SEATOSUMMIT

WORKBOOK 2026

TESTED BY AUSTRALIA FOR 35 YEARS

There are few landscapes more extreme, diverse or remote than Australia. Born from these rugged terrains, Sea to Summit has spent 35 years designing and testing gear to withstand the toughest conditions—here and anywhere on the planet.

Whether your adventure is extreme or laid back, you can trust our gear that's been proven in Australia's harshest environments.

SEATOSUMMIT

DESIGN COMES FIRST

Sea to Summit, like many globally recognised outdoor brands, began with humble roots. In 1983, at just 17, Roland Tyson began making outdoor gear on an old industrial sewing machine.

Roland's design philosophy was simple: good gear works.

From his home in Perth, Western Australia, he honed his sewing skills, building gear tested on his own adventures. Roland had a unique ability to build products that were simple, practical and reliable—gear that made his travels smoother and more comfortable. Australia's remote Outback and later the Himalayas helped to continually refine the designs.

In 1991, Roland outfitted an expedition from sea level to the peak of Everest, and Sea to Summit as a gear manufacturer was born.

The company truly took shape in 1993, when his partner Penny Sanderson joined him in both outdoor exploration and managing the rapidly growing company.

Today, Roland remains Sea to Summit's chief designer, and the inspiration behind many of its most successful products.

Over the past 35 years, Sea to Summit has evolved, but one thing remains constant: simple, reliable, durable and practical gear remains at the heart of Sea to Summit's success worldwide.

Here's to the next 35 years and beyond.

SUSTAINABILITY

Our love of the outdoors drives innovation, exploration, and adventure. It also compels us to make meaningful steps towards improving our environmental and social impact.

Innovation is at the heart of what we do. A key aspect of that is ensuring our products are built to last and are easily repaired.

The most sustainable product is the one that does not need to be replaced.

When we introduce meaningful lower-impact improvements, we will highlight them as part of our broader, ongoing commitment. These improvements alone don't define our brand or our products.

Transparency and accountability in the steps we take are essential for making real progress in improving our impact.

OUR COMMITMENTS IN ACTION

PLANET

As part of our Greenhouse Gas (GHG) measurement programme, we've committed to science-based aligned targets for the reduction of carbon emissions and an action plan to meet them.

Our action plan will focus on reducing our GHG emissions through material choices and lower-impact manufacturing techniques, renewable energy, low-emission transport logistics and vehicle electrification.

PRODUCT & PACKAGING

These are the areas where we can make the most direct impact.

As the following pages show, we are committed to increasing our use of recycled and recyclable materials, bluesign APPROVED fabrics, and adopting more sustainable manufacturing practices.

These are important milestones, and they mark just the beginning of our journey.

PEOPLE

It's important that we take care of the people who work for us and work with us.

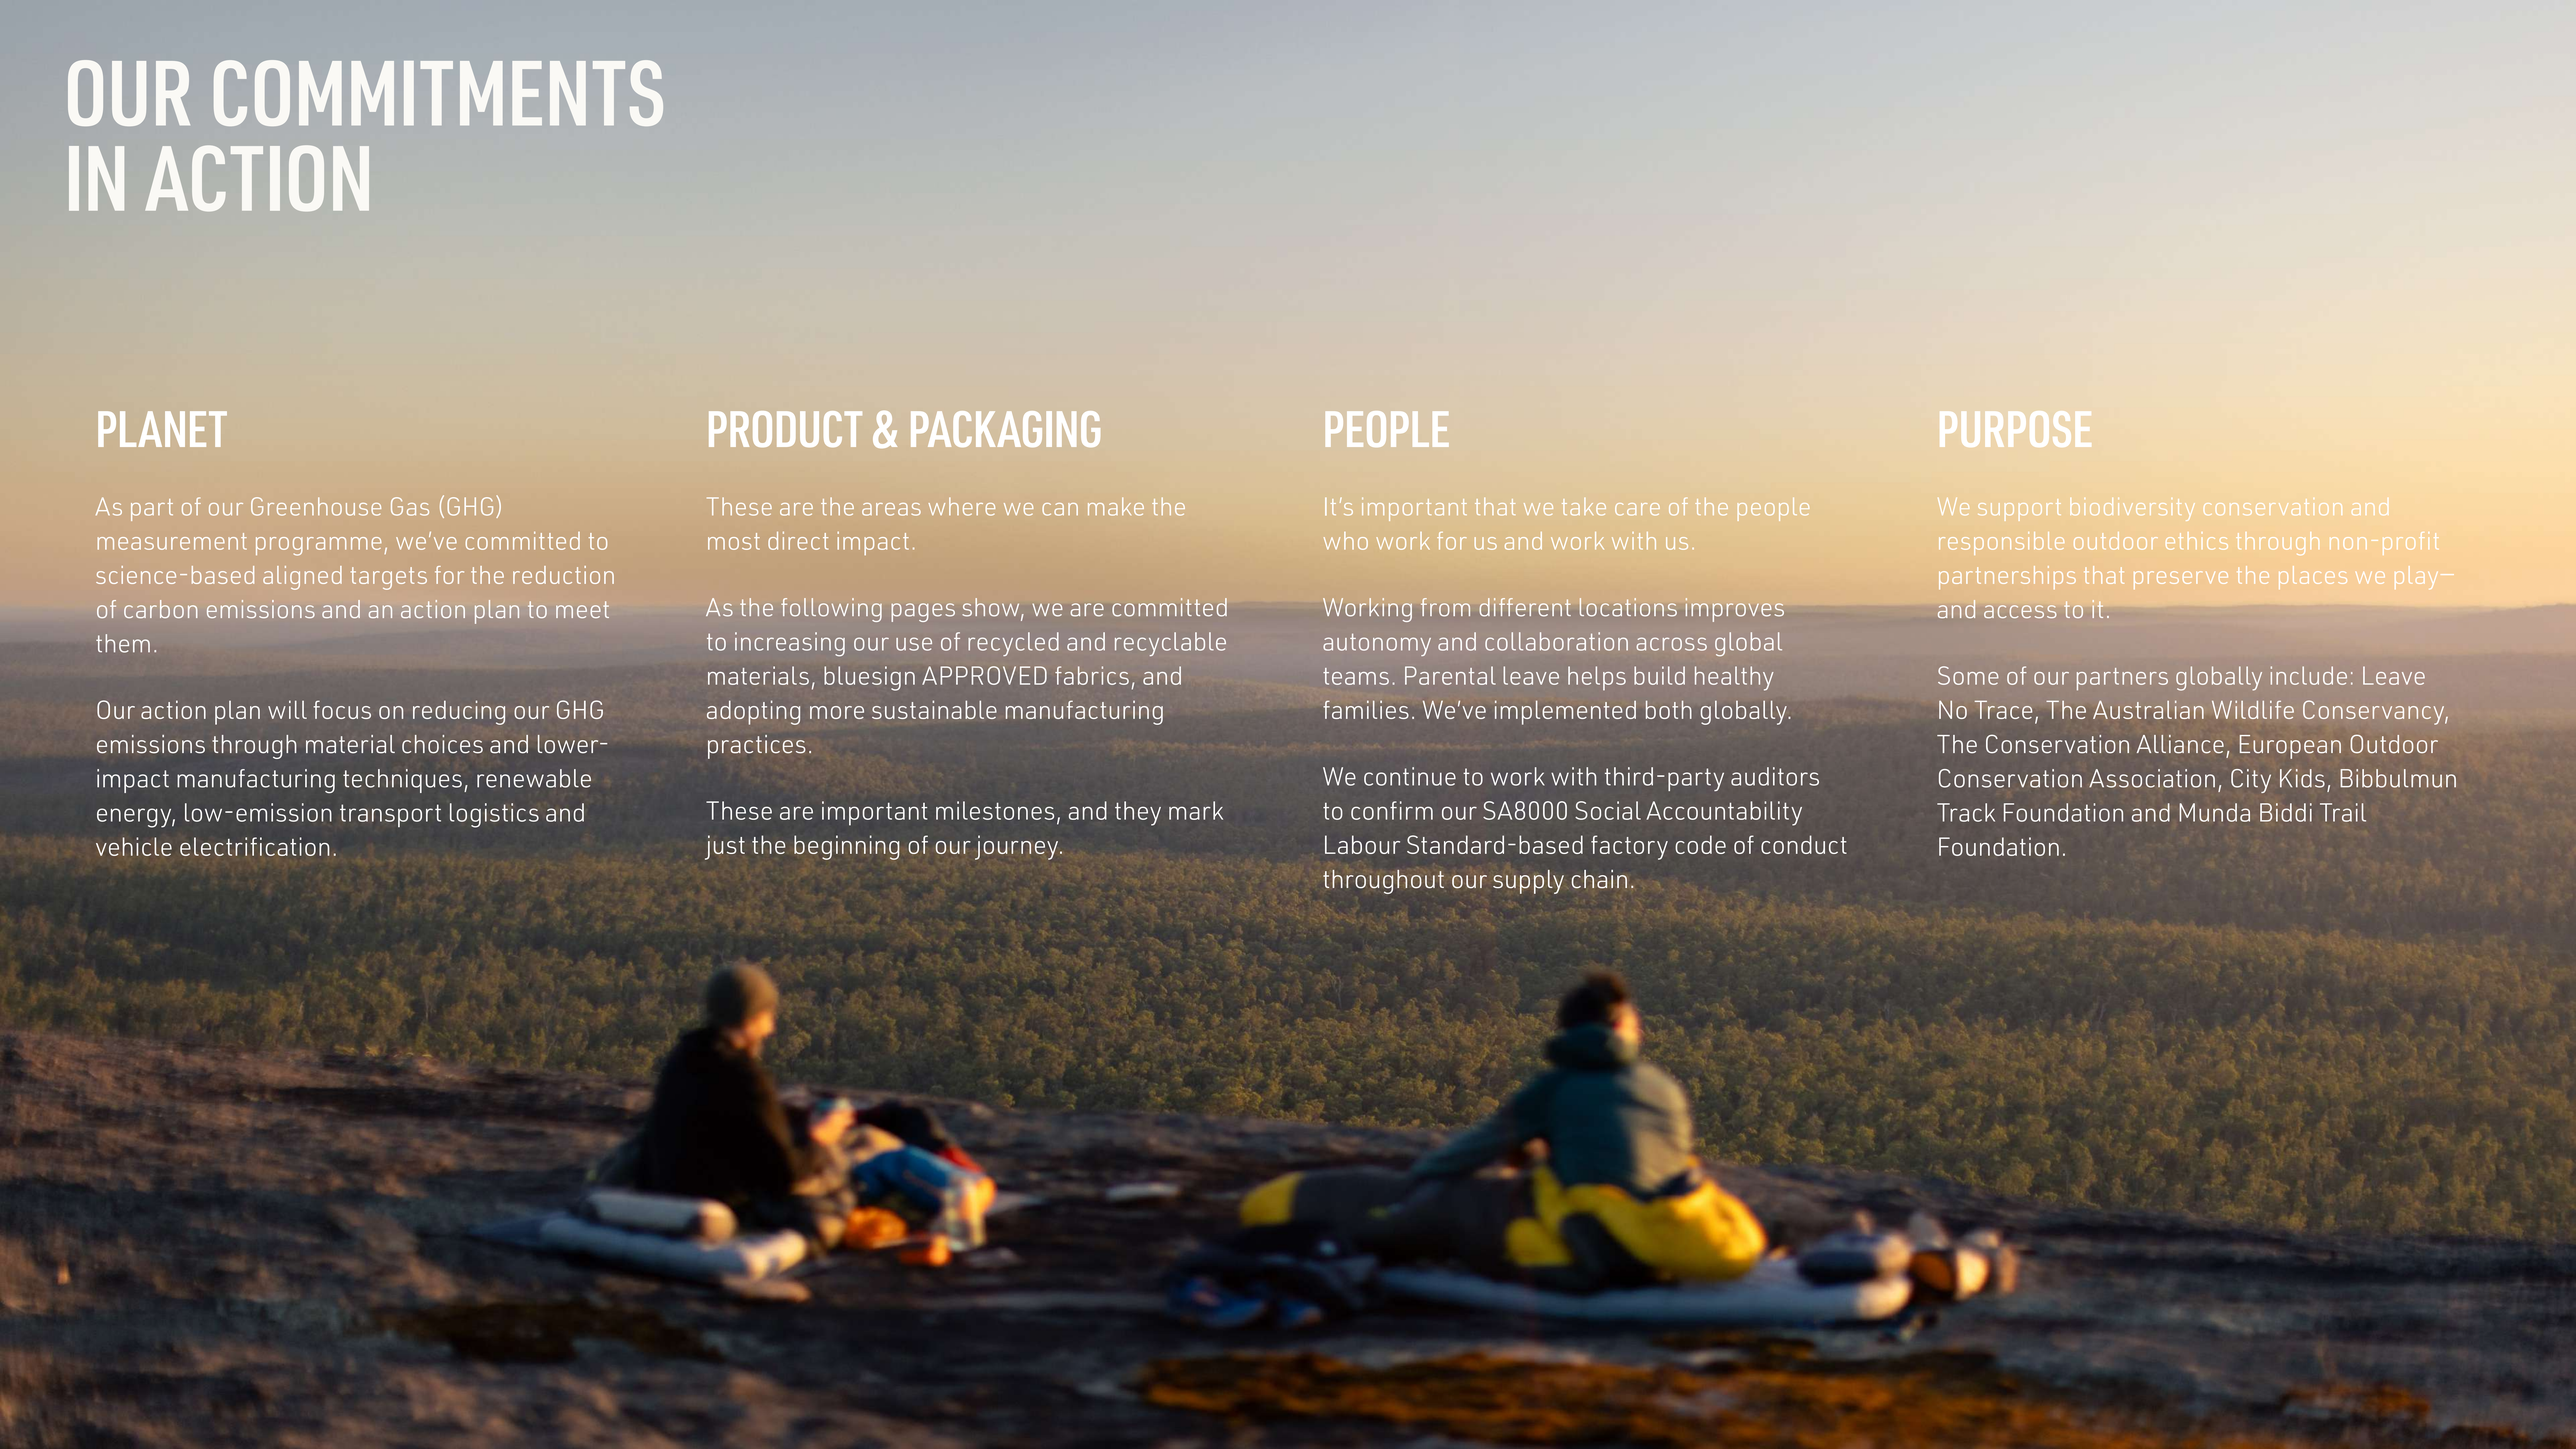
Working from different locations improves autonomy and collaboration across global teams. Parental leave helps build healthy families. We've implemented both globally.

