

SEATOSUMMIT

WORKBOOK 2027

TESTED BY AUSTRALIA

Out here, gear either works or it doesn't. It's a pretty simple equation, and one that's helped shape every piece of gear that leaves our workshop.

The unrelenting heat. An unexpected storm wind. And distance that makes the horizon seem endless. Every season and every element help us fine tune the balance that others struggle to find:

Lighter, yet stronger.

Simpler, yet more capable.

By sweating the small stuff, we catch the details that are only noticed when they're missing. And you're miles from anywhere.

We do all this so you don't need to think twice about the gear you've packed.

In fact, when you're out on a trail, at camp or in transit, we hope you don't think about it at all.

SEATOSUMMIT

THE BEST GEAR IS THE KIND YOU DON'T THINK ABOUT

A VERY HUMAN APPROACH

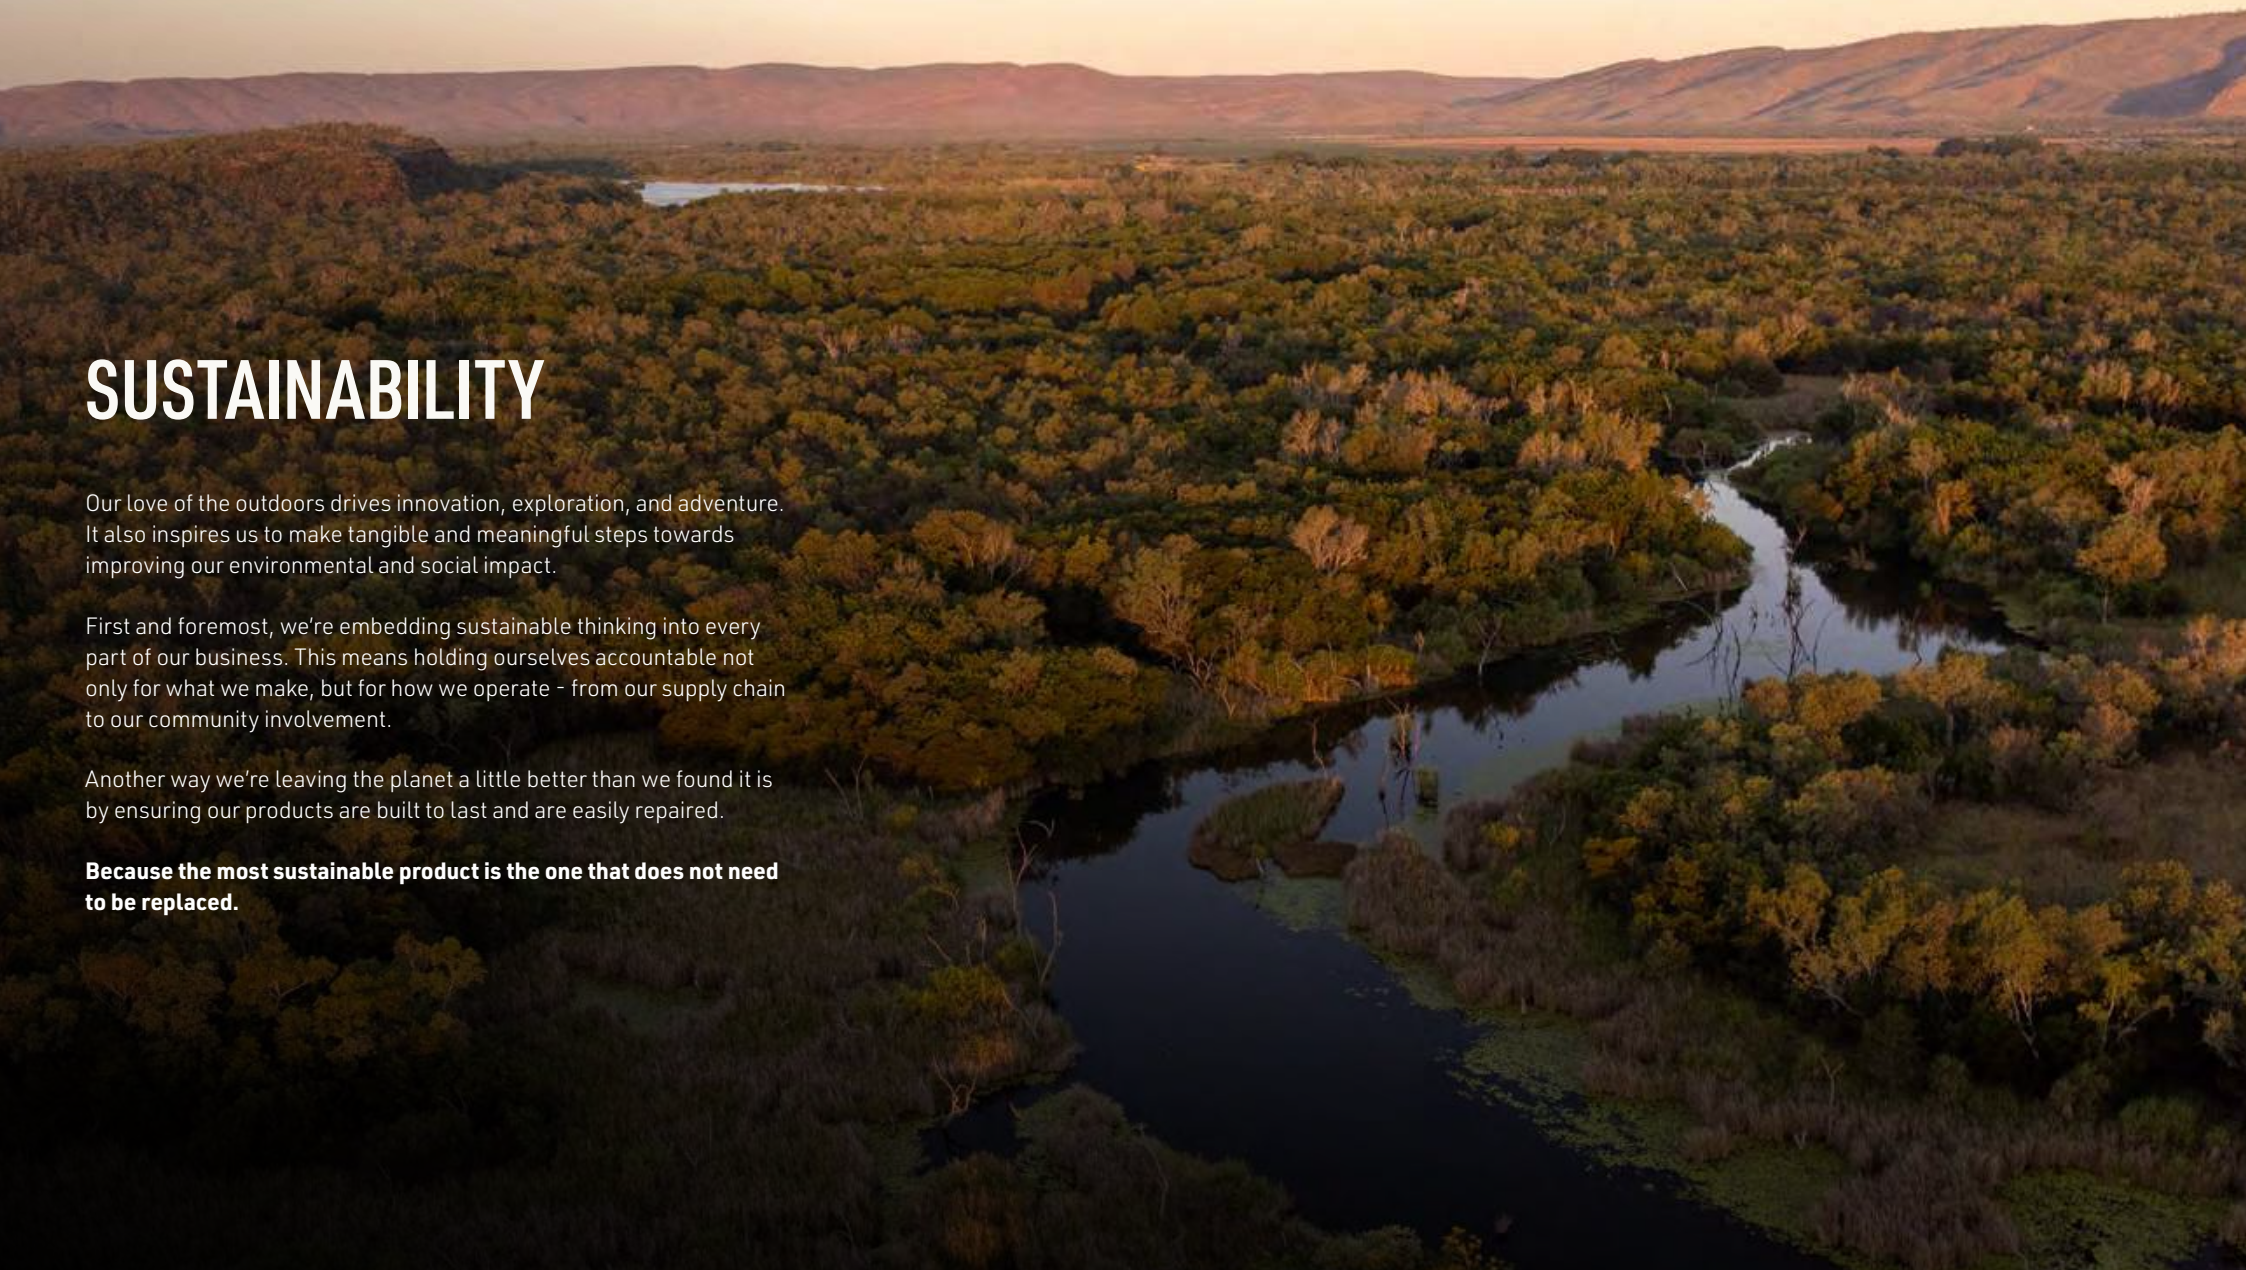

You can't design gear you haven't used. Every product is designed and build around real needs, real participation and real-world conditions.

MEANINGFUL INNOVATION

Restrained. Pragmatic. Call it what you will. If new features don't strengthen comfort, durability, reliability or ease – it doesn't make the range.

SHORTCUTS? NO THANKS.

We bring the same mentality we have on the trail into the studio: if the long road leads to better gear, that's the direction we're going. No rushing it out the door. No shortcuts, ever.

SUSTAINABILITY

Our love of the outdoors drives innovation, exploration, and adventure. It also inspires us to make tangible and meaningful steps towards improving our environmental and social impact.

First and foremost, we're embedding sustainable thinking into every part of our business. This means holding ourselves accountable not only for what we make, but for how we operate - from our supply chain to our community involvement.

Another way we're leaving the planet a little better than we found it is by ensuring our products are built to last and are easily repaired.

Because the most sustainable product is the one that does not need to be replaced.

OUR COMMITMENTS IN ACTION

PLANET

As part of our Greenhouse Gas (GHG) measurement programme, we've committed to science-based aligned targets for the reduction of carbon emissions and an action plan to meet them.

Our action plan will focus on reducing our GHG emissions through material choices and lower-impact manufacturing techniques, renewable energy, low-emission transport logistics and vehicle electrification.

PRODUCT & PACKAGING

These are the areas where we can make the most direct impact.

As the following pages show, we are committed to increasing our use of recycled and recyclable materials, bluesign APPROVED fabrics, and adopting more sustainable manufacturing practices.

These are important milestones, and they mark just the beginning of our journey.

PEOPLE

It's important that we take care of the people who work for us and work with us.

Working from different locations improves autonomy and collaboration across global teams. Parental leave helps build healthy families. We've implemented both globally.

We continue to work with third-party auditors to confirm our SA8000 Social Accountability Labour Standard-based factory code of conduct throughout our supply chain.

PURPOSE

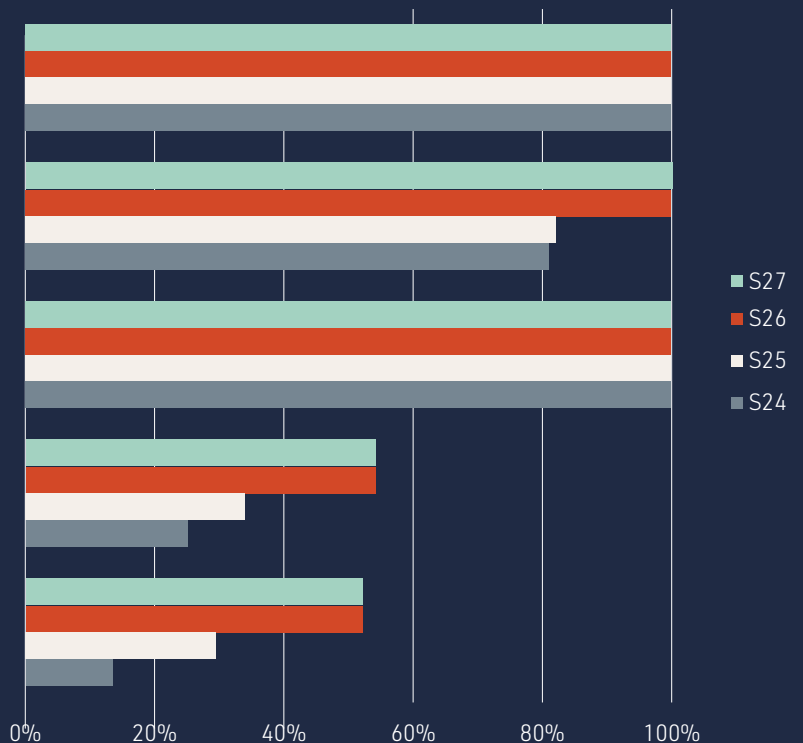

We support biodiversity conservation and responsible outdoor ethics through non-profit partnerships that preserve the places we play—and access to it.

