

K2 26/27 **Ski Collection**

Free & Original

SINCE 1962

We're the Original American Ski Brand and we show up for everyone, but not just anyone. We're here for the ski bums, the dirtbags, the rebels, and everyone else who carves their own path and creates a life worth living and sharing. We'll be there, serving the culture that drives innovation that results in best-selling products, completing and restarting the cycle.

COLLECTIVE PROGRESS: TOGETHER, DRIVING CHANGE FOR THE OUTDOORS

Like-minded people driving progress for the outdoors, together

K2 believes that protecting the places we love is a shared responsibility. Through our Collective Progress initiative, we're bringing together passionate people, partners, and ideas to reduce our impact, safeguard natural resources, and inspire the next generation of outdoor enthusiasts.

Carbon Reduction

We're committed to lowering our carbon footprint through the use of cleaner energy, sustainable materials, and more efficient production processes.

Sustainable Materials

By integrating flax, bio-resins, recycled materials, and eco-friendly technologies across our ski and boot lines, we're reducing waste and using materials that give back to the earth.

Product Lifecycle & Repairability

We focus on durability, repairability, and recycling to extend the life of our products and reduce waste. Our products are built to last and designed to be easily repaired or recycled.

Community & Partnerships

Working with like-minded organizations and communities, we're fostering collaboration that drives environmental awareness and action within the outdoor industry.

A skier in a white suit is captured mid-air, performing a backflip over a snow-covered wooden fence. The skier is holding their skis vertically. The scene is set at night with a dark blue sky and falling snow. The fence is made of dark wooden slats and is heavily laden with snow. The skier's suit is white with some dark accents. The overall atmosphere is dynamic and adventurous.

A photograph of three skiers sitting on a wooden bench outdoors. The skier on the left is wearing a dark jacket, a green beanie, and sunglasses, with their arms crossed. The skier in the middle is wearing a dark helmet, goggles, and a dark jacket. The skier on the right is wearing a dark jacket, a striped beanie, and sunglasses. They are all wearing ski boots and have their skis and poles leaning against the bench. The background features a stone wall and a wooden log stump.

POLES

Mindbender Pole

Simple, strong, and ready from the resort to the skin track. Built from strong and lightweight 7075 aluminum with a touring EVA sleeve for comfort on the climb and control on the descent. No gimmicks—just a dependable pole for big days all season long.

FEATURES

Flipjaw Adjustment Mechanism

- GRIP:** Freeride Dual Injection
- SHAFT:** Adjustable 7075 Aluminum
- BASKET:** 70mm Freeride
- SIZES (CM):** Adjustable: 100-120, 110-135
- COLORS:** Black

Freeride Flipjaw

Forged out of tough 7075 aluminum and featuring K2's proprietary Flipjaw locking mechanism, the Freeride Flipjaw seamlessly transitions from early-morning skin tracks to afternoon resort laps. Ditch those featherweight touring poles for something that is equally at home on the skin track and the chairlift.

FEATURES

Flipjaw Adjustment Mechanism

- GRIP:** Freeride Dual Injection
- SHAFT:** Adjustable 7075 Aluminum
- BASKET:** 70mm Freeride
- SIZES (CM):** Adjustable: 100-120, 110-135
- COLORS:** Black, Offwhite

Freeride 18

With a comfy dual injection rubber grip and a bombproof 18mm diameter aluminum shaft, the Freeride 18 is built to last. Listen, you can get some crazy bells and whistles on poles these days, all you really need is a comfy grip paired with durable aluminum. Keep things sturdy and simple - drop in with the Freeride 18.

FEATURES

Freeride Dual Injection

- GRIP:** Freeride Dual Injection
- SHAFT:** 18mm 7075 Aluminum
- BASKET:** 70mm Freeride + 95mm Powder
- SIZES (CM):** 110, 115, 120, 125, 130
- COLORS:** Khaki, Dark Green

Power Carbon

All carbon ski poles are basically the same, right? Wrong. Take a look at the lightweight Power Carbon - with a slick pole strap adjustment system and ultra-comfy Ripcord grip, you'll be wondering what exactly you've been wrapping your fingers around all these years. You're picky about your skis, boots, and goggles - why not be just as discerning when it comes to your poles?

FEATURES

Carbon Web

- GRIP:** Ripcord
- SHAFT:** 14mm Carbon Web
- BASKET:** 70mm Freeride
- SIZES (CM):** 110, 115, 120, 125, 130
- COLORS:** Red

Power Composite

With a thermo-formed Performance Rubber grip and lightweight-yet-durable 16mm composite shaft, the Power Composite represents that perfect balance between lightweight performance and durable practicality.