We continue to work with third-party auditors to confirm our SA8000 Social Accountability Labour Standard-based factory code of conduct throughout our supply chain.

PURPOSE

We support biodiversity conservation and responsible outdoor ethics through non-profit partnerships that preserve the places we play—and access to it.

Some of our partners globally include: Leave No Trace, The Australian Wildlife Conservancy, The Conservation Alliance, European Outdoor Conservation Association, City Kids, Bibbulmun Track Foundation and Munda Biddi Trail Foundation.



IMPACT STANDARDS & CERTIFICATIONS WE SUPPORT

RECYCLED CLAIM STANDARD

- Global, voluntary third-party certification.
- Verifies recycled content and ensures traceability throughout the supply chain.
- Promotes consistent definitions of 'recycled' materials, enabling brands and consumers to make informed purchasing decisions.

SOLUTION DYED

- Traditional dyeing uses water and chemicals in a dye bath to colour fabric, consuming more resources and creating waste.
- Solution dyeing integrates colour at the chip level, reducing water, chemical waste and energy use while enhancing durability and colourfastness.

FOREST STEWARDSHIP COUNCIL & KERBSIDE RECYCLABLE PACKAGING

- The FSC certifies wood and paper products sourced from responsibly managed forests that meet strict environmental, social, and economic standards.
- We use FSC-certified card-based packaging which is also easily recyclable through kerbside collection.

RESPONSIBLE DOWN STANDARD

- Global, voluntary third-party certification.
- Ensures animal welfare and ethical practices in the down and feather supply chain.
- Guarantees traceability, prohibits live-plucking and force-feeding, and supports ethical sourcing and responsible farming practices.

BLUESIGN APPROVED FABRICS

- Swiss-based voluntary third-party chemicals management certification.
- Certifies textiles, ensuring minimal environmental impact and resource conservation.
- Prevents the use of hazardous chemicals, promotes fair labour practices, and ensures transparency and accountability throughout the supply chain.

1% FOR THE PLANET®

- A global movement of people and businesses working together to drive environmental impact.
- One percent of each Revive product supports grassroots organisations focused on protecting biodiversity, endangered ecosystems, and wildlife.

IMPACT STANDARDS & CERTIFICATIONS WE SUPPORT

AUSTRALASIAN RECYCLING LABEL

- Provides clear recycling instructions on packaging, helping consumers dispose of materials responsibly.
- It promotes correct recycling practices, reducing contamination and improving recycling outcomes.

PFAS (PER- AND POLYFLUORINATED CHEMICAL/SUBSTANCES)

- Persistent 'forever chemicals' that don't degrade, causing long-term contamination of ecosystems and water supplies.
- We use non-PFAS chemistry for water and stain resistance.
- Our products contain no intentionally-added PFAS.

AUSTRALIAN PACKAGING COVENANT

- National regulatory framework guiding Australian businesses and governments in reducing packaging waste and improving recycling rates.
- Compliance with APCO ensures our packaging meets strict environmental standards and we share the responsibility for its impact.

FLAME RETARDANTS

- Many flame retardants are persistent 'forever chemicals' that do not break down in the environment, leading to long-term contamination of ecosystems.
- We use durable materials that naturally meet flame resistance standards.

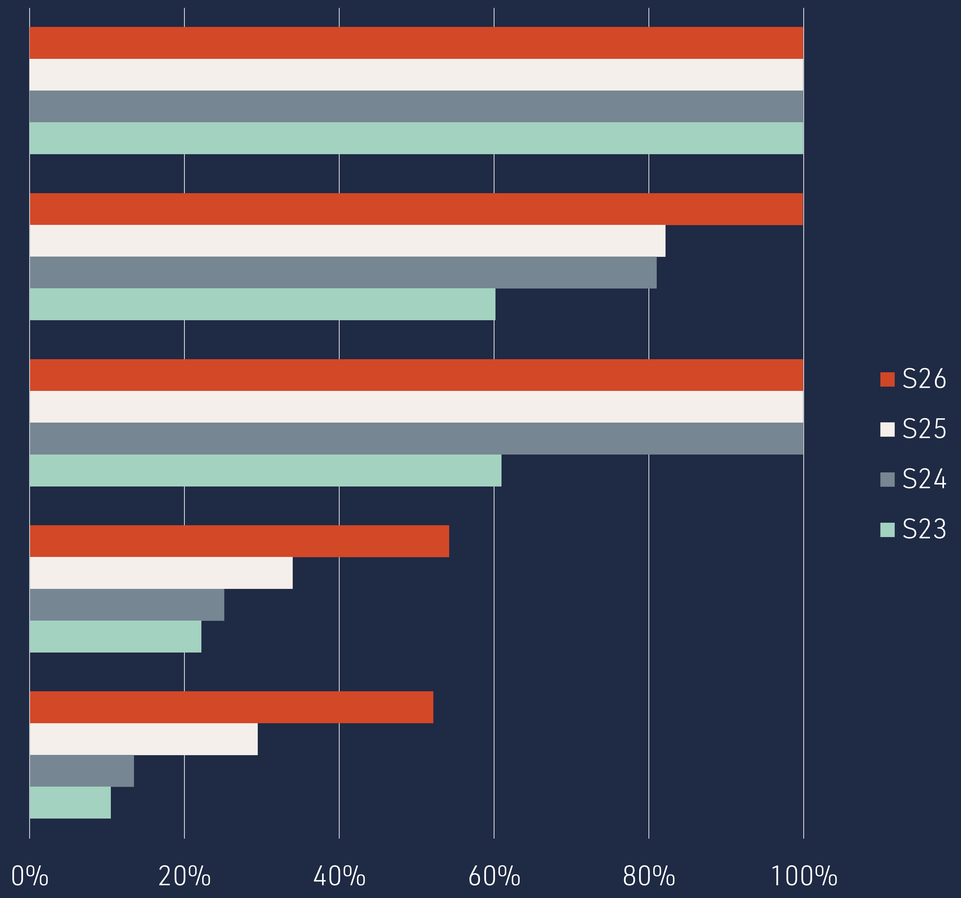
BPA (BISPHENOL A)

- BPA is a chemical commonly used in polymers and is linked to potential health and environmental risks.
- All our food-grade camp kitchen products are made from materials that do not contain BPA.

PRODUCT & PACKAGING

These key indicators reflect our efforts to reduce our impact. The goal is less–we can all do more.

AIM	HOW WE ACHEIVE IT
Ensure animal welfare in our supply chain	**Use Responsible Down Standard (RDS) Certified Virgin Down in Sleeping Bags and Quilts**
Reduce packaging waste and choose responsibly sourced materials	**Use Forest Stewardship Council (FSC) certified card for packaging, ensuring it is kerbside recyclable**
Reduce chemical use impacts on the environment and human health	**Use non-PFAS chemistry**
Reduce chemical use impacts on the environment and human health	**Increase use of bluesign APPROVED materials**
Reduce resource consumption, energy use and waste	**Increase use of Recycled Claim Standard (RCS) certified fabrics, Solution Dyeing and other lower-impact manufacturing methods**



Graph note: Shown as % of total Soft Goods or applicable SKUs
Graph note 2: S23-S24 non-PFC used, S25-S26 non-PFAS used

SUPPORTING 1% FOR THE PLANET

Our Revive products use lower-impact materials and manufacturing techniques.

1% for the Planet is a global movement of people and businesses like ours working together to drive environmental impact.

Our Product Line Membership reinforces our commitment to environmental stewardship with one percent of each Revive product benefitting 1% for the Planet environmental partners.

The partners we have chosen are focused on protecting biodiversity, endangered ecosystems, and wildlife. They're making a tangible impact on the environments where we play.

WARRANTIES

SEA TO SUMMIT GUARANTEE

We stand behind our products and strive to exceed expectations. For over 35 years, Sea to Summit has designed and built award-winning gear that's continuously tested in the Australian outback and demanding environments around the world. We guarantee our products against manufacturing defects within a reasonable time from purchase—and we strive to keep the claim process straightforward.

Customer satisfaction is our ultimate priority. While we advocate, educate and promote simple care and maintenance to extend a product's usable life, in instances of a manufacturing defect we replace, repair, or provide credit for the item. This is assessed on an individual, case-by-case basis. Put simply, we always do what we know is right to build products and relationships that last.

WHAT'S REASONABLE?

Environmental Wear and Tear

Our products are engineered using quality materials that are specific to the end-use. Normal wear and tear and the breakdown of materials due to age, use, or environmental conditions are not covered under our guarantee.

Accidental Damage

Damage due to improper use or care, accident, or negligence is not covered under our guarantee. However, we always aim to exceed expectations, so we'll look to assist with a functional repair whenever possible.

NEW

IN 2026

SEA TO SUMMIT

SLEEP SYSTEMS

Don't Just Sleep Well–Sleep Better

New fabrics, new insulation materials, new designs, one goal: to improve sleep comfort.

Liners: The Baselayer of Your Sleep System

Just like the 'layering' concept for outdoor clothing, our liners utilise a range of performance fabrics to suit any condition - so they can excel as the next-to-skin baselayer of your sleep system.

CAMP KITCHEN

Engineered for How You Eat Outdoors

It's not often that your backcountry campsite has a table to sit at. With that in mind, we have designed the new Horizon range to be held instead of placed on a table.

TENTS

Liveability Evolved

Liveability means many things: more useable head-and-shoulder room, weather protection, taller tent doors or better ventilation. Liveability does not appear on a spec page–but it has a big impact on the experience a shelter provides. Sea to Summit tents have been designed since day one to evolve all aspects of what it means to be comfortable in the outdoors.

SLEEP

WHAT'S NEW IN 2026

Don't Just Sleep Well–Sleep Better

New fabrics, new insulation materials, new designs, one goal:
to improve sleep comfort.

