

A photograph of a forest path with two hikers. The path is a dirt trail winding through a dense forest of tall, thin trees. The ground is covered in brown leaves and ferns. Two hikers, a man and a woman, are walking away from the camera on the path. The man is wearing a brown jacket and a backpack, and the woman is wearing a white jacket and a backpack. The forest is lush with green ferns and moss-covered trees. The overall atmosphere is serene and natural.

WHEN GOOD IS ONLY A STEPPING STONE  
WHEN REACHING THE PEAK IS JUST ONE OF MANY  
WHEN COMFORT ZONES ARE NO LONGER COMFORTABLE  
WHEN THE HORIZON IS SIMPLY A NEW CHALLENGE  
WHEN YOU ARE DRIVEN TO PUSH BEYOND

# PROTECTING OUR PLANET IS OUR RESPONSIBILITY

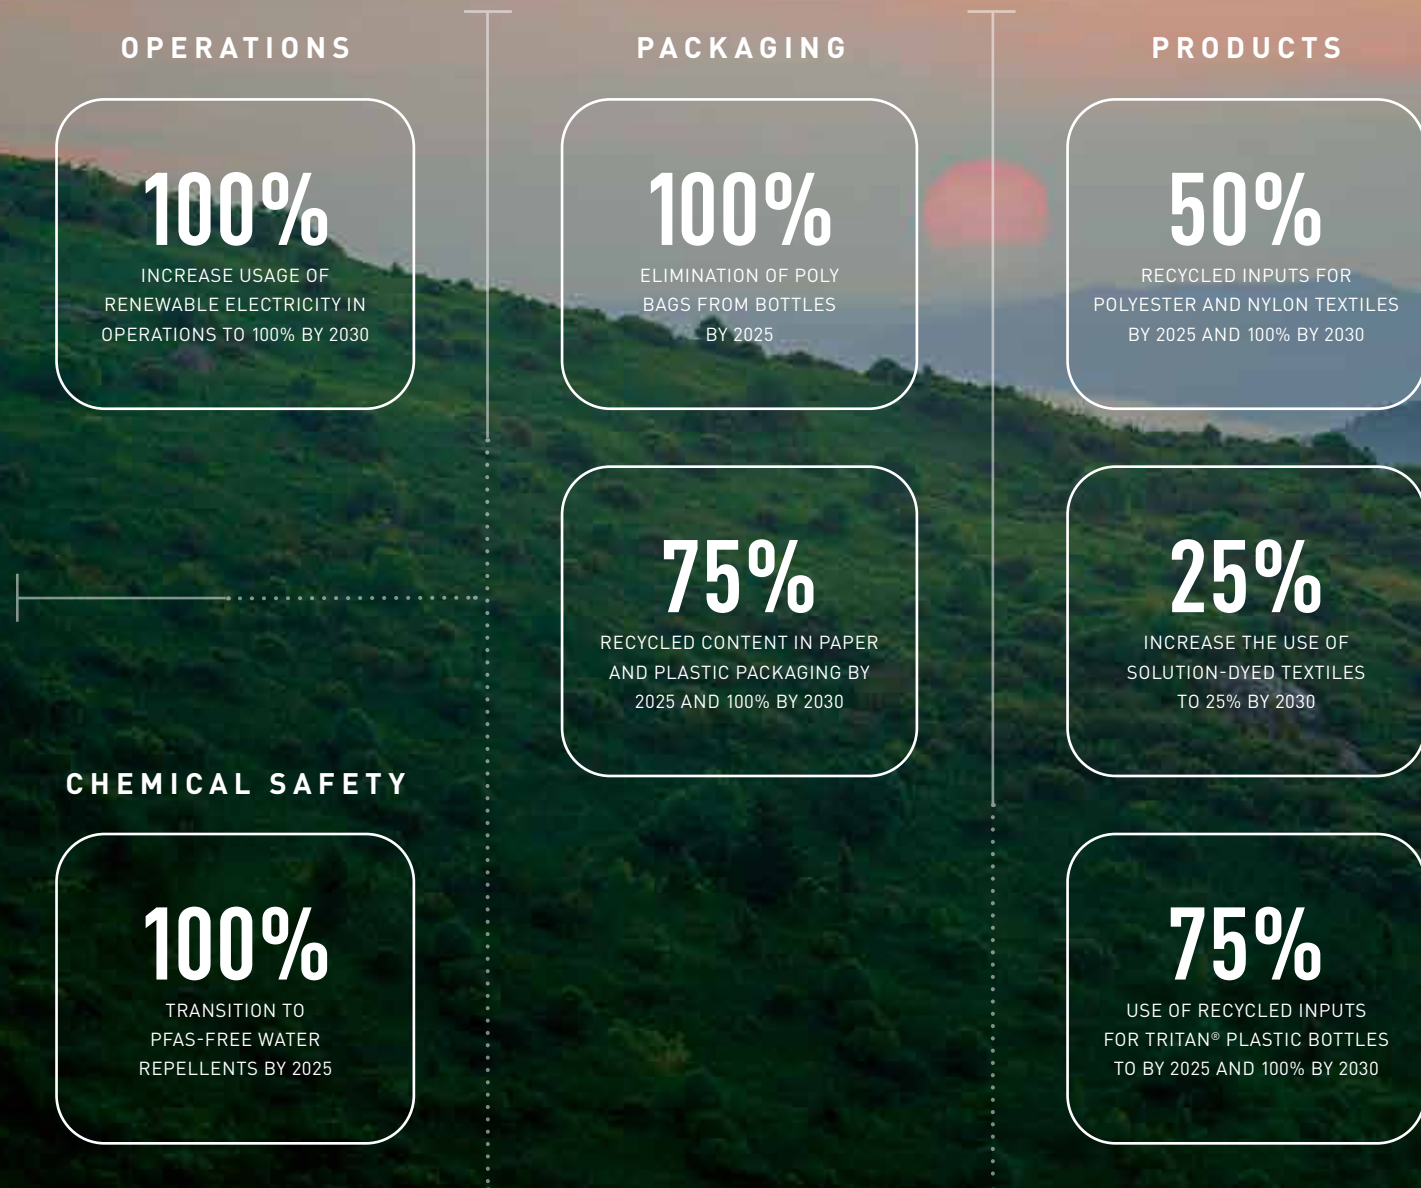

## OUR INSPIRATION

The earth inspires us. It is where we play and find true freedom. Future generations are depending on us to protect this place where we live. If we want to continue playing outdoors, then climate change is the most pressing environmental issue facing us.

## MAKING MATERIAL CHANGE

At CamelBak, we're working to reduce our environmental impact for a better environment and society. By doing so, we'll make healthier products for our consumers and the earth, while continuously raising the bar to new heights.

