# SUNGLASSES

## SUNGLASSES TECH

### TORIC

Dual curve lens shape delivers precise optics and a natural field of view

### CYLINDRICAL

Single curve lens shape delivers a wider field of view, especially in aggressive riding positions

### IRIZ LENS

Mirror-coated lens that reduces glare and blocks more visible light for better eye comfort in bright conditions

Contrast-enhancing lens for sharper detail and color separation

Light-adaptive lens that shifts from 90 VLT (nearly clear) to 25 VLT

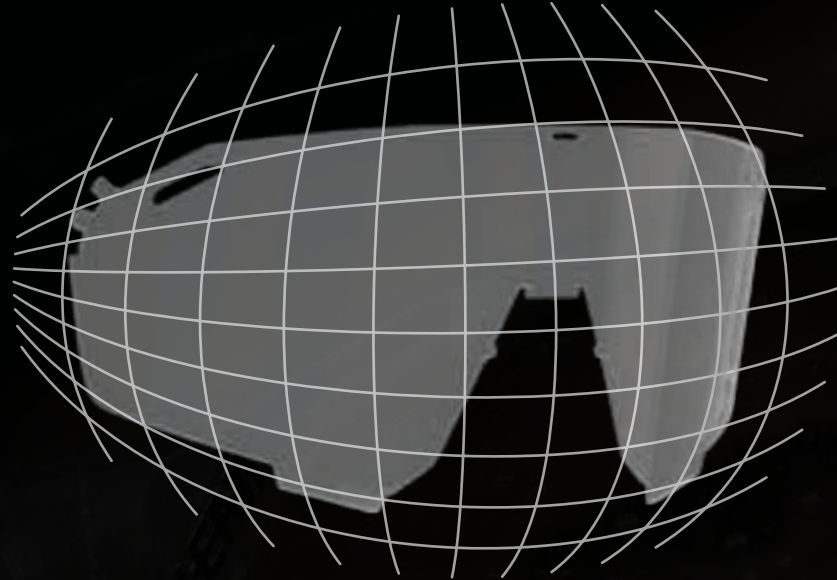

### POLARIZED

Light-filtering lens that reduces glare and eye strain for sharper vision on reflective surfaces like water, snow, and wet roads

# LENS BASE CURVE

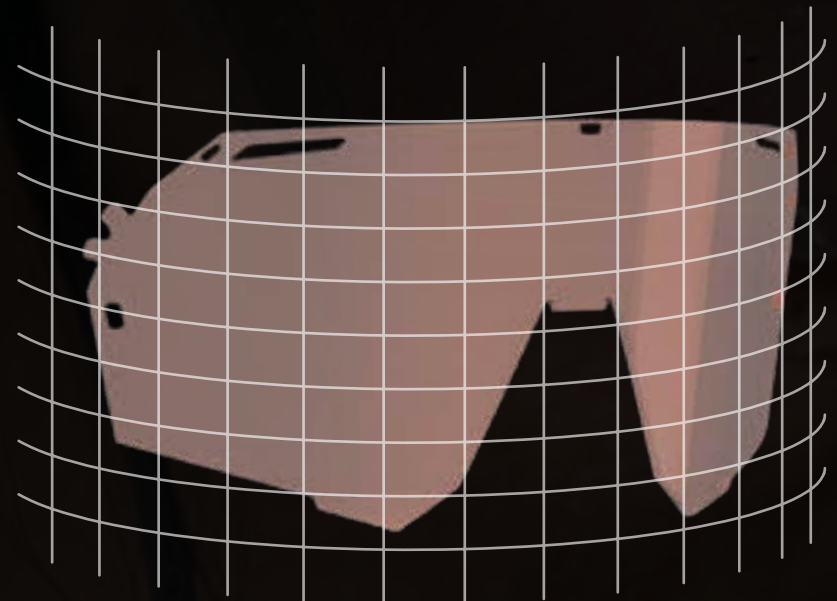

## TORIC BASE CURVE

- Dual-curve 7x4 shape: more pronounced curve horizontally, gentler curve vertically
- Delivers precise optics and a natural field of view
- Rounded profile sits close to the face for better aerodynamics and wind protection
- Certified to ANSI Z87.1 impact protection standard

## CYLINDRICAL BASE CURVE

- Single-curve shape: curves horizontally, flat vertically
- Taller profile delivers a wider field of view, especially in aggressive riding positions
- Modern wraparound style with enhanced ventilation and reduced fogging
- Impact tested for proven protection

# LENS TECHNOLOGY

## IRIZ LENS

- Mirror-coated lens that reduces glare and blocks more visible light for better eye comfort in bright conditions.

## CRYZTAL

- Contrast-enhancing lens that sharpens detail and boosts color separation for more natural color and greater clarity.

## PHOTO CHROMIC

- Light-adaptive lens that automatically adjusts tint with UV exposure for clear vision in any condition.

## POLARIZED

- Light-filtering lens that reduces glare and eye strain for sharper vision on reflective surfaces like water, snow, and wet roads.

# GOGGLES

## GOGGLES TECH

Light-adaptive lens that shifts from 90 VLT (nearly clear) to 25 VLT

Contrast-enhancing lens for sharper detail and color separation

Mirror-coated lens that reduces glare and blocks more visible light for better eye comfort in bright conditions

Designed to resist penetration from objects, providing high-impact protection without compromising visibility

Equipped with a built-in film system that allows riders to clear mud or debris from their vision by advancing a clean film strip across the lens during use

Featuring multiple thin, removable lens layers that can be quickly peeled away to restore clear vision when dirt, mud, or debris accumulates during riding

Designed with a special coating on the lenses that resists surface damage, helping maintain clear vision and extending the life of the goggles