Sleep System Integration

Our productst are designed to work together for a better night's sleep. Our Aeros pillows use PillowLock to attach to sleeping mats or easily fit inside the hood of a sleeping bag due to their technical shape.

Our Liners work as the performance baselayer of your sleep system to keep you comfortable and fit ANY sleeping bag shape. Our mats and sleeping bags are cut wider to give you room to move throughout the night because ultralight does not need to mean ultra-tight.

Climate Control

Sleeping well outdoors is often a function of controlling body temperature over a variety of external conditions.

From Breeze thermal adapt liners to Climate Control sleeping bags using Free Flow zips, Sea to Summit defines adaptable comfort for sleeping in the outdoors.

Lower Impact Materials

RCS-certified recycled fabrics. RDS-certified down. Post consumer waste Revive Loft insulation. Materials that are bluesign APPROVED. Solution dyeing where possible. Small but significant steps towards treading lightly.

DON'T JUST SLEEP WELL–SLEEP BETTER

Wider by Design

Sleep studies show that most people do not sleep on their back with their arms crossed, so why make a sleeping mat that only fits that sleep position? Sea to Summit ultralight air mats are wider by design, giving you 8% more sleep area than typical tapered sleeping mats so you have the space needed to support how YOU sleep.

Thickness Without Stability Makes for an Uncomfortable Sleep

Stability and support are key to comfort in an air mat. With between 90–177 individual air sprung cells that move independently to conform around your body, Sea to Summit air mats provide even weight distribution free from uncomfortable pressure points–something standard baffled sleeping mats cannot offer.

Room to Move

You don't have a "sleep position", you have MANY sleep positions. People move around in their sleep... a lot. That's why we created the Contour shape in our new self inflating mats. Narrower at the head and flaring wider through the shoulders and torso, the Contour shape adds 12% more sleep surface exactly where you need it. So go ahead–roll on your side, pull your knees up, sleep comfortably.

Lighter and More Comfortable Foam Mats

Our Pursuit and Pursuit Plus mats use Air Light Construction. A Sea to Summit innovation, large horizontal cores remove 40% of the foam to create air-filled, foam supported chambers for exceptional comfort. AirLight Construction also significantly reduces the weight and packed size of the mat–making it suitable for ultralight journeys.

2026 SLEEP
REVIVE RANGE

What is Solution Dyeing?

A process where dye is added to the liquid polymer before the fibre is extruded. The resultant fabrics will not fade over time in the same way conventional fabrics will. The real upside is a massive reduction in water and chemical use and in secondary emissions, such as CO_2 during manufacture.

What is bluesign?

A system run by an independent, Swiss-based third-party group that monitors every step in a supply chain to ensure the use of the most benign materials, production creating the fewest emissions and pollution, humane conditions for workers and material safety standards for consumers.

You can read more at **www.bluesign.com/en/**

RCS-Certified

Revive products – and other Sea to Summit equipment – utilise recycled materials that are RCS-certified. The Recycled Claim Standard (RCS) is an international, voluntary standard that uses the ISO definition for recycled, sets criteria for third-party certification of recycled input and ensures a chain of custody throughout the supply chain.

For more information visit **www.textileexchange.org/recycled-claim-global-recycled-standard**

Revive Loft

Multi-denier synthetic insulation used in Revive sleeping bags. Revive Loft is made of 100% RCS-certified post-consumer recycled polyester. The insulation is a key part of offering approachably-priced, technical sleep products with a strong sustainability story.

SLEEPING MATS
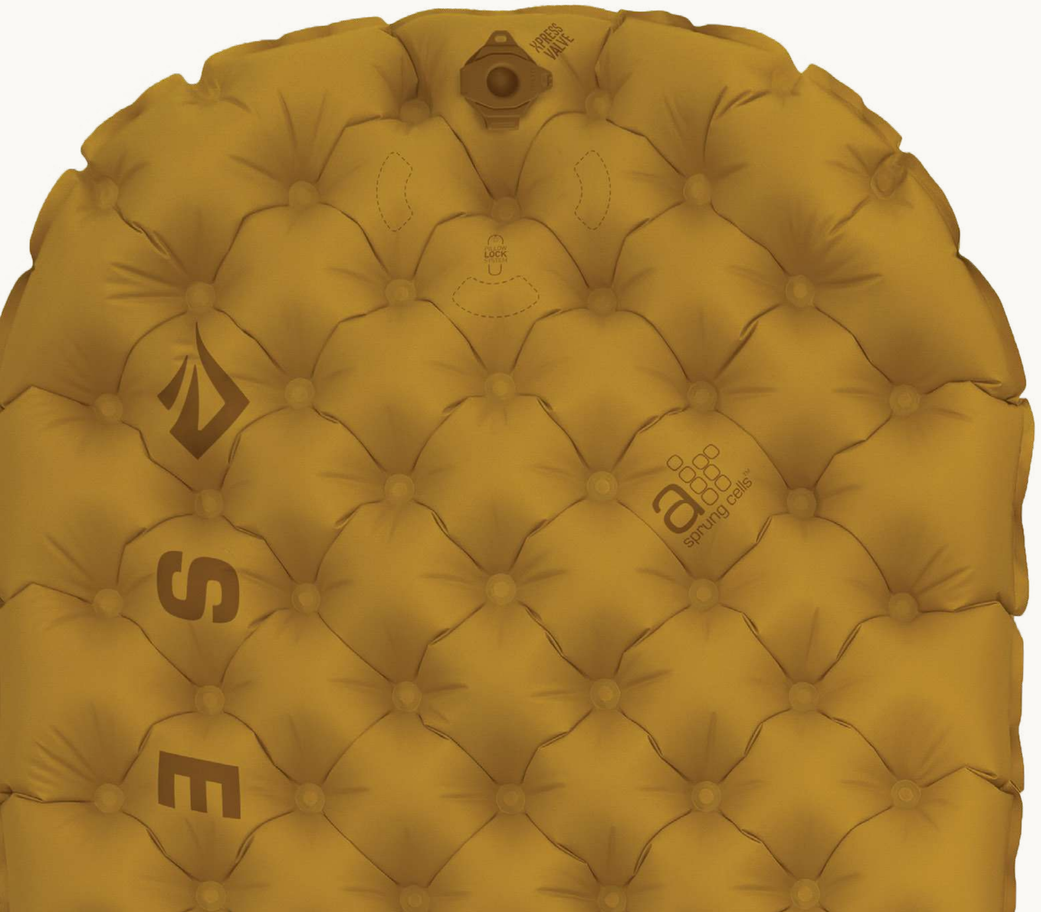
WHAT'S NEW IN 2026



Room to Move

Sure, narrow tapered mats are light. But you can't roll over on them, and when sleeping on your back - your elbows end up on the cold ground.

Sea to Summit mats are the widest in their class; both the renowned Air Sprung Cell mats and the new Contour-shaped self inflating mats are designed to keep you comfortable - no matter how you sleep.

Durability for Peace of Mind

From thru-hikes to off-the-map expeditions, Sea to Summit mats are built to give you peace of mind. From choosing stronger 30/40D fabrics and thicker TPU layers in our Air Mats to pioneering field repair patches to ensure you always get a comfortable night's sleep.

Better Support

The secret is in the construction.

In air mats, Air Sprung Cells offer noticably more stability and support than baffled designs. They also significantly reduce pressure points on hips and shoulders for side sleepers. In self inflating mats, Air Light and Air Frame construction provide hybrid air-filled, foam- supported sleep surfaces for a comfortable and quiet sleep.

Lower Impact Materials

2026 self inflating mats use RCS-certified recycled face fabrics. Pursuit, Pursuit Plus and Comfort Deluxe Mats also use bluesign APPROVED fabrics that are solution-dyed, saving approximately 30% of the water, chemicals and energy used in normal fabric production.

ULTRALIGHT AIR MATS
COMMON FEATURES

Air Sprung Cells

Think of Air Sprung Cells as individual, air-filled springs. Dozens of these cells form a supporitve sleeping surface that is far more stable and comfortable than the baffles of a conventional air mat.

XPRESS VALVE

A high-airflow, low-profile valve that combines an inflate port, a deflate port and an adjust button.

Compatible with the Air Stream Pump Sack built into the mat stuff sack.

air stream™ PUMPSACK

Integrated into the stuffsack of every Air Sprung Cell mat. A single breath fills the inflator bag, with 3-4 breaths being all you need to inflate a mat.

Turn the inflator bag inside out to find a mini XPRESS nozzle that fits Aeros Pillows.t

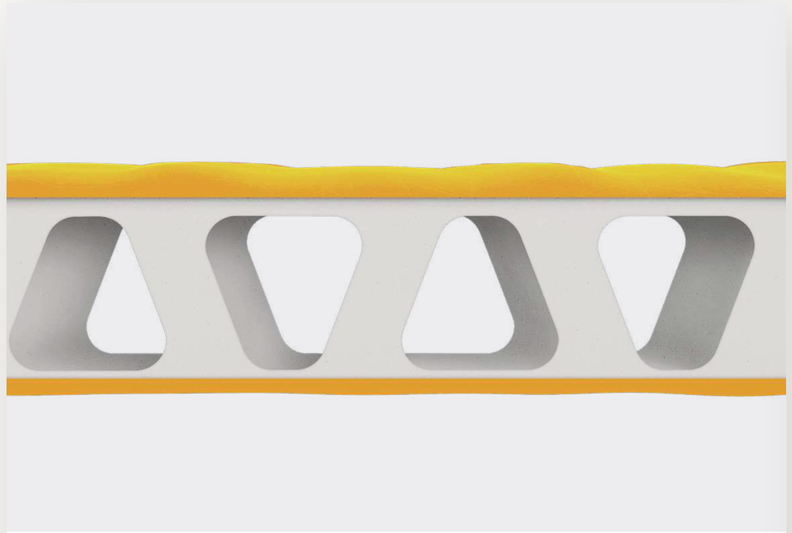
ALL-ROUNDER SLEEPING MATS

ALL-ROUNDER SELF INFLATING MATS
CONSTRUCTION

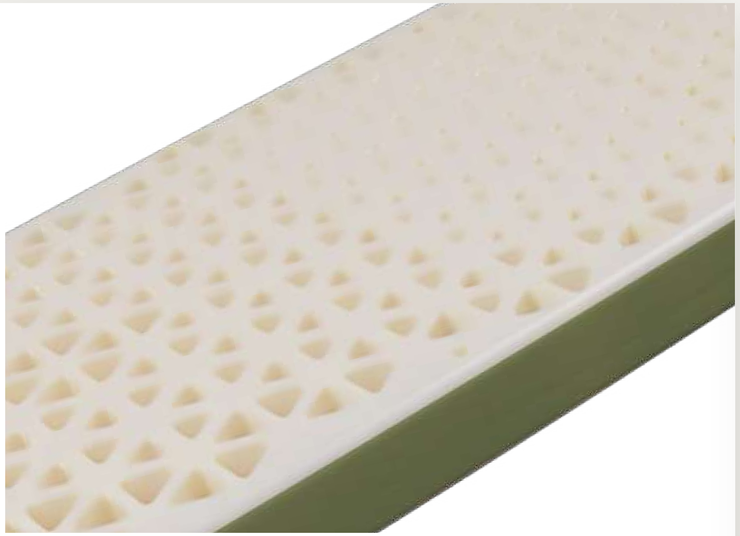


AirLight
CONSTRUCTION

The original foam/air hybrid construction.