Some of our partners globally include: Leave No Trace, The Australian Wildlife Conservancy, The Conservation Alliance, European Outdoor Conservation Association, City Kids, Bibbulmun Track Foundation and Munda Biddi Trail Foundation.

PRODUCT & PACKAGING

These key indicators reflect our efforts to reduce our impact. The goal is less–we can all do more.

AIM	HOW WE ACHIEVE IT
Ensure animal welfare in our supply chain	**Use Responsible Down Standard (RDS) Certified Virgin Down in Sleeping Bags and Quilts**
Reduce packaging waste and choose responsibly sourced materials	**Use Forest Stewardship Council (FSC) certified card for packaging, ensuring it is kerbside recyclable**
Reduce chemical use impacts on the environment and human health	**Use non-PFAS chemistry**
Reduce chemical use impacts on the environment and human health	**Increase use of bluesign APPROVED materials**
Reduce resource consumption, energy use and waste	**Increase use of Recycled Claim Standard (RCS) certified fabrics, Solution Dyeing and other lower-impact manufacturing methods**

Graph note: Shown as % of total Soft Goods or applicable SKUs
Graph note 2: S24 non-PFC used, S25-S27 non-PFAS used

SUPPORTING 1% FOR THE PLANET

Our Revive products use lower-impact materials and manufacturing techniques.

1% for the Planet is a global movement of people and businesses like ours working together to drive environmental impact.

Our Product Line Membership reinforces our commitment to environmental stewardship with one percent of each Revive product benefiting 1% for the Planet environmental partners.

The partners we have chosen are focused on protecting biodiversity, endangered ecosystems, and wildlife. They're making a tangible impact on the environments where we play.

PRODUCT GUARANTEE

SEA TO SUMMIT GUARANTEE

We stand behind our products and strive to exceed expectations. For over 35 years, Sea to Summit has designed and built award-winning gear that's continuously tested in the Australian outback and demanding environments around the world. We guarantee our products against manufacturing defects within a reasonable time from purchase—and we strive to keep the claim process straightforward.

Customer satisfaction is our ultimate priority. While we advocate, educate and promote simple care and maintenance to extend a product's usable life, in instances of a manufacturing defect we replace, repair, or provide credit for the item. This is assessed on an individual, case-by-case basis. Put simply, we always do what we know is right to build products and relationships that last.

NEW

IN 2027

SEATOSUMMIT

NEXT-GENERATION SLEEP SYSTEMS

A new generation of sleep gear pushes comfort, packability and performance further. Ion mats, ultralight Pico liners, Fusion PrimaLoft® warmth and refined sleeping bags deliver better nights outdoors across fast-and-light missions to vehicle-supported adventures.

A SMARTER CAMP KITCHEN

Frontier and XLite evolve with lighter weights, tighter nesting and smarter functionality. Hard-anodised aluminium cookware, improved Flip-Lock handles and expanded sizing - from shot glasses to ramen bowls - create a more complete modular camp kitchen.

ULTRALIGHT TENTS DONE RIGHT

The new ULT tent platform distils the strengths of Sea to Summit sheltes down to category-leading weights. Spectral ULT and Aerial ULT deliver freestanding and semi-freestanding performance, while the Purist Mesh Bug Shelter adds minimalist insect protection.

DRYLINE PACKS

The new DryLine daypacks bring Sea to Summit drybag expertise to everyday carry. Roll-top closures, welded pockets and weather-sealing fabrics keep gear protected while solving the accessibility challenges of traditional waterproof packs.

CAMP KITCHEN

WHAT'S NEW IN 2027

Xlite: Even More Packable

The XLite system pushes space efficiency further. Collapsible cookware and dinnerware pack flat to eliminate wasted space, while modular sizing allows each piece to nest tightly together. The result is a more compact, streamlined camp kitchen with full cooking and eating capability.

The New Frontier

Frontier Ultralight cookware gets lighter and more refined. Hard-anodised aluminium delivers faster, more even heat, while the new Flip-Lock handle is lighter, permanently attached and rattle-free. Modular sizing allows cookware and dinnerware to nest together with virtually no wasted space.

A Smarter Camp Kitchen

Sea to Summit continues to evolve camp kitchen as a system. Modular cookware, dinnerware and cook sets are designed to work together - reducing wasted space, improving packability and creating lighter, more capable cooking setups for every style of adventure.

More Sizes. One System.

The range expands for 2027 with new sizes from compact shot glasses to full-size pints and the new ramen bowl - inspired by many hungry nights after long days outdoors. New colours drawn from the Australian landscape refresh the range, while every piece nests seamlessly within the XLite and Frontier systems.

CAMP KITCHEN PACKAGING
SHARED FEATURES

Instant Shelf Impact

Refined, colour-led packaging cuts through visual noise - helping customers quickly identify the product and move from browsing to buying.

Increases Customer Engagement

Designed for hands-on interaction, allowing customers to see, touch and operate the product - building confidence and accelerating purchase decisions.

Supports Faster Selling

Easy-open design enables quick demonstrations and seamless repacking - maintaining strong visual standards on shelf.

Maximises Retail Efficiency

Compact, durable packaging reduces shelf space and material use while maintaining strong in-store presentation. Fully curbside recyclable and FSC certified.

2027 CAMP KITCHEN

XLITE COLLAPSIBLE DINNERWARE

Packs Flat. Saves Space.

Designed as a fully integrated system, each piece collapses and nests precisely to eliminate wasted space - cups stack into bowls, bowls into cookpots– creating one of the most compact camp kitchen setups available.

Ultralight by Design

Injection-moulded silicone construction reduces weight by up to 30% compared to previous generations - starting from just 43g for a cup - minimising pack load without compromising function.

Proven Reliability

Built on over 15 years of collapsible dinnerware expertise, this latest range is rigorously tested to 15,000+ cycles - delivering long-term durability in both lab and field conditions.

SEATOSUMMIT

XLITE COLLAPSIBLE
CUP, MUG, PINT

Packs Flat. Saves Space.

Packs Flat to Save Space

Collapsible design flattens for easy packing, reducing bulk compared to rigid drinkware.

Nests into the XLite System

Sized to nest with XLite dinnerware and fit inside cookware for efficient, modular storage.

Right Size for Every Drink

Range of capacities covers everything from quick drinks to full pours, without carrying rigid cups.

Ultralight, Comfortable in Hand

Food-grade silicone and a glass-reinforced nylon base keep weight low while providing a firm rim and stable structure.

SKU	SIZE	WEIGHT	COLOUR
1058	Cup - 310ml	43g | 1.5 oz	Dark Blue, Mediterranea, Laurel Wreath, Pagoda Blue, Burnt Orange, Meadow Mauve

XLITE COOKWARE

FLIP-LOCK HANDLE

50% Lighter

The patent-pending, custom-formed hard anodised aluminium reduces weight without compromising strength or comfort.

Cook. Lock. Carry.

Dual-function design delivers a secure cooking grip, then locks contents in place rattle free for transport.

Auto-Locking Latch System

Latch engages automatically in use and releases smoothly to pivot for packing.

Field-Serviceable Construction

Easily cleaned and maintained to ensure consistent performance over years of use.

Secure, Always Ready

Permanently fixed handle eliminates rattle and ensures consistent, secure performance.

2027 CAMP KITCHEN
SMARTER COOKWARE LIDS

Integrated Strainer Lid

Dedicated straining ports enable controlled water drainage while retaining food - silicone rim provides a secure, heat-resistant thumb hold.

Lid Keep Security

Redesigned retention system secures the lid during stirring - enabling stable, controlled cooking on the stove.

Silicone Lid Lifter

Heat-resistant, high-grip lifter protects hands during use and flexes flat for compact packing.

SEATOSUMMIT

XLITE COLLAPSIBLE
1L, 2L & 3L POT

2L POT, KETTLE & PAN SET 3 PIECE

Packs Flat. Saves Space.

Packs Flat, Nests Together

Kettle, pot and fry pan nest together into a tight, space-efficient stack, keeping your cookware organised and easy to pack.

Boil and Cook in One

Pot, kettle and fry pan support boiling, frying and simple meal prep, giving you real cooking capability at camp.

Safe Handling Across the System

Purpose-built handles provide control and confidence: Flip-Lock handle on the pot, dual pivot handles on the kettle, and press-lock handles on the fry pan that fold flat for storage.

Fast, Even Cooking

Hard-anodised aluminium and a ceramic-coated fry pan deliver even heat distribution, reducing hot spots for more reliable cooking results.

FRONTIER ULTRALIGHT COOKWARE
SHARED FEATURES

Designed to Save Space

System-engineered to nest essential cookware inside - maximising packing efficiency.

Cook. Lock. Carry.

Flip-Lock handle delivers a secure cooking grip, then locks contents in place for rattle-free transport.

Ultralight Cooking Performance

5-series hard-anodised aluminium delivers fast, even heat - improving fuel efficiency and control.

Lid Keep Security

Redesigned retention system secures the lid during stirring—enabling stable, controlled cooking.

Integrated Strainer Lid

Straining ports for controlled drainage - silicone rim delivers a secure, heat-resistant grip.

FRONTIER ULTRALIGHT DINNERWARE
SHARED FEATURES

Frontier Ultralight Dinnerware

Precision-sized to fit within its designated cookset - minimising wasted space and streamlining packing.

Cool Grip Construction

Heat-dissipating sidewalls and base reduce heat transfer - ensuring a secure, comfortable hold.

Integrated Utensil Holder

Thumb grip secures utensils for carrying - while delivering a stable, ambidextrous hold.

Ultralight Hard-Anodised Cutlery

From just 8g, aircraft-grade aluminium delivers strength at minimal weight - stackable with polished bowls for smooth eating.

High-Temperature Cooking

Hard-anodised aluminium heats quickly and distributes heat evenly–ideal for frying and sautéing on compact camp stoves without scorching.

Consistent Heat, Better Control

Thicker aluminium construction stabilises heat during high-temperature cooking for more consistent results when searing, frying or sautéing.

Compact to Pack, Secure to Use

Dual handles pivot flat for streamlined packing, then lock together to provide a stable, confident grip when cooking.

Non-Stick Performance, Easy Cleanup

Ceramic non-stick coating ensures easy food release and quick cleanup, while silicone-covered handles protect hands and improve grip.

Durable hard-anodised aircraft grade aluminium combined with a sleek-yet-strong shape to create an extremely lightweight utensil

Frontier Ultralight
CUTLERY & UTENSILS

Frontier Cutlery uses durable hard-anodised aircraft grade aluminium combined with a sleek-yet-strong shape to create an extremely lightweight utensil.

The enhanced shape adds strength, and allows the utensils to 'stack' on top of one another. The bowls of the Spoon and Spork are polished to create a smooth, comfortable feel.

All Frontier cutlery sets come with a carabiner that attaches the utensils for clean, efficient storage.

FEATURES

- Ultralight and super-strong aircraft aluminium alloy utensil
- Smooth, matte finish for comfortable mouth feel
- Tough and lightweight for lifelong use
- Comes with a mini carabiner to keep cutlery together
- Stacks efficiently with other Frontier cutlery pieces

HORIZON INSULATED MUG

Designed for easy grip and sip, the Horizon Insulated Mug features innovative double-walled construction that keeps drinks hot and a secure lid to prevent spills. CoolGrip base and sides minimise heat transfer for comfortable handling. Made from tough, food-grade polypropylene reinforced with glass, it's ultralight, durable, and dishwasher safe. The stackable, handle-free design saves pack space, making it perfect for camping and outdoor adventures.

FEATURES:

- Double-walled construction insulates contents to maintain temperature in any conditions
- CoolGrip base and sides ensure a comfortable hold by minimising heat transfer from hot contents
- Made from tough, food-grade polypropylene reinforced with glass, it's lightweight, and easy to clean

Horizon Range
HORIZON BOWL

Designed for how you eat outdoors - because there's rarely a table in the backcountry. The Horizon Bowl features a moulded thumb grip for a secure, ambidextrous hold, even with gloves. Deep sidewalls minimise spills, and the grip doubles as a utensil holder for easier carrying. CoolGrip fins reduce heat transfer for safer handling of hot meals. Made from tough food-grade polypropylene reinforced with glass, it's lightweight, and dishwasher safe. Stackable for space-saving carry.

FEATURES:

- Moulded thumb grip offers an ambidextrous, stable hold even with gloves, ideal for eating without a table
- Deep, vertical sidewalls keep food inside when holding, passing, or resting the bowl on uneven ground
- CoolGrip fins reduce surface temperature, making handling hot meals safer and more comfortable outdoors

CAMP CUTLERY SET

Our lightweight, all-purpose three-piece Camp Cutlery set will have you ready for any adventure. Made from BPA free, glass reinforced polypropylene it's durable, light and dishwasher safe.

Its shaped handles also allow cutlery to neatly nest together for compact packing and it includes a mini carabiner to hold all the pieces together.

FEATURES:

- Light, strong and durable
- Dishwasher safe
- Includes mini carabiner
- Shaped handles allow cutlery to nest together for compact packing

Camp Range
DINNERWARE SET - [6 PIECE]

Adventure tested. Camp ready. This all-in-one, ultralight dinnerware set includes a plate, bowl, cup, cutlery set with carabiner, and mesh sack for drying and organisation. Steep sidewalls on the bowl and plate reduce spills, while the tactile EasyGrip surface ensures secure handling, even with gloves. Made from tough food-grade polypropylene reinforced with glass, each piece is lightweight, stackable and easy to clean.

