

CYCLING SPRING SUMMER 2026

SILVINI®

TECHNICAL
SPORTSWEAR

We design and manufacture professional cycling and ski apparel for maximum performance and comfort. We focus on various styles of cycling, from road & gravel to MTB & enduro and offer wide selection for skiers: cross-country, ski touring, outdoor and lifestyle.

We put great emphasis on technology.
We believe in research and development
of materials and innovations that enable
cyclists and skiers to rise to the top.
We make all our clothing from carefully
selected materials, taking into account
the specific form of both sports.

A stylized, handwritten signature in white ink, likely belonging to Dušan Neuwirth.

Dušan Neuwirth
Owner and founder

The birth of SILVINI was led by Jessie and
Dušan, who invited their friends Jan and
Claudio to join them. Although we come
from different parts of the world, we
are united by our passion for sport and
our desire to produce sportswear that
combines perfect functionality, original
design and uncompromising comfort.
And so, in 2009, SILVINI was born, a Czech
brand based in the heart of Europe with
an international reach.

Modern pentathlon

An aerial photograph of a rugged coastline. On the left, a steep, rocky cliff face is covered with patches of green shrubs and dry, tangled branches. The cliff meets a deep blue sea. White foam from breaking waves is visible where the water hits the rocks and the base of the cliff. The right side of the image shows the open sea with a textured surface of small waves and whitecaps.

MAXIMUM PERFORMANCE AND COMFORT FOR DEMANDING CYCLISTS

The ROAD PRO collection was created in collaboration with elite cyclists from the Roman Kreuziger Cycling Academy and is inspired by the iconic climbs of the Passo di Gavia area. The clothing is designed for maximum performance – the anatomical cut and ultra-light, breathable materials ensure comfort even in extreme summer conditions. A key feature is the highly comfortable cycling pad, which provides support even on long rides. ROAD PRO is the ideal choice for those who demand top-quality performance without compromise.

A lightweight and breathable road cycling jersey with a slim fit, designed for demanding cyclists, made from Light MESH and Ultra Light MESH materials. The jersey features an anatomical 3D cut, providing optimal comfort during rides. It is equipped with a full-length YKK VISLON® zipper, an extended back panel, and three rear pockets. Laser-cut sleeves help minimize air resistance and maximize comfort. Silicone grippers on the bottom hem keep the jersey in place. Developed in collaboration with the Roman Kreuziger Cycling Academy, this jersey is ideal for cyclists seeking quality and performance.

Stelvia is a women's slim-fit road cycling jersey for demanding cyclists, made from lightweight Light MESH and Ultra Light MESH materials. The jersey features a 3D cut with a shorter front and longer back, along with a full-length zipper. Thanks to the silicone elements the back panel stays in place, the sleeves are laser-cut. The jersey includes reflective elements and a double pocket.

AURONZO MD2624

Jersey S-4XL

TOP PRODUCT

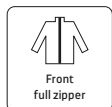

A very lightweight, anatomical cut jersey designed for demanding cyclists, created for maximum comfort in hot weather. Large mesh panels ensure excellent moisture wicking and ventilation. The 3D cut with an extended back panel is perfectly adapted to the riding position. The jersey features a full-length YKK Vislon zipper, a low-profile collar, three rear zippered pockets, taped seams, silicone grippers to prevent the jersey from riding up, and reflective details for better visibility.

A photograph of a rustic stone building with a wooden door and a large green vine growing over it. The stone is light brown and textured. The door is dark wood with a small window and a metal knocker. A large green vine with many leaves is growing over the door and the wall. A small black lantern is mounted on the wall to the left of the door. The background is a solid yellow color.

A COLLECTION FOR CYCLISTS ACROSS GENERATIONS

The ESSENTIAL collection combines lightweight materials, a simple design, color-matched reflective details, and a focus on precision craftsmanship. Everything is designed with maximum emphasis on functionality and comfort.

The apparel is made of light and breathable fabrics, ideal for everyday rides. The jackets can be easily folded into their inner pocket within seconds, and the hoods are usefully hidden in the collar. Modern, neutral color tones make this collection a perfect choice for cyclists of all ages.

THE PERFECT BLEND OF STYLE AND FUNCTIONALITY

The ENDURO collection brings comfort and style to every ride. With a refined design, anatomical cuts, and a strong focus on functionality, each piece is crafted to elevate your cycling experience to a new level. A sleek look combined with practical details ensures comfort even during the most demanding rides. ENDURO is the choice for those who ride with confidence, performance, and refined style. The collection was developed in collaboration with leading Czech rider Michal Prokop, a three-time world champion and winner of prestigious global races in BMX and enduro disciplines.

A person is riding a mountain bike on a rocky trail. The trail is covered with small, light-colored stones and is surrounded by dense green bushes and trees. The sky is overcast and grey. The word "ENDURO" is written in large, white, bold, sans-serif capital letters across the top of the image. Below it, the number "34-43" is written in a smaller, white, sans-serif font.

MELETI M1918

Jacket S-3XL

This men's jacket is perfect for off-road cycling. It combines the Quatroflex Power membrane which features waterproofing up to 10,000 mm and breathability of 10,000 g/m²/24hrs on the back, sleeves and hood with the windproof Windbreaker material on the front part. For optimal ventilation, the jacket is equipped with Light Mesh panels in the armpits. The jacket has a full-length zipper, two side zippered pockets, and an adjustable hood, which can be worn over a helmet. The sleeves are completed with elastic cuffs for enhanced protection against the cold. A longer back panel and an adjustable hem are also featured as standard, along with reflective prints for better visibility.

MATERIALS

The high-compression fabric perfectly adapts to the body and supports healthy blood circulation. Targeted compression promotes faster muscle recovery, improves oxygen delivery throughout the body, and effectively reduces muscle fatigue during prolonged physical activity. Ideal for cycling, running, and other endurance sports.

The high-compression material perfectly adapts to the body and supports healthy blood circulation. Targeted compression helps speed up muscle recovery, improves oxygenation, and effectively reduces muscle fatigue even during prolonged physical activity. Ideal for cycling, running, and other endurance sports.

The Cool-Tech cycling pad is anatomically shaped and designed for recreational cyclists who enjoy their rides and occasionally spend extended time in the saddle. It is made from lightweight, breathable material, and thanks to seamless technology and high elasticity, it provides maximum comfort during the ride. The pad's perforation further enhances moisture wicking, ensuring a pleasant feel even under increased physical effort.

With the Top series cycling pad, a full-day ride will be no problem. The Elastic Interface® pad is designed for maximum performance and comfort, even on longer rides. Its lightweight construction, high breathability, and effective moisture-wicking properties ensure comfort during intense cycling. Ideal for road and gravel cycling.

Flannel – a brushed fabric with excellent thermal insulation. This woven material offers outstanding breathability and feels soft, warm, and exceptionally comfortable against the skin.

An ultra-light, quick-drying material with a porous texture that ensures excellent moisture wicking. The mesh fabric is soft to the touch, highly breathable, and does not absorb water, providing maximum comfort even during intense activity.

Elastic three-layer fabric with a membrane offering a water column of 10,000 mm and breathability of 10,000 g/m²/24 h. Ideal for rainy conditions, it reliably protects against water and wind penetration, helping to retain body heat and ensuring thermal comfort even in demanding weather.

Four-way stretch fabric that adapts perfectly to the body and allows full freedom of movement in all directions. It offers excellent breathability and maintains its shape even during intense use.

A highly durable material with excellent abrasion resistance. This two-layer synthetic material effectively replaces real leather. It is water-resistant, smooth, and has an elegant glossy appearance.

The Veon Comfort cycling pad is designed for longer recreational rides and regular use. It is ergonomically shaped to ensure comfortable seating even during several hours in the saddle. Thanks to its elastic material and seamless technology, it provides high comfort during rides of up to 4 hours.

A woven fabric with wind protection that keeps the body warm even in deteriorating weather conditions. The material prevents wind from penetrating into the lower layers of clothing, effectively blocking heat loss and ensuring comfort in cold weather.

A lightweight, quick-drying woven fabric with excellent breathability that conforms to the body. The material is strong, thin, and highly durable with a long lifespan.

A woven quick-drying fabric with excellent breathability that allows freedom of movement. It is strong yet flexible, ensuring high durability and a long lifespan.

A renowned Japanese brand known for producing zippers of the highest quality. The zippers are characterized by precise craftsmanship, reliability, and long lifespan. Thanks to their quality design, they do not get stuck and ensure smooth operation even with frequent use.