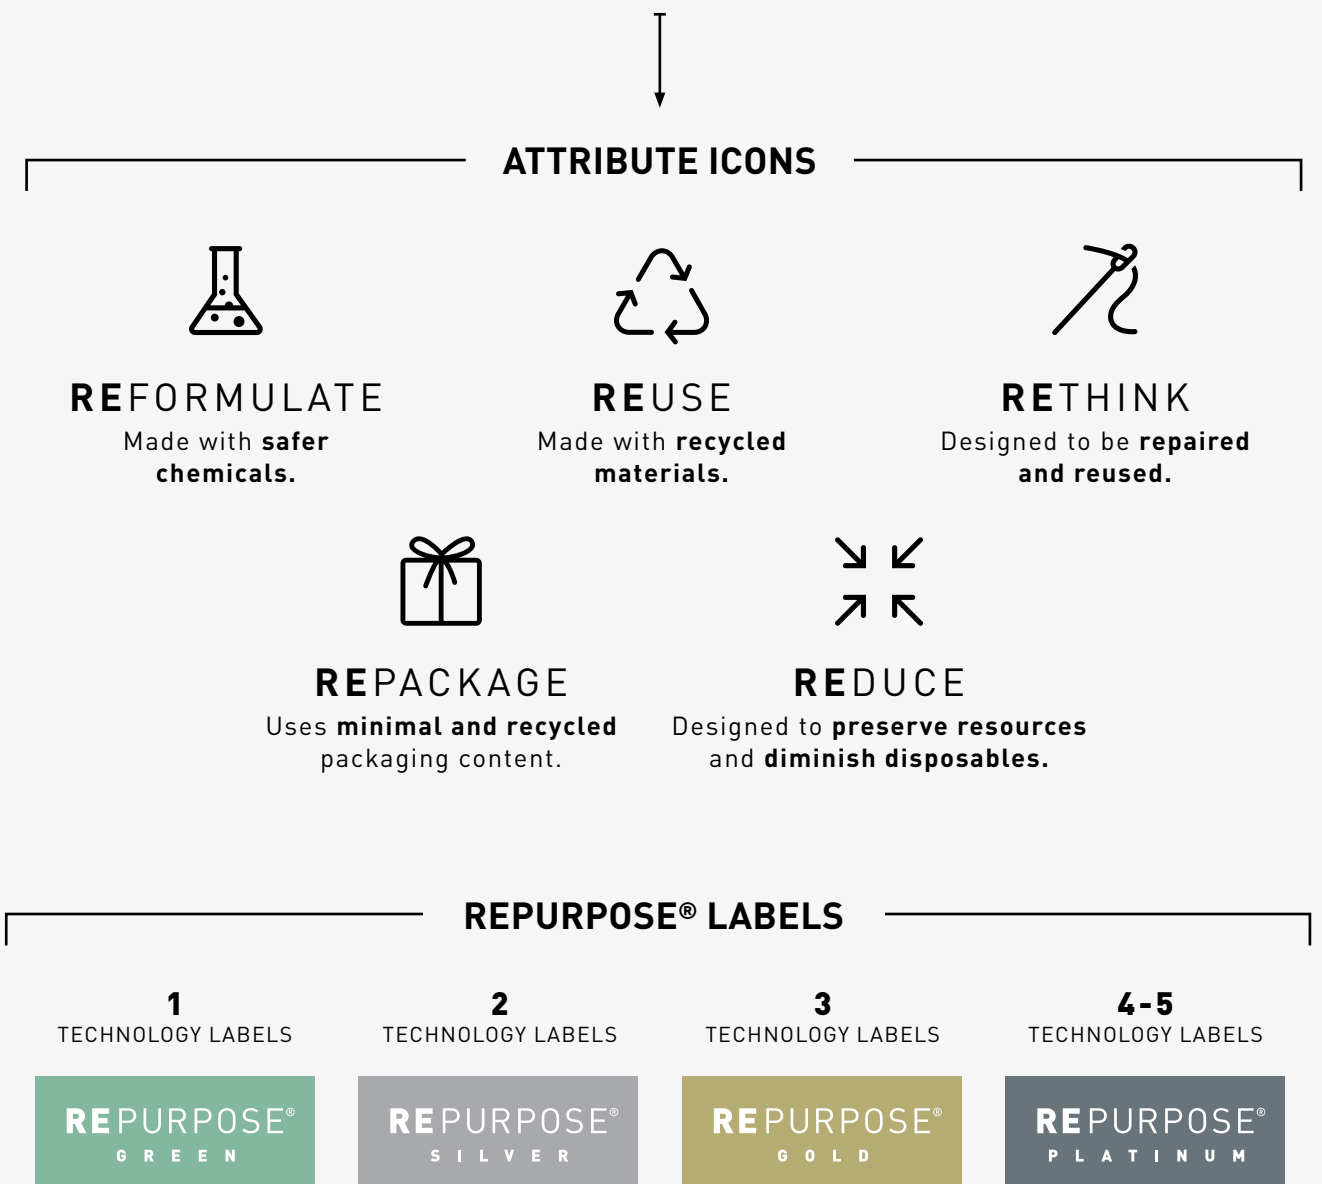

Specifically, we're stepping up our commitments with ambitious targets to improve across key areas by 2025.

# REPURPOSE: TRANSPARENT MATERIAL CHANGE

Our RePurpose® label was designed to communicate the key attributes which contribute towards our evolving mission in creating quality, low-impact and long-lasting designs.

Products with our RePurpose® Labels and Attribute Icons are made using better materials and manufacturing processes which help diminish disposables. The system illustrates how we've improved products with the planet in mind across all categories. Choosing product within this system helps us achieve our goals and enables our customers to help in our effort toward a more sustainable future.

# TRUST YOUR WATER

**CAMELBAK®**  
 FILTERED BY  
**LifeStraw®** ##

A product with a purpose. Our Eddy+ filtered by LifeStraw® features two stages of filtration. First, the Hollow Fiber Filter removes bacteria, parasites, and microplastics. Next, the Ion Exchange Filter reduces lead, taste and odor, chlorine, and other chemicals, so you can enjoy clean and delicious water at home or on the go.

## STAGE 1 • HOLLOW FIBER MEMBRANE

Removes 99.999999% of bacteria (E. coli, etc.)  
 Removes 99.999% of protozoa (Giardia Cryptosporidium, etc.)  
 Removes 99.999% of microplastics  
 Filters 4,000 liters (1,000 gallons)

## STAGE 2 • ION EXCHANGE FILTER

Reduces chlorine and lead  
 Removes bad odor and taste  
 Removes organic chemical matter (Pesticides, Herbicides)  
 Filters 100 liters (25 gallons)

## FEATURES

- TWO STAGES OF FILTRATION**  
 HOLLOW FIBER FILTER REMOVES BACTERIA, PARASITES AND MICROPLASTICS. ION EXCHANGE FILTER REDUCES LEAD, TASTE AND ODOR, CHLORINE AND OTHER CHEMICALS.

# SAFE HYDRATION, TRUSTWORTHY FILTRATION

Outfit your pack with flexibility and the built-in confidence of clean and safe drinking water. Crux® 2L Reservoir Filtration Kit filtered by LifeStraw® passes 2 liters of water through two complete stages of filtration - the Hollow Fiber Filter removes bacteria, parasites, and microplastics and the Activated Carbon Filter reduces taste, odor, and chlorine. Easy to fill and equipped with multiple features to ensure reliably safe and leak-proof personal hydration. Every purchase shares the gift of clean drinking water - one product, one child, one year of safe water.

COLLECTION

Our ever-evolving family of Everyday Bottles continue to offer innovative hydration solutions, led by Tritan™ Renew construction— an ingenious plastic that utilizes 50% recycled material in place of fossil-based resources.