FEATURES

- Everything you need in one kit - includes a bowl, plate, cup, cutlery set with carabiner clip, and mesh sack for compact, organised camp meals
- Minimises spills - steep, vertical sidewalls on bowl and plate help keep food inside when eating outdoors
- Comfortable, secure hold - tactile EasyGrip surface on bowl, plate and cup provides grip, even with gloves or when your hands are cold or wet

DETOUR COOKWARE

Packs Flat. Saves Space.

Collapsible design reduces volume for compact storage - ideal for vehicle-based packing.

Induction-Ready Stainless Steel

Compatible with gas, electric and induction cooktops - delivering durable, high-performance cooking.

Secure for Transport

Handles lock lid and contents in place - ensuring rattle-free carry.

Click-Safe Handle System

Engages securely for safe handling - reverses to lock lid and nested contents for transport.

Integrated Nesting System

Designed as a complete system - each piece collapses and nests precisely to eliminate wasted space.

Stainless Steel
COLLAPSIBLE POUR OVER

The functional and space-saving Frontier Collapsible Pour Over Filter makes the perfect coffee. The Collapsible Pour Over can hold a single serve of coffee and features a stainless steel mesh filter that can be easily washed, even in a dishwasher. The mount base fits the majority of mug and mouth bottle rims for convenience and versatility.

FEATURES

- Low -profile for compact packing
- Super fine stainless steel mesh keeps grinds and lets through the good oils for the perfect pour over brew
- Basket holds single serve of around 30 grams of coffee grinds
- Mount base fits most mug and wide mouth bottle rims

Detour Stainless Steel
COLLAPSIBLE KETTLE 1.6L

A durable, collapsible stainless steel and silicone kettle that works on radiant or most induction stoves for a coffee or tea break like home, even when you're off the beaten track. The double glass-reinforced nylon handles allow for stable, safe pouring, and the rim is wide enough to allow the kettle to be used as a pot. A LID KEEP handle adds extra convenience while cooking.

FEATURES

- BPA free, food grade, heat resistant silicone
- Innovative collapsible design
- Stainless steel base conducts heat well for quick boiling
- Two glass-reinforced nylon 66 handles support the upper rim and improve control when pouring
- Larger 1.6L family capacity

Detour Stainless Steel
COLLAPSIBLE POURING POT 1.8L

The Detour 1.8L Stainless Steel Collapsible Pouring Pot has a stainless steel upper rim with a built in spout. Along with the Click Safe handle this allows safe, secure pouring and straining.

The pot can be used on radiant or most induction stoves, and includes features such as the LID KEEP which allows the lid to be clipped to the side of the pot while cooking.

This durable, full-function pot collapses to a fraction of its in-use height thanks to the silicone rubber sidewalls.

FEATURES

- Induction and gas cooktop compatible
- Innovative collapsible design
- Click-Safe removable handle stows for transport and locks securely into place for use
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile
- Integrated patent-pending LID KEEP rests lid on side of pot

Detour Stainless Steel
COLLAPSIBLE POT 3L

The Detour Stainless Collapsible 3L Pot offers the quality of premium domestic cookware combined with induction-stove compatibility, dual-handle safety plus road-ready collapsibility and rattle-free storage capability. Its multi-ply base provides durability and optimum heat distribution for perfect gourmet meals.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers. The base is formed with a highly conductive aluminium core layered between two durable stainless steel surfaces.
- Induction and gas cooktop compatible
- Innovative collapsible design
- Click-Safe handles stow for transport (securing the lid and keeping nesting products inside)and lock securely
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile

Detour Stainless Steel
COLLAPSIBLE POT 5L

The Detour Stainless Collapsible 5L Pot is a durable and efficient addition to any
camp kitchen. With a three-ply base for even heat distribution and compatibility on
gas as well as induction cooktops, this pot makes mealtimes simple and seamless.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers. The base is formed with a highly conductive aluminium core layered between two durable stainless steel surfaces.
- Induction and gas cooktop compatible
- Innovative collapsible design
- Click-Safe removable handle stows for transport and locks securely
  into place for use
- Compatible with Sea to Summit Detour Silicone colander
- Large internal radius allows easy cleaning and matches Sea to Summit cutlery profile.

Detour Stainless Steel
PAN 10in

The Detour Stainless 10 inch Pan is a durable and efficient addition to any camp kitchen. With a three-ply base for even heat distribution and compatibility on gas as well as induction cooktops, the Detour Pan allows precise heat control when frying or sautéing.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers. The base is formed with a highly conductive aluminium core layered between two durable stainless steel surfaces.
- Induction and gas cooktop compatible

KETTLE COOK SET - [3 PIECE] 1.6L KETTLE + 2x MUG

Perfect for civilised hot drink breaks when you're on the road, the 1.6L Kettle also works as a cookpot for more expansive camp meals. Two collapsible stainless steel mugs round off the set – all items collapse down for compact storage.

FEATURES

- Innovative collapsible design for compact packing
- Kettle with stainless steel base works with both gas and most induction camp stoves and cookers
- Food grade silicone and long lasting stainless steel construction
- Wide rim allows kettle to be used as a cooking pot
- Durable stainless steel safety lid with silicone lid grip
- Dual handles for stable pouring
- Compact nesting design
- BPA free

Detour Stainless Steel
ONE POT COOK SET - [5 PIECE] 3L POT + 2x LARGE BOWLS + 2x MUG

The durable and packable Detour Stainless Steel One Pot cookset is the perfect starter set, or the ideal addition to an existing gourmet camp kitchen. At its heart is the collapsible Detour Pot (3L), with dual handles for stable and secure handling. Two large bowls and mugs complete the set.

FEATURES

- The three-ply base creates even heat distribution for better control when cooking on camp cookers
- Stainless steel base works with both gas and induction camp stoves and cookers
- Food grade stainless steel and silicone construction
- Durable stainless steel safety lid with silicone lid grip
- Dual handles for stable pouring
- Compact nesting design
- BPA free
- Integrated patent-pending LID KEEP rests lid on side of pot

Detour Essentials

ULTRA-SIL KITCHEN SINK

Ultralight & Compact. At just 55 grams, the Ultra-Sil Kitchen Sink packs into a micro-sized pouch for ultralight carrying. Engineered with a wide base and stiffened rim, it holds its shape when full, providing stable dishwashing anywhere. Made from waterproof Ultra-Sil 30D siliconised CORDURA® nylon with fully taped seams, it's watertight, fast-drying, and ideal for washing dishes away from sensitive water sources.

FEATURES

- Wash dishes easily anywhere with a stable wide base and rigid rim that holds its shape when full
- At just 55g, it packs into its own micro storage pouch for effortless carrying
- Easily dispose of water away from camp and sensitive water sources with hypalon carry handles

Camp Kitchen Utility
KITCHEN SINK

Camping Dish Duty Made Easy: Engineered with a wide base and rigid rim for stability, the Kitchen Sink holds its shape when full. Made from waterproof certified recycled 70D nylon with fully taped seams, it's watertight, fast-drying, and ideal for washing dishes away from sensitive water sources. It compresses into a palm-sized pouch, making it compact and versatile for all types of camping adventures.

FEATURES

- Wash dishes easily anywhere with a stable wide base and rigid rim that holds its shape when full
- Packs light and saves space–folds into a palm-sized pouch for easy transport
- Easily dispose of water away from camp and sensitive water sources with webbing carry handles

WATER TRANSPORT

Water Transport
WATERCELL X

The Watercell X is your go-to solution for storing, transporting, and dispensing water on any adventure. Made from durable certified recycled 400D nylon and bluesign APPROVED materials, it features 3D-baffled, RF-welded TPU construction that's BPA, PVC-free and non-PFAS. Converts to a shower with included fitting. The adjustable strap and welded lash points provide versatile options for carrying, hanging, or securing on the move.

FEATURES

- Wide-mouth design makes filling, draining, and drying fast and easy
- Low-profile 63mm multifunction cap provides variable flow control and is easy to operate with one hand.
- Adjustable TPU strap and welded lash points make it easy to carry, hang, or secure.

SIZES

Water Transport
PACK TAP

Enjoy taste-free water anywhere with the Pack Tap. An internal Mylar bladder keeps your water flavour-free on every adventure. The compact spigot operates easily with one hand and stays clean under a protective cap. Hang it from a tree or secure it at camp. Lightweight and flexible, the tough outer fabric is made from certified recycled, non-PFAS, bluesign APPROVED 300D polyester. Replacement bladders extend its lifespan with simple swaps.

FEATURES

- Keeps water flavour-free – internal Mylar bladder preserves clean, taste-free hydration on every adventure
- Easy access to water – spigot operates smoothly with one hand and stays clean under a protective cap
- Versatile setup – multiple durable lash points let you hang, lay flat or attach the Pack Tap almost anywhere

Camp Kitchen Utility
ULTRA-SIL FOLDING BUCKET

The ultralight solution for hauling water. Weighing just over 30g and folding into a compact pouch, the Ultra-Sil Folding Bucket offers truly ultralight, packable water transport. Its generous 10L capacity and stiffened rim make collecting and pouring water easy. Double-stitched and taped seams, plus bluesign APPROVED Ultra-Sil 30D siliconised nylon, keep it watertight, strong, and quick-drying. Makes adhering to Leave No Trace Seven Principles simple and easy.

FEATURES

- Carry water effortlessly anywhere thanks to the ultralight 30D siliconised nylon and compact folding design
- Easy water collection and pouring with a stiffened rim and 10L capacity for stable handling at camp or on trail
- Go further with less weight: ultralight at just over 30g and incredibly packable into its own compact storage pouch

Camp Kitchen Utility
FOLDING BUCKET

Light and packable water transport for camp or trail. With a generous 10L design, the Folding Bucket makes it easy to collect, carry, and pour water back at camp. A base handle and volume markers simplify use, while welded seams and lightweight, recycled fabric keep it watertight and quick-drying. Folds into a compact pouch when empty. Made from bluesign APPROVED, certified recycled, non-PFAS materials to adhere to Leave No Trace Seven Principles.

FEATURES

- 10L capacity with a stable design for hassle-free water collection and transport
- Welded seams and recycled fabric keep it watertight and quick-drying
- Lightweight and foldable for easy packing and saving space

WHAT'S NEW IN 2027

Next-Gen Sleeping Mats

A new generation of Sea to Summit mats raises the bar for comfort and packability. Ion's Lite Grid construction delivers new levels of warmth-to-weight, packability and noise reduction without sacrificing reliability. Ori-Fold technology reimagines the classic closed-cell foam mat.

Boundary-Pushing Liners

Innovation at both ends of the spectrum pushes liners further than ever. Pico sets a new benchmark for ultralight sleep systems, while Fusion PrimaLoft® delivers exceptional warmth-to-weight with breathable active insulation.

Home Comfort on the Trail

Camp comfort reaches a new level with wider mats, fitted sheets, roomier sleeping bags and the Grand Tour range. These designs bring a more relaxed, bed-like sleep experience to travel, touring and vehicle-supported adventures.

Sleep Systems for Every Adventure

From ultralight backpacking setups to versatile all-purpose systems and vehicle-supported comfort, Sea to Summit sleep systems support every style of adventure – allowing users to balance warmth, weight and comfort for the way they travel.

SLEEPING MATS
WHAT'S NEW IN 2027

A New Generation of Air Mats

For 2027, our air mat range evolves with lighter, quieter and more thermally efficient designs. New materials and construction techniques improve packability and warmth while maintaining the comfort, reliability and width that define Sea to Summit sleep systems.

Lite Grid Construction

The new Ion series introduces Lite Grid construction - an advanced internal structure that reduces weight and packed size while increasing insulation. By reinforcing critical weld zones and reducing TPU thickness elsewhere, Lite Grid delivers quieter, lighter mats without sacrificing durability or reliability.

Ori-Fold Innovation

Closed-cell foam mats are reliable but traditionally bulky. Ori-Fold changes that with a dual-folding design that dramatically reduces pack size. The Contour model adds a removable sit pad and a Contour shape that delivers wider comfort at the shoulders and hips with body-mapped pressure relief.

Grand Tour Sleep System

The new Tour and Grand Tour mats bring home-inspired comfort outdoors. Stretch-knit fabric, stable AirBase construction and a removable fitted sheet with pillow pocket deliver softer sleep, better support and easy-wash hygiene on extended trips.

ULTRALIGHT AIR SLEEPING MATS

ULTRALIGHT AIR MATS

SHARED FEATURES - COMFORT YOU CAN COUNT ON

Air Sprung Cells

Think of Air Sprung Cells as individual, air-filled springs. Dozens of these cells form a supportive sleeping surface that is far more stable and comfortable than the baffles of a conventional air mat.

Wider by Design

Sea to Summit ultralight air mats are wider by design, giving you 8% more sleep area than typical tapered sleeping mats so you have the space needed to support how YOU sleep.

XPRESS VALVE

A high-airflow, low-profile valve that combines an inflate port, a deflate port and an adjust button.

Compatible with the Air Stream Pump Sack built into the mat stuff sack.

Reliable Construction

Extrusion laminated fabrics eliminate delamination issues - and RF welds deliver strongest bonds. Excessive testing to perfect TPU thicknesses for true confidence in the field.

LITE GRID CONTRUCTION

NEW LITE GRID CONSTRUCTION

An advanced internal structure that reduces weight and packed size while increasing insulation efficiency. Reinforced weld zones add strength where needed, while reduced TPU thickness cuts bulk and noise—delivering a lighter, quieter, warmer and more compact mat without compromising durability or reliability.

20D Ultralight Shell
Lightweight, quiet fabric for low-noise comfort.

ThermalCore Insulation
Dual reflective layers maximise heat retention.

Lite Grid Matrix
Reinforced weld zones reduce weight and bulk.

2027 SLEEP
AIR MATS

ULTRALIGHT

Supportive and stable

Lightweight, efficient comfort with larger Air Sprung Cells that provide adaptive support while keeping weight and packed size low.

ETHER LIGHT

Softer, deeper cushioning

A thicker 10cm construction delivers a plush, sink-in sleep feel for campers who prefer a more cushioned sleep experience.

ION

Our pinnacle air mat range

New Lite Grid construction reduces weight, noise and packed size while increasing insulation—without sacrificing comfort, width or durability.

ULTRALIGHT ION R5

ETHER LIGHT ION R6

ETHER LIGHT ION R8

XR

Proven all-round performance

Sharing the same comfort and features as Ion, XR mats use durable Hybrid 30/40D fabrics and trusted construction for dependable adventure use.

ULTRALIGHT XR

ETHER LIGHT XR

ENDURANCE

Maximum durability and value

Built with robust 70D nylon for improved resistance to abrasion and punctures while delivering the same Air Sprung Cell comfort.

ULTRALIGHT ENDURANCE R3

AIR MAT DEVELOPMENT TESTING

Tested Beyond Real-World Limits

Each mat is pushed to failure at extreme pressures, ensuring a 4x safety margin above anything it will encounter in the field.

Proven for Years of Use

A 110kg rolling load simulates years of use, repeatedly cycling across the mat to validate internal weld strength and long-term durability.

Built for Critical Reliability

Pressure-cycled 10,000 times and held at maximum load for extended periods, with every mat individually checked before shipping to ensure it won't fail when it matters most.

SEATOSUMMIT

INSULATED AIR MAT
ULTRALIGHT ION R5

Maximum Performance. Minimal Weight.

Ultralight, Built to Last

Reduced weight and packed size without sacrificing durability, thickness or comfort - delivering reliable performance over the long haul.

Re-Engineered from the Inside Out

Lite Grid construction uses a variable-thickness TPU matrix, reducing weight while reinforcing critical weld zones for long-term reliability.

Better Thermal Efficiency

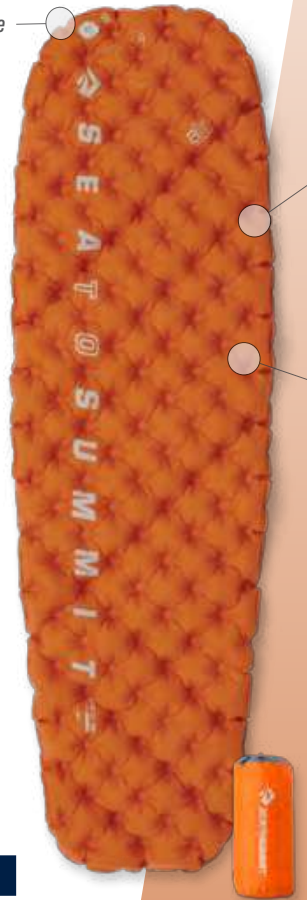

Multiple suspended layers of ThermalCore insulation on either side of the Lite Grid matrix improve warmth without increasing bulk.

Stable Comfort with Room to Move

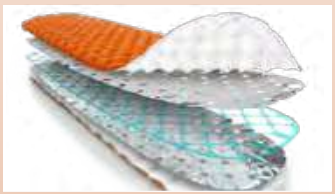

Air Sprung Cells and updated 20D fabric deliver pressure-relieving support, while a broader profile through the hips and shoulders provides stability and quieter comfort in any sleep position.

CLOSED CELL FOAM MATS

CLOSED CELL FOAM MATS

Reliable Insulation

Aluminium Thermal Reflective Layer
Insulating foam limits conductive heat loss to the ground, while the bonded aluminium layer reflects radiant body heat back toward you. A protective surface coating ensures durable, reliable insulation with a tested R-Value of 2.0.

Zoned Comfort

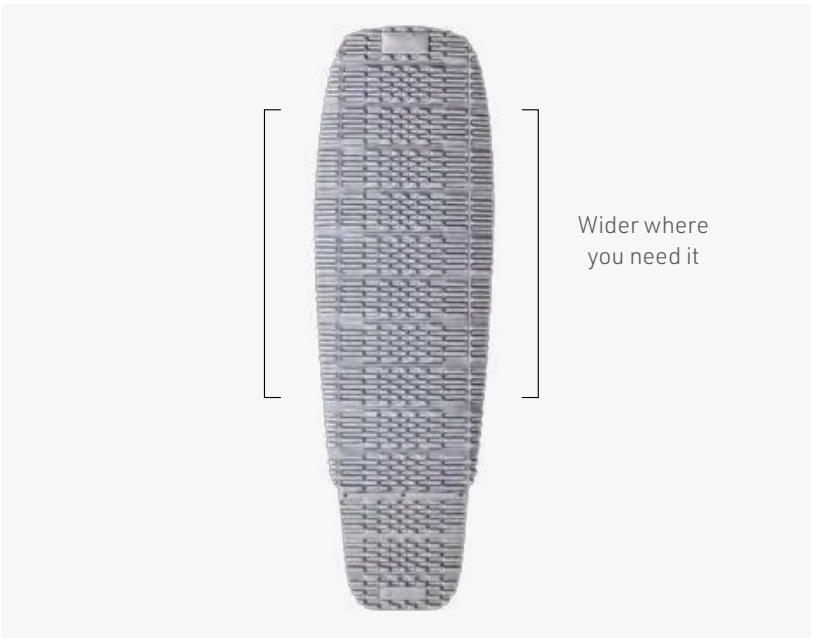

Sculpted foam cells are zoned through the centre of the mat to increase load-bearing under shoulders and hips, reducing pressure without adding unnecessary weight or bulk.

Adaptive Foam Cells

Individually conforming cells deliver soft, supportive comfort - flat-top design improves sleeping surface feel.

CLOSED CELL FOAM MATS

Wider Where You Need It

Contour shape adds width at shoulders and hips - up to 9% wider than rectangular mats for improved comfort, especially for side sleepers.

Packs Smaller

20% smaller packed size vs standard closed-cell foam mats.

Removable Sit Pad

Foot section detaches to create a dedicated sit pad - using higher-density foam for improved seated support.

Dual-Fold Design

Quick, intuitive folding action reduces volume and streamlines packing.

Dual-Density Foam Construction

Triple-layer, high-rebound foam combines soft top-layer comfort with a stable, durable base.

SEATOSUMMIT

CLOSED CELL FOAM SLEEPING MAT
ORI-FOLD CONTOUR

Folds Small. Goes Anywhere.

Most Compact Folding Mat

Contour shape adds width where you need it, while the dual-fold design reduces packed size by 20% for easier transport.

Two Mats in One

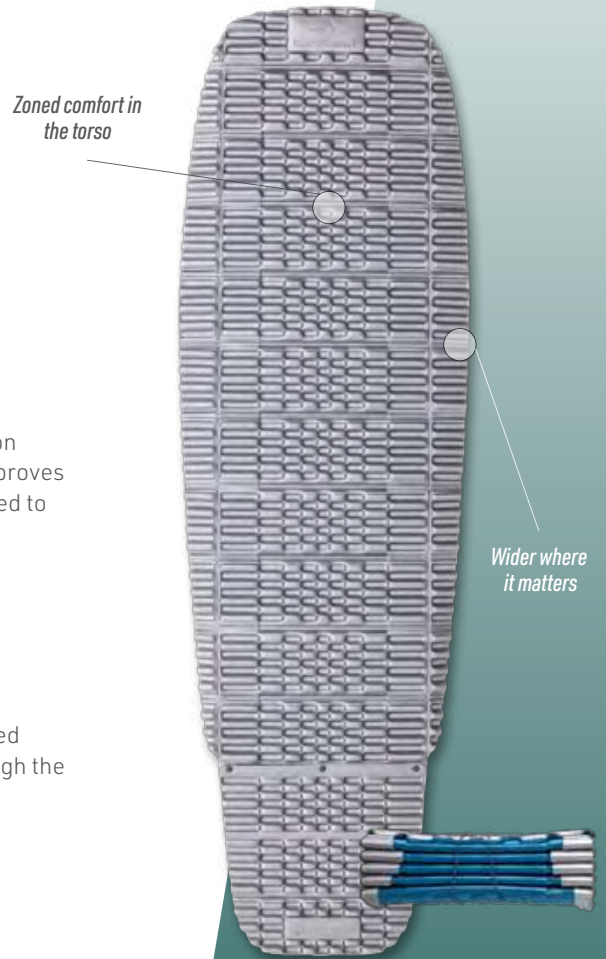

Removable foot section transforms the mat into a full-length sleep mat at night and a dedicated sit pad by day, with higher-density foam for better seated support.

Lightweight, Built to Last

Triple-layer, dual-density foam construction with a durable aluminium thermal layer improves long-term insulation performance compared to traditional foam mats.

Wider Where You Need It, Thicker Where It Matters

Contour shape adds width at the shoulders and hips, while dual-density foam and zoned construction provide greater support through the centre and reduce weight at the edges.

20% Small Pack Size

Removeable Foot Area Doubles as a Sit Pad

Dual Density Foam Cells for Support

SKU	SIZE	DIMENSIONS	PACKED DIMENSIONS	WEIGHT	COLOUR
111201	One Size	185 x 56 x 2cm	41 x 15 x 13cm	365g | 12.9 oz	Mediterranea

SEATOSUMMIT

CLOSED CELL FOAM SLEEPING MAT
ORI-FOLD RECTANGULAR

Folds Small. Goes Anywhere.

Ultralight Foam, Built to Last

High-rebound IPXE foam construction eliminates the risk of leaks or punctures, delivering dependable ultralight performance over repeated use.

Targeted Comfort Where It Counts

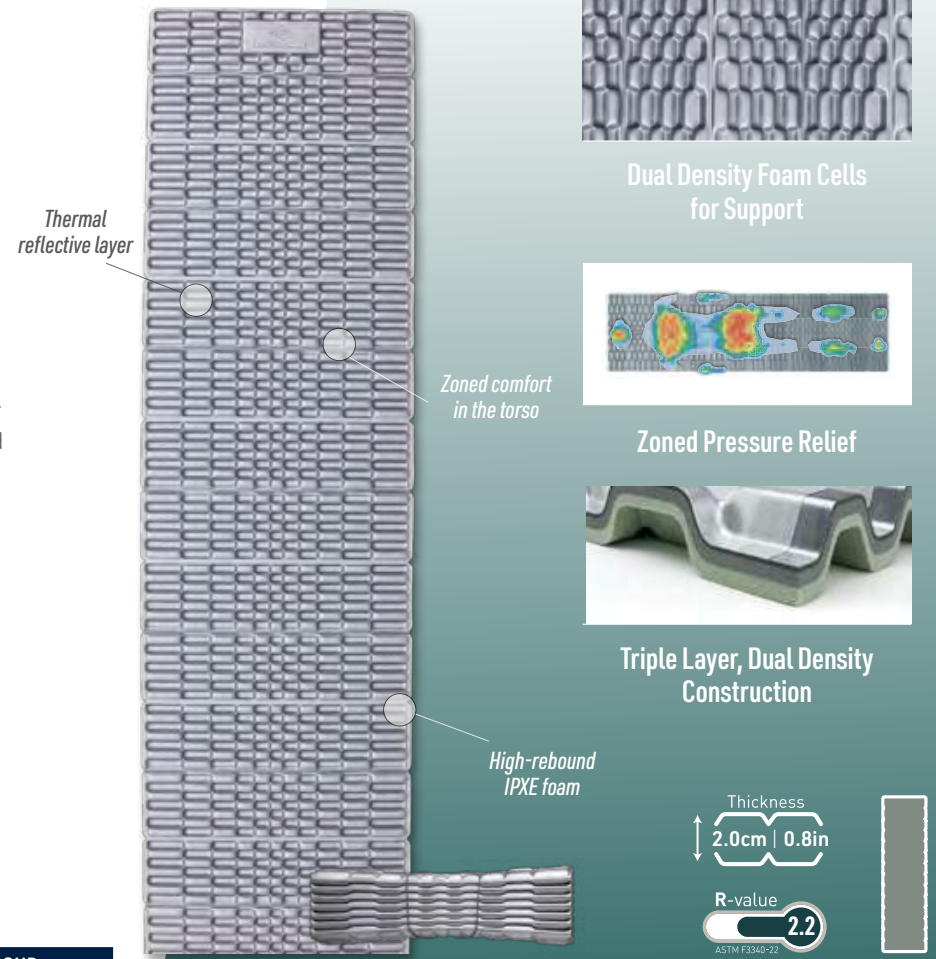

Sculpted foam cells are zoned to provide greater support at the shoulders and hips, improving comfort without unnecessary weight or bulk.

Dual-Density Support

Dual-density construction pairs a softer top layer for comfort with a denser base layer for improved support and durability on rough ground.

Insulation You Can Rely On

Protected aluminium thermal layer reflects body heat, working with dual-density foam and sculpted cells to deliver an ASTM R-value of 2.2 for warm-weather comfort.