FEATURES

- BASKET:** 60mm All Mountain
- SIZES (CM):** 110, 115, 120, 125, 130, 135
- COLORS:** Slate

Power Aluminum

Save some coin without sacrificing proper pole plants. You might have just used "whatever is lying around" in the past, but that ain't cutting it now. Get your hands on a pair of durable Power Aluminum poles, featuring a robust 18mm-diameter shaft, and push off into your next on-mountain adventure.

FEATURES

Nesting Baskets

- GRIP:** Performance Rubber
- SHAFT:** 18mm Aluminum
- BASKET:** 60mm Performance
- SIZES (CM):** 110, 115, 120, 125, 130, 135
- COLORS:** White, Blue

Style Composite

The Style Composite is K2's sensible, lightweight pole offering for the ladies. Equipped with an ergonomic Performance Rubber grip and a 16mm shaft diameter that reduces weight without sacrificing durability, these poles will have you focusing on your skiing, not your gear. Available in shorter lengths for smaller skiers.

FEATURES

100% Composite

GRIP:	Performance Rubber
SHAFT:	16mm Composite
BASKET:	60mm All Mountain
SIZES (CM):	105, 110, 115, 120
COLORS:	White

Style Aluminum

For the female skier who doesn't want to worry about the durability of her ski poles, we offer the Style Aluminum. Built with a strong but lightweight 16mm aluminum shaft, these poles strike the perfect balance of reliable performance and incredible value. Available in shorter lengths for smaller skiers.

FEATURES

Nesting Baskets

GRIP:	Performance Rubber
SHAFT:	16mm Aluminum
BASKET:	60mm Performance
SIZES (CM):	105, 110, 115, 120
COLORS:	Black, Blue

Lockjaw Carbon Plus

You've been checking the forecast, and everything is lining up. Stable, cold snow lies just a few hours' skin from the trailhead. Scoop up the Lockjaw Carbon Plus and take a hike (in a good way). With an extended Adventure Ultra Light EVA foam grip, articulating powder baskets, proven Lockjaw 6000 locking mechanism, and built-in bubble inclinometer, these poles are as adventure-ready as you are.

FEATURES

Lockjaw 6000 Adjustment Mechanism, Bubble Inclinometer

GRIP:	Adventure Ultra Light EVA
SHAFT:	Adjustable Carbon Web
BASKET:	95mm Articulating
SIZES (CM):	Adjustable: 105-145
COLORS:	Yellow

Lockjaw Carbon

With a carbon upper and aluminum lower, the Lockjaw Carbon is ready for big days in the backcountry. Featuring our bombproof Lockjaw 6000 adjustment mechanism, elongated EVA foam grips for easy sidehilling, and an integrated bubble inclinometer to help keep you safe, the Lockjaw Carbon proves that poles are more than just pointy sticks to keep you upright.

FEATURES

Lockjaw 6000 Adjustment Mechanism, Bubble Inclinometer

GRIP:	Adventure Ultra Light EVA
SHAFT:	Adjustable Carbon Upper/7075 Aluminum Lower
BASKET:	95mm Powder
SIZES (CM):	Adjustable: 90-130, 105-145
COLORS:	White

Lockjaw Aluminum

Sometimes you just need a reliable adjustable pole to get you into the backcountry. Look no further than the Lockjaw Aluminum: reliable, wallet-friendly. Complete your kit and hit the skin track.

FEATURES

Lockjaw Adjustment Mechanism, Bubble Inclinometer

GRIP:	Adventure Ultra Light EVA
SHAFT:	Adjustable 7075 Aluminum
BASKET:	95mm Powder
SIZES (CM):	Adjustable: 105-145
COLORS:	Gunmetal

Swift Stick

Why run a pair of trekking poles in the summer and then have to buy a pair of ski poles for the skin track? If your life revolves around the trails – during summer and winter – get the four-piece, collapsible, adjustable Swift Stick. With our Flipjaw telescoping design, Adventure EVA foam grip, and sturdy aluminum construction, the Swift Stick will be your number one companion, regardless of the season.

FEATURES

Flipjaw Adjustment Mechanism, Bubble Inclinometer

- GRIP:** Adventure Ultra Light EVA
- SHAFT:** Adjustable 7075 Aluminum
- BASKET:** 95mm Powder
- SIZES (CM):** Adjustable: 110-130
- COLORS:** Grey

Sprout

Nothing is worse than buying a bunch of gear for your kid, only to have them outgrow it within a year. Pick up the adjustable Sprout and rest easy, knowing that your pint-sized shredder's poles will last for more than a season.

FEATURES

Flipjaw Adjustment Mechanism, Nesting Baskets

- GRIP:** Rubber
- SHAFT:** Adjustable 14mm Aluminum Upper/16mm Aluminum Lower
- BASKET:** 50mm Performance
- SIZES (CM):** Adjustable: 75-105
- COLORS:** Seafoam, Off White

Decoy/Charm

With two colorways – his and hers – the Decoy and Charm poles add a dash of style to any kid's setup. Plus, these poles are built out of sturdy aluminum, meaning they can withstand the rowdiest of on-snow antics.

FEATURES

Nesting Baskets

- GRIP:** Rubber
- SHAFT:** 16mm Aluminum
- BASKET:** 60mm Performance
- SIZES (CM):** 75, 80, 85, 90, 95, 100, 105
- COLORS:** Blue, Purple

Ski Technology: Construction

CONSTRUCTION		Triaxially Braided K2-patented process that interlocks strands of fiberglass around a milled core for pronounced torsional strength while retaining the flex patterns inherent in a wood ski.
		Metal Laminate A metal laminate construction, denoted by "Ti" in the name, uses a sheet of Titanal above and below the core to give the ski a damp, precise and accurate feel.
		Hybritech Sidewall Blending a sidewall construction underfoot with a cap construction in the extremities. The sidewall section gives the ski accuracy, power, and edge grip while the capped region reduces the swing weight and increases overall durability.
		DuraCap Construction A molding process that envelopes the core and internal materials with the top layer of the ski. Duracap skis are generally lighter overall, with enhanced durability and forgiveness.
		TwinTech Sidewalls A Durable, Full sidewall construction providing great edge feel and performance with added top sheet resistant to ski vs. ski impact damage.
WOMEN'S SPECIFIC		Stance Forward More than simply moving the mounting point on a men's ski, the overall shape, sidecut, and flex are designed around the biomechanics of how women stand and pressure the ski during a turn.
		Correct Flex Eliminates the overly stiff mid-section typically found on shorter lengthed skis. K2 addresses this with an insert that leaves a smooth, consistent flex profile optimized on every size from longest to shortest.
FREERIDE		Dark Matter Technology - The next dimension of ski design. It is a first of its kind, targeted mass weighting to specific spots on each ski. Injected TPU inserts, that are weighted with powdered stainless steel, are integrated into the core & over the edges at Enhanced Stability Points (ESP). These locations are fine tuned to each model & sized to amplify performance and purpose.
		Torsion Control Design Designed to enhance stability and control in all snow types, TCD combines a progressive torsional flex with a balanced and even longitudinal profile. Torsionally stiffest in the forebody and center of the ski, then easing throughout the tail, K2 skis with TCD have both precise, accurate turn initiation and smooth, consistent turn release in all snow types.
		Spectral Braid An extension of K2's Torsion Control Design, Spectral Braid is a first of its kind variable angle reinforcement that allows for precision tuned torsion and flex by altering the fiber orientation along the length of the ski. Lively, energetic, and remarkably composed; Mindbender skis with K2's Spectral Braid have stability and control in spades while remaining hyper-maneuverable.
		Uni Directional Flax Flax improves a ski's ability to track in variable terrain resulting in improved suspension and composure.

CARVING		Aircore Channels K2's AirCore Channels are precision-cut channels in the aspen core of the ski, designed to enhance energy and agility. This innovative construction only on our Blur 74 W & 79W deliver a lively, responsive flex, improving turn initiation and making the ski feel more nimble on the mountain.
		Titanal H-Beam AMAG Recycled Titanal is layered over the edges to improve edge contact and control, delivering a stable and smooth ride.
		BioResin K2's proprietary resin blend. BioResin was formulated with 30% bio-content and provides better cold temperature toughness and superior bond strength compared to our old, standard resin.
		Flax Shield Flax Shield improves a ski's ability to track in variable terrain resulting in improved suspension and composure.
		Titanal I-Beam Titanal runs from tip to tail along the center of the ski, optimally shaped for stability and precision through the entire turn.
FREESTYLE		Carbon Boost Braid Longitudinal carbon stringers woven into the K2's patented Triaxial Braid for added pop and rebound.
		Uni Directional Flax Flax improves a ski's ability to track in variable terrain resulting in improved suspension and composure.
		Triaxially Braided K2-patented process that interlocks strands of fiberglass around a milled core for pronounced torsional strength while retaining the flex patterns inherent in a wood ski.
TOURING		Titanal Touring Tech First of its kind, Titanal laminate developed specifically for K2 Touring skis that dramatically increases damping and predictability on lightweight carbon constructions, while enhancing stability and edge grip.
		Carbon Overdrive A proprietary construction that delivers incredibly high performance at extremely low weights.
		Snowphobic Topsheet Hydrophobic, snow shedding top material that helps prevent snow from sticking to the tops of your skis.

Ski Technology: Rocker Profiles

Once thought of as a powder-specific feature, K2 pioneered the use of rocker on all-mountain and piste skis, with the rest of the ski industry following in our footsteps. Today, almost all of our skis are built with rocker, with the height and length optimized on each model for maximum performance and enjoyment.

SPEED ROCKER
Short, low rise in the tip with camber throughout and a flat tail for quick turn initiation, precise steering, and maximum stability on groomed snow.

POWDER ROCKER
High and long rise in the tip, low camber underfoot, and a medium-height, long rise in the tail to maximize float in soft snow.

POWDER TWIN ROCKER
High and long rise in both the tip and tail for maximum float in soft snow.

ALL-TERRAIN ROCKER
Gradual rise in the tip for great versatility in all conditions, with a low, short rise in the tail for added control in variable snow.

ALL-TERRAIN TWIN ROCKER
Gradual, extended rise in the tip and tail for added versatility and control in all conditions.

CATCH FREE ROCKER
Effortless turn initiation at slow to moderate speeds thanks to a medium-height, gradual rise in the tip and a low, gradual rise in the tail.

Ski Technology: Ski Cores

K2 uses a variety of wood species in cores to fine tune the energy, rebound and power each core gives a ski.

PURE ASPEN
Lightweight and resilient, great all-around material.

ASPEN MICROBLOCK
Many small stringers of Aspen give a consistent flex, smooth feel, and damp ride.

MAPLE
Energetic, tough, dense wood that absorbs impact.

PAULOWNIA
Lively, low density wood with excellent strength to weight ratio.

FIR
Stiff, strong and dense wood for solid edge to edge performance.

BALSA
Ultra-light and responsive, balsa cores are a key component to our class leading performance to weight ratio.

Overlap Boot Technology

LINERS

ALL NEW P SERIES LINERS

P1 LINER

P1 is the pinnacle of fit and performance. Samdry TPU outer, dual-density mid foam, and EVA inner deliver unmatched comfort and rebound. Laminated PE tongue adds precision, while anatomical shaping secures heel and ankle. Built for aggressive skiers who want maximum customization and all-day comfort.

P2 LINER

P2 balances performance and comfort with PE outer, shaped mid foam, and open-cell inner for plush feel. A 10mm PE tongue adds support, while pre-shaped heel zones lock in fit. Ideal for skiers seeking responsive performance without sacrificing warmth or comfort.

P3 LINER

P3 focuses on comfort and value. PVC outer and soft mid foam create a forgiving feel, while open-cell inner foam enhances warmth. Pre-shaped heel zones maintain security, and a 10mm PE tongue adds structure. Perfect for intermediate skiers who prioritize ease and all-day comfort.

P4 LINER

P4 is streamlined for simplicity and comfort. PVC outer, PE mid foam, and open-cell inner deliver a cushioned feel. A 10mm PE tongue provides support without bulk. Designed for recreational skiers who want reliable fit and easy-going performance.

LEGACY K2 LINERS

INTUITION POWERFIT WRAP BOA® LINER

The Intuition Wrap Liner's laminates are specifically engineered to be our lightest weight liner for increased maneuverability while maintaining its warmth and custom moldable fit right out of the box. The BOA® liner system increases adjustability and evens the hold across the entire foot.

BOA® TOURFIT LINER

BOA liner increases adjustability and even hold across the entire foot. Features stiffer foam with asymmetric tongue for added power and energy transmission. Completely heat moldable with pre-molded ankle pocket.

ELITEFIT PRO LINER

3D shaped PE 160 ankle and heel foam, adjustable 3d shaped Ultralon tongue, molded high performance collar, ski edge sensitivity shims, full lace up design, new Powerfit Pro insole.

ELITEFIT SPORT LINER

3D shaped PE 160 ankle and heel foam, adjustable 3d shaped Ultralon tongue, molded high performance collar, full lace up design, new Powerfit Pro insole.

ELITEFIT PLUS LINER

Pre-molded ankle and heel foam, shaped PE 50 tongue, molded high performance collar, new Powerfit Pro insole.

TOURFIT LT

Lightweight construction that offers same performance features in the pro model. Stiffer foam with asymmetric tongue for added power and energy transmission. Completely heat moldable with pre molded ankle pocket

TOURFIT

Lightweight, hard charging construction inspired by the Lux Fit Tour liners. Pre molded ankle bumps for added fit and fully heat moldable with asymmetric tongue.

POWERFIT PRO

Pre-molded and lasted with Ultralon heat-moldable foam. Featuring stiffer foam and a stiff, asymmetric tongue for added power and energy transmission, pre-molded ankle pockets, and a high-density power collar.

PRECISIONFIT PRO

Pre-molded and lasted with Ultralon heat-moldable foam. Featuring an asymmetric tongue, pre-molded ankle pockets, and a high-density power collar for a firm-but-comfortable performance fit.