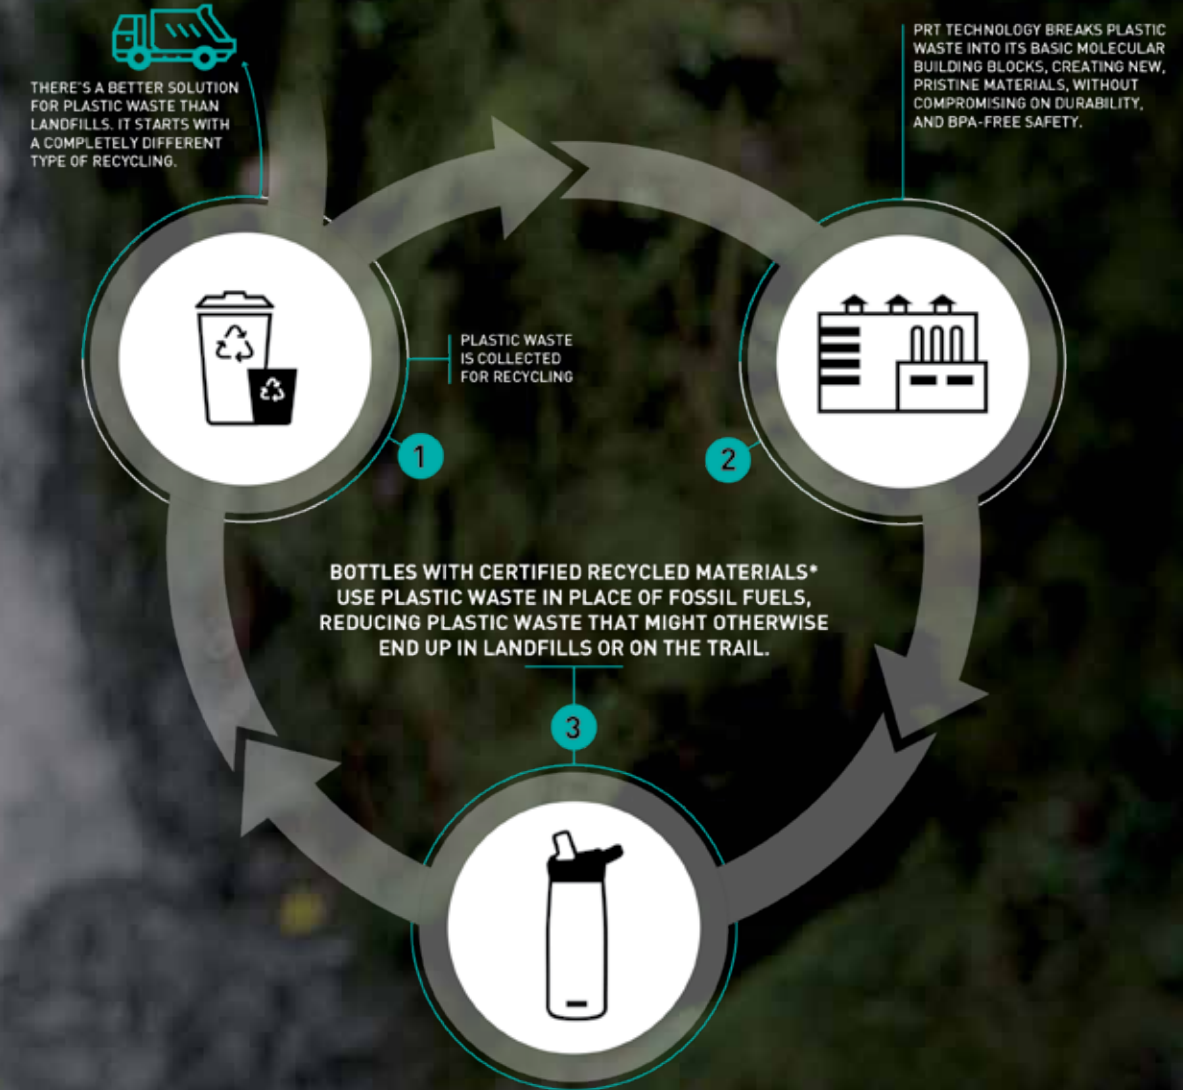

**CAMELBAK**

**tritan**<sup>™</sup>  
RENEW  
50% RECYCLED MATERIAL

# A BETTER LIFE FOR OLD PLASTICS

Breathing new life into plastic waste is harder than it seems. Much of what's recycled actually ends up in landfills or incinerators. Traditional mechanical recycling has its limits, and the recycled material it creates doesn't always have the durability needed for daily use. There is science in the solution. Tritan™ Renew