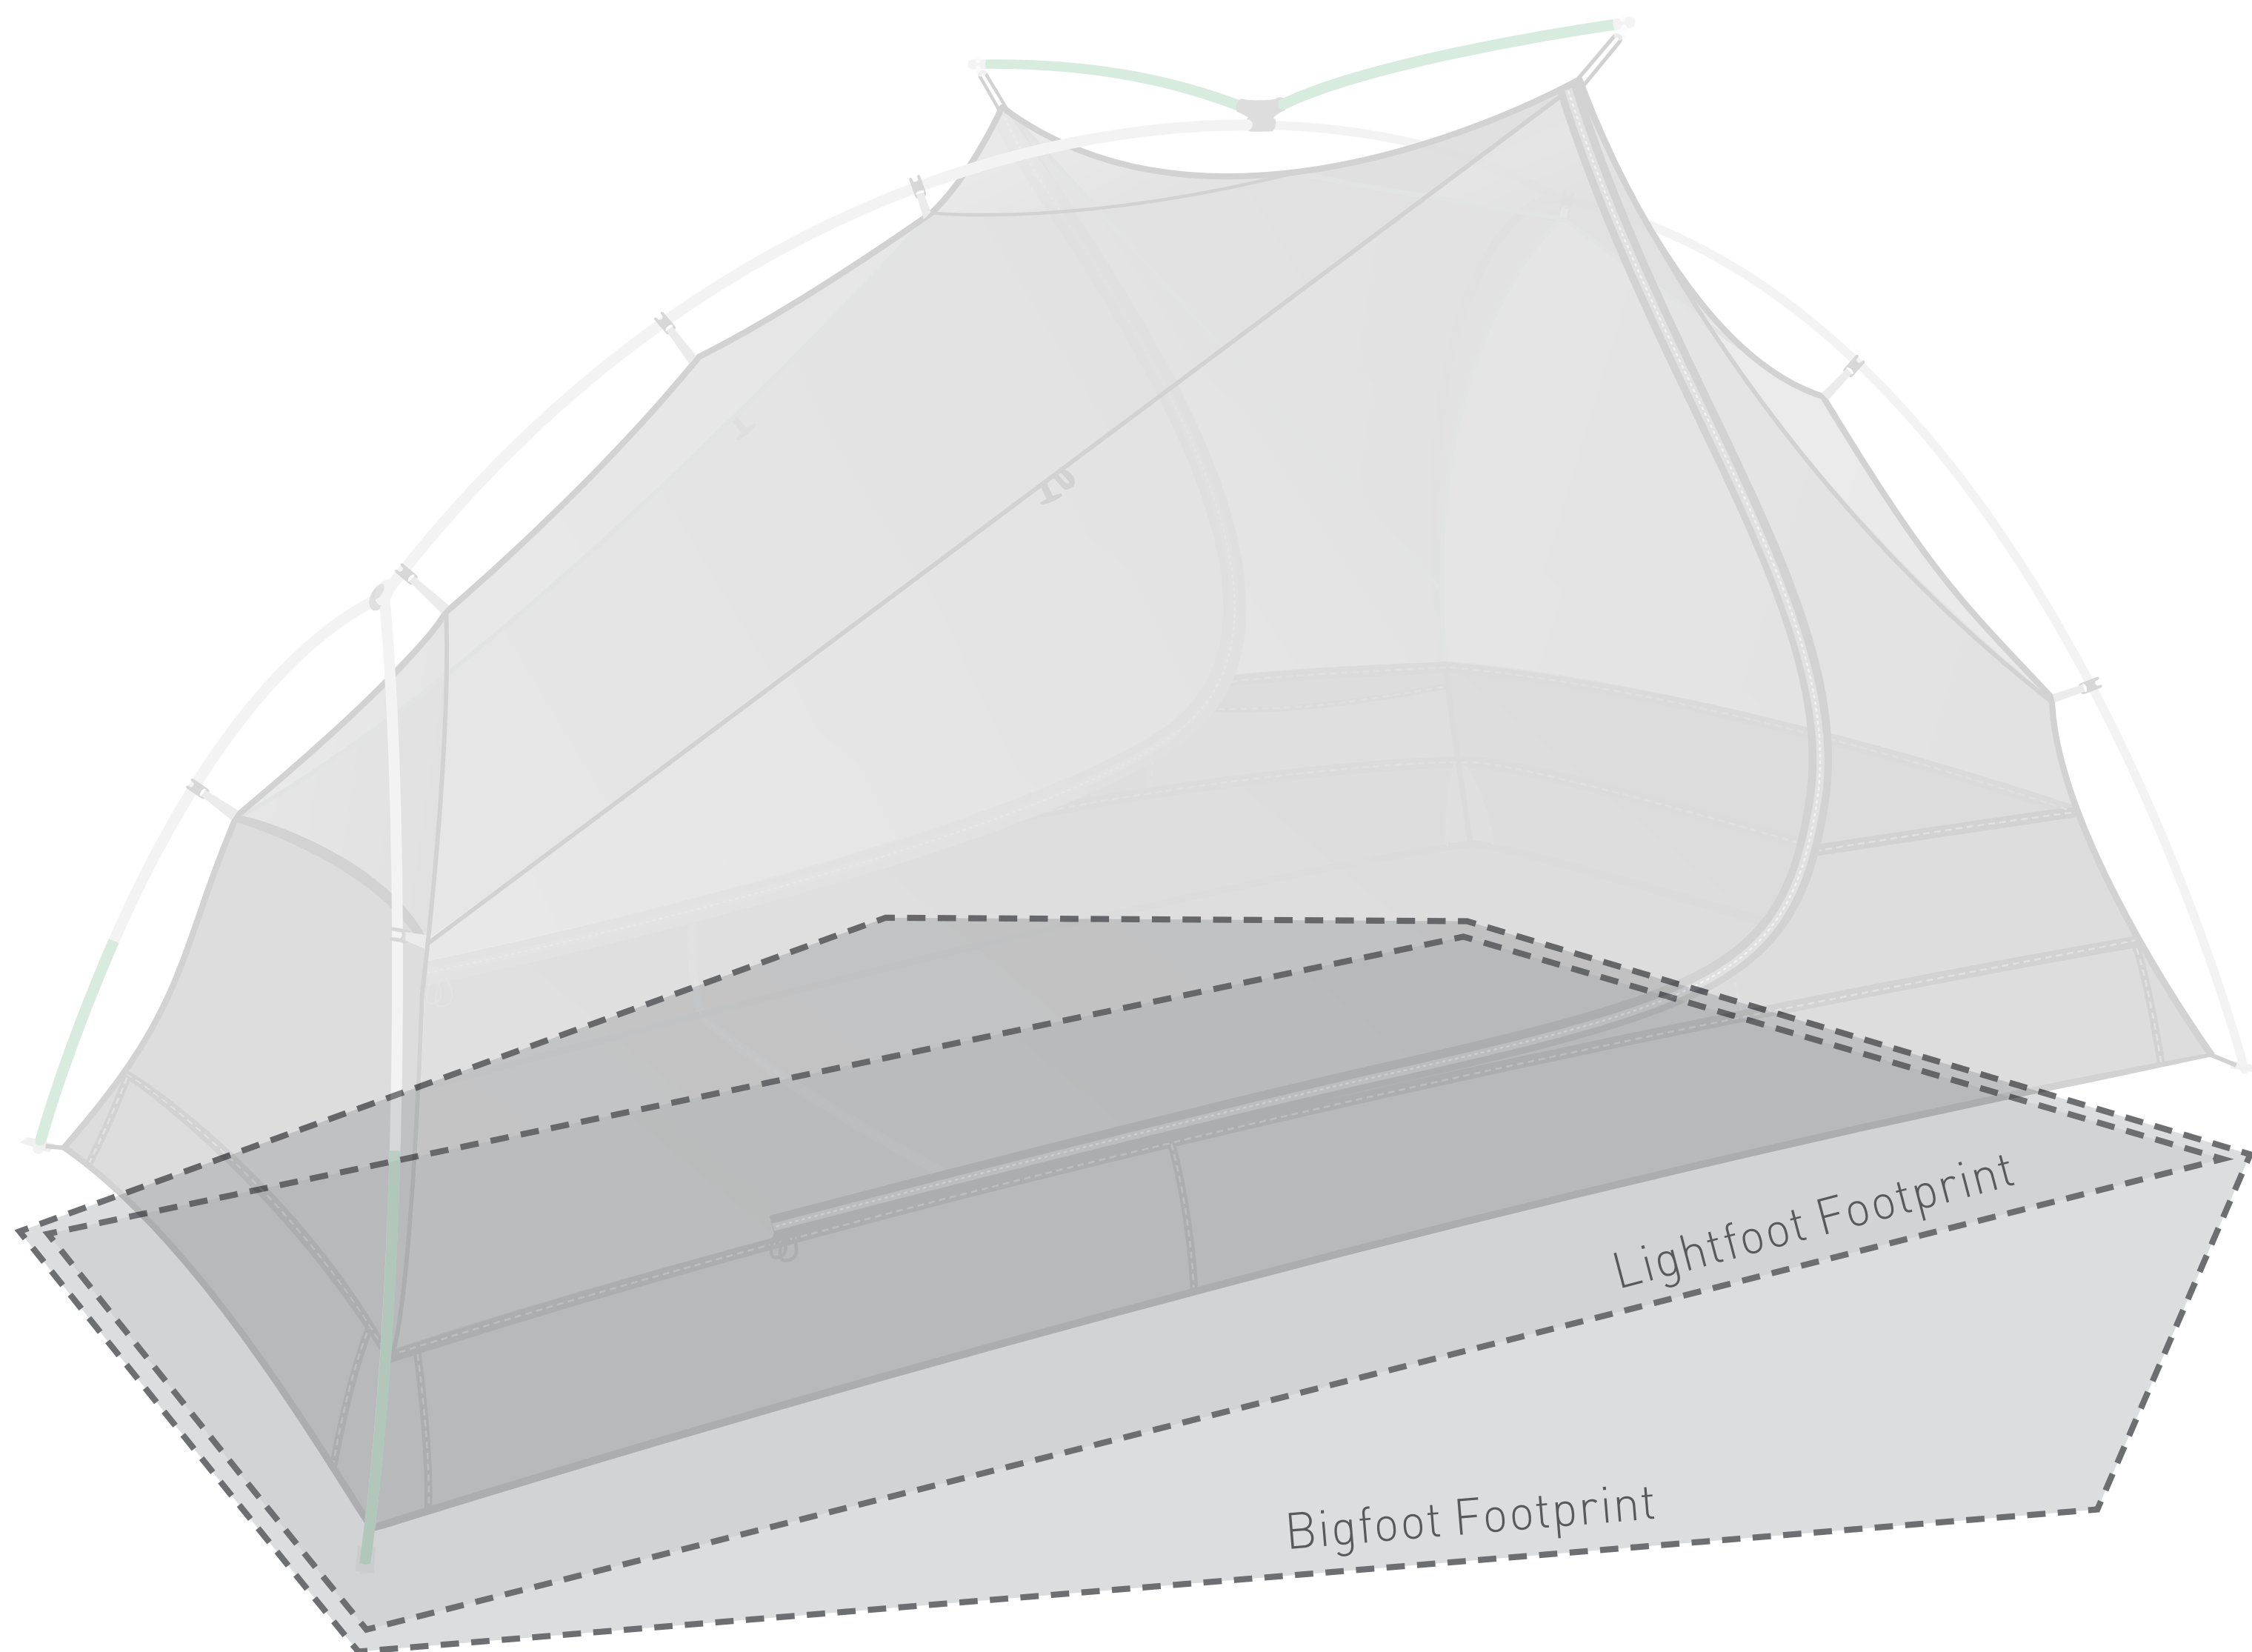

Escapist GROUND SHEET

Protect your shelter floor or sleeping mat from groundwater, thorns, mud, and dirt with this tough, lightweight and waterproof ground sheet.

FEATURES

- Sized to fit under both our Escapist Evo Tarp, Minimalist Tarp and Escapist Mesh Bug Shelter

Comes with a lightweight storage pouch

Hangout Mode POLESET

Activate Hangout Mode in your Telos tent with these custom DAC Featherlite NSL poles.

FEATURES

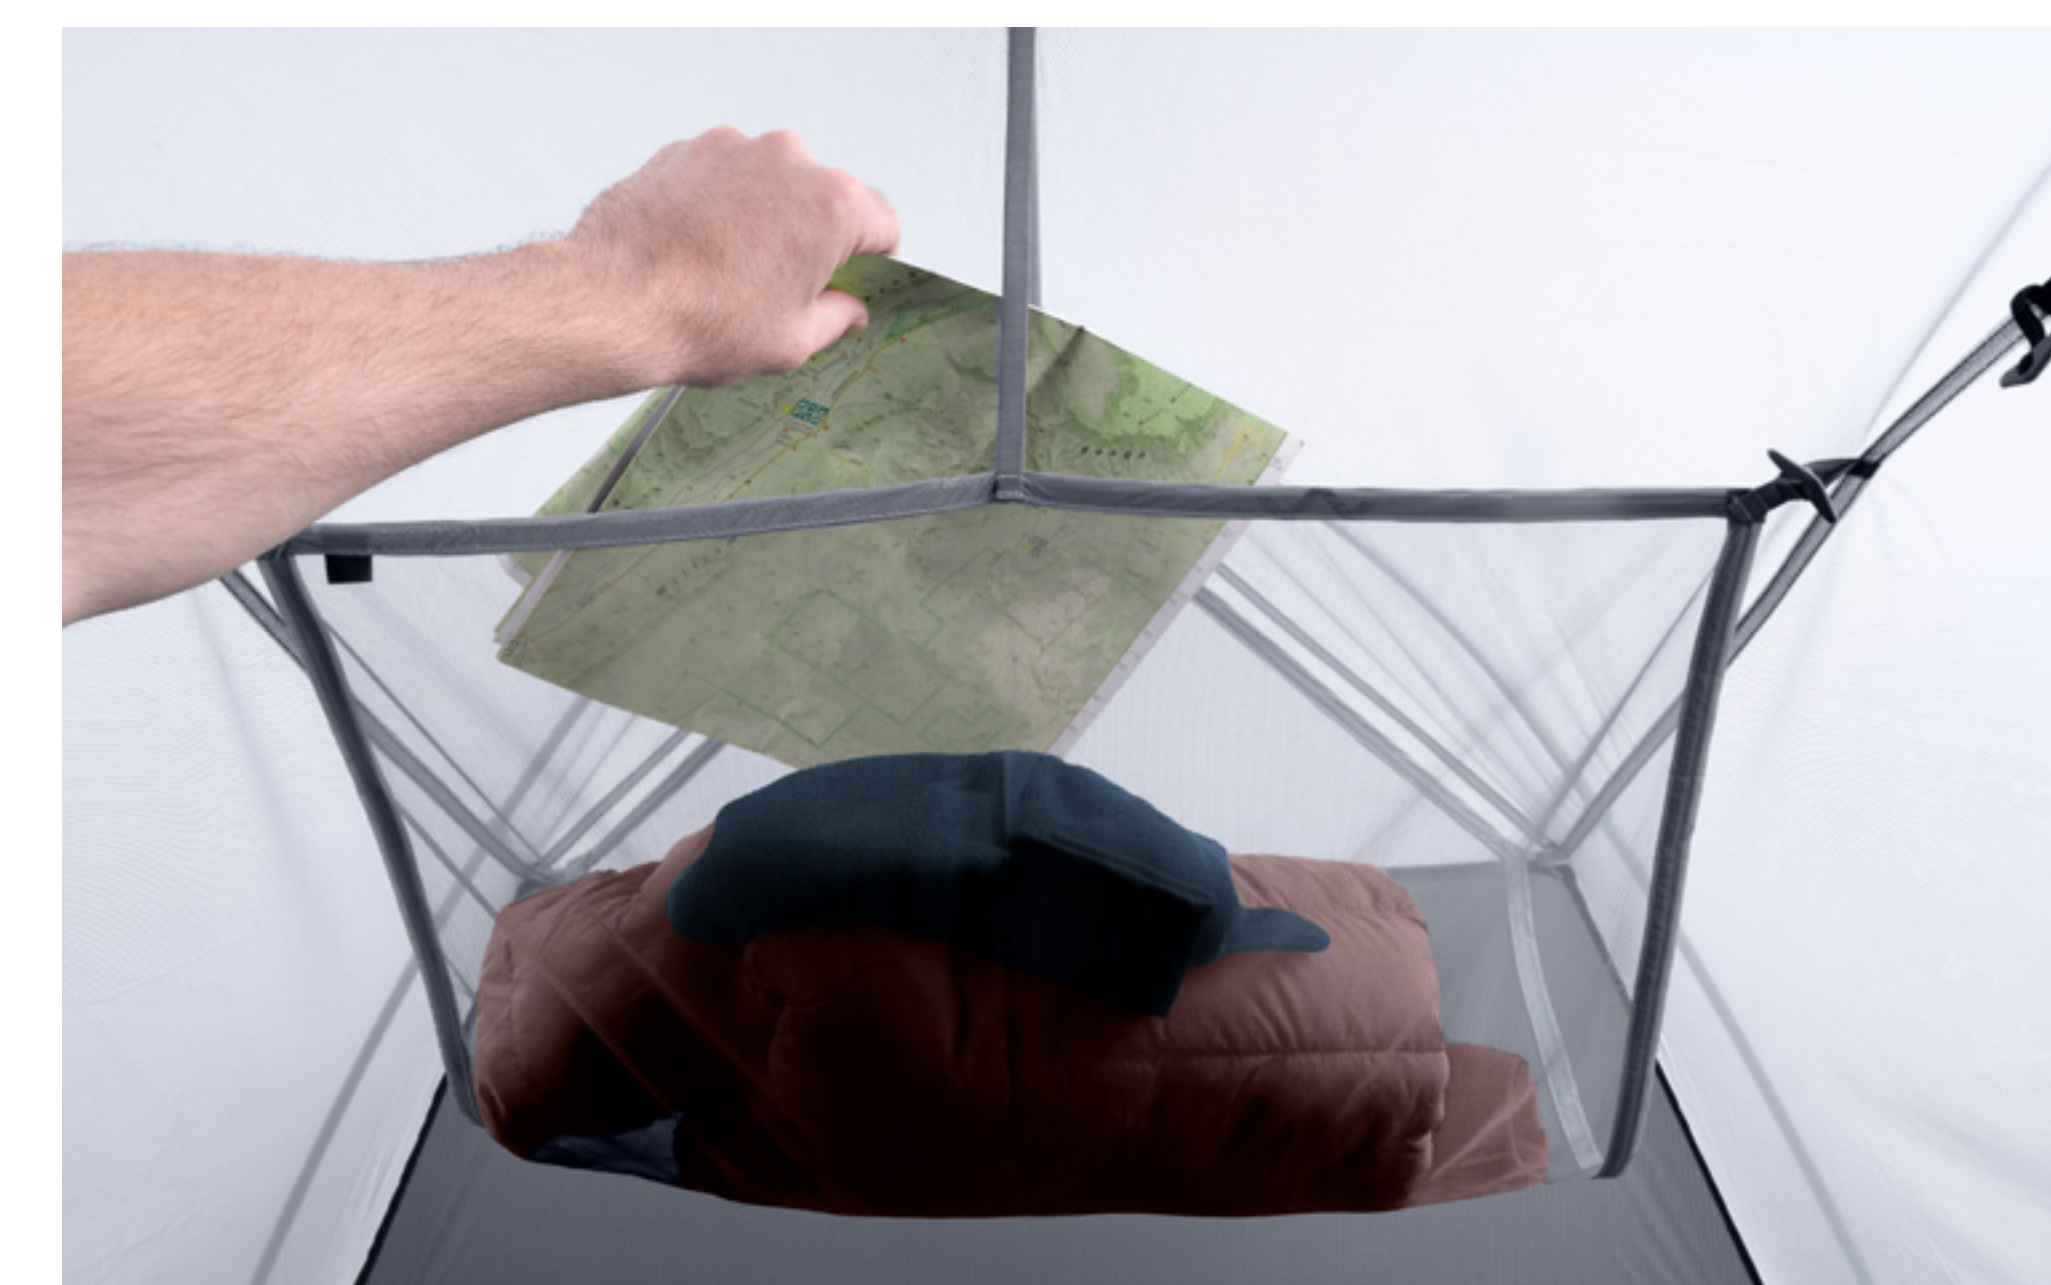

- Easy-to-use pole strap to keep the two-pole set bundled together
- Three-segment poles fold away to fit with the main tent pole set inside the Lightbar stuff sack

Telos GEAR LOFT

Stash gear within easy reach and keep it off the tent floor.

FEATURES

- Perfect for clothes when delayering before bed
- Easily attach and detach with quick-connect V-Toggles

Ground Control GUY CORDS

Make it easy to weather the storm with our quick-connect guy cords for tents and shelters.

FEATURES

- Quick-connect, knot-free V-Toggle attachment for ease of use
- Integrated cord length adjuster—multiple guy cords can also join together for extra length
- Tightly woven, reflective cord resists tangling

Ground Control LIGHT TENT PEGS

Strong and ultralight premium 7 series aircraft alloy (7075-T6) tent pegs with a unique TriPoint shape.