POWERFIT PRO TOUR

Pre-molded and lasted with Ultralon heat-moldable foam. Featuring stiffer foam and a stiff, asymmetric tongue for added power and energy transmission, pre-molded ankle pockets, and a high-density power collar. Includes a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

PRECISIONFIT PRO TOUR

Pre-molded and lasted with Ultralon heat-moldable foam. Features an asymmetric tongue, high-density power collar, and a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

LUXFIT PRO

Pre-molded and lasted with Ultralon heat-moldable foam. Features medium-density foam, pre-molded ankle pockets, and a medium-density collar, providing an ideal blend of performance and comfort.

LUXFIT PRO TOUR

Pre-molded and lasted with Ultralon heat-moldable foam. Features medium-density foam, pre-molded ankle pockets, and a medium-density collar, providing an ideal blend of performance and comfort. Includes a tour notch at the back of the ankle for increased comfort and range of motion while hiking and skinning.

CUSHFIT PRO

Maintains the renowned comfort of the original Cushfit liner, but with a notable increase in support and performance thanks to the use of Ultralon foam, similar to what is used in our Powerfit Pro and Precisionfit Pro liners.

CUSHFIT PLUS

Lasted with a blend of open-cell and EVA foam for an extremely comfortable, warm, and supportive fit.

CUSHFIT COMFORT

Same great fit and out-of-the-box feel as our classic Cushfit liner, but with additional foam in key areas for increased comfort and compliance.

CUSHFIT JR

A scaled-down version of our adult Cushfit liner built for our youth boots.

FEATURES

BOA® CUFF

The single cable design allows the tension to self equalize always giving a consistent pressure to the shin. The improved wrap allows for better power transmission and improved comfort even at high tension.

ENERGY BOLTS

A bolted rear cuff gives Cortex excellent rearwards support and a precise forward flex. The top bolt can be removed to allow for a more progressive cuff response and slower rebound.

SKI EDGE SENSITIVITY (SES) SHIMS

Ski Edge Sensitivity allow the skier to tune edge initiation of the ski. SES Shims on Medial side of liner Cuff produce more inside edge angle. Skis feel more reactive and quicker to edge, excellent for slower more precise skiing. SES Shims on the Lateral side of liner Cuff produce less inside edge angle. Skis feel more controlled and more stable, excellent for higher speeds.

PEBAX

Lightweight, eco-friendly material used in the cuff of select boot models for energetic and consistent flex across a wide range of temperatures.

FASTFIT INSTEP

Softer TPU material is used in the instep area of select models' shells for quick and easy entry and exit.

HANDS FREE ENTRY

Dual material overlap for hassle-free entry and exit.

ENERGY INTERLOCK

A rivet-free technology that integrates the cuff and shell, putting less stress on the boot's lower shell and producing a smooth, progressive flex.

POWERFUSE SPYNE

A co-injected Y-shaped support in the rear of the boot that adds strength and power to the Energy Interlock in order to maximize fore/aft flex efficiency and lateral stiffness, providing enhanced responsiveness and energy transfer to the ski.

CUFF ALIGNMENT INDEX

Single-sided alignment system for +/- 1 degree of lateral cuff adjustment

DUAL CUFF ALIGNMENT INDEX

Dual-sided alignment system for +/- 2 degrees of lateral cuff adjustment.

FULLY HEAT-MOLDABLE

Both the boot's shell and cuff are capable of being heat-molded to a variety of foot shapes for a true custom fit.

WOMEN'S-SPECIFIC LAST

A lower cuff height, lower-volume shell, and narrower heel to accommodate women's lower leg and foot shapes.

WOMEN'S ADJUSTABLE CUFF

Allows for quick adjustment of the cuff opening to accommodate a variety of lower leg shapes.

APRÈS MODE 2.0

A new and improved walk mode offering a massive 50-degree range of motion. A lever on the back of the boot unlocks the upper cuff from the lower shell, allowing for increased comfort and convenience when walking from the car to the lift.

INTEGRATED TECH FITTINGS

Tech fittings in the toe and heel are fully integrated into the shell injection, allowing for compatibility with both tech bindings and alpine DIN bindings.

FRICION FREE CUFF PIVOT

An easy-hinging cuff pivot designed to provide minimal resistance while in walk mode.

GRIPWALK OUTSOLES

Removable and interchangeable rockered soles designed to work with Marker's GripWalk binding system for better grip and comfort while walking, standing, and hiking.

REPLACEABLE OUTSOLES

Dual-injected TPU for secure footing, direct power transfer to the ski, and increased wear resistance.

CANTABLE OUTSOLES

Shims can easily be placed underneath the outsoles to cant the boots for a customized fit.

NAVICULAR PUNCH

A strategic bump built into the boot mold to alleviate pressure commonly experienced during ankle flexion.

ASYMMETRICAL TOE BOX

Fits the natural curvature of your toes for added comfort and to ensure a proper fit.

POWER WEDGE

A removable spoiler that fits between the liner and the back of the boot cuff that allows for adjustment of the boot's forward lean angle, ranging from 12 to 14 degrees.

SWITCHBACK BUCKLE

Buckles lock in the forward position when touring to increase ROM. Toe buckle flipped on toebox for increased clearance in variable terrain. Magnesium buckles and wire bails for additional weight savings.

TECH INSERT

Tech fittings in the toe and heel are fully integrated into the shell injection.

VIBRAM OUTSOLE

Designed with adventure in mind. Superior grip and durability. K2 exclusive tread pattern. 9523 iso DIN.

HONEYCOMB BOOTBOARD

Stay Warmer, Longer. Traps heat and insulates like a down jacket. Retains heat 15% better than traditional bootboard. Boot-fitter friendly

POWERLOCK 2.0 WALK MECHANISM

Improved walk mechanism with locking lever, 9-15 degrees of forward lean adjustability and 60 degrees ROM.

MULTIFIT LAST

The MultiFit Last was developed in conjunction with the BOA Fit System to accommodate a variety of foot shapes ranging from 97mm to 104mm eliminating the need for multiple last options.

BOA® FIT SYSTEM

The BOA Fit System provides a performance fit engineered to enhance feel and responsiveness while reducing pressure points by incrementally modulating the Alpine boot closure with precise micro-adjustments.

LINER TOE SHIM

Designed to create the perfect fit for a variety of foot shapes. These 4mm toe shims can be added to the liner on all BOA boots to decrease the volume between the toe-box and instep.

HARSH MELLOW MODULAR INSERTS

The honeycomb boot board includes two modular heel inserts. A soft Harsh Mellow insert for a high level of damping or a more rigid insert for improved power transfer.

Three Piece Boot Technology

SHELLS

REVOLVE

Revolver Shell, offers the same fit and feel as the Raichle boots of years past, updated to withstand the rigors of today. Precise, snug, and proven, this 99mm last shell has become the definitive freestyle boot of the modern era.

REVOLVE PLUS

The Revolver Plus Shell takes the same 99mm last and opens up the toe box for a roomier feel out of the box. The Pillar Shell uses the original 3-piece design and adds replaceable soles for extended longevity and increased traction.

LINERS

INTUITION PRO TOUR WRAP

Slip-on the Intuition Pro Tour Wrap and get ready to motor on up the skin track. Crafted out of Intuition® Foam, and featuring a tour notch and lace-up system, the Intuition Pro Tour Wrap offers the added comfort and performance your boot is missing.

INTUITION PRO WRAP

Slip into the Intuition Pro Wrap, and experience unmatched ankle retention and pressure-free performance. Crafted out of Intuition® Foam, the Intuition Pro Wrap offers the added comfort and performance your boot is missing.

INTUITION WRAP

The Intuition Wrap Liner's laminates are specifically engineered to be our lightest weight liner for increased maneuverability while maintaining it's warmth and custom moldable fit right out of the box.

METHOD

The Method Shell adds much needed depth to the FL3X line. Designed for those with a wider foot, the Method shell incorporates a higher volume fit and a 102mm last.

DIVERGE TOUR

The Diverge Tour Shell offers a smooth stride and articulated purchase in any situation. Walk farther and more comfortably than ever before. Featuring a higher back cuff and lightweight Grilamid™ plastic, this construction will take you anywhere.

INTUITION PRO TOUR TONGUE

With a Tour Flex Notch, removable external J-Bars, and lacing system, the Intuition Pro Tour Tongue makes walking a blister-free experience in an enveloping snug fit, while giving you the performance you need to send it on the downhill.

INTUITION PRO TONGUE

Crafted out of Intuition® Foam, the Intuition Pro Tongue Liner's laminate is specifically engineered to provide energy transfer to the shell while maintaining warmth in a custom, moldable fit. Slip-on the Intuition Pro Tongue liner and feel the power of the highest performing liner that we've ever created.

INTUITION TONGUE

The Intuition Tongue Liner's laminates use multi-layered construction in a traditional tongue liner, designed to provide targeted comfort and performance in a familiar way.

FEATURES

RIBBED TONGUE

100% Ribbed tongue enables smoother, more natural linear flex from your shin to your toe. The tongue bends like a flexible straw, never bottoming out while providing smooth rebound. No more shin bang!

EASY ON/OFF

The front of the shell opens a full 90° to slide your foot in and out with ease in all temperatures. Like putting on slippers!

MOLDABLE

Utilizing the QuickFit™ System, all FL3X boots – shells included – can be molded to the exact needs of your foot. Not all feet are the same; and with FL3X, we pride ourselves on creating boots that allow a personalized, 1-to-1 fit experience.

ADJUSTABLE FLEX

The boot's flex is rated on a simple scale of 1-10 (10=stiffest). Change a boot's flex by simply switching the tongue. (Competitor's boots require permanent cutting.)

INFINITE PIVOT

Unlike traditional designs, the rear cuff never bottoms out. It pivots infinitely forward with your calf for less shell distortion, no shin pain and more control.

CUSTOMIZABLE

All parts are sold separately for unlimited personalization and repair using a standard phillips head screwdriver.

LADDER BUCKLE

The ladder buckle features an intuitive, easy to remember, macro-size adjustment, plus a micro-twist for fine adjustment with a light, easy-to-handle aluminum lever.

FORWARD LEAN & CUFF ALIGNMENT

Tool-less forward angle adjustment. Original & Soul shells: 2mm or 4mm. Easy, precise lateral angle adjustment. Revolver & Revolver Plus shells: 12mm.

WOMEN'S CUFF

The women's cuff is anatomically shaped to match a female's specific calf shape for increased comfort and control.

SHOCK ABSORBER BOOT BOARD

Soft rubber layer in the sole of the shell absorbs vibrations, impact and shock for a smooth ride.

WIDETRACK BUCKLE

Durable aluminum levers with a minimalistic lightweight design. This adjustment mechanism is engineered to increase precision and durability while maintaining on-the-fly, single-handed micro adjustment.

45 DEGREE HEEL LOCK

Keep heels where they belong. Placing the middle buckle at an optimal 45 degree angle creates a solid lock for the heel to stay put when pressuring the tips and tails of the skis.

GRIPWALK OUTSOLE

Designed for a better purchase on unstable & slippery terrain. The convex shape and ribbed tread add both comfort & grip for getting from house to hill to peak! Sold separately. Available for Revolver Plus and Method models.

J-BAR

An additional j-shaped piece of foam is inserted internally on both sides of the ankle area to dramatically increase ankle hold down, to keep your feet perfectly in place for precise control.

POWER WEDGE

Dial in your forward lean angle with this removable velcro spoiler.

WIDE TOE

A thinner foam is used in the front of the liner to increase space without sacrificing control for people with wider feet or who prefer a little more toe room.

INTUITION

All boot liners are built using authentic Intuition™ closed cell foam. It is body heat activated to mold 100% to your feet and shells during use, or can be instantly heat molded by a shop in minutes for a light, warm and super comfortable fit.

WOMEN'S LINER

The women's cuff is anatomically shaped to match a women's-specific calf shape for increased comfort and control.

TECH FITTINGS

Compatible with all pin-tech bindings, the in-molded tech fittings open up a new world of possibilities for FL3X Boots. One boot – any objective.

MID GRIP

Whether you are climbing grated stairs or scrambling on top of a mountain, a dual material or single material midgrip gives you the confidence to stay on your feet.

WALK MODE

Flip the lever up to ascend with ease. And when it's time to send it, flip the lever down, lock the cuff in place, and push into the fluid, progressive flex you've come to expect from FL3X. Works great for après bar sessions too.

DUAL MATERIAL OUTSOLES

No slipping getting in-between you and the ground. A firm TPU and a softer material combat wear and keep your feet underneath you on any surface.

POWER WRAP

An additional layer of ergonomically shaped EVA is wrapped around the outside of the upper liner to increase energy transfer and horsepower to the shell.

Pole Technology

POLE CONSTRUCTION		Carbon Web External carbon strands are precisely laminated onto the carbon shaft creating K2's lightest weight, most durable, and stiffest shaft offered.
		100% Composite Full composite construction for a great combination of weight, durability, and cost.
		Aluminum 7075 or 6061 High strength aircraft grade aluminum for a seamless, durable tubing shaft.
GRIP TECH		Rip Cord Grip System Safety releasable strap mechanism integrated into grip top. Unique lightweight cored out grip design removes material where possible. Utilizing a slim, neoprene padded right/left strap for comfort and ease of entry. Push button hinging grip top allows for easy strap adjustment and removes the need for buckles and Velcro, creating the most comfortable and streamlined strap ever.
		Utility Hook Stubborn boot buckles, heel risers and walk mode levers are no match for the utility hook grip. Flip your pole over and use the notch on the front of the grip to flip, clip, pull and buckle up your gear on the fly.
ADJUSTMENT TECH		LockJaw 6000 Completely redesigned with a T6 6000 series aluminum lever and body linked together with Teflon bushings to optimize clamp force with minimum lever pressure. The minimalist design achieves a reduced weight of 25% from its plastic equivalent and is the most durable, non-slip adjustment mechanism in K2 poles.
		LockJaw Adjustment Mechanism Refined over several generations, the tried and true lockjaw system continues to define the standard for length adjustment mechanisms. Simple, lightweight and durable, the Lockjaw is the workhorse of the K2 pole line.
		FlipJaw Adjustment Mechanism Length adjustment mechanism connecting a smaller diameter upper shaft with larger diameter, more durable lower shaft.
GENERAL TECH		Bubble Inclinometer Quick and accurate slope angle measurement in the palm of your hand.
		All Season Kit Change up the tips and baskets, without any tools, to make them compatible for backcountry exploration in the summer or winter.
		Nesting Baskets Notches in the basket to couple the pair of poles for easy carry or storage.
		Backup Probe Want to check the snowpack without having to take off your pack and dig for a probe? No problem, just screw the two lower pole segments together and you have a 200cm backup probe at the ready. With gear this versatile, you're always prepared for the unexpected.
	Powder Basket The newly redesigned powder basket has a 95mm diameter for float in deep snow and a smooth flex to conform to harder terrain during long skin tracks and traverses.	
	Articulating Powder Basket - The 80mm ball and socket articulating basket features 50 degrees of unhindered movement, allowing the basket to effortlessly match the snow's surface during traverses or when conditions turn hard.	

Helmet Technology

HELMET CONSTRUCTION		MIPS The MIPS BPS System is designed to add protection against the rotational motion transmitted to the brain from angled impacts to the head. The rotational motion is a combination of rotational energy and rotational forces from angular acceleration that both affect the brain and increases the risk for minor and severe brain injuries. MIPS' added protection system has been proven to reduce the rotational motion when implemented in a helmet by absorbing and redirecting energies and forces otherwise transmitted to the brain.
		Hybrid This unique construction features the best of both In-Mold and Hard-Shell constructions. The primary In-Mold construction makes the helmet incredibly light, while the secondary Hard-Shell upper allows for more advanced Active Matrix Venting and increased durability.
		In-Mold In-Mold is the premium construction for ultra-lightweight performance and is characterized by an EPS liner that is molded directly to a lightweight poly-carbonate (PC) shell. The result is a construction so light you'll forget it's even there.
		Hard Shell Hard-Shell helmets are built to last and will look good no matter how many trips they make in and out of your gear bag. Hard-Shell helmets protect you from impact thanks to lightweight EPS foam bonded to an injection molded and durable ABS shell.
		Dual Active Perfect combination of user/switch regulated Active Matrix Venting and integrated Passive Channel Venting.
		Passive Channel Venting Channels on the inside surface of the EPS direct air-flow between your head and the helmet, removing moisture and excess heat for all day comfort.
		Active Matrix Climate control at the flip of a switch, Active Matrix Venting allows you to regulate the airflow of the helmet vent system with the push of a finger.
LINER SYSTEMS		Convertible Full Wrap Liner Same coverage as a full-wrap but easily pops out, leaving the fit system and minimal padding to accommodate warm days and wearing a thin beanie under the helmet.
		Full Wrap Liner A comfortable, washable, full-coverage, breathable liner design that wicks away moisture to prevent overheating and seamlessly integrates fit and audio systems.
		Tech Form Liner Compression formed, precise fit liner with removable ear pad and neck roll for a convertible customized fit.
FIT SYSTEMS		BOA® All the benefits of the 360 K2dialed Fit System with the precision and quality that you have come to expect from Boa® Technologies.
		360 K2Dialed The 360 K2Dialed Fit System is an evolution of the K2dialed Fit System, delivering unparalleled comfort around your entire head. An intricate web design results in 360 degrees of even pressure distribution for a secure and snug fit that you customize with the twist of a dial.
		K2Dialed The K2Dialed Fit System creates a custom-fitting helmet no matter what your head shape. An ergonomically inspired three-point adjustable interface maximizes fit and customization with the twist of a dial. This allows for the ultimate convenience of being able to make fit adjustments on the fly.
AUDIO TECH		Aftermarket Bluetooth Speaker Compatible All K2 Helmets are now compatible with Outdoor Tech® Bluetooth audio systems, as well as other after-market audio options.
		Baseline Audio Systems Pre-installed audio kit with a low-profile speaker that easily connects to your mobile device without hindering the fit or comfort. The on-cord controller is designed for on-the-go usability at your fingertips for talk or tunes.
GENERAL TECH		Bike Certified Certified by North American bicycle helmet safety standard and European bicycle and skateboard helmet safety standard.
		Magna Snap Magnetic retention clip that easily flips up and over the goggle strap for a secure hold that you don't have to fumble for.
		Removable Ear Pads Ability to easily remove ear pads for reduced bulk while retaining the fit system.
		Removable Goggle and Headlamp Clips Customized fit for tool-free, on-the-go versatility.
		PowFly Waterproof breathable cover for Route adds protection against the elements of winter weather.