SKU	SIZE	DIMENSIONS	PACKED DIMENSIONS	WEIGHT	COLOUR

ALL-ROUNDER SLEEPING MATS

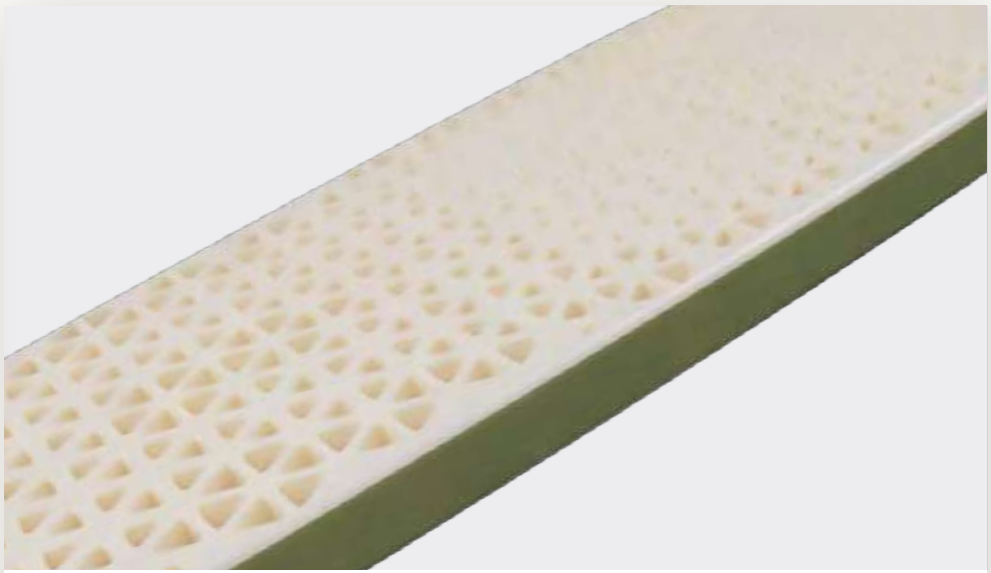

ALL-ROUNDER SELF INFLATING MATS
CONSTRUCTION

AirLight
CONSTRUCTION

Pursuit Series Sleeping Mats

The original foam–air hybrid construction uses horizontal coring to remove up to 40% of foam, creating air-filled, foam-supported chambers that deliver stable, supportive comfort. This structure reduces weight and packed size for efficient, lightweight performance.

AirZone
CONSTRUCTION

Camp Series Sleeping Mats

Body-mapped cutouts retain insulation where it's needed under the torso and feet, while removing excess foam elsewhere to reduce weight and packed size - optimising warmth, efficiency and comfort.

ALL-ROUNDER SELF INFLATING MATS
SHARED FEATURES

Range of Shapes

All self-inflating mats are offered in the weight-efficient Contour shape and room-to-spread out Rectangular versions.

Comfort Deluxe mats are wider, and include the supremely comfortable Double.

XPEL VALVE

The first valve specifically designed to prevent re-inflation during pack-up, the low-profile XPEL valve allows simple inflation and adjustment of self inflating mats.

Side-Loading Stuff Sack

The side-loading stuff sack places the drawcord along the longer axis—packing away your rolled-up mat is now effortless.

PURSUIT SLEEPING MATS

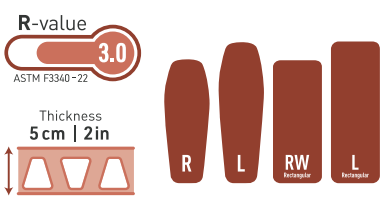

Self Inflating
PURSUIT MAT

Pack light and sleep deeply with the Pursuit self-inflating sleeping mat. A lightweight, performance sleeping mat, built for long days on the trail that demand restful nights. Features Air Light construction which creates foam-supported air channels for serious comfort at a low weight. The XPEL Multi Function Valve and side-loading stuff sack allow the mat to be packed up swiftly. Pursuit is built with bluesign APPROVED, RCS-recycled, solution-dyed fabric so you can rest easy.

FEATURES

- 5cm | 2in Air Light construction creates air-filled chambers for increased comfort while keeping weight and size low.
- Pursuit is the lightest mat in its class - perfect for backpackers who prefer a quiet and stable self inflating mat.
- Weight efficient Contour shape with room to side sleep and adjust positions with ease.

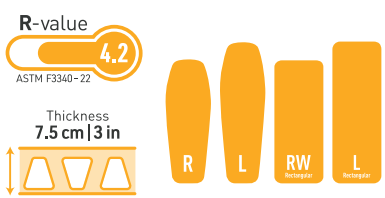

Self Inflating
PURSUIT PLUS MAT

Made for comfort-seeking outdoors lovers, the Pursuit Plus is a 7.5cm thick, self inflating sleeping mat for maximum comfort in the wilderness. Features Air Light construction which creates foam-supported air channels for serious comfort at a low weight. The XPEL Multi-Function Valve allows the mat to be rolled up easily, and a side-loading stuff sack streamlines the packing process. Pursuit Plus is built with bluesign APPROVED, RCS-recycled, solution-dyed fabric to create a mat with a high level of comfort and a low environmental impact, and is part of our 1% for the Planet commitment.

FEATURES

- 7.5cm | 3in Air Light construction reduce weight and packed volume, but create air-filled chambers to increase comfort.
- Thermally efficient Contour shape. Room to side sleep and adjust positions with ease, without adding extra weight.
- ASTM-tested R-Value of 4.1, offering extended three season comfort and insulation.

Self Inflating
CAMP MAT

The Camp Self-Inflating Mat is a comfortable, durable option for the adventurer who wants a quality pad at an affordable price. Utilizing the multi-function valve, this pad deflates easily, with no fighting re-inflation during pack up. What's more, Air Zone construction technology removes weight and bulk without compromising on comfort, and the durable face fabric will withstand some tough adventuring. It's your back to basics, no-frills, sleeping pad
that offers great comfort for backpacking and camping adventures.

FEATURES

- 4.2 R-Value is warm enough for all but the coldest ground
- One and a half inch thick foam provides comfort, reduced weight and packability
- Air Zone construction technology keeps body contact areas warmer while still offering great support and packability sleep and adjust positions with ease

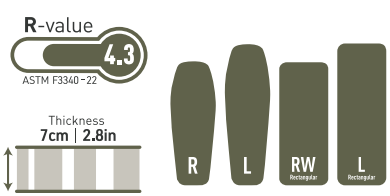

Self Inflating
CAMP PLUS MAT

The Camp Plus Self Inflating Mat delivers extra comfort with 33% more thickness than standard mats and adjustable firmness to match your sleep style. Body-mapped Air Zone construction keeps insulation where it's needed and cuts weight where it's not. The weight-efficient Contour Shape adds more sleep area - ideal for a wide range of body types and sleep styles. Made with rugged, certified recycled 75D polyester, it's built to last season after season.

FEATURES

- Body Mapped Insulation: Air Zone construction insulates where needed, reducing weight where it's not
- 33% thicker than standard mats, with added depth, comfort, and adjustable firmness for any sleep style
- Contour Shape: Adds 12% more sleep area to allow for varied sleep positions

VEHICLE SUPPORTED SLEEPING MATS

2027 SLEEP

GRAND TOUR SLEEPING MAT

Stretch Knit Comfort

Soft, quiet stretch-knit fabric paired with a lightly quilted fitted sheet delivers a plush, body-conforming sleep surface for home-like comfort.

Removable Fitted Sheet

Zip-on, zip-off design allows easy removal for machine washing - improving hygiene and sleep comfort.

Integrated Essentials Pocket

Built-in pocket keeps small items like phones, head torches and glasses close at hand - adding convenience without clutter.

VEHICLE SUPPORTED SELF INFLATING MATS
CONSTRUCTION

AirFrame
CONSTRUCTION

Comfort Deluxe Series Sleeping Mats

Interlocking cross-core construction creates a grid of air-filled, foam-supported chambers that regulate internal rebound and eliminate bounce - delivering stable, level support even on double mats. The 10cm profile provides a thick, comfort-focused sleep surface for vehicle-based camping.

AirBase
CONSTRUCTION

Tour Series Sleeping Mats

A continuous foam platform delivers even cushioning and insulation, while adaptive support columns beneath respond to body movement to enhance pressure relief and stability. The 9cm profile creates a spacious, home-like sleep experience with balanced comfort and support.

SEATOSUMMIT

SELF INFLATING
GRAND TOUR MAT

Sleep Better, Anywhere.

Home-Inspired Comfort

Quilted, removable fitted sheet and stretch-knit surface create a soft, supportive sleep experience that feels closer to home.

AirBase Adaptive Support

Continuous foam platform with adaptive columns delivers even cushioning and pressure relief for stable, supportive comfort.

Hygienic, Easy to Clean

Removable fitted sheet allows easy machine washing after extended trips.

Effortless Inflation and Pack Down

XPEL valve enables easy inflation, precise adjustment and rapid deflation, while the Airstream HV sack allows quick pressure top-off.

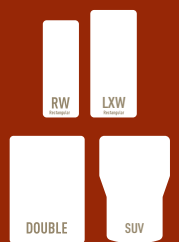

Removeable Fitted Sheet

Air Base Constuction enhances support and warmth

SLEEPING MAT ACCESSORIES

ADAPT SHEET SET

Sleep Like You're at Home

Bedding Comfort for Your Sleep System

Adds a fitted bottom sheet and oversized top sheet to create a complete, bedding-style sleep experience on your sleeping mat.

Adaptive Top Sheet

Oversized top sheet features a foot pocket to anchor it in place, or can be untucked to float freely in warmer conditions.

Secure Fit and Integrated Pillow Comfort

Elastic drawcord keeps the fitted sheet in place, while the integrated pillow sleeve secures your pillow and adds soft, breathable comfort.

Fresher, Quieter, Easy Care

Stretch-knit recycled fabric with HeiQ Fresh® odour control stays fresher between washes, reduces mat noise and is easy to clean.

Securely Stays in Place

ADAPT FITTED SHEET

Sleep Like You're at Home

Add Comfort to Your Sleep System

Adds a soft, breathable layer to your sleeping mat for improved next-to-skin comfort - just like a fitted sheet at home.

Secure Fit That Stays Put

Elastic drawcord on the underside keeps the sheet firmly positioned, preventing slipping or bunching overnight.

Integrated Pillow Sleeve

Built-in sleeve keeps ultralight pillows securely in place while covering the surface with soft, breathable fabric for added comfort.

Fresher, Quieter, Easy Care

HeiQ Fresh® odour control helps keep the sheet fresher between washes, while the fabric reduces mat noise and is easy to clean.

SHARED FEATURES

PILLOW
LOCK
SYSTEM

PillowLock Included

Keep your pillow in place.

Mini XPRESS valve

Easy to use; fits nozzle on sleeping mat Air Stream Pump Sack for fast inflation.

Slides into Sleeping Bag Hoods

Now your favourite pillow and sleeping bag fit together.

Packs Small

Stores cleanly in the included stuff sack for compact, hygienic packing.

RCS Recycled Fabrics

Recycled (or up-cycled in the Foam Core Pillow) materials. Rest easy.

CAMPING PILLOWS

Aeros
ULTRALIGHT PILLOW

Ultralight, compact, and comfortable, the Aeros Ultralight Pillow uses soft, brushed recycled fabric and a contoured shape that fits inside sleeping bag hoods. Its scalloped base and included PillowLock system keep it securely in place all night. The mini XPRESS valve enables fast inflation and adjustable firmness of its extra-thick 11cm height for personalised support. Made with durable, hydrolysis-resistant TPU, it packs to the size of an egg—ideal for fast and light adventures.

FEATURES

- Ideal for ultralight adventures. Regular Size weighs only 57g packed
- Inflates and deflates quickly thanks to the mini XPRESS valve
- Offers customisable comfort with up to 11cm thickness and adjustable firmness

Aeros
DOWN PILLOW

The Aeros Down Pillow delivers enhanced comfort with a down-topped, air-supported design and soft-touch nylon face. Its rectangular shape provides ample sleep space, while up to 12cm thickness and adjustable firmness ensure personalised support. Quick inflation and deflation are effortless with the mini XPRESS valve. Made with low-impact, certified recycled polyester and a hydrolysis-resistant TPU air chamber, it offers durable, ultralight performance. Included PillowLock keeps your pillow secure all night.

FEATURES

- Ultralight construction delivers premium comfort at just 70g for the Regular Size
- A plush down layer atop a supportive air chamber provides soft, quiet, and comfortable pillow-top cushioning
- Inflates and deflates quickly thanks to the mini XPRESS valve

Aeros
PREMIUM PILLOW

Engineered for lightweight luxury, the Aeros Premium features a top layer of memory foam and brushed stretch knit fabric over an adjustable air chamber, providing breathable, customisable support up to 12cm thick. Its ergonomic scalloped shape cradles your head, fits inside sleeping bag hoods, and supports all sleep positions. PillowLock patches secure the pillow firmly in place on your mat. Built with durable hydrolysis-resistant TPU and certified recycled fabrics, the Aeros Premium is the perfect upgrade for adventurers and campers seeking lightweight comfort.

FEATURES

- A memory foam top layer and recycled stretch-knit fabric combine to make a truly lightweight, luxurious pillow
- Inflates and deflates quickly thanks to the mini XPRESS valve

VEHICLE SUPPORTED

Memory Lux PILLOW

No compromise on comfort. The Memory Lux Pillow blends plush memory foam and breathable stretch-knit fabric with a self-inflating air core for unmatched support. Adjustable height (9–12cm in the large, 9-14cm in the XL) and firmness let you customise the pillow to suit your sleep style, while the generous rectangular shape offers all the comfort of home. The removable, machine-washable cover keeps things fresh. Rolls down easily into the included storage sack. Bring a little luxury wherever you go.

FEATURES

- Memory Foam Luxury: Thick perforated memory foam with a self-inflating core and soft fabrics delivers comfort that rivals or exceeds home pillows
- Height Adjustable Support: Quickly inflate or deflate the pillow from 9–14 cm using the mini XPRESS valve for personalised sleep comfort

SIZES

L / XL

Foam Core PILLOW

Soft comfort meets practical design. A brushed stretch-knit fabric and lightweight foam core offer quiet, supportive rest, while a layer of recycled Revive Loft insulation adds breathability and temperature regulation. The built-in rolling closure makes it easy to pack - no straps needed. Crafted from certified recycled materials, including foam offcuts from our sleeping mats, the Foam Core Pillow is a compact, lower-impact option for a better night's sleep outdoors.

FEATURES

- Soft, breathable face fabric made from recycled stretch-knit ensures comfort throughout the night
- Easy to roll and stow with a built-in hook-and-loop fastening system for quick packing bikes, motorbikes and roof-racks

2027 AEROS TRAVEL PILLOWS
SHARED FEATURES

Support for Upright Sleep

Wedge-shaped design stabilises your head without pushing it forward.