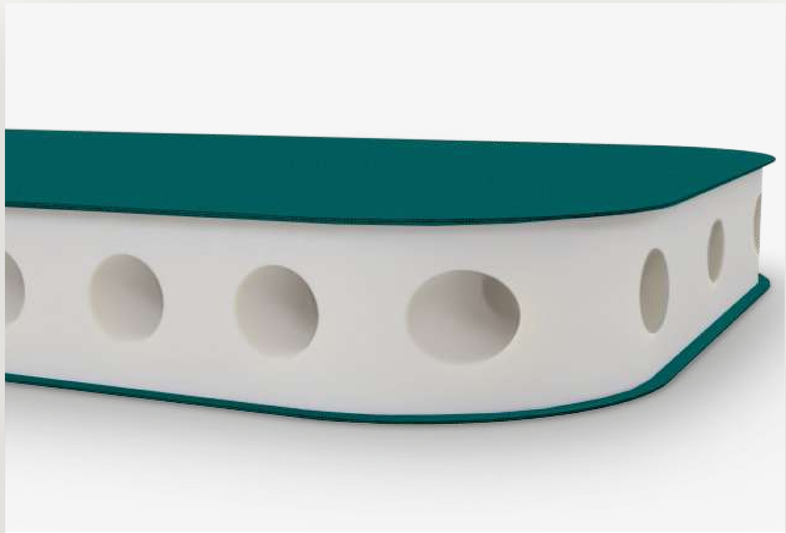
Horizontal cores remove 40% of the foam, creating air-filled, foam-supported chambers for stability and comfort.

Significantly reduces weight and packed size of the mat.



AirZone
CONSTRUCTION

Body-mapped cutouts leave insulation where you need it, and create weight savings where you don't.



AirFrame
CONSTRUCTION

Air Frame construction uses interlocking cross-cores.

The technology evens out the internal rebound of the foam better than any other self inflating mat.

A grid of air-filled, foam supported chambers provide bounce-free stability, even on a Double mat.

ALL-ROUNDER SELF INFLATING MATS
COMMON FEATURES

Range of Shapes

All self-inflating mats are offered in the weight-efficient Contour shape and room-to-spread out Rectangular versions.

Comfort Deluxe mats are wider, and include the supremely comfortable Double.

XPEL VALVE

The first valve specifically designed to prevent re-inflation during pack-up, the low-profile XPEL valve allows simple inflation and adjustment of self inflating mats.

Side-Loading Stuff Sack

The side-loading stuff sack places the drawcord along the longer axis—packing away your rolled-up mat is now effortless.

SEATOSUMMIT

SELF INFLATING
PURSUIT PLUS MAT

More comfort, less weight, lower-impact materials

Light and Ultra-Comfortable

The extra thick Pursuit Plus mat's Air Light construction uses horizontal cores which form air-filled, foam-supported channels for greater comfort while reducing weight.

Weight efficient Contour Shape adds 12% more sleep area where you need it most—perfect for a variety of sleep positions and body types.

Easy to Roll-Up and Store

The low-profile XPEL multi-purpose valve makes inflation and pressure adjustment super quick. When deflating, flip the valve to prevent air from re-entering the mat, ensuring a tighter roll and smaller packed size.

Durable and Recycled Fabrics

The base and top layers are built with rugged 75D woven polyester fabric that is RCS-certified recycled.

SEATOSUMMIT

SELF INFLATING
COMFORT DELUXE MAT

Ultimate comfort and stability with lower-impact fabrics.

Stable Comfort

Air Frame construction creates a comfortable, supportive and stable sleep while the stretch knit top fabric conforms around your body eliminating pressure points.

Lighter and More Packable

Air Frame construction allows the sleeping mat to roll up smaller and weigh less for easy transport and storage.

Easier to Use

The included Airstream HV (high-volume) pump sack, cross-core Air Frame construction and XPEL valve(s) make inflation and deflation easier.

Lower-Impact Materials

- Solution Dyed fabrics
- bluesign APPROVED fabrics
- RCS-certified recycled fabrics
- non-PFAS chemistry
- Supports 1% for the Planet Partners

WHAT'S NEW IN 2026

Supporting Sleepers in So Many Ways

Comfort means different things to different people. We offer the most comprehensive range of pillows, each crafted for comfort. From ultralight to super plush - we've got you covered.

PillowLock

Now supplied with every Aeros pillow, this unique hook-and-loop system keeps your pillow attached to your sleeping mat throughout the night.

Memory Foam Comfort

Built into the Premium and Memory Lux pillows, a layer of memory foam takes sleep comfort to the next level.

Lower Impact Materials

Use of RCS-certified recycled face fabrics and upcycled foam offcuts maintain the level of comfort you expect from a Sea to Summit pillow - while reducing their impact.

AEROS PILLOWS

COMMON FEATURES

PILLOW LOCK SYSTEM

PillowLock Included

Keep your pillow in place

MINI XPRESS VALVE

Mini XPRESS valve

Easy to use; fits nozzle on sleeping mat Air Stream Pump Sack.

Slides into Sleeping Bag Hoods

Now your favourite pillow and sleeping bag fit together.

Soft and Supportive

Soft-touch and engineered fabrics outside, memory foam inside.

RECYCLED 100 claim standard

RCS Recycled Fabrics

Recycled (or up-cycled in the Foam Core Pillow) materials. Rest easy.

SLEEPING BAGS

WHAT'S INSIDE A
SEA TO SUMMIT SLEEPING BAG?

MATERIALS

Technical fabrics

Fabrics are selected based on weight, durability, softness, water repellency and comfort. Where possible, we choose fabrics that are RCS-certified recycled and bluesign APPROVED.

Non-PFAS

All of the DWR finishes on our sleeping bag shells and our Ultra-Dry Down treatment are 100% non-PFAS.

Ultra-Dry Down

Ultra-Dry Down is a non-PFAS, permanent polymer treatment that absorbs 30% less moisture and dries 60% quicker than untreated down.

Responsible Down Standard RDS

100% of the down used in our sleeping bags and quilts are RDS-certified. The RDS system audits and enforces animal welfare standards from the source to the final product.

Revive Loft

The insulation in our synthetic sleeping bags is 100% RCS-certified post-consumer waste recycled polyester. The multi-Denier fibres have hollow cores.

HOW WE ACHEIVE IT

Baffle design

The baffle height is adjusted for each variant to allow maximum loft. Baffles are aligned vertically in the torso to minimise down shift when a sleeper turns over.

Zip Pairing

Many sleeping bags are designed to be zipped together to create a cosy sleep environment for two. The side zipper lengths are the same regardless of the bag's size (so a Regular will zip together with a Long).

Internal Pockets

Our All-Rounder and Vehicle Supported sleeping bags often have small zippered internal pockets: space for valuables, or a place to store electronics in freezing conditions.

YKK Zipper

All sleeping bags utilise YKK zippers with zipper ploughs for smooth, snag-free operation.

Quilt Lock

Most models can be combined with a Sea to Summit quilt to provide a thermal boost.

Tested Down Quality. Each down sleeping bag includes a batch test report from the International Down and Feather Laboratory (IDFL) certifying the loft and composition of the down used. We publish a minimum fillpower rating; in production it is often exceeded.

Tested temperature Ratings. All of our sleeping bags are independently tested in ISO-accredited laboratories to the ISO Standard 23537.

CLIMATE CONTROL

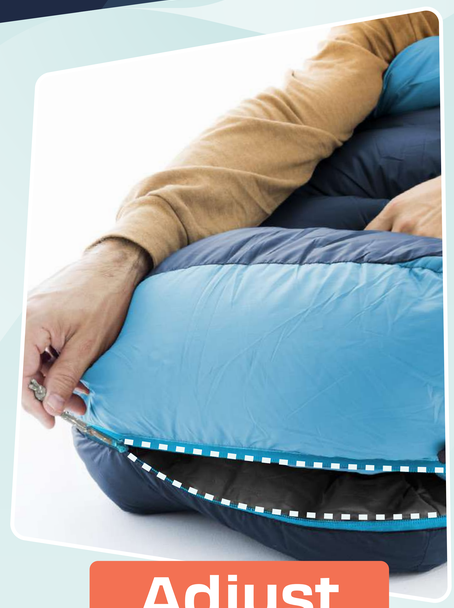
FREE FLOW

Wherever Your Adventures Take You...

Having the option to perfectly adjust your sleeping bag to the conditions can be key to your camp experience and comfort.

Which is where climate control, using Free Flow zippers comes in.

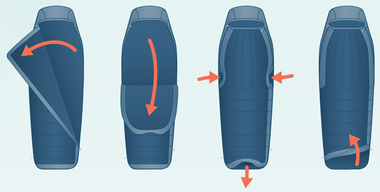
Free Flow zippers put you in control of your comfort.



Adjust

to regulate temperature

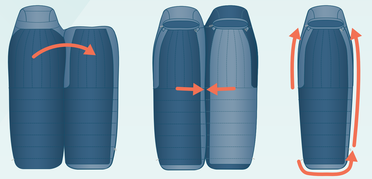
With multiple zipper configurations, Sea to Summit's Free Flow lets you adjust your sleeping bag for multi seasonal functionality and effective climate control.



Adapt

to the conditions

With the option to use your sleeping bag in three configurations including a quilt, two bags coupled together, or a standard set up, Sea to Summit's Free Flow offers versatility and flexibility.



Action

your camp experience

Close the shoulder snaps, open the side zippers and reach your arms out of the bag. Enjoy a morning brew. Read a book while sitting in your tent. Live a little.

Experience a level of practicality you've never had in a sleeping bag before.

(SPARK PRO)

SPARK PRO

DOWN SLEEPING BAG

Until now, true versatility and ultra lightweight were an either/or choice. Not any more. The technical construction and Free Flow system of the Spark Pro means that it can be used comfortably across a wide range of temperatures, while its feather-light fabrics and ultra high-lofting down keep it light and packable.

ULTRA-DRY Down 950+ Loft

FREE FLOW

QUILT LOCK

KEY FEATURES:

950+ loft, RDS certified goose down is treated with our NON-PFAS Ultra-Dry Down finish for water resistance in damp conditions

The shell and lining fabric of the Spark Pro is a 10 Denier nylon chosen for its enhanced breathability. It contributes to the high level of comfort that this technical bag provides.

The hood and foot box feature a highly water-resistant, breathable 10 Denier nylon fabric that effectively sheds moisture, for instance from tent wall condensation.

The **Free Flow Zip System** offers temperature regulation and multiple sleeping bag configurations for added freedom in the outdoors. The minimalist 1/4 length secondary and foot box zips are ultra lightweight for added versatility and comfort.

SPARK

WOMEN'S DOWN SLEEPING BAG

ENGINEERED FOR WOMEN

The Spark Women's sleeping bag is the perfect option for lightweight adventures. Specifically designed for women, with a fit - wider between the hips and knees - that allows a natural sleeping position without compressing the down. Women's-specific body mapping ensures additional warmth where female sleepers need it most.

EMBER

DOWN QUILT

The Ember quilt was designed for multi-season use with an excellent warmth to weight ratio. In warmer conditions, the ability to easily ventilate keeps you comfortable. As temperatures drop, the drawcord foot box helps you retain warmth. In cold weather, the Ember can be secured to your Sea to Summit sleeping bag using the Quiltlock system for an extra temperature boost.

ULTRA-DRY Down
850+ Loft

QUILT LOCK

KEY FEATURES:

- 850+ loft, RDS certified goose down is treated with our NON-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- The shell and lining fabric of the Ember is a 10 Denier nylon chosen for its enhanced breathability. It contributes to the high level of comfort that this technical quilt provides.
- Pairing with most Sea to Summit bags, the **QUILTLOCK SYSTEM** and drawcord foot box enables quilts to be secured to sleeping bags for added functionality and freedom.
- A technical quilt has become the go-to sleep solution for many gram-counting adventurers. The lack of a zipper saves weight and reduces the packed volume, while the broader cut allows freedom of movement and ventilation. Supplied straps secure the Ember to your sleeping mat.

ULTRA-DRY Down
650+ Loft

KEY FEATURES:

650+ loft, RDS certified duck down is treated with our NON-PFAS Ultra-Dry Down finish for water resistance in damp conditions

Recycled polyester shell and liner fabric offers lightweight comfort. The shell fabric is treated with a NON-PFAS DWR finish to help shed moisture.

Versatile and ultralight, with a tapered rectangular shape, a full-length zipper and a drawstring foot box. The no-hood design keeps the Traveller light and compact.

The foot box and shoulder drawcords can be tightened to retain warmth, or opened - along with the side zipper - for ventilation. Open flat to use as a blanket/quilt or zip to another Traveller to form a double bag for two.

ALL-ROUNDER SLEEPING BAGS

ALL-ROUNDER
SLEEPING BAGS

Maximum variability, maximum comfort.

1. **Comfortable Hood**
   Fits snugly to retain warmth, offers space for a Regular pillow
2. **Vertical Chest Baffles**
   Prevent lateral down shift in shoulder/ torso area
3. **Zipper Plough**
   Eliminates zipper slider snagging
4. **20D Recycled Fabrics**
   RCS-certified recycled nylons and polyesters chosen for comfort and performance
5. **Opening Footboxes**
   More ventilation. More functionality
6. **Horizontal Baffes in Leg Section**
   More thermally efficient (given less lateral movement than torso)
7. **650+ / 750+ RDS Down**
   Ultra-Dry Down treated. Certified for loft and composition
8. **Revive Loft**
   Multi-Denier, hollow-core fibre synthetic insulation: is RCS-certified recycled
9. **Climate Control using Free Flow Zippers**
   Open zippers for unparalleled ventilation or to stretch out arms /or feet
10. **Quality 40D Nylon Compression Sack Included**
11. **Roomy Shape**
    Extra space for an unrestricted sleep

DOWN SLEEPING BAG

Our most versatile technical sleeping bag. In colder temperatures, cinch down the technical hood, zip up the draft-tube protected zippers and let the 750+ Ultra-Dry Goose Down keep you warm. In warmer conditions, the Free Flow Zip system provides different configurations for superior ventilation or opens the bag flat for use as a quilt on the warmest of nights. All of the above make the Ascent a true three-season backcountry bag, one of very few sleeping bags for which this is true.

SHELL AND LINING FABRIC IS 100% RCS CERTIFIED RECYCLED POLYESTER CERTIFIED BY CONTROL UNION 1114661

KEY FEATURES:

- 650+ loft, RDS certified duck down is treated with our NON-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- Recycled polyester shell and liner fabric offers lightweight comfort. The shell fabric is treated with a NON-PFAS DWR finish to help shed moisture.
- The Free Flow Zip System offers unparalleled temperature regulation and multiple sleeping bag configurations including removing the entire upper section of the bag for use as a quilt.
- The oversized hood with drawcord can be snugged down to retain warmth effectively. It is sized to fit a large Sea to Summit pillow (or home-sized pillow) - perfect for vehicle-based adventures.

650+ fill power, RDS-certified, Duck Down with Ultra Dry Down treatment for improved water resistance in damp conditions.	Recycled 20-Denier Polyester shell and lining. Shell has a NON-PFAS DWR finish to help shed moisture.	Relaxed tapered rectangular fit: Spread out in this generous and versatile bag. Unzip the entire upper section for use as a quilt.	Free Flow+ Zip System: Primary zip and secondary zip - full length #5 with Zip-Plough and two sliders. Footbox zip - #5 with two sliders.	Vertical chest baffles, horizontal baffles lower half and base, box wall baffle construction throughout.	Fitted front draft collar: scalloped over the neck and oversized at the shoulders.	Oversized hood with two soft touch adjustments. Fits a home-sized pillow.	Single, synthetic-filled, draft tube along the top of all zippers.	Pairs with most Unisex and Women's Sea to Summit bags.	Pairs with Sea to Summit quilts.	Fits a home pillow.

TANAMI

DOWN COMFORTER

Bring the comfort of home to your vehicle based adventures. The Tanami Down comforter utilises 650+ fill power, RDS-certified duck down with a NON-PFAS Ultra-Dry Down treatment to keep you cozy, while the textured nylon liner fabric prevents the quilt from sliding off as you sleep.

A drawcord system helps secure the quilt to the base of your sleeping mat, and the QuiltLock system means you can add the Tanami to a Sea to Summit sleeping bag to boost performance.

Pairs with Sea to Summit quilts.	Sea to Summit Regular Pillow fits inside hood.

SLEEPING LINERS

SLEEPING LINERS
WHAT'S NEW IN 2026

The Baselayer of Your Sleep System

Just like the 'layering' concept for outdoor clothing, our liners utilise a range of performance fabrics to suit any condition - so they can excel as the next-to-skin baselayer of your sleep system. Stretch fabrics mean that our performance liners will fit any shape of sleeping bag.

Thermal Boost

Technical shapes, hollow-core fibres, a knitted structure and far infrared-absorbing/emitting pigments in the yarns all provide a thermal boost and make the Reactor series the first choice for cool-to-cold weather sleep systems.

Thermal Adapt

In warmer, more humid conditions, the highly breathable and stretchy Coolmax and Tencel blended fabric of our Thermal Adapt range wick moisture away from contact points and spread it over a broad area where it can dissipate.

Sleeping Bag Liners and Traveller Sleep Sheets

Shapes tailored to purpose. Sea to Summit Mummy liners are perfect for technical sleeping bags. Rectangular liners work well with broader-cut car-camping bags, and Traveller liners (with their built-in pillow sleeve) are ideal when hygienic travel sleep sheets are needed.

Lower Impact Materials

All Sea to Summit liners are made using RCS-certified recycled yarns which are also bluesign APPROVED. No flame retardants. Non-PFAS.

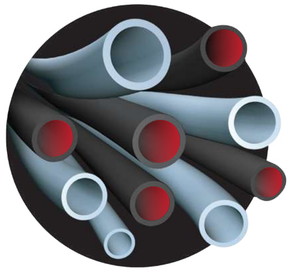
THERMAL BOOST LINERS

THERMAL BOOST LINERS
FABRIC TECHNOLOGY

Lower impact, higher performance. More comfort.



THERMOLITE® PRO

Thermolite Pro with far infrared technology. The key to thermal boost in your cold-weather sleep system

THERMOLITE PRO far infrared fibre technology provides additional warmth in two ways.

Hollow-core fibres knitted into a three-dimensional structure trap insulating air. Ceramic pigments in the fibre absorb infrared radiation, then emit this back to the sleeper.

The fibre is blended into the **Reactor Lightweight** and **Midweight** liners.

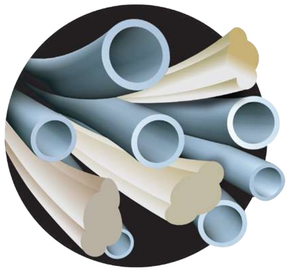
THERMOLITE® EcoMade

Thermolite EcoMade adds warmth while reducing waste

The hollow-core fibres provide a thermal boost by trapping air - just like virgin polyester fibres.

The difference is that they originate as plastic bottles which are cleaned, ground into flakes then extruded into yarns before being knitted into liner fabric.

The blend of THERMOLITE PRO and THERMOLITE EcoMade is bluesign APPROVED



THERMOLITE® EcoMade ALL SEASON TECHNOLOGY

Thermolite EcoMade All Season offers year-round comfort

THERMOLITE EcoMade ALL SEASON uses a blend of warmth-trapping hollow-core fibres and moisture-wicking channel fibres.

This RCS-certified recycled fabric helps regulate temperature across a range of warm and cool conditions.

It is blended into both the **Reactor Fleeceweight** and **Silk Blend** liners.

SEATOSUMMIT

THERMAL BOOST LINER
REACTOR LIGHTWEIGHT

Increase warmth with minimal additional weight.

Freedom to Move

Regardless of sleeping position or tossing and turning, the stretch knit construction and armholes provide complete freedom of movement, allowing unrestricted rest. It fits into any sleeping bag and snaps into Sea to Summit bags for easier entry and exit.

Boosts Sleep System Warmth

Using Far Infrared Technology (FIR) and hollow-core fibres, Thermolite Pro traps and reflects body heat, increasing warmth without adding significant weight and bulk. The Reactor Lightweight may add up to 4°C | 7°F when used as part of a sleep system.

Easy to Clean

Unlike sleeping bags, the Reactor Lightweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

Extends Sleeping Bag Lifespan

Frequent washing can reduce the performance of a sleeping bag. Using a Reactor Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

SKU	SIZE	MAX USER HEIGHT	WEIGHT	COLOUR

THERMAL BOOST LINER
REACTOR MIDWEIGHT

The go-to liner for every adventure.

Freedom to Move

Regardless of sleeping position or tossing and turning, the stretch knit construction and armholes provide complete freedom of movement, allowing unrestricted rest. It fits into any sleeping bag and snaps into Sea to Summit bags for easier entry and exit.

Boosts Sleep System Warmth

Using Far Infrared Technology (FIR) and hollow-core fibres, Thermolite Pro traps and reflects body heat, increasing warmth without adding significant weight and bulk. The Reactor Midweight may add up to 6°C | 11°F when used as part of a sleep system.

Easy to Clean

Unlike sleeping bags, the Reactor Midweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

Extends Sleeping Bag Lifespan

Frequent washing can reduce the performance of your sleeping bag. Using a Reactor Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

Boosts warmth for cold conditions.

Freedom to Move

Regardless of sleeping position or tossing and turning, the Thermolite Fleece fabric and armholes provide freedom of movement, allowing unrestricted rest. It fits into any sleeping bag and snaps into Sea to Summit bags for easier entry and exit.

Boosts Sleep System Warmth

The Reactor Fleeceweight utilises Thermolite hollow core fibres woven into a grid fleece to trap and reflect body heat, noticeably enhancing warmth in the sleep system with minimal added weight. The Reactor Fleeceweight may add up to 8°C | 14°F when used as part of a sleep system.

Extends Sleeping Bag Lifespan

Frequent washing can reduce the performance of a sleeping bag. Using a Reactor Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

Easy to Clean

Unlike sleeping bags, the Reactor Fleeceweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

THERMAL ADAPT LINERS

THERMAL ADAPT LINERS
FABRIC TECHNOLOGY

Reduced impact. Increased usability. Greater Comfort.

COOLMAX® EcoMade

Coolmax EcoMade wicks perspiration from your skin and spreads it over a broad area where it dissipates.

Coolmax EcoMade fibres are 100% recycled. Longitudinal channels in the fibre wick moisture effectively.

In a stretch-knit form, this is the perfect basis for a Thermal Adapt liner, which helps you regulate temperature in warm, humid conditions.

It is blended into the **Breeze** liners and sleep sheets.

Tencel™ Feels so right

Tencel Lyocell is a sustainable material that provides softness and wicking performance.

TENCEL fibres are derived from sustainably-sourced wood fibres and manufactured using environmentally-responsible processes.

They deliver temperature regulation, wicking performance and natural comfort.

The fibre is blended into the **Breeze** and **Comfort Blend** liners and sleep sheets.

HEIQ FRESH

Sea to Summit liners feature HeIQ Fresh Technology to keep the liner feeling fresher during longer trips.

HeiQ Fresh is made of amino sugars polymers, permanently bonded to the fibers of the fabric.

It absorbs the compounds in perspiration that can cause odour, then releases them when the liner is washed.

HeiQ is not a biocide; it is not an anti-microbial treatment. The amino sugars are bio-based.

SEATOSUMMIT

THERMAL ADAPT LINER
BREEZE LIGHTWEIGHT

Keep comfortable on warm nights.

All-Weather Comfort

Made from a breathable blend of Coolmax EcoMade and plush, biobased Tencel Lyocell fibres, the Breeze effectively wicks moisture to keep you dry and comfortable, even on warmer nights.

Easy to Clean

Unlike sleeping bags, the Breeze Lightweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

Versatile Freedom of Movement

The super-stretchy Coolmax/Tencel Lyocell blend Breeze Liner also features a drawcord footbox and armholes (mummy only) for added ventilation and greater freedom of movement, making it perfect for use outside of a sleeping bag.

Extends Sleeping Bag Lifespan

Frequent washing can reduce the performance of a sleeping bag. Using a Breeze Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

TENTS

WHAT'S NEW IN 2026

Liveability Evolved

Liveability means many things: more useable head-and-shoulder room, weather protection, taller tent doors or better ventilation. Liveability does not appear on a spec page - but it has a big impact on the experience a shelter provides. Sea to Summit tents have been designed since day one to evolve all aspects of what it means to be comfortable in the outdoors.

Increased Weather Protection

Always evolving; the Telos and Ikos tents have revised Apex vents that can now be fully closed. The vent flaps now utilise more effective rain gutters and water-resistant zippers. In the tarp realm, the Minimalist offers storm flaps that can seal off one end against the weather.

New Ultra-Sil LS Fabric

The new Ultra-Sil LS fabric absorbs less moisture, dries quicker and has a lower stretch making it easier to maintain a taut pitch.

RCS-recycled, bluesign APPROVED and non-PFAS, Ultra-Sil LS comprises of nylon with a grid of polyester yarns.

Ease of Use

Sea to Summit tents and shelters are engineered to be simple and easy to use. Hold-Fast clips are made of unbreakable aluminium and can be used one-handed or while wearing gloves. Guylines (tents and tarps) are secured with custom-toggles that are detachable for easy deployment and storage.

Little details that make a real difference when weather turns foul.

ULTRALIGHT

MINIMALIST TARP

All the versatility of a flat tarp with improved weather protection.

Versatile Protection

Twin storm flaps can be closed to block wind and rain or opened to increase shade coverage, providing flexibility in changing conditions.

Improved Weather Resistance

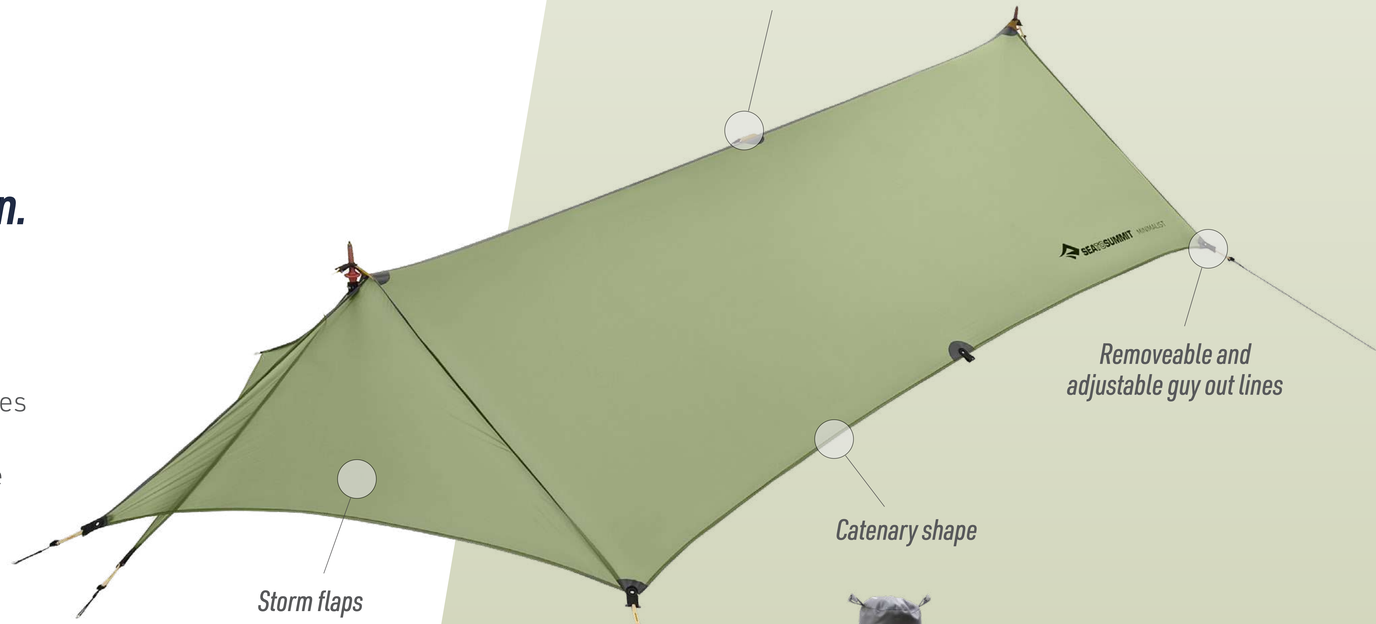
The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch. Its curved catenary shape also reduces edge flutter in high winds.

Quick Adjustability

Easily pitched with hiking poles, it includes line tensioners at the reinforced tie-out points for quick adjustments beneath the tarp. Guy lines are also removable for tangle-free storage.

Lower-Impact Materials

Crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.



Stuff sack doubles as a pole pocket

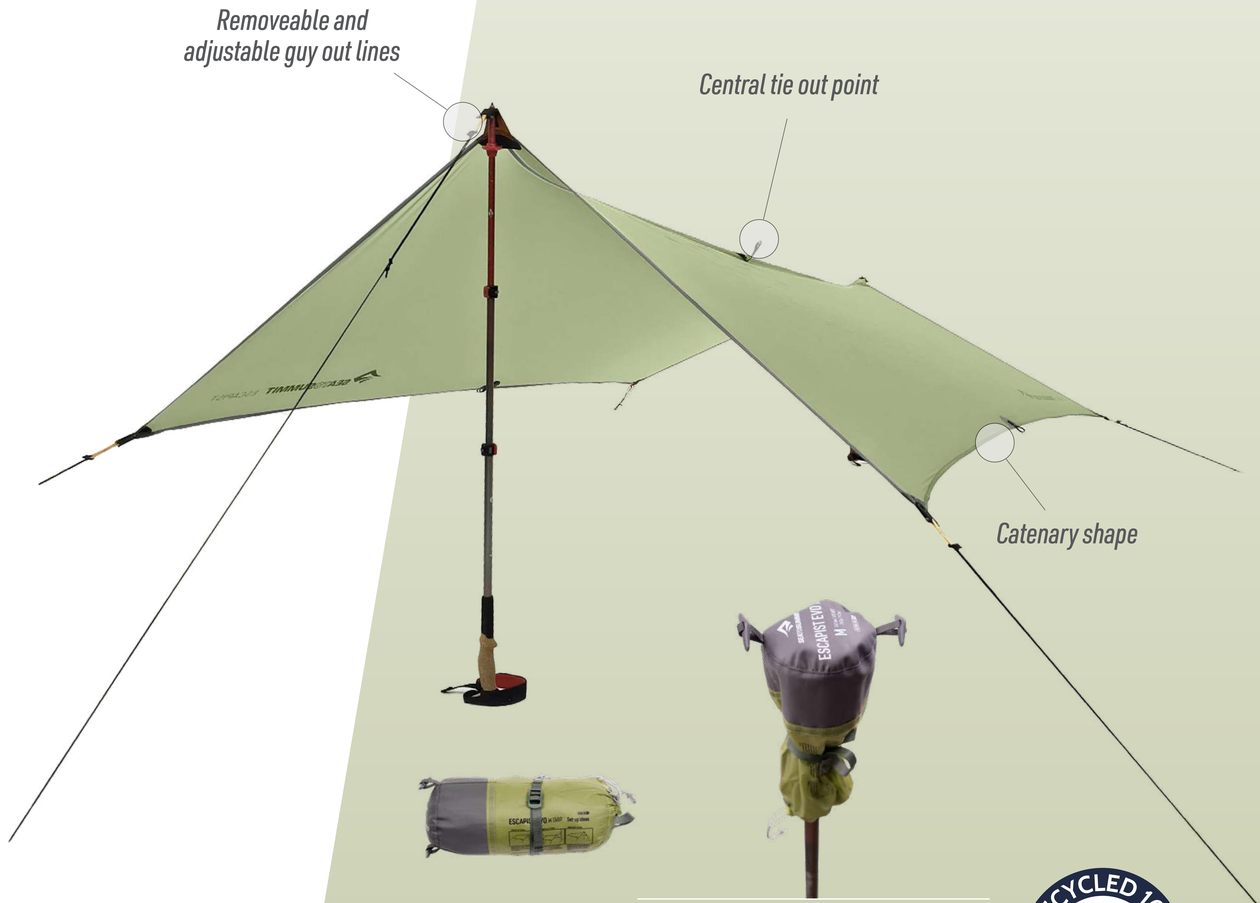
The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch. Its curved catenary shape also reduces edge flutter in high winds.

Quick Adjustability

Easily pitched with hiking poles, it includes line tensioners at the reinforced tie-out points for quick adjustments beneath the tarp. Guy lines are also removable for tangle-free storage.

Lower-Impact Materials

Crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.



Stuff sack doubles as a pole pocket

ULTRALIGHT
ESCAPIST MESH BUG SHELTER

Adds protection to ultralight tarps.

Insect Protection

Featuring high-visibility 15D No-See-Um polyester mesh and a zippered door, the ultralight Escapist Mesh Bug Shelter provides essential protection from insects, mosquitoes, spiders and ants for long-distance hikers.

Waterproof Floor for Dry Comfort

The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric forms a bathtub-shaped floor that wraps around the shelter sides. Seam-taped, waterproof, quick-drying and with minimal fabric stretch, it ensures reliable protection from the ground up.

Simple Setup Options

The simple no-pole design easily hangs under Escapist and Minimalist tarps, offering reliable protection in buggy or wet environments. Its versatile setup also allows it to be pitched on its own using trekking poles, guy lines, tent stakes, or trees.

Lower-Impact Materials

The waterproof tub floor is crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.

Easily connects underneath Escapist and Minimalist tarps

ULTRALIGHT COMFORT
TELOS EVO TR2 & TR3

Liveability evolved.

Most Liveable Lightweight Tent

Tension Ridge raises the tent's shape upwards for more usable head-and-shoulder space and creates truly higher doors for easier entry.

Adaptable to Changing Conditions

With multiple setup options, the tent can easily transform to provide shelter from the sun, wind, rain, bugs and cold, making it perfect for environments ranging from mountains to deserts and rainforests.

Upgraded Weather Resistance

Now featuring a waterproof zipper and air vent scoops that close and secure, the improved Apex vent provides significantly better ventilation and condensation management compared to other designs.

Improved Pitch

Supported by a DAC NFL poleset, the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch.

LIGHTWEIGHT
IKOS EVO TR2 & TR3

Rugged, lightweight and liveable.

Upgraded Weather Resistance

Now featuring a waterproof zipper and air vent scoops that close and secure, the improved Apex vent provides significantly better ventilation and condensation management compared to other designs.

Adaptable to Changing Conditions

With multiple setup options, the tent can easily transform to provide shelter from the sun, wind, rain, bugs and cold, making it perfect for environments ranging from mountain valleys to deserts and rainforests.

Liveability Evolved

Tension Ridge raises the tent's shape upwards for more usable head-and-shoulder space and creates truly higher doors for easier entry.

User-Friendly Design

Symmetrical architecture, Hold Fast 'C' clips, and colour-coded poles simplify setup and takedown. The included Gear Loft organises the interior, while the footprint (now also included) protects the floor and enables dry takedown and fly-only pitching.

Protect your tent floor from abrasion tears and dirt with our durable and lightweight footprints.

Comes with a lightweight storage pouch

Escapist
GROUND SHEET

Protect your shelter floor or sleeping mat from groundwater, thorns, mud, and dirt with this tough, lightweight and waterproof ground sheet.

FEATURES

- Sized to fit under both our Escapist Evo Tarp, Minimalist Tarp and Escapist Mesh Bug Shelter

Hangout Mode
POLESET

Activate Hangout Mode in your Telos tent with these custom DAC Featherlite NSL poles.

FEATURES

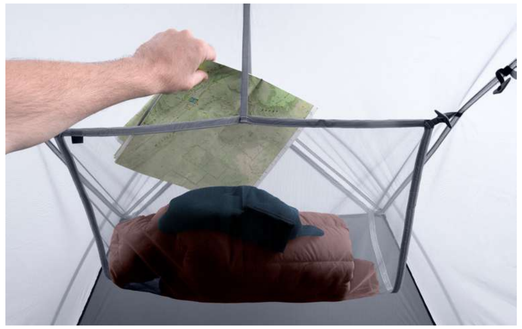
- Easy-to-use pole strap to keep thetwo-pole set bundled together
- Three-segment poles fold away to fit with the main tent pole set inside the Lightbar stuff sack

Telos
GEAR LOFT

Stash gear within easy reach and keep it off the tent floor.

FEATURES

- Perfect for clothes when delayering before bed
- Easily attach and detach with quick-connect V-Toggles



Ground Control
GUY CORDS

Make it easy to weather the storm with our quick-connect guy cords for tents and shelters.

FEATURES

- Quick-connect, knot-free V-Toggle attachment for ease of use
- Integrated cord length adjuster—multiple guy cords can also join together for extra length
- Tightly woven, reflective cord resists tangling

Ground Control
LIGHT PEGS

Strong and ultralight premium 7 series aircraft alloy (7075-T6) tent pegs with a unique TriPoint shape.

FEATURES

- Rigid TriPoint design maximises grip in varied ground conditions
- Multiple notches keep guy cord low and secure in hard ground
- Reflective pull-cords for easy removal and improved visibility at night

Ground Control
TENT PEGS

Light and strong three-sided replacement pegs for your tent, tarp or shelter.

FEATURES

- Reflective cord and luminescent pull loop for peg extraction
- Multi-height guy points to reduce leverage on the peg
- Available as a pack of 8 pegs including Ultra-Sil stuff sack, or a bulk refill pack for individual sale

CAMP KITCHEN
WHAT'S NEW IN 2026

Engineered for How You Eat Outdoors

It's not often that your backcountry campsite has a table to sit at. With that in mind, we have designed the new Horizon range with multiple smart features so that it can be comfortably and securely held in your hands instead of simply placed on a table.

Ergonomics

An ambidextrous thumb loop on plates and bowls allows you to hold the dinnerware firmly in your hands and serves as a holder for cutlery - keeping them out of the dirt.

Cutlery can be reversed and clipped together to create a long spoon or spork for tall pots or meal pouches.

Designed to Work Better

Cool Grip fins minimise contact area, allowing you to hold a bowl or plate comfortably with hot contents. The Cool Grip pattern extends from the sidewalls to the base, and has been designed to drain better and not retain water in the fins after washing. The insulated Mug is a double-walled design which maintains the temperature of your beverage without bulky external insulation or hard to pack handles.

Innovation Born from Experience

Sea to Summit pioneered collapsibility in functional camping dinnerware and cookware - saving significant space in a pack, framebag or the back of your vehicle.

For 2026, we have engineered a range of dinnerware specifically designed to make eating in the backcountry simpler and easier.

POTS & PAN

Designed to add functional performance to your camp kitchen, our Frontier Pots and Pan use a hard-anodised alloy to offer durability and versatility for lightweight adventures.

Our durable ceramic coating provides a non-stick surface for seamless mealtimes. The removable handle locks securely into place during use and can be flipped and locked over the lid for compact packing and easy transportation. Available in multiple sizes for solo to group use.

FEATURES

- Lightweight, reliable and easy to use hard-anodised alloy is strong and durable
- Click-Safe removable handle stows for transport and locks securely into place for use
- Durable ceramic non-stick coating
- Easy-flow strainer lid for efficient draining
- Integrated patent-pending LID KEEP rests lid on side of pot
- Graded scale on the internal pot wall allows accurate volume measurements

Frontier Ultralight
CUTLERY & UTENSILS

Frontier Cutlery uses durable hard-anodised aircraft grade aluminium combined with a sleek-yet-strong shape to create an extremely lightweight utensil.

The enhanced shape adds strength, and allows the utensils to 'stack' on top of one another. The bowls of the Spoon and Spork are polished to create a smooth, comfortable feel.

All Frontier cutlery sets come with a carabiner that attaches the utensils for clean, efficient storage.

FEATURES

- Ultralight and super-strong aircraft aluminium alloy utensil
- Smooth, matte finish for comfortable mouth feel
- Tough and lightweight for lifelong use
- Comes with a mini carabiner to keep cutlery together
- Stacks efficiently with other Frontier cutlery pieces

Frontier Ultralight
CUTLERY SET (3PC)

An ultra lightweight and durable aluminium cutlery set featuring a fork, spoon and knife. The Frontier 3 Piece Set is ideal for lightweight backpackers to vehicle-based campers who prefer a fork and spoon over a spork.

INCLUDES

- Fork, Spoon and Knife

Frontier Ultralight
CUTLERY SET (2PC) SPORK + KNIFE

An ultra lightweight and durable aluminium cutlery set featuring a spork and knife. The Frontier 2 Piece Set is ideal for all weight-conscious backpackers and travellers.

INCLUDES

- Spork and Knife

Frontier Ultralight
CUTLERY SET (2PC) LONG HANDLED SPOON + SPORK

An ultra lightweight and durable aluminium cutlery set featuring a long handled spoon and spork. The adaptor turns the set into tongs. The Frontier 2 Piece Long handle Set transitions seamlessly from minimalist freeze-dried-food-pouch utensil to gourmet salad or pasta serving tongs.

INCLUDES

- Long Handled Spoon, Long Handled Spork and Adaptor attachment

COLLAPSIBLE POT 1L

The Frontier Collapsible Solo Pot forms the basis for the perfect, packable ultralight cook-and-eat system. The pot is perfectly shaped and dimensioned to work as a bowl – it collapses to a fraction of its in-use height for compact packing.

FEATURES

- Collapsible design for compact packing
- New, shorter, Click Safe handle for a firm grip
- Hard-anodised aluminum base for efficient heat transfer (important for fuel-conscious minimalist hikers)
- Food grade silicone sidewalls
- Shaped perfectly for use as a bowl

Frontier Ultralight
COLLAPSIBLE POURING POT 2.2L

The functional and space-saving Frontier Collapsible Pot features a built in spout. Along with the Click-Safe handle this allows safe, secure pouring and straining. The full-function pot collapses to a fraction of its in-use height thanks to the silicone rubber sidewalls.

FEATURES

- Space saving collapsible pot for lightweight adventures
- Lightweight, reliable and easy to use hard-anodised alloy is strong and durable
- Click-Safe removable handle stows for transport and locks securely into place for use
- Collaspible Frontier Pots are compatible with Frontier Collapsible dinnerware and Frontier Pans
- Integrated patent-pending LID KEEP rests lid on side of pot
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile

Frontier Ultralight
COLLAPSIBLE POUR OVER

The functional and space-saving Frontier Collapsible Pour Over Filter makes the perfect coffee. The Collapsible Pour Over can hold a single serve of coffee and features a stainless steel mesh filter that can be easily washed, even in a dishwasher. The mount base fits the majority of mug and mouth bottle rims for convenience and versatility.

FEATURES

- Low -profile for compact packing
- Super fine stainless steel mesh keeps grinds and lets through the good oils for the perfect pour over brew
- Basket holds single serve of around 30 grams of coffee grinds
- Mount base fits most mug and wide mouth bottle rims

Frontier Ultralight
COLLAPSIBLE KETTLE 1.1L

A space-saving and collapsible 1.1L kettle. The perfect solution for fast and light adventures, the new Frontier Ultralight Collapsible Kettle puts storage, efficiency and space-saving at the forefront.

FEATURES

- Collapsible design for compact packing
- The wide rim allows kettle to be used as a cooking pot
- Hard anodised safety lid with silicone lid grip
- Two glass-reinforced nylon 66 handles support the upper rim and improve control when pouring
- Food grade silicone & aluminium construction BPA free, non-PFAS
- Hard anodised aluminium base conducts heat really well for outdoor cooking
- Nests with other Frontier products

BOWL & PLATE

No Table? No Problem. Dinnerware built for the outdoors.

Designed to be Held

The moulded thumb grip ensures a comfortable and secure, ambidextrous hold, even with gloves on. Deep, vertical sidewalls keep the contents inside to minimise spills, while the thumb grip also doubles as a utensil holder for easier carrying and passing of food.

Protects Hands from Heat

The Cool Grip fins reduce surface heat for more comfortable handling.

Lightweight and Durable

Crafted from food-grade, glass-reinforced polypropylene, this dinnerware is lightweight, rugged, and easy to clean. Plus, it's microwave and dishwasher safe for added convenience.

Space Saving

The stackable design allows multiple bowls or plates to nest compactly, saving valuable space.

Thumb loop doubles as cutlery holder

Steep sidewalls avoid spills

Cool Grip fins reduce surface heat for comfortable handling

Microwave and dishwasher safe

Camp Kitchen
FOLDING SPATULA

Backcountry gourmets rejoice: at last there is a spatula that packs down small enough to fit in a solo cookpot, yet deploys to become a full-value utensil for everything from sauteing to flipping pancakes for a larger group.

FEATURES:

- Glass-reinforced nylon for flex and strength
- Blade measures 7.5 x 10cm / 2.75" x 4"
- Stable handle locking mechanism
- Easy to clean
- Spatula corner shaped to match Sea to Summit cookware

Camp Kitchen
SERVING SPOON

The perfect addition to your camp kitchen. Made of rugged glass-reinforced nylon and food-grade silicone rubber, the Folding Spoon packs down small enough to fit into small pots, yet pops out to form a full-value measuring and serving spoon.

FEATURES:

- Glass-reinforced nylon and food-grade silicone for flex and strength
- Spoon bowl shaped to match Sea to Summit cookware
- Easy to clean
- Stable handle locking mechanism

COLLAPSIBLE KETTLE 1.6L

A durable, collapsible stainless steel and silicone kettle that works on gas, electric and most induction stoves for a coffee or tea break like home, even when you're off the beaten track. The double glass-reinforced nylon handles allow for stable, safe pouring, and the rim is wide enough to allow the kettle to be used as a pot. A LID KEEP handle adds extra convenience while cooking.

FEATURES

- BPA free, food grade, heat resistant silicone
- Innovative collapsible design
- Stainless steel base conducts heat well for quick boiling
- Two glass-reinforced nylon 66 handles support the upper rim and improve control when pouring
- Larger 1.6L family capacity

Detour Stainless Steel
COLLAPSIBLE POURING POT 1.8L

The Detour 1.8 Litre Stainless Steel Collapsible Pouring Pot has a stainless steel upper rim with a built in spout. Along with the Click Safe handle this allows safe, secure pouring and straining.

The pot can be used on gas, electric and most induction stoves, and includes features such as the LID KEEP which allows the lid to be clipped to the side of the pot while cooking.

This durable, full-function pot collapses to a fraction of its in-use height thanks to the silicone rubber sidewalls.

FEATURES

- Induction and gas cooktop compatible
- Innovative collapsible design
- Click-Safe removable handle stows for transport and locks securely into place for use
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile
- Integrated patent-pending LID KEEP rests lid on side of pot

Detour Stainless Steel
PAN 10in

The Detour Stainless 10 inch Pan is a durable and efficient addition to any camp kitchen. With a three-ply base for even heat distribution and compatibility on gas as well as induction cooktops, the Detour Pan allows precise heat control when frying or sautéing.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers. The base is formed with a highly conductive aluminium core layered between two durable stainless steel surfaces.
- Induction and gas cooktop compatible
- Click-Safe removable handle stows for transport and locks securely into place for use
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile

COLLAPSIBLE POT 3L

The Detour Stainless Collapsible 3L Pot offers the quality of premium domestic cookware combined with induction-stove compatibility, dual-handle safety plus road-ready collapsibility and rattle-free storage capability. Its multi-ply base provides durability and optimum heat distribution for perfect gourmet meals.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers. The base is formed with a highly conductive aluminium core layered between two durable stainless steel surfaces.
- Induction and gas cooktop compatible
- Innovative collapsible design
- Click-Safe handles stow for transport (securing the lid and keeping nesting products inside)and lock securely
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile

Detour Stainless Steel
COLLAPSIBLE POT 5L

The Detour Stainless Collapsible 5L Pot is a durable and efficient addition to any camp kitchen. With a three-ply base for even heat distribution and compatibility on gas as well as induction cooktops, this pot makes mealtimes simple and seamless.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers. The base is formed with a highly conductive aluminium core layered between two durable stainless steel surfaces.
- Induction and gas cooktop compatible
- Innovative collapsible design
- Click-Safe removable handle stows for transport and locks securely into place for use
- Compatible with Sea to Summit Detour Silicone colander
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile.

KETTLE COOK SET (2P) (3 PIECE) 1.6L KETTLE + 2x MUG

Perfect for civilised hot drink breaks when you're on the road, the 1.6L Kettle also works as a cookpot for more expansive camp meals. Two collapsible stainless steel mugs round off the set – all items collapse down for compact storage.

FEATURES

- Innovative collapsible design for compact packing
- Kettle with stainless steel base works with both gas and most induction camp stoves and cookers
- Food grade silicone and long lasting stainless steel construction
- Wide rim allows kettle to be used as a cooking pot
- Durable stainless steel safety lid with silicone lid grip
- Dual handles for stable pouring
- Compact nesting design
- BPA free

ULTRA-SIL
KITCHEN SINK

The ultimate kitchen sink for ultralight adventures.

Backcountry Dish Duty Made Easy

With its broad base and stiffened rim ensuring it won't collapse when full, washing dishes while camping has never been simpler.

Ultralight and Super Compact

Weighing just over 50g and packing down into a compact micro stuff sack, the Ultra-Sil Kitchen Sink won't slow down fast and light adventures.

Leave No Trace Convenience

Promoting Leave No Trace principles, its seam-sealed, watertight design is perfect for collecting and carrying water for washing dishes or personal bathing—keeping these activities away from sensitive water sources.

Lower-Impact Materials

Made from bluesign APPROVED Ultra-Sil 30D siliconised CORDURA® nylon using non-PFAS chemistry, this fabric minimises weight and delivers exceptional strength.

Stainless Steel stiffened rim

Stands by itself when full of water

Fully seam sealed and leakproof

Durable hypalon carry handles

CAMP UTILITY
TRASH DRY BAG

Pack it in, pack it out–mess-free!

Hygienic and Secure

Featuring a unique roll-top closure and garbage bag keeper, the Trash Dry Bag keeps odours and liquids safely contained.

Reliable Double-Layer Design

Made with waterproof 70D nylon and fully taped seams, the outer dry bag is double-stitched for added durability. It's compatible with any disposable garbage bag (suggested size: medium 27L | 7 gallons), which fits perfectly as an inner liner.

Easy to Hang and Transport

Twin lash rails on the sides provide secure storage, allowing it to be strapped to the outside of packs or kayaks. Dual clip-in loops at the top keep the bag open for easy-access while it's hanging.

Lower-Impact Materials

Now made from RCS-certified recycled and bluesign APPROVED nylon, using non-PFAS chemistry.

Prevents spills during transport

Unique roll top closure secures disposable liner inside

Daisy chain webbing for attaching to packs, kayaks, etc

70D WATERPROOF FABRIC

WATER TRANSPORT
WATERCELL X

Adventure-ready, all-in-one versatile water storage solution.

User-Friendly Simplicity

The leak-free, wide-mouth design makes filling, draining, and drying simple and easy. The low-profile 63mm multifunction cap offers variable flow rates, easily controlled with one hand.

Durable and Compact

Made from 400D RCS-certified recycled and bluesign APPROVED nylon for flexibility, durability and abrasion resistance. Its sturdy 3D-baffled, RF-welded TPU construction is stackable, BPA and PVC-free, and built to last using non-PFAS chemistry.

Easy to Carry and Hang

The adjustable TPU strap system makes carrying and hanging easy, while welded lash points offer versatile attachment options when on the move.

Shower Anywhere

Converts seamlessly to a backcountry shower with an included fitting that attaches securely to the carry strap when not in use.

WATER TRANSPORT
PACK TAP

Fresh water on tap. No taste.

Taste-Free Hydration

The internal mylar bladder ensures water stays taste-free, while the leak-proof, compact spigot is easy to operate with one hand and stays clean under a protective cap when not in use.

Accessible Water, Always

Whether hung from a tree or secured at camp, the Pack Tap provides easy access to bulk water. Multiple durable lash points allow it to be hung, laid flat or attached almost anywhere.

Light and Flexible

Lightweight, flexible and compact when rolled up empty, the Pack Tap's tough outer fabric is now made from RCS-certified recycled and bluesign APPROVED 300D polyester using non-PFAS chemistry.

Replaceable Bladder

Two sizes of replacement bladder are available which cover all three sizes of the Pack Tap. Removing an existing bladder and installing the new one can be done quickly and simply, extending the life of the product.

2026

Options for Any Adventure

From high performance ultralight, to versatile lightweight and on to heavy duty bags built to meet the most demanding condtions head on.

Sea to Summit is the storage market leader, the proven choice of thru-hikers, packrafters and bikepackers - or just families heading for a day at the beach.

Trusted Reliability

Top-quality components include seal strips made of non-wicking hypalon and patented Field Repair Buckles that can be replaced with a screwdriver.

High tech fabrics are seam sealed and laminated or coated to be reliably waterproof. Construction details such as double-sewn seams result in dry storage products that deliver solid performance, year after year.

Details Make the Difference

Small details make our storage bags easy to use: the white interior of Lightweight and Big River Dry Bags makes it easy to find gear in poor light.

A Dry Bag Sling turns many of our dry bags into single-strap daypacks.

Lash-point rails and double 'D' Rings on Big Rvier Dry Bags make securing them simple, and the ability to squeeze air out of an Evac Dry Bag or Compression Dry Bag is just genius.

The Compressibility Gold Standard

Our new Evac laminate increases air-permeability and hydrostatic head. It is, of course, non-PFAS.

SEATOSUMMIT

EVAC BIKEPACK
DRY BAG SET

Reliably waterproof and securely attaches to bicycles.

Trusted Waterproof Performance

Featuring a roll-top Hypalon closure and durable 420D HD fabric with 10,000mm+ waterproof rating, all backed by Sea to Summit's legendary reliability.

Compact Storage

The waterproof 500D Evac CORDURA base lets you expel air while keeping water out, ensuring a more secure attachment and a smaller, more compact bag.

Simple and Secure Bicycle Attachment

The included Stretch-Loc Straps and triple lash rails on the dry bag ensure a secure fit to any cargo cage.

Rugged and Abrasion-Resistant

Crafted from tough 420D HD ripstop nylon and a grippy hypalon back panel, offering excellent slip resistance and tear protection, makes it perfect for high-wear areas like fork legs and downtube attachment.

FIELD REPAIR BUCKLE

Heavy Duty
BIG RIVER DRY BACKPACK

Big River Dry Backpacks are reliable, abrasion resistant, and waterproof. From the white water to alpine motor bike trails, this backpack keeps everything dry, together, and safe. A white interior laminate makes it simple to find your gear, while the oval shape and lash loops allow secure stacking or attachment to equipment. The hypalon non-wicking roll-top closure keeps water out, and the Field Repair Buckles can be replaced in seconds with just a Phillips screwdriver. So gear up, roll down and get after it.

FEATURES

- Low profile grab handles—easy to grab and carry
- Triple-coated oval base for increased water shedding and durability
- Hypalon non-wicking roll-top closure
- Adjustable sternum strap
- 420D ripstop nylon shrugs off water and abrasion

SIZES

30L | 50L | 75L

COLOURS

420D WATERPROOF FABRIC

RELIABLY DRY

Waterproof, roll-top hypalon closure secured with our patented Field Repair Buckle for a reliable seal and double-stitched, fully-taped waterproof seams.

MINIMALIST CARRY

Streamlined and adjustable EVA foam pack harness with supportive sternum strap and removable 38mm webbing hipbelt holds pack firmly in place.

BUILT TOUGH

Heavy-duty 420D nylon fabric is super-strong, abrasion and puncture resistant with a triple-coated oval base for increased water shedding and durability.

UPDATED 2026

POCKET TROWEL

Minimise your backcountry impact with this compact and lightweight camping trowel.

FEATURES

- Storage space in handle for lighter or toilet paper
- Withstands extremely cold temperatures

THE CLOTHESLINE

Quick and easy to set-up no stretch, no peg, adjustable length clothesline.

FEATURES

- Clothesline measures 3.5 metres
- Dual cord with beads holds garments in place, even in the wind

POCKET SHOWER

Enjoy a well-earned eight minute shower at the end of a long sweaty day in the outdoors.

FEATURES

- Contoured shower head provides generous and even spray dispersion
- Simple and easy-to-use twist mechanism for turning on/off and for flow adjustment

Ultra-Sil OUTHOUSE

There's nothing more useless than wet toilet paper—keep yours dry and accessible.

FEATURES

- Toilet paper is suspended inside by a stiffening rod that allows the paper to dispense smoothly
- Accommodates full size toilet roll

SHELTERS

NANO MOSQUITO PYRAMID NET

MOSQUITO PYRAMID NET

HEAD NET FEATURES:

MAXIMUM VISIBILITY

Black mesh offers better visibility than white mesh.

COMFORTABLE

Made with soft fibres.

EASY TO USE

Elasticised neck drawcord closure.

HANDY STORAGE

Packaged in a handy stuff sack or pouch.

HEAD NET

When the bugs are thick, wearing a head net is the answer.

FEATURES

- Fine woven 80 hole/cm² hexagonal mesh
- Wide enough to wear with a hat or without

Ultra-Mesh HEAD NET

Keep even the smallest insects at bay—including no-see-ums, sand-flies and midges.

FEATURES

- Ultra-fine 310 hole/cm² (2000 holes/in²) hexagonal mesh

Nano HEAD NET

No one wants bugs on their face –this tiny head net is the answer.

FEATURES

- 15D Ultra-Vis 80 hole/cm² hexagonal mesh
- Lightest and smallest insect head net available

TRANSPORT ACCESSORIES
STRETCH-LOC STRAP

Stretchy. Secure. Versatile.

Easy to Secure

Simple to fasten, tighten, and secure just about anything with ease. The grippy, stretchy TPU material prevents secured items from slipping.

Stays Put

The integrated keeper strap holds excess strap, provides extra grip and ensures the strap stays in place after the secured item is removed – no more re-threading with every attachment.

Highly Versatile

Use as a compression strap or combine multiple straps for added length, making it perfect for a variety of packing and securing needs.

STRETCH-LOC MINI STRAP

Stretchy. Secure. Versatile.

Easy to Secure

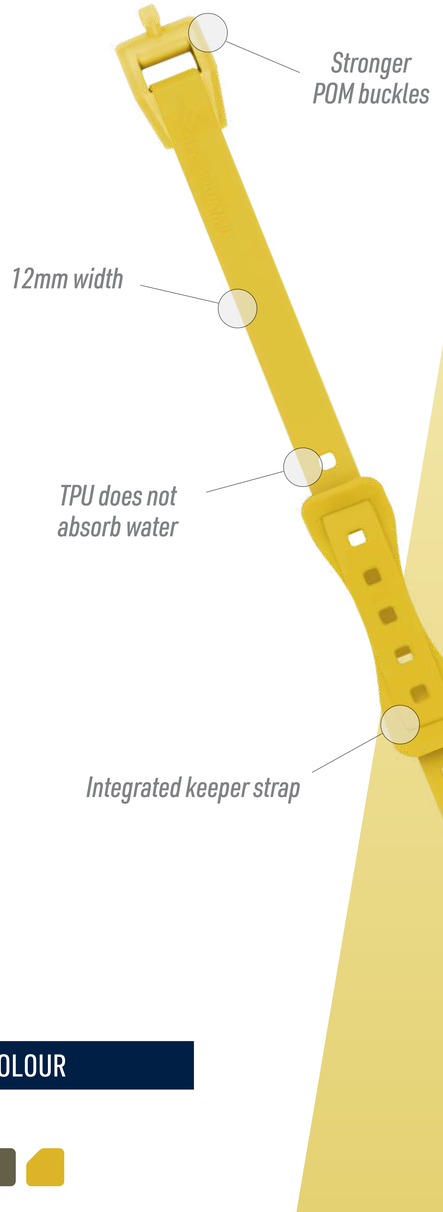
Simple to fasten, tighten, and secure just about anything with ease. The grippy, stretchy TPU material prevents secured items from slipping.

Stays Put

The integrated keeper strap holds excess strap, provides extra grip and ensures the strap stays in place after the secured item is removed – no more re-threading with every attachment.

Highly Versatile

Use as a compression strap or combine multiple straps for added length, making it perfect for a variety of packing and securing needs.



Easy to fasten, tighten and secure

Grippy and stretchy TPU Strap prevents secured items from slipping

Two or more straps can be joined to increase length

Thermoplastic Polyurethane tpü UV Stabilised • Flexible • Freeze Proof

SKU	LENGTH	WEIGHT	COLOUR