is enabled by a revolutionary recycling technology called molecular recycling, which replaces fossil-based feedstocks with traditionally hard-to-recycle waste plastics. Every bottle made with Tritan™ Renew keeps waste out of our oceans and landfills, and it has a lower environmental impact than conventionally produced bottles.

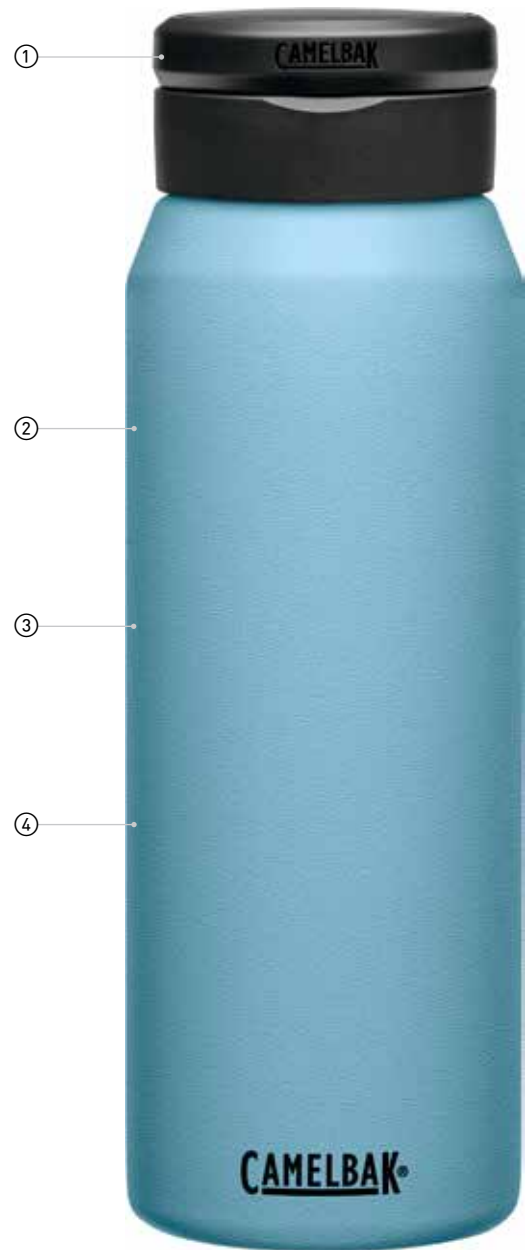

\*Made from certified recycled content through a third-party mass balance allocation process.