Packs Small, Travels Clean

Compacts into a pocket-sized stuff sack for easy, hygienic storage.

Fast Inflate, Easy Pack Down

Mini XPRESS valve enables quick inflation, adjustment and deflation.

Secure Fit, Stays in Place

Narrow centre fits between neck and headrest, with adjustable closure for a stable fit.

Lower Impact Materials

Comfortable recycled fabrics and a robust TPU bladder deliver long-lasting performance.

2027 SLEEP
TRAVEL PILLOWS

Aeros Ultralight TRAVEL PILLOW

Travel lighter and sleep easier with an ultralight pillow designed for upright comfort. The ergonomic wedge-shaped profile keeps your head supported, while the brushed recycled fabric offers soft, breathable comfort against your skin. Adjust firmness via the air core, and rely on the fast valve and compact stuff sack to streamline transitions through airports and bus stations.

FEATURES

- **Ultralight:** Ultralight design packs down exceptionally small for effortless travel
- **Adjustable Firmness:** Adjustable air core lets you customise firmness for personalised comfort
- **Supportive:** Ergonomic wedge shape supports upright sleeping without forward head tilt

Aeros Down TRAVEL PILLOW

Experience better in-flight rest with a compact, ultralight pillow shaped for upright sleeping. Its ergonomic wedge shape holds your head comfortably, while the down topper delivers a naturally soft, quiet layer that boosts long-haul comfort. The adjustable air core offers personalised firmness, and the rapid inflate/deflate valve plus included stuff sack streamline movement on and off planes or buses.

FEATURES

- **Down Topper:** A plush down layer atop a supportive air chamber provides soft, quiet, and comfortable pillow-top cushioning
- **Easy to Use:** Rapid inflate/deflate, mini XPRESS valve enables fast setup and pack-away in transit
- **Stays in Place:** Adjustable snap collar keeps pillow in place for adjustable support

Aeros Premium TRAVEL PILLOW

Engineered for travel, this ultralight pillow uses an ergonomic wedge-shaped profile to support your head comfortably upright when you can't lie down. A soft, stretchy and recycled stretch knit fabric top offers quiet and breathable comfort, while an adjustable air core allows you to fine-tune firmness. With a rapid inflate/deflate valve and pocket-sized stuff sack, it transitions smoothly through your journey.

FEATURES

- **Supportive:** Ergonomic wedge shape supports upright sleeping without forward head tilt
- **Comfortable Fabric:** Soft, stretch knit fabric provides breathable, quiet comfort
- **Adjustable Firmness:** Adjustable air core lets you customise firmness for personalised comfort

PILLOW
DISPLAY FIXTURE

Boost Sales and Improve Merchandising.

Increase Customer Interaction

Pillows are easy to miss on the retail sales floor. Displayed correctly, having multiple pillows out of packaging for customers to touch and feel will boost sales by over 30%.

Silent Salesperson

Interchangeable graphics specific to each pillow clearly communicate the benefits of the pillow, helping turn shoppers into buyers.

Adapts to the Retail placement

Want to highlight pillows on a table top or at checkout? Do you want to make your pillow wall display more profitable? The Sea to Summit pillow display adapts to both wall and table tops seamlessly.

Durable Metal Construction

Designed to survive years of retail use, the durable metal construction will be a trouble-free asset to your visual merchandising tool kit for years to come.

Can be hung on slatwall or gridwall

SLEEPING LINERS

SLEEPING LINERS
WHAT'S NEW IN 2027

More Than Just Warmth

The liner range now goes beyond simple warmth boosts. New fabrics and clearer segmentation create a more complete offer – spanning thermal performance, breathable next-to-skin comfort, fitted sheets for sleeping mats, hygiene-focused travel use and natural fibre sleep feel.

Fusion PrimaLoft® Performance

The new Fusion PrimaLoft® Sleep Liner delivers the highest warmth-to-weight performance in the range. Using breathable PrimaLoft® Active Evolve insulation, it traps significant warmth while managing moisture - remaining soft, stretchy and comfortable next to skin.

Pico: The Lightest Liner

The new Pico Ultralight Sleep Liner brings comfort and hygiene benefits to the lightest possible setup. Built from breathable 7D ripstop nylon, it is the lightest liner in the world - packing exceptionally small for fast-and-light sleep systems.

Natural Fibre Comfort Returns

For 2027, natural fibres return to the liner range with Renew and Silk Flex. From soft, sheet-like TENCEL™ Lyocell to ultralight silk, they deliver breathable comfort, effective moisture management and a more natural sleep feel.

2027 SLEEP

LINER SHAPES

Designed for How You Sleep

Sea to Summit liners are shaped to match how and where they're used - whether that's inside a sleeping bag in the backcountry or on a bed while travelling. Each shape is purpose-built to deliver better comfort, fit and performance for its intended environment.

Camping Liners

Optimised for Sleeping Bags

The Contour shape mirrors a sleeping bag for improved warmth and weight efficiency. A hooded version aligns with technical bags for full coverage, while the Contour Lite version removes the hood to minimise weight and bulk.

Travel Liners

Designed for Beds and Travel

The Traveller shape delivers a rectangular, bed-like fit with an integrated pillow sleeve for a secure, hygienic sleep surface and an easy-access opening for convenience. The Traveller Lite model offers the same rectangular shape in a simpler, more minimal design.

THERMAL BOOST LINERS
FABRIC TECHNOLOGY

Lower impact, higher performance, more comfort.

THERMOLITE® PRO

Thermolite Pro. Engineered for cold-weather performance.

THERMOLITE PRO uses far infrared fibre technology to deliver warmth in two ways: hollow-core fibres knitted into a three-dimensional structure trap insulating air, while ceramic pigments absorb and emit infrared radiation back to the sleeper.

The result is targeted thermal boost where you need it most. THERMOLITE PRO features in the **Reactor Lightweigh**t and **Midweight** liners.

THERMOLITE® EcoMade ALL SEASON TECHNOLOGY

All-season comfort. Reduced impact.

THERMOLITE EcoMade ALL SEASON blends warmth-trapping hollow-core fibres with moisture-wicking channel fibres to regulate temperature across warm and cool conditions alike – delivering excellent thermal performance with a significantly reduced footprint.

Originating as plastic bottles, fibres are cleaned, ground, extruded into yarns and knitted into fabric. RCS-certified and bluesign® APPROVED, THERMOLITE EcoMade features across the **Reactor liner range**, with the ALL SEASON variant in the **Reactor Fleeceweight.**

PRIMALOFT®

Maximum warmth. Minimum weight.

PrimaLoft® Active Evolve uses fibres of varied thickness and length to create a lofted structure that traps warm air efficiently, delivering excellent warmth for its weight. Four-way stretch moves with the body so the liner never restricts your sleep position.

Soft enough to wear next-to-skin, the fabric also manages moisture to maintain a comfortable sleeping environment. Made from up to 100% post-consumer recycled content, the **Fusion PrimaLoft Liner** offers our highest warmth-to-weight performance.

PRIMALOFT ACTIVE EVOLVE FABRIC

Highest Warmth-to-Weight in the Range

Adds up to +9°C / +16°F when used as part of a sleep system.

Packs Small, Travels Light

Compresses into its included stuff sack for minimal pack volume.

Soft, High-Loft Performance Fabric

PrimaLoft® Active Evolve traps insulating air while remaining soft and comfortable next to skin.

Stretch Comfort That Moves With You

Flexible fabric adapts to your body and sleeping position for unrestricted comfort.

Breathable Across Conditions

Highly breathable insulation regulates temperature and moisture for comfort in a wide range of temperatures.

SEATOSUMMIT

SLEEP LINER
FUSION PRIMALOFT

Active Insulation, Engineered for Sleep.

Exceptional Warmth-to-Weight

PrimaLoft® Active Evolve uses a high-loft, multi-denier fibre structure to trap insulating air, delivering exceptional warmth with less material than traditional fleece or insulated fabrics.

Adaptive Thermoregulation

Variable fibre lengths and deniers create natural loft highs and lows, trapping heat when needed while releasing excess warmth and moisture to regulate temperature during sleep.

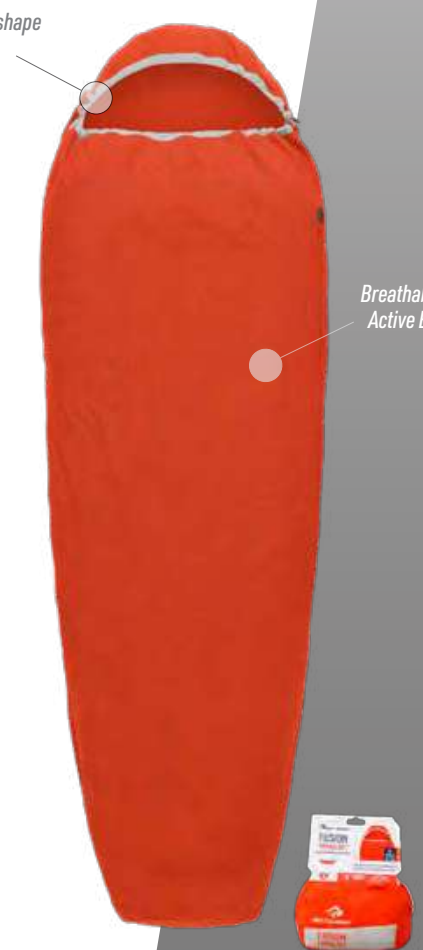

Breathable, Next-to-Skin Comfort

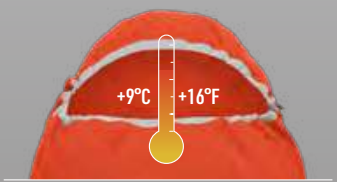

Active Evolve combines insulation-level warmth with fabric-like breathability, managing moisture overnight while remaining soft, stretchy and comfortable against the skin.

Lightweight, Highly Packable

Open, high-loft structure eliminates the need for additional fabric layers, packing exceptionally small while delivering warmth comparable to heavier sleep system liners.

PRIMALOFT

SEATOSUMMIT

THERMAL BOOST LINER
REACTOR LIGHTWEIGHT

Increase warmth with minimal additional weight.

Freedom to Move

Regardless of sleeping position or tossing and turning, the stretch knit construction and armholes provide complete freedom of movement, allowing unrestricted rest. It fits into any sleeping bag and snaps into Sea to Summit bags for easier entry and exit.

Boosts Sleep System Warmth

Using Far Infrared Technology (FIR) and hollow-core fibres, Thermolite Pro traps and reflects body heat, increasing warmth without adding significant weight and bulk. The Reactor Lightweight may add up to 4°C | 7°F when used as part of a sleep system.

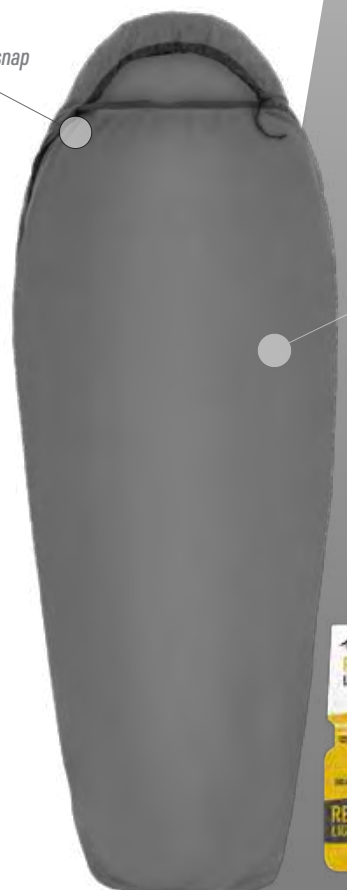

Easy to Clean

Unlike sleeping bags, the Reactor Lightweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

Extends Sleeping Bag Lifespan

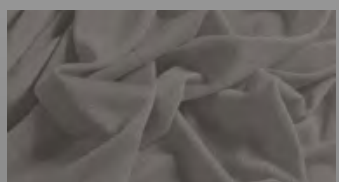

Frequent washing can reduce the performance of a sleeping bag. Using a Reactor Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

REACTOR MIDWEIGHT

The go-to liner for every adventure.

Freedom to Move

Regardless of sleeping position or tossing and turning, the stretch knit construction and armholes provide complete freedom of movement, allowing unrestricted rest. It fits into any sleeping bag and snaps into Sea to Summit bags for easier entry and exit.

Boosts Sleep System Warmth

Using Far Infrared Technology (FIR) and hollow-core fibres, Thermolite Pro traps and reflects body heat, increasing warmth without adding significant weight and bulk. The Reactor Midweight may add up to 6°C | 11°F when used as part of a sleep system.

Easy to Clean

Unlike sleeping bags, the Reactor Midweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

Extends Sleeping Bag Lifespan

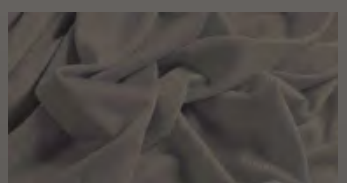

Frequent washing can reduce the performance of your sleeping bag. Using a Reactor Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

REACTOR FLEECEWEIGHT

Boosts warmth for cold conditions.

Freedom to Move

Regardless of sleeping position or tossing and turning, the Thermolite Fleece fabric and armholes provide freedom of movement, allowing unrestricted rest. It fits into any sleeping bag and snaps into Sea to Summit bags for easier entry and exit.

Boosts Sleep System Warmth

The Reactor Fleeceweight utilises Thermolite hollow core fibres woven into a grid fleece to trap and reflect body heat, noticeably enhancing warmth in the sleep system with minimal added weight. The Reactor Fleeceweight may add up to 8°C | 14°F when used as part of a sleep system.