FEATURES

- Rigid TriPoint design maximises grip in varied ground conditions
- Multiple notches keep guy cord low and secure in hard ground
- Reflective pull-cords for easy removal and improved visibility at night

Ground Control TENT PEGS

Light and strong three-sided replacement pegs for your tent, tarp or shelter.

FEATURES

- Reflective cord and luminescent pull loop for peg extraction
- Multi-height guy points to reduce leverage on the peg
- Available as a pack of 8 pegs including Ultra-Sil stuff sack, or a bulk refill pack for individual sale

PACKS & BAGS

WHAT'S NEW IN AW2026

Carry Your Way

From expeditions to everyday adventures, every bag is built to move the way you do. Switch from hand carry to shoulder or backpack with quick-change straps designed for comfort and flexibility wherever the journey leads.

Check Bag Ready

Built for smooth transit from check-in to carousel. All straps remove or stow away for a clean profile that won't snag in transit, while padded handles and durable fabrics take the knocks of airline travel in stride

Effortless Packing, Easy Access

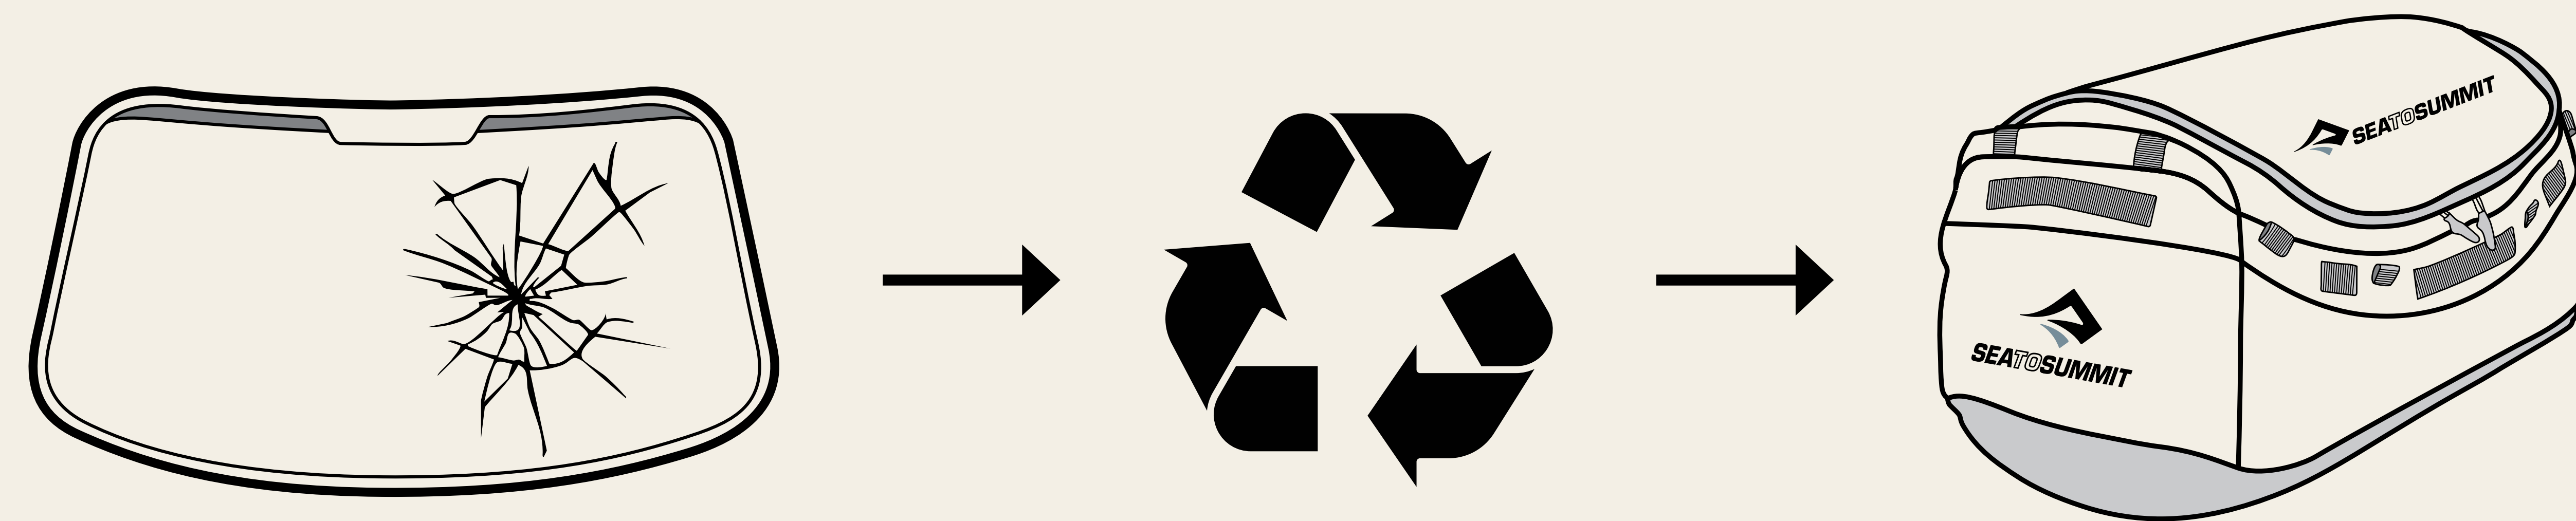

Oversized openings, structured shapes, and clean interiors make packing simple and finding gear fast. Duffles include a storage bag that doubles as a packing cube, helping you stay organised from home to trailhead.

Lower Impact, Lasting Performance

Constructed from recycled fabrics laminated with reSHIELD – a PVB film reclaimed from vehicle windscreens – the Meridian and Talus ranges pair reduced impact with durability you can depend on.

ReSHIELD FABRIC

**From Windscreens
to Waterproof**

What is ReSHIELD?

ReSHIELD is Sea to Summit's next-generation waterproof laminate, engineered for durability and environmental responsibility. It's created by recovering polyvinyl butyral (PVB) membranes from damaged automotive windscreens - material that would otherwise go to landfill - and repurposing them into a tough, waterproof barrier for technical travel gear. The PVB film is laminated to recycled base fabrics and tested to exceed 10,000 mm hydrostatic head, delivering long-term waterproof performance and structural integrity where it's needed most.

*From windscreens to waterproof.
ReSHIELD transforms waste into
adventure-ready protection.*

PACKS & BAGS

CARRY YOUR WAY

Comfortable Hand Carry Straps

Perfect for those short hauls from the kerb to the check-in counter, the integrated straps make lifting and carrying effortless. Padded for comfort and balanced for control, they sit naturally in your hand to make every move feel easy.

Backpack Carry

When you're covering longer distances or need your hands free, the ergonomically shaped, multi-density straps make carrying the duffel easy and comfortable. With adjustable lengths to suit a wide range of body types, it's designed to move naturally with you wherever you go.

Padded Grab Handles

Padded grab handles on all four sides make it easier to manoeuvre in tight spaces. Reinforced with X-webbing that increases structural width by 80% at the seam – they deliver greater strength, comfort and control wherever your travels take you.

PACKS & BAGS

CHECK BAG READY

Metal Hardware

Reliability matters. That's why Sea to Summit uses all-metal hardware at every strap attachment point, ensuring lasting strength and dependable performance no matter where your travels take you.

Strap Garage

Travel demands quick transitions. The dedicated strap garage lets you neatly stow away your hand-carry strap when it's not in use, keeping your duffel snag-free and comfortable to carry in backpack mode.

Removable Backpack Straps

Easily remove and stow the backpack straps when not in use. On the Meridian Duffel, an exterior pocket with a water resistant YKK zipper provides a dedicated spot to keep them neatly stored.

Ready for Check-In

Airline travel can be tough, but these duffles are built to take it in stride. With fully removable straps for a streamlined shape and robust construction throughout, they're made to handle the rough and tumble of baggage handling.

PACKS & BAGS

EASY TO PACK & STORE

Oversized D-Shaped Opening

Pack fast and find what you need with ease. The oversized lid and robust #10 YKK zippers open wide, giving you clear visibility and instant access to everything inside your duffel.

Maximum Packing Space

The duffel’s modern, open layout maximises room for everything you need. With an uncluttered interior, it adapts easily to any trip or packing style.

Storage Cell

Designed to look clean and organised on the retail floor, the storage cell presents the duffel neatly and makes it easy for customers to repack after handling. It also provides compact storage at home when not in use.

Packing Organisation

Designed to fit perfectly inside the duffel, the storage cell doubles as a packing cell, forming the foundation of an organised packing system.

