## SETTING THE STANDARD FOR ENTRY-LEVEL MOUNTAIN BIKE HEAD PROTECTION

The Trail 1.0 helmet is the perfect option for riders who want proven safety technology, modern style, and trail-ready features without a premium price tag. It's backed by Leatt's trusted safety features, including 360° Turbine Technology, which helps protect against both linear and rotational impacts, giving you serious protection when it matters most. **The universal fit system is engineered to comfortably fit a wide range of head shapes and sizes**, with a FidLoc magnetic buckle for easy on and off. Add in an adjustable visor with breakaway function, breezy ventilation, and a moisture wicking liner, and you've got what might be the best-looking, best-performing entry-level mountain bike helmet on the trail. CE and CPSC certified for confidence wherever the ride takes you.

### ROTATION & MOVEMENT PROTECTION

The optimally designed turbine discs enable the helmet to move slightly on the head upon impact, helping to reduce peak acceleration to the head & brain.

### IMPACT PROTECTION

The special energy absorbing material in the turbines absorbs low impact energy associated with concussion.

### 360° TURBINE TECHNOLOGY

When combined with the helmet's impact foam, 360° Turbine Technology offers a unique 3-in-1 safety system. The design helps reduce the forces associated with concussion by protecting against low speed impacts, high speed impacts, and rotational forces.

PRODUCT TECHNOLOGY

**STRETCH PANELS**

Stretch panels at strap junctions allow the harness to flex and contour to the shoulders for a stable, ergonomic fit.

**SUSPENSION**

Underarm stretch panels expand and contract with the rider's breath to maintain compression and stability. They also function as suspension—flexing and adapting to body movement for consistent support and comfort.