Extends Sleeping Bag Lifespan

Frequent washing can reduce the performance of a sleeping bag. Using a Reactor Liner reduces the need for frequent washing, helping maintain the sleeping bag's loft and extend its useable life.

Easy to Clean

Unlike sleeping bags, the Reactor Fleeceweight Liner is easy to clean and quick-drying. And its HeiQ Fresh odour control treatment keeps it fresh throughout extended use.

SLEEP LINER
COMFORT FLEECE

Fleece Comfort, On the Go.

Soft, Comfortable Fleece Warmth

Made from 125gsm double-brushed microfleece, the Comfort Fleece liner delivers a soft, familiar next-to-skin feel that's comfortable to sleep in, even on cooler nights.

Lightweight Thermal Boost

The thin microfleece construction provides effective warmth while remaining lightweight and breathable, avoiding the bulk of traditional heavy fleece fabrics.

Breathable and Quick Drying

The lightweight fleece fabric allows good airflow and dries quickly, helping manage moisture and maintain comfort during overnight use.

Easy to Care For

HeiQ Fresh® odour control helps the Comfort Fleece liner stay fresher between washes, while the recycled fleece fabric is easy to clean and quick drying.

Adds up to +7°C | +13°F when used as part of a Sleep System

COMFORT & HYGIENE LINERS
FABRIC TECHNOLOGY

Reduced impact. Increased usability. Greater Comfort.

COOLMAX® EcoMade

Coolmax EcoMade wicks perspiration from your skin and spreads it over a broad area where it dissipates.

Coolmax EcoMade fibres are 100% recycled. Longitudinal channels in the fibre wick moisture effectively.

In a stretch-knit form, this is the perfect basis for a Thermal Adapt liner, which helps you regulate temperature in warm, humid conditions.

It is blended into the **Breeze** liners and sleep sheets.

Tencel™ Feels so right

Tencel Lyocell is a sustainable material that provides softness and wicking performance.

TENCEL fibres are derived from sustainably-sourced wood fibres and manufactured using environmentally-responsible processes.

They deliver temperature regulation, wicking performance and natural comfort.

The fibre is blended into the **Breeze** and **Comfort Blend** liners and sleep sheets.

HEIQ FRESH

Sea to Summit liners feature HeIQ Fresh Technology to keep the liner feeling fresher during longer trips.

HeiQ Fresh is made of amino sugars polymers, permanently bonded to the fibers of the fabric.

It absorbs the compounds in perspiration that can cause odour, then releases them when the liner is washed.

HeiQ is not a biocide; it is not an anti-microbial treatment. The amino sugars are bio-based.

SLEEPING LINERS

HIGHLIGHT FEATURES

Freedom to Move, Vent as You Need

Arm openings and an adjustable footbox provide ventilation and allow use outside a sleeping bag.

Integrated Pillow Sleeve

Keeps your pillow in place while improving comfort and hygiene in shared environments.

Packs Small, Stays Clean

Lightweight design packs into its stuff sack, providing a clean sleep surface wherever you go.

SEATOSUMMIT

SLEEP & TRAVEL LINER

PICO ULTRALIGHT

Go Light. Sleep Anywhere.

Ultra-Light, Exceptionally Packable

Ultra-thin 7 Denier ripstop nylon (21gsm) delivers minimal weight and packs down exceptionally small, making it ideal for fast-and-light sleep systems and travel.

Comfort for the Minimalist

Contour shape reduces bulk while providing comfortable coverage for sleeping bags and mats. The Traveller version is designed for beds and bunks, with an integrated pillow pocket to keep your pillow secure and hygienic.

Breathable, Next-to-Skin Comfort

Air-textured yarn is soft and highly breathable, reducing clamminess and improving comfort against the skin.

Freshness for Multi-Day Use

HeiQ Fresh® odour control and quick-drying fabric help keep the liner fresher between washes on extended trips or frequent travel.

Incredibly Small Pack Size

SILK FLEX

Comfort That Moves With You.

Ultralight Natural Fibre Comfort

32gsm ripstop silk delivers exceptional softness and next-to-skin comfort at an ultralight weight.

Stretch Comfort

Integrated stretch panels allow the liner to move naturally as you sleep, improving comfort without restriction.

Natural Temperature and Moisture Regulation

Silk regulates temperature by dissipating heat in warm conditions and trapping warmth when temperatures drop, while efficiently wicking moisture for improved overnight comfort.

For Camping and Travel

Contour shape provides efficient comfort for sleeping bags and mats, while the Traveller version suits beds and bunks, with a pillow sleeve for a more secure, hygienic sleep setup and side openings for easy entry and ventilation.

RENEW

Better Sleep, Naturally.

Renewable Natural Fibre Comfort

Made from 100% TENCEL™ Lyocell, Renew delivers a soft, sheet-like feel using sustainably sourced wood fibres for natural next-to-skin comfort.

Breathable Comfort

TENCEL™ Lyocell fibres naturally wick moisture away from the body, helping reduce clamminess and maintain comfort overnight.

Naturally Regulated Sleep Temperature

Woven TENCEL™ Lyocell fabric balances warmth and breathability, keeping you comfortable across a wide range of mild to warm conditions.

For Camping and Travel

Contour shape provides efficient comfort for sleeping bags and mats, while the Traveller version suits beds and bunks, with an integrated pillow sleeve for a more secure, hygienic sleep setup.

BREEZE

Stay Cool. Sleep Better.

Comfort for Warm Conditions

A breathable blend of Coolmax® EcoMade and TENCEL™ Lyocell fibres wicks moisture efficiently, helping keep you cool, dry and comfortable in warm or humid conditions.

Freedom to Move

Super-stretch fabric adapts to your body and sleeping position, with a drawcord footbox and arm openings (Contour version) for added ventilation and unrestricted movement.

Breathable, Moisture-Managing Comfort

Fabric blend promotes airflow and effective moisture movement, helping manage comfort in warm conditions or when used inside a sleeping bag.

For Camping and Travel

Contour shape provides efficient comfort for sleeping bags and mats, while the Traveller version suits beds and bunks, with an integrated pillow sleeve for a more secure, hygienic sleep setup.

SLEEPING BAGS

SLEEPING BAGS

WHAT'S NEW IN 2027

Sleeping Bags that Adapt

Sea to Summit sleeping bags are designed to adapt to changing conditions. Climate Control ventilation, quilt-conversion designs and arm-out functionality allow sleepers to fine-tune warmth and airflow - delivering versatile comfort across a wide range of environments.

Ascent: Versatile by Design

The updated Ascent refines one of our most versatile technical sleeping bags. 750+ fill power duck down and box-baffle construction maximise thermal efficiency, while Climate Control multi-zip configurations allow ventilation, arm-out camp use or full quilt conversion as conditions change.

Circuit: Comfort in Motion

New to the range, the Circuit blends camping comfort with backcountry performance. A semi-tapered rectangular shape offers room to move, while the wrap-around zipper allows full ventilation or flat quilt conversion. Lightweight 650+ fill Ultra-Dry Down keeps it warm, packable and versatile.

Boab: Summer-Ready Comfort

The Boab range expands with a new 7°C / 45°F model for warm-weather camping. Its roomy shape allows relaxed sleep, while a full-length zip lets the bag open flat as a quilt for ventilation. Durable recycled fabrics and synthetic insulation deliver reliable comfort.

SLEEPING BAGS

SHARED FEATURES

Comfort Across All Conditions

Wider shapes and Climate Control features: long zips, footbox ventilation, arm openings and quilt conversion - adapt to how you want to sleep.

ULTRA-DRY Down™

Ultra-Dry Down Performance

Non-PFAS treatment absorbs less moisture, dries faster and retains loft to maintain warmth in damp conditions.

Custom Packability

Custom-sized compression sacks reduce packed volume by up to 60% for efficient storage and transport.

Technical Hood Design

Engineered to minimise heat loss while maintaining comfort over extended use.

Anatomical Footbox Comfort

Trapezoidal shape limits down compression, keeping feet warmer with room to move.

SHARED FEATURES

No-Shift Insulation

Vertical chest baffles prevent down shifting, maintaining consistent warmth in critical areas.

Water-Resistant Protection

Hood and footbox fabrics resist moisture from tent walls, helping keep insulation drier and warmer.

Draft Protection That Works

Oversized, down-filled draft tubes and collars minimise heat loss to retain warmth.

Snag-Free Zips

Zipper plough and reinforced backing fabrics prevent snagging for smooth, reliable use.

RESPONSIBLE DOWN STANDARD R·D·S CERTIFIED
100% RDS DOWN CERTIFIED BY CONTROL UNION 883003

RECYCLED 100 claim standard
SHELL AND LINING FABRIC IS 100% RCS CERTIFIED RECYCLED NYLON CERTIFIED BY CONTROL UNION 1114661

NON PFAS

1% FOR THE PLANET

Lower Impact Materials

Responsible down, recycled fabrics and non-PFAS coatings reduce environmental impact.

WHAT'S INSIDE A SEA TO SUMMIT SLEEPING BAG?

MATERIALS

Technical Fabrics

Fabrics are selected based on weight, durability, softness, water repellency and comfort. Where possible, we choose fabrics that are RCS-certified recycled and bluesign APPROVED.

Non-PFAS

All of the DWR finishes on our sleeping bag shells and our Ultra-Dry Down treatment are 100% non-PFAS.

Ultra-Dry Down

Ultra-Dry Down is a non-PFAS, permanent polymer treatment that absorbs 30% less moisture and dries 60% quicker than untreated down.

Responsible Down Standard RDS

100% of the down used in our sleeping bags and quilts is RDS-certified. The RDS system audits and enforces animal welfare standards from the source to the final product.

Revive Loft

The insulation in our synthetic sleeping bags is 100% RCS-certified post-consumer waste recycled polyester. The multi-Denier fibres have hollow cores.

HOW WE ACHIEVE IT

Baffle Design

The baffle height is adjusted for each variant to allow maximum loft. Baffles are aligned vertically in the torso to minimise down shift when a sleeper turns over.

Zip Pairing

Many sleeping bags are designed to be zipped together to create a cosy sleep environment for two. The side zipper lengths are the same regardless of the bag's size (so a Regular will zip together with a Long).

Internal Pockets

Our All-Rounder and Vehicle Supported sleeping bags often have small zippered internal pockets: space for valuables, or a place to store electronics in freezing conditions.

YKK Zipper

All sleeping bags utilise YKK zippers with zipper ploughs for smooth, snag-free operation.

Quilt Lock

Most models can be combined with a Sea to Summit quilt to provide a thermal boost.

Tested Down Quality. Each down sleeping bag includes a batch test report from the International Down and Feather Laboratory (IDFL) certifying the loft and composition of the down used. We publish a minimum fillpower rating; in production it is often exceeded.

Tested temperature Ratings. All of our sleeping bags are independently tested in ISO-accredited laboratories to the ISO Standard 23537.

ULTRALIGHT SLEEPING BAGS

ULTRALIGHT
SLEEPING BAGS

Ultralight, Without Compromise.

Designed for fast-and-light adventures where every gram counts, these sleeping bags minimise weight and pack size while maintaining comfort and reliable warmth. A refined fit, technical hood and weather-resistant touchpoints deliver thermal efficiency without the restrictive feel typical of ultralight designs.

Vertical Chest Baffles
Prevent lateral down shift in shoulder/ torso area

CLIMATE CONTROL ZIP SYSTEM

(SPARK PRO)

SEATOSUMMIT

SLEEPING BAG
SPARK PRO

Ultralight, Without Compromise.

Ultralight Precision

Minimised weight and packed size without compromising performance, delivering fast-and-light efficiency for demanding adventures.

Advanced Climate Control

Multi-zip configuration delivers precise ventilation, quilt conversion and arm-out functionality for adaptable comfort across changing conditions.

Premium 900+ Fill Power Down

RDS-certified goose down with non-PFAS Ultra-Dry treatment delivers exceptional loft and efficient warmth, with a water-resistant hood and footbox for added protection in damp conditions.

Thermally Efficient

Box-wall baffles, draft tubes, an anatomical footbox and technical hood maximise heat retention, while an ultralight, not ultra-tight shape provides room to move.

SPARK DOWN SLEEPING BAGS

Down Sleeping Bag
SPARK

The Spark series has been designed to provide minimal weight and packed size while offering enhanced ergonomics compared to the prior model. More technical hoods; more rugged, easy-to-use zippers; water resistant fabrics on the hood and foot box and a new 10D liner fabric set new standards for comfort and function.

FEATURES

- 850+ loft, RDS certified goose down is treated with our non-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- The shell and lining fabric of the Spark is a 10 Denier nylon chosen for its enhanced breathability. It contributes to a significant increase in comfort.
- The hood and foot box feature a highly water-resistant, breathable 10 Denier nylon fabric that effectively sheds moisture, for instance from tent wall condensation
- The Contour fit with a more technical hood maximises thermal efficiency, while still offering a higher level of comfort and freedom of movement than is common in ultralight sleeping bags.

Down Sleeping Bag
WOMEN'S SPARK

The Spark Women's sleeping bag is the perfect option for lightweight adventures. Specifically designed for women, with a fit - wider between the hips and knees - that allows a natural sleeping position without compressing the down. Women's-specific body mapping ensures additional warmth where female sleepers need it most.

