## CAMILLE x PROTEST

IN COLLABORATION WITH OUR **TEAMRIDER CAMILLE ARMAND**, WE'VE CREATED AN EXCLUSIVE COLLECTION TESTED AND APPROVED DURING EXTREME EXPEDITIONS.

FOR THOSE WHO CHASE UNTOUCHED POWDER AND ENDLESS DESCENTS, OR SIMPLY SPEND ENTIRE DAYS CARVING DOWN THE SLOPES. EVERY DETAIL MATTERS: A SECURE POCKET FOR YOUR PHONE AND AVALANCHE BEACON, AN ERGONOMIC CUT FOR TOTAL FREEDOM OF MOVEMENT, AND A DESIGN CRAFTED FOR PERFORMANCE AND ABSOLUTE COMFORT. THIS **JACKET AND PANTS** ARE MADE TO TAKE YOU WHEREVER THE MOUNTAIN CALLS.

**"WHEN YOU'RE DEEP IN THE BACKCOUNTRY, YOUR GEAR BECOMES PART OF YOU. THIS COLLECTION HAS KEPT ME SAFE, WARM, AND FREE TO PUSH MY LIMITS - NOW IT'S YOUR TURN."** — CAMILLE ARMAND.

PERFORMANCE IN THE OUTDOOR IS ALL ABOUT LAYERING. BEING PREPPED FOR IT ALL.  
THE RIGHT LAYERS KEEP YOU DRY, WARM, AND FREE TO CHASE EVERY RUN THAT COMES YOUR WAY.

THERMAL WEAR IS AN ESSENTIAL BASE LAYER DURING WINTER SPORTS, HELPING TO KEEP YOU WARM AND COMFORTABLE ON THE MOUNTAIN. THIS SEASON, OUR COLLECTION EXPANDS WITH A **MERINO WOOL LINE** MADE OF 80% MERINO WOOL. MERINO FIBERS ARE EXTREMELY FINE, AND TRAP AIR SO PROVIDE EXCELLENT INSULATION WITHOUT FEELING HEAVY. IT IS WARM, BREATHABLE, COMFORTABLE.

FALL WINTER 26/27

BUILDING ON THE INNOVATION OF THE ZIP-SHIFT JACKET, THIS SEASON WE INTRODUCE THE ULTIMATE DUO: **THE ZIP-SHIFT SUIT**. THIS COMPLETE SKI OUTFIT FOR WOMEN COMBINES THE FUNCTIONALITY OF OUR POPULAR **PTLULLABY PANTS** WITH THE CLEVER DESIGN OF **THE ZIP-SHIFT JACKET**.

THE BIGGEST ADVANTAGE? THE JACKET IS FULLY DETACHABLE FROM THE PANTS, ALLOWING YOU TO **WEAR BOTH PIECES SEPARATELY**. PRACTICAL YET STYLISH: FROM A FULL COORDINATED LOOK TO INDIVIDUAL JACKET OR PANTS, IT'S PERFECT FOR QUICK CHANGES, A SHORT BREAK, OR A SPONTANEOUS APRÈS-SKI.

# GEOTECH

PROTEST | FALL WINTER 26/27 COLLECTION

# TECH & FUNCTION

When it comes to functional wear, effective moisture management is vital, making sure heat and moisture from the body can escape while keeping external moisture out. The level of this effectiveness is measured in millimeters (mm) and grams (g) and the ratings are determined through specific testing methods that are regularly inspected by independent testing facilities in Europe.

As a result of this testing, our GEOTECH range features technical fabrics categorized into easy-to-understand series: 20K, 10K, and 5K, allowing customers to make informed decisions based on technical performance.

## HOW WE MEASURE WATERPROOFNESS

The level of waterproofness in a fabric, as measured in millimeters, is determined through a hydrostatic head test. In this test, fabric is pulled taut and sealed in a controlled chamber, water is then poured into a graduated cylinder (water column) placed on the fabric, adding pressure to its surface. Once this pressure becomes too great, a few water droplets begin to leak through the fabric. The higher the column (mm), the more pressure the fabric can take, the more waterproof it is. We express this waterproofness with ratings such as 20K (20,000mm), offering high waterproofing, 10K as best practice, and 5K, which is standard waterproofing and more suited for city life. "If it doesn't rain, why do you need this?" Imagine you have to kneel or sit down in the snow. The snow puts pressure on the fabric. Get it?

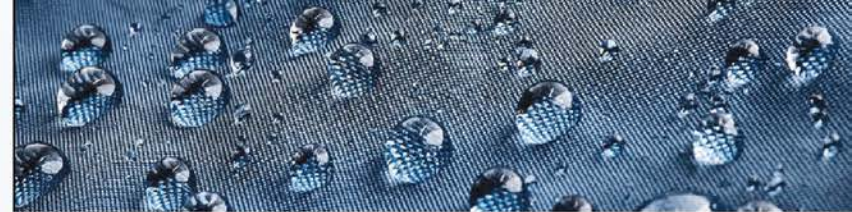

## HOW WE MEASURE BREATHABILITY

A fabric's breathability is tested and measured through a MVTR (moisture vapor transmission rate) test. The result is based on the amount of vapor, measured in grams, that can pass through a square meter of fabric from the inside out during a 24-hour period. In the case of a 20K type fabric, this would be 20,000 grams. The larger the number, the more breathable the fabric, meaning that 20K is highly breathable and perfect for the most active rider or skier. While a fabric rated at 5K is less breathable but still perfectly adequate for medium to mildly intense activities.

## WATERPROOF TAPED SEAMS

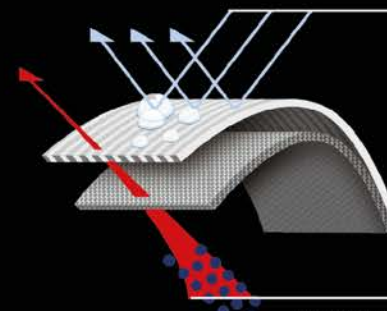

A garment consists of several pieces of fabric stitched together, and with every stitch comes a tiny pin prick hole. This means that even if the fabric is waterproof, you can still get wet if the seams aren't sealed properly. To improve waterproofness we use a special kind of tape that we apply to seams on the inside of our clothing.

This tape tightly bonds itself to the fabric, creating a completely waterproof yet barely noticeable seal. For the majority of our range we use this tape in critical areas where pressure is extra high, like the seat or lower back. Whereas our top range of outerwear and rainwear features fully taped seams, making those garments highly waterproof.

## SOFTSHELL 3-IN-1

The big difference between hardshell and softshell outerwear lies in their flexibility. Softshell fabric is specifically designed to provide a greater range of motion, making it ideal for activities such as hiking, climbing, and skiing. A softshell typically consists of three layers bonded together, offering flexibility and high breathability. Add wind and water resistance to the mix and you've got the perfect mid-season garment. Softshell is particularly well-suited for mild winter conditions and seasons with fluctuating temperatures.

## INSULATION TECHNOLOGY

To create and retain warmth we opt for the latest modern insulation and adapt each PROTEST garment according to its intended use and activity. Features like thickness, weight and feel vary from sport to sport, but in common for all snow gear and outerwear, is top quality insulation that ensures superior performance.

## 3M™ THINSULATE™ INSULATION

Lightweight and thin, this loose-fill insulation consists of extremely fine microfibers that trap air and block radiant heat loss all while allowing moisture to escape. It's quick-drying and durable, ensuring high-end comfort in insulation used for outerwear and accessories.

## FEATHERTOUCH INSULATION

A high-loft insulator that provides deep warmth through its high-volume structure, capturing air in small pockets.

## HIGH-LOFT THERMAX® INSULATION

A premium insulator combining high mobility with volume and low weight, ensuring comfortable warmth under all conditions.

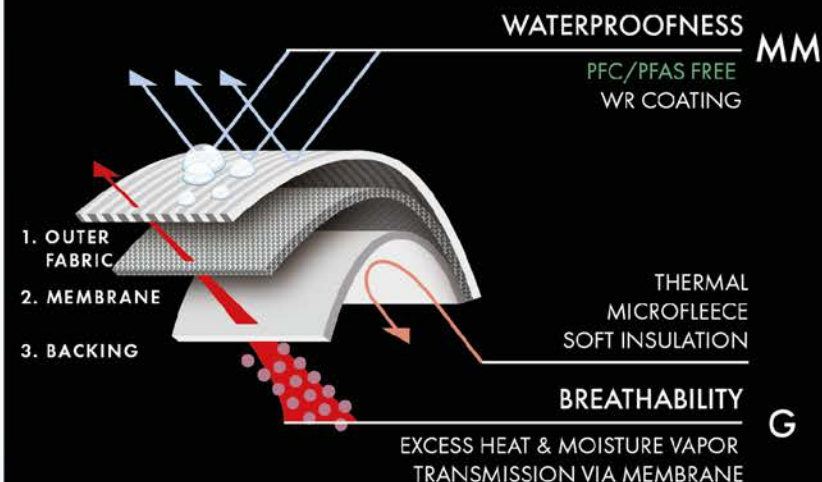

## THERMAX® INSULATION

A regular high-end insulator combining high mobility with low weight, ensuring comfortable warmth at all times.

## SHELL

With a tough exterior, a "shell" is a highly technical weather-resistant garment designed to shield against the elements, providing durability and protection in challenging outdoor conditions. Without lining or insulation, it's lightweight and perfect for layering, making it fully adaptable to personal preference.

# WHEN WE PUT WORDS INTO ACTION

---

PROTEST | FALL WINTER 26/27 COLLECTION

# PRODUCT PVRE GREEN

Sustainability runs through the PROTEST collection under an environmental theme called PVRE GREEN, made identifiable by the PVRE Green hang tag or label. This is our way of showing consumers we've consciously made sustainable choices like opting for recycled and organic materials, the latest insulation technologies, chemical free treatments. Wherever and whenever we have the opportunity, we will choose a certified sustainable option.

For example, in the Spring/Summer 2025 collection, 64% of our bikini sets are made from recycled materials, made possible by our PVRE GREEN label that guarantees sustainability. Simultaneously, our snow jackets, snow pants, and snowsuits in the Fall/Winter 2025 collection consist of 73% recycled materials, a clear improvement from 54% in the Autumn/Winter 2024 collection.

To grow responsibly, for the sake of our planet and our cherished playgrounds, we are actively pursuing and implementing more sustainable practices. We believe in transparency and think certification is the best choice, using materials from controlled sources and thereby building consumer trust. That's why our team has a Sustainability Advisor whose role is to give support and advice on certification and legislation in a rapidly changing world.

PROTEST complies with the European REACH standard, which addresses the production and use of chemical substances. We keep our RSL (Restricted Substances List) updated and keep all of our suppliers notified at least once a year to keep all partners up to date.

We use sustainable yarn by REPVEVE®. Owned by Unifi®, one of the world's leading textile manufacturing innovators. REPVEVE® transforms post-consumer waste such as plastic bottles into certifiable, traceable, high-performance polyester yarn. Thereby actively contributing to filtering out waste destined for our oceans.

All other recycled textile materials we use are Global Recycled Standard (GRS) certified. GRS is an internationally recognized standard. Developed by Textile Exchange; a non-profit organization focused on promoting sustainability in the textile industry. It sets new standards for the sustainable use of recycled materials in products and ensures that products bearing the GRS logo are made from recycled materials and meet high social, environmental and chemical criteria. This reduces the need for new raw materials and reduces the environmental impact of waste.

To obtain the GRS, companies must undergo third-party accreditation by a certification body. Products must include a minimum of 20% recycled materials (pre- and or post-consumer waste) to obtain the Global Recycled Standard (GRS), although at least 50% is needed for the product to be labeled with the GRS logo.

REPVEVE®

# PFAS PFC

PFAS and PFCs are per- and polyfluoroalkyl chemicals commonly used to waterproof outdoor clothing. By creating a thin chemical coating on the fabric, clothes are more resistant to water, grease, and dirt. These 'forever chemicals' can take up to 1,000 years to break down in nature and therefore are virtually non-biodegradable, causing major health risks. The EU acknowledged this danger and are prohibiting the use of these chemicals.

Naturally, we are focused on using PFAS /PFC-FREE materials whenever possible. While clothing may require water repellent properties, we reject the use of toxins like these 'forever chemicals' by strictly prohibiting our suppliers from using any treatments or fabrics containing these harmful chemical components and encouraging them to find alternatives that are safe to use.

Durable water repellency and waterproofness, also known as DWR and WP, are key features in our outerwear collections. We make it our priority to actively source and use safe eco-friendly alternatives without compromising on quality.

We are proud to announce that our current collection is already 98% free from PFAS- and PFC 's

# RECYCLING & WASTE MANAGEMENT

Being a sportswear brand automatically makes us an importer of garments. With a large and extensive distribution network, we are fully aware of our impact as importers and distributors of numerous textile garments into Europe. Our responsibility extends beyond transport and shipping containers; it begins with each individual garment.

Not only do we make our clients excited with the latest gear but when ordering online we send them packaging materials and protective bags that are essential to keep our sportswear clean and undamaged. Therefore, our polybags are made from 100% recycled LDPE. Additionally, we instruct and encourage consumers to recycle or re-use, as we do with our cardboard boxes.

UPV Textiel – Extended UPV Textiel is a Dutch foundation created to collectively organize the collection, reuse, and recycling of discarded textiles. PROTEST works with UPV and over 850 other participants to build an EPR-system; Extended Producer Responsibility. This market-driven approach aims for 75% recyclability by 2030 and 100% by 2050. By joining forces, we can achieve these sustainability goals.

Our sales network reaches across many borders. We feel responsible for our product placements and therefore comply with the following environmental organizations on waste management within the European Union:

Germany	Der Grüne Punkt
Netherlands	Afvalfonds in Nederland
United Kingdom	Valpak
Spain	EcoEMBES
Austria	Reclay
Sweden	coming soon
Denmark	coming soon
France	Re_fashion and Léko

## WE ARE CURRENTLY AFFILIATED WITH:

**Re\_fashion**

**Re\_fashion** - Textile, Household linen and Footwear Industry's eco-organization. Re\_fashion manages the prevention of waste and management of the end-of-service life of products placed on the market in France through recommendations on easy-to-read sorting-tri symbols.

**Léko** - A new-generation eco-organization approved by the French state, aiming to modernize the consumer packaging and graphic paper sector by specializing in clear recycling instructions.

# SMART ENERGY

**POWER** - Since 2018, we've made a significant energy transition in our hometown in the Netherlands and have managed to power our Headquarters using our own supply. With over 10,000 solar panels installed across 25,000 square meters of roofs, we're among the top ten largest solar panel installations in the Netherlands. Annually, we generate approximately 2.5 million kWh, equivalent to the green energy needs of 600 households. Not only do we meet our own power needs with solar energy, we're returning a lot of electricity back into the grid as well.

**TRANSPORT** - Our products are mainly shipped by sea in an effort to reduce our carbon footprint. Despite the use of fossil fuel, transport by truck or by air would be 100 times more pollutant.