DUFFLE BAG MERIDIAN

Check. Bag. Ready

Carry your Way

Switch from hand carry to backpack with a quick-change harness built for comfort. Heavy duty aluminium hooks ensure reliability, while padded handles make short hauls easy. Meridian adapts to your journey.

Checked Bag Ready

Built tough to survive baggage handlers. Stow straps in stealth pockets, grab padded handles on all sides, and check in with confidence. A padded base and streamlined profile keep it rolling with the punches.

Easy Packing

Oversized D-shaped lid with YKK #10 zip swallows gear, while the clean interior maximises space. The supplied storage bag doubles as a packing cube to start your packing system.

Lower Impact, High Performance

Live life to the fullest with a bag made from second-life materials. 600D recycled polyester laminated with ReSHIELD PVB film from reclaimed windscreens and 1000D recycled nylon reinforcements keep your impact low while keeping your gear safe.

DUFFLE BAG TALUS

Carry Anywhere. Trust Everywhere.

Expedition Ready

From custom metal clips to oversized zips, and a bomb-proof hypalon attachment rail that wraps around the entire bag, Talus combines heavyweight materials with solid engineering for unmatched durability.

Easy Packing. Easy Access

Designed to swallow your gear, the oversized D-shaped lid with a YKK #10 zip gives unmatched access to the cavernous interior. The stiff fabric holds its shape while you pack, and the included storage bag converts into a packing cell to keep gear organised and easy to find.

Adaptable Carry

Wherever your expedition takes you, changing modes of transport is part of the journey. The Talus straps convert quickly from hand grip to backpack style, and padded base and lid protect both your gear and your back.

Lower Impact Materials

Constructed from a 1500D recycled polyester laminated to ReShield - a PVB film reclaimed from vehicle windscreens and reinforced with 1000D recycled nylon, Talus is built to take you to the ends of the Earth while treading lighter on the planet

Carry straps convert quickly from hand carry to backpack

HYDRAULIC PACKING CUBES

Lightweight. Durable. Dustproof.

Protect Your Gear With Confidence

Engineered with PU-coated zips and RF-welded seams, Hydraulic Packing Cubes deliver IP6X-certified dustproof and water-resistant protection – keeping your contents dry, clean, and secure in any conditions.

Ultralight yet Tough

Constructed from TPU-laminated 70D ripstop nylon, Hydraulic Packing Cubes balance minimal weight with maximum durability. High-tech materials deliver rugged performance built to withstand years of travel and adventure.

Easy Organisation

A translucent TPU window and multiple colour options make it simple to identify and sort your gear. Hydraulic Packing Cubes keep your essentials visible, organised, and ready for effortless packing and access on the move.

Range of Sizes

Available in four versatile sizes to suit every journey – from compact cubes for electronics and cords to larger options for clothing and gear. Choose individual cubes or a complete set for a perfectly coordinated packing system.

WATERPROOF TOTE PACK MERIDIAN

Dry Bag Protection, Anywhere you Go.

Waterproof

Keep contents dry and protected with the integrated roll-top closure and taped seams. When not needed, the collar folds inside for clear, easy access to the main compartment

Hand Carry

Integrated, padded handles are always ready for use, offering a comfortable grip for short trips and quick transitions

Shoulder Carry

For longer trips or when you need your hands free, the webbing straps quickly lengthen to sit comfortably over the shoulder

Backpack Carry

For ultimate comfort and versatility, the webbing straps quickly convert into padded backpack straps, providing balanced, all-day comfort wherever you're headed

WATERPROOF TOTE PACK MERIDIAN

Dry Bag Protection, Anywhere You Go.

Reliably Waterproof

Fully taped seams, 10,000mm waterproof fabric and extendable collar keep water, sand, and everything else out - simply roll, clip and seal the closure to bring Sea to Summit's proven dry bag performance to everyday carry.

Everyday Carry, Your Way

Carry by hand, sling over your shoulder, or wear as a backpack when the distance stretches. From the store to the shore, or city streets to the canoe, it's at home in any environment.

Comfortable and Dependable

Padded backpack straps with aluminium hooks detach in seconds for streamlined carry. Hypalon points reinforce key stress areas, while stretch-knit handles stay soft yet strong.

Lower Impact, High Protection

Made from 600D RCS recycled polyester with ReSHIELD post-consumer PVB lamination reclaimed from vehicle windshields. Keep your impact low and your gear safe.