FEATURES

- 850+ loft, RDS certified goose down is treated with our non-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- The shell and lining fabric of the Spark is a 10 Denier nylon chosen for its enhanced breathability. It contributes to a significant increase in comfort
- The hood and foot box feature a highly water-resistant, breathable 10 Denier nylon fabric that effectively sheds moisture, for instance from tent wall condensation
- The women's specific Contour fit with a more technical hood maximises thermal efficiency, while allowing a natural side or figure-four sleeping position. The result: a much higher level of thermal efficiency and comfort

Spark Women's 7C/45F & -1C/30F -Standard front draft collar. SPARK -9C/15F Double draft collars.	Ergonomically shaped for maximum comfort and warmth retention.	Single, down-filled, draft tube along the top of all zippers.	The Women's Spark 7C and 1C cannot be paired with another sleeping bag. The Women's Spark -9C can be zipped to most Sea to Summit Unisex sleeping bags.	Pairs with STS quilts.	Hood fits Aeros Ultralight and Regular pillows

EMBER QUILT & TRAVELLER BAG

Down Quilt
EMBER

The Ember quilt was designed for multi-season use with an excellent warmth to weight ratio. In warmer conditions, the ability to easily ventilate keeps you comfortable. As temperatures drop, the drawcord foot box helps you retain warmth. In cold weather, the Ember can be secured to your Sea to Summit sleeping bag using the Quiltlock system for an extra temperature boost.

FEATURES

- 850+ loft, RDS certified goose down is treated with our non-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- The shell and lining fabric of the Ember is a 10 Denier nylon chosen for its enhanced breathability. It contributes to the high level of comfort that this technical quilt provides
- Pairing with most Sea to Summit bags, the **QuiltLock system** and drawcord foot box enables quilts to be secured to sleeping bags for added functionality and freedom
- A technical quilt has become the go-to sleep solution for many gram-counting adventurers. The lack of a zipper saves weight and reduces the packed volume, while the broader cut allows freedom of movement and ventilation. Supplied straps secure the Ember to your sleeping mat

Down Sleeping Bag
TRAVELLER

A full-length zipper, shoulder and foot box drawcords and an incredibly small packed size give the Traveller unmatched versatility. The drawcords and zipper can be closed in colder temperatures or unzipped for ventilation - the Traveller opens flat as a quilt. You can even zip two Travellers together. Light and packable, a Traveller goes wherever your travels take you.

FEATURES

- 650+ loft, RDS certified duck down is treated with our non-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- Recycled polyester shell and liner fabric offers lightweight comfort. The shell fabric is treated with a non-PFAS DWR finish to help shed moisture
- Versatile and ultralight, with a tapered rectangular shape, a full-length zipper and a drawstring foot box. The no-hood design keeps the Traveller light and compact
- The foot box and shoulder drawcords can be tightened to retain warmth, or opened - along with the side zipper - for ventilation. Open flat to use as a blanket/quilt or zip to another Traveller to form a double bag for two

CLIMATE CONTROL ZIP SYSTEM

CLIMATE CONTROL

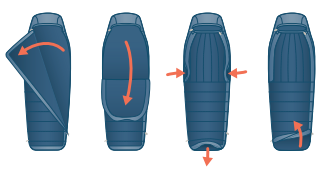

FREE FLOW

Wherever Your Adventures Take You...

Having the option to perfectly adjust your sleeping bag to the conditions can be key to your camp experience and comfort.

Which is where climate control, using Free Flow zippers comes in.

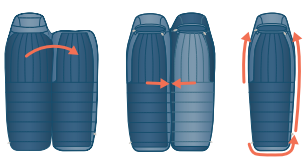

Adjust to regulate temperature

With multiple zipper configurations, Sea to Summit's Free Flow lets you adjust your sleeping bag for multi seasonal functionality and effective climate control.

Adapt to the conditions

With the option to use your sleeping bag in three configurations including a quilt, two bags coupled together, or a standard set up, Sea to Summit's Free Flow offers versatility and flexibility.

Action your camp experiences

Close the shoulder snaps, open the side zippers and reach your arms out of the bag. Enjoy a morning brew. Read a book while sitting in your tent. Live a little.

Experience a level of practicality you've never had in a sleeping bag before.

SEATOSUMMIT

SLEEPING BAG
ASCENT

Maximum Versatility. Premium Performance.

Comfortable, Roomy Fit

Relaxed contour shape provides extra space while maintaining thermal efficiency and unrestricted movement.

Premium Down Performance

RDS-certified duck down with non-PFAS Ultra-Dry treatment delivers high loft and reliable thermal efficiency in all conditions.

Advanced Climate Control

Multi-zip configuration delivers precise ventilation, quilt conversion and arm-out functionality - maximising comfort across a wider range of conditions.

Thermally Efficient, Lightweight Construction

Box-wall baffles, draft tubes and a technical hood maximise heat retention, while lightweight 20D fabrics provide a soft, comfortable feel and compress efficiently for compact carry.

HAMELIN SYNTHETIC SLEEPING BAGS

Down Sleeping Bag
HAMELIN

A backpack-capable sleeping bag with a higher level of comfort than traditional contour bags. For a few extra grams and larger packed size, Hamelin brings the benefits of synthetic insulation in wet/sandy environments. Designed for comfort and performance, the Contour fit offers plenty of room to move. The full-length side zipper extends throughout the foot box, along with a half-length zipper on the opposite side it provides ventilation and versatility.

FEATURES

- Bluesign APPROVED, 20D recycled polyester shell with non-PFAS DWR. 20D Bluesign APPROVED recycled polyester liner
- 100% RCS-certified, post-consumer, recycled, multi Denier synthetic insulation
- Free Flow zipper system and Contour fit for comfort and performance across multiple seasons, varying weather and challenging environments

Down Sleeping Bag
WOMEN'S HAMELIN

A women's-specific backpack-capable sleeping bag that provides a higher level of comfort than unisex contour bags. The higher weight compared to a down bag is balanced by the benefits of synthetic insulation in wet/sandy environments. Designed for comfort and performance, the women's-specific relaxed contour allows a natural sleeping position without compressing insulation. The full-length side zipper extends throughout the foot box, along with a half-length zipper on the opposite side it provides ventilation and versatility.

FEATURES

- Bluesign APPROVED, 20 Denier recycled polyester shell with non-PFAS DWR. 20 Denier bluesign APPROVED recycled polyester liner
- 100% RCS-certified, post-consumer, recycled, multi-Denier synthetic insulation
- Free Flow zipper system and Women's Contour fit for comfort and performance across multiple seasons, varying weather and challenging environments

SLEEPING BAG
BOAB 7°c

Room to Move. Sleep Easy.

Room to Move

Generous, tapered rectangular shape provides unrestricted space, ideal for side sleepers and those who prefer a less restrictive fit.

Climate Control

Full-length zipper extends through the footbox, with dual sliders for customised ventilation or to open flat as a quilt.

Lower Impact Materials

RCS-certified recycled fabrics and Revive Loft synthetic insulation with non-PFAS DWR deliver reliable performance with reduced environmental impact.

Durable and Easy-Going

50D fabrics, snag-resistant YKK zipper and a full-length draft tube deliver reliable warmth and smooth, fuss-free use.

VEHICLE SUPPORTED DOWN BAGS & QUILTS

Down Quilt
TANAMI

Bring the comfort of home to your vehicle based adventures. The Tanami Down comforter utilises 650+ fill power, RDS-certified duck down with a non-PFAS Ultra-Dry Down treatment to keep you cozy, while the textured nylon liner fabric prevents the quilt from sliding off as you sleep.

A drawcord system helps secure the quilt to the base of your sleeping mat, and the QuiltLock system means you can add the Tanami to a Sea to Summit sleeping bag to boost performance.

FEATURES

- 650+ loft, RDS-certified duck down is treated with our non-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- The 30 Denier recycled nylon shell material has a non-PFAS DWR finish to help shed condensation. The 45 Denier recycled nylon liner is textured for increased comfort and to prevent the Tanami from slipping
- The Tanami features the QuiltLock system, allowing the quilt to be attached to a Sea to Summit sleeping bag for an additional thermal boost in cold weather

Down Sleeping Bag
BASECAMP

The Basecamp sleeping bag utilises 650+ fill power down. It's a versatile and spacious option for vehicle-based adventures. The Free Flow Zip System allows for multiple configurations and temperature regulation for comfort and freedom. The Ultra Dry Down waterproof treatment and RDS-certified Duck Down makes the Basecamp sleeping bag a versatile option for vehicle-based adventures.

FEATURES

- 650+ loft, RDS certified duck down is treated with our non-PFAS Ultra-Dry Down finish for water resistance in damp conditions
- Recycled polyester shell and liner fabric offers lightweight comfort. The shell fabric is treated with a non-PFAS DWR finish to help shed moisture
- The Free Flow Zip System offers unparalleled temperature regulation and multiple sleeping bag configurations including removing the entire upper section of the bag for use as a quilt
- The oversized hood with drawcord can be snugged down to retain warmth effectively. It is sized to fit a large Sea to Summit pillow (or home-sized pillow) - perfect for vehicle-based adventures

WHAT'S NEW IN 2027

Ultralight Without Compromise

The new ULT tents deliver category-leading weight while preserving the hallmarks of Sea to Summit shelters. Adaptable pitch modes, generous interior volume, large vestibules and storm-ready ventilation ensure dependable performance in real backcountry conditions.

Spectral ULT: Freestanding Ultralight

The Spectral ULT delivers true freestanding performance at category-leading weight. Steep sidewalls, a high ceiling and twin vestibules maximise usable interior space, while compact pole sections and advanced ventilation make it ideal for fast, lightweight travel.

Aerial ULT: Maximum Efficiency

The Aerial ULT delivers one-pound-per-person efficiency in a semi-freestanding design that preserves interior volume and stability. A large articulated apex vent drives airflow from the highest point, while double-wall construction manages condensation in changing conditions.

Purist Mesh Bug Shelter

The Purist Mesh Bug Shelter delivers fully enclosed insect protection in a compact ultralight design. Pitch with trekking poles or inflate the included air beam for fast, rigid setup anywhere - no central hang point required. Sit-up geometry and high-airflow mesh maximise comfort and ventilation.

SEA TO SUMMIT TENTS

ADAPTABLE TO CHANGING CONDITIONS

Hangout Mode

The rainfly transforms into a weather-protected shelter for cooking or relaxing without having to retreat inside the tent.

Partial Fly Mode

In windy or uncertain weather, half the rainfly can be rolled back for ventilation and views, then quickly redeployed from inside the tent if rain arrives.

Full Fly Mode

The fully waterproof, seam-taped rainfly pitches low to block wind and rain for maximum weather protection.

Stargaze Mode

Sleep under the stars, with the rainfly ready to deploy in seconds if the weather turns.

Inner Only Mode

No-see-um mesh panels maximise airflow while protecting against biting insects.

Fly Only Mode

Ultralight shelter setup using just the fly, with or without the footprint.

SEA TO SUMMIT TENTS
REAL WORLD LIVEABILITY

Large Internal Volume

Steep walls, a high ceiling and rectangular floorplan maximise interior volume and comfort while you wait out the weather.

Internal Organisation

Extra large gear pouches and smaller essential pockets keep your tent neat and tidy.

Dry Setup & Take Down

Pitch fly-first or pack down the inner separately with the fly still up - the Sentinel's design keeps the tent interior dry even in wet conditions.

External Storage

Twin vestibules offer generous, weather-protected space for packs, boots, and wet gear.

Dyneema® Apex vent

Airflow is essential for reducing condensation. Twin recessed AirLift vents beneath protective scoops keep air moving, even in rough weather.

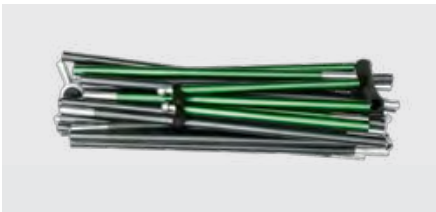

SEA TO SUMMIT TENTS

BETTER PITCH & MATERIALS

Ultra-Sil LS Fabric

This advanced rainfly fabric reduces water absorbtion, dries faster and delivers 2x better shape retention when wet than standard nylon rainflys.

DAC Poles

NFL polesets in Aerial, Spectral and Telos. MX polesets in Ikos. Pressfit, NSL & MX polesets in Sentinel

Adjustable Peg Loops

Easily tension the tent and fine-tune peg positions to avoid rocks or roots.

Reliable in the Field

Metal hardware that won't fail when it counts.

Adjustable & Removable Guylines

Boomerang Toggles make deploying or stowing guylines fast and easy.

SEA TO SUMMIT

PRODUCT TESTING

Performance Verified in Lab and Field.

Waterhead Testing (ISO 811)

The tent floor fabric is tested to ISO 811 standards, measuring the pressure at which water penetrates. The Sentinel's floor achieves a 25,000 mm hydrostatic head, ensuring a fully waterproof barrier against ground moisture.

Rain Ingress Testing

In controlled rain-room testing, the Sentinel endures 100 mm per hour (4 inches/hour) of simulated rainfall - well beyond typical storm intensity. The tent remains dry and stable throughout prolonged, adverse conditions.

Durability Testing (ISO 5981 Flex Abrasion)

Using an ISO 5981 flex abrasion machine, fabric samples are repeatedly bent under tension to simulate years of use. Results confirm the Sentinel's long-term durability and resistance to coating wear and delamination.

Field Testing

Beyond the lab, the Sentinel is field-tested across extreme environments, including the deserts of Western Australia. These real-world trials validate durability, weather protection, and usability in demanding conditions.

TENT
AERIAL ULT1

Ultralight without Compromise.

Truly Light

Semi-freestanding architecture and precision DAC pole geometry deliver exceptional two-person weight efficiency without compromising stability.

Ultralight, Not Ultra Tight

Generous one-person geometry maintains interior volume, large door access and sit-up comfort at minimal weight.

High-Flow Apex Ventilation

Large, fully articulated vent opens at the highest point for maximum airflow, then seals completely when protection is needed.

Adaptable to Changing Conditions

Multiple pitch modes allow the tent to be configured for changing conditions, while 10/15D Ultra-Sil LS fabrics and adjustable metal hardