

«LOYAL COMPANION FROM THE MOUNTAIN TO THE SEA»

[sn] Spring Summer 2024

LOYAL COMPANION FROM THE MOUNTAIN TO THE SEA

At super.natural, we're always pushing the boundaries of innovation to create clothing that is both sustainable and high-performing. That's why we're proud to introduce our latest breakthrough: the bio super.wool collection, featuring cutting-edge technology that combines the best of both worlds. Join us in the fight against climate change and make a positive impact on the environment without sacrificing your style or performance.

Are you ready to embark on a thrilling journey with our new sports and outdoor collection? We are excited to present to you a line of clothing that has been passionately crafted, drawing inspiration from the untamed wilderness of the mountains to the majestic, unforgiving waves of the sea.

But that's not all – we want the urban community to experience the exhilaration of the super.natural sporty lifestyle as well.

We are more than a team, we are a family, united in our love for sports and the great outdoors. From the bottom of our hearts, we want to say a huge thank you for your unwavering support.

BASE LAYER

Merino sheep have a light and ultra-breathable coat that keeps them cool from the scorching summer sun. When winter sets in, they grow an extra layer of wool over their base coat, so they can adapt to very cold temperatures. Therefore, the **super.natural** merino-mix base layers come in different styles: short and long sleeves, pants and different fabric grammage – all designed to help regulate your body’s temperature, whatever the weather conditions and climate zones.

GRAMMAGES

■ SIERRA 140

The Sierra Nevada is known for its gentle, warm and very hot temperatures. The 140g lightweight SIERRA 140 base layers are exceedingly breathable, odour and moisture resistant - the perfect match for all outdoor adventures on warm summer days.

■ TUNDRA 175

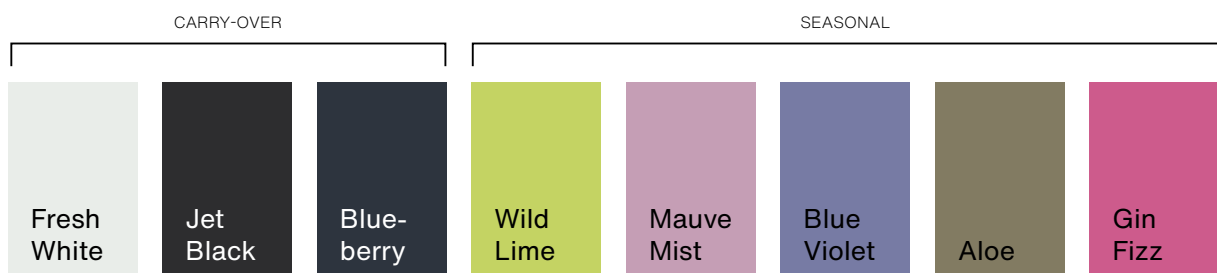

Designed for chilly winter and summer days, the TUNDRA 175 collection is an ideal companion all year long. Regardless how and where you spend your time outdoors, the 175g midweight fiber offers a pleasantly light wearing comfort.

■ ARCTIC 230

The ARCTIC 230 base layer collection has been designed for harsh winter days with icy and frosty temperatures. Just imagine being outside at -15 degrees and you are still feeling warm and cozy – our 230g heavyweight fiber won’t let you down.

bio super.wool

OUR FINEST SUPER.NATURAL MERINO BLEND

With the new development of **bio super.wool** we set new standards and bring an innovative product with a holistic concept to the market. By combining 50% finest mulesing-free merino wool and 50% of the first biodegradable synthetic fiber **PrimaLoft® BIO™**, both functional and ecological benefits are combined in our products. The entire

product life cycle of all **bio super.wool** products have reduced CO2 emissions and are biodegradable. This means only water, biomass, mineral salts and carbon dioxide remains after decomposition. During production, normal use, washing and also disposal, the innovative textile fiber reduces environmental impacts, such as microplastics, at every single stage.

PRIMALOFT® BIO™ INSULATION

OUR LATEST INNOVATION

Designed for nature – We are proud to introduce you to our innovation relating to 2nd layer and processing of sustainable fabrics.

One of our highlights is the use of PrimaLoft® Bio™, a synthetic fiber that meets both the high technical standard of our super.natural Products as well as the progressive sustainability approach of being made from 100% recycled materials.

Products made with PrimaLoft® Bio™ Fibers have been specifically developed to return to materials found in nature, with the aim to reduce the environmental impact of microfibers and garments throughout their life.

BASE LAYER

Merino sheep have a light and ultra-breathable coat that keeps them cool from the scorching summer sun. When winter sets in, they grow an extra layer of wool over their base coat, so they can adapt to very cold temperatures. Therefore, the **super.natural** merino-mix base layers come in different styles: short and long sleeves, pants and different fabric grammage – all designed to help regulate your body’s temperature, whatever the weather conditions and climate zones.

GRAMMAGES

■ SIERRA 140

The Sierra Nevada is known for its gentle, warm and very hot temperatures. The 140g lightweight SIERRA 140 base layers are exceedingly breathable, odour and moisture resistant - the perfect match for all outdoor adventures on warm summer days.

■ TUNDRA 175

Designed for chilly winter and summer days, the TUNDRA 175 collection is an ideal companion all year long. Regardless how and where you spend your time outdoors, the 175g midweight fiber offers a pleasantly light wearing comfort.

■ ARCTIC 230

The ARCTIC 230 base layer collection has been designed for harsh winter days with icy and frosty temperatures. Just imagine being outside at -15 degrees and you are still feeling warm and cozy – our 230g heavyweight fiber won’t let you down.

Innovation

OUR FINEST SUPER.NATURAL MERINO BLEND

With the new development of **bio super.wool** we set new standards and bring an innovative product with a holistic concept to the market. By combining 50% finest mulesing-free merino wool and 50% of the first biodegradable synthetic fiber **PrimaLoft® BIO™**, both functional and ecological benefits are combined in our products. The entire

product life cycle of all **bio super.wool** products have reduced CO2 emissions and are biodegradable. This means only water, biomass, mineral salts and carbon dioxide remains after decomposition. During production, normal use, washing and also disposal, the innovative textile fiber reduces environmental impacts, such as microplastics, at every single stage.

PRIMALOFT® BIO™ INSULATION

OUR LATEST INNOVATION

Designed for nature – We are proud to introduce you to our innovation relating to 2nd layer and processing of sustainable fabrics.

One of our highlights is the use of PrimaLoft® Bio™, a synthetic fiber that meets both the high technical standard of our super.natural Products as well as the progressive sustainability approach of being made from 100% recycled materials.

Products made with PrimaLoft® Bio™ Fibers have been specifically developed to return to materials found in nature, with the aim to reduce the environmental impact of microfibers and garments throughout their life.

MERINO WOOL – A MARVEL OF NATURE

Merino sheep are among the oldest and most resilient breeds in the world. This particular sheep has its origin in North Africa and is globally known for its unique characteristics.

The merino sheep are well prepared for every climate zone and defy both, the icy cold and intense heat. Due to the natural texture of their fur, they can easily cope with temperature differences up to 40 degrees – and what works for animals often applies to humans. That's where the biggest benefit of merino wool comes in: it has a cooling effect at warmer temperatures and a warming one on cold days.

The fine new merino wool is obtained from living sheep. The good thing about it: the sheep's fur grows back naturally, thus the wool is naturally ecological. At super.natural, we rely on the origin, which is why we source our merino wool from African farms. Further, we rely on the German worsted yarn manufacturer Süd-wolle. As the world leader in worsted fabrics for weaving, circular and flat knitting, the company follows the latest eco-certifications, including Bluesign and Oeko-Tex standards.

THE IDEA

Aiming to combine the advantages of merino wool and synthetic fiber, we founded the brand **super.natural** in Switzerland in 2012. True to our motto #merinomadebetter, the natural and synthetic fibers perfectly complement each other, providing maximum comfort and functionality. The merino mix completely eliminates the disadvantages of both fibres – it is the birth of the perfect blend of merino wool and synthetic fiber.

THE PRODUCTS

Our functional BASE products for everyday use, made of 50% merino wool and 50% polyester, form the foundation of **super.natural**. But why should we only use this unique fiber mix for sports? To fully exploit the benefits of this mix of materials, we have developed a timeless **super.natural** collection that suits any wardrobe. Our **super.natural** styles offer an irresistible combination of comfort, style and functionality.

COMFY TO WEAR, EASY TO CARE.

Merino wool can absorb up to a third of its own weight in moisture, while polyester speeds up the removal of the moisture from the material. This combination offers you optimal comfort – with no trace of dampness.

The innovative combination of fibers can withstand a regular wash up to 40° C – no need for a separate wool wash. Our merino mix is incredible easy to care for.

The stabilising effect of the synthetic fibers means you can also put super.natural products in the dryer.

The fiber mix combines the natural elasticity of merino wool with the durability of polyester, enabling a uniquely stable shape and impressive longevity.

The tightly-knit connection between the materials creates an extremely soft surface that doesn't itch and offers incredible natural comfort.

The antibacterial effect of the enzyme keratin, which is a natural component of merino wool, prevents unpleasant odors from developing – even after profuse sweating or wearing the product multiple times.

Merino wool regulates temperature: it cools you down in hot temperatures and during increased activity, and warms you up in cold weather or when you take a break.

STILL HAVE QUESTIONS?

You might find the answer you're looking for here:

Do merino mix products start to smell more quickly than 100% merino?

Merino mix products can remove existing moisture from the material more quickly than 100% merino wool. To benefit from merino wool's antibacterial effect, you only need a proportion of 30% wool. The rapid moisture transportation of our fiber mix removes bacteria from what would be a fertile breeding ground, meaning unpleasant smells develop much more slowly. You won't have to worry about odors even after sweat-inducing activities or wearing the items multiple times.

What is mulesing? Is this procedure also a problem with super.natural products?

Mulesing, an unpleasant procedure to prevent flystrike in merino sheep, predominantly occurs in Australia. It involves the removal of strips of skin from around the hind legs and buttocks of the sheep – an incredibly painful process and a very controversial topic in sheep farming. To counteract the issue of mulesing, the wool used in super.natural products comes exclusively from African farms. As the flies are not present in this region, mulesing is not necessary.

How do I look after super.natural products properly?

super.natural products can simply be put in the washing machine at 40° C, and can even be tumble dried. Unlike 100% merino wool products, they can be cared for just like your usual clothes without the risk of shrinkage or of holes appearing. However, to best protect the odor-blocking enzymes in the merino fibers, it is recommended to use a wool detergent.

Why don't super.natural products itch?

The quality of wool is measured using its fiber strength. That means that the thinner the fibers, the softer it feels, and the higher the quality. super.natural uses merino wool with a measurement of 17 microns, which puts the wool in the 'fine' quality class. As a comparison, conventional sheep's wool measures at 30-50 microns.
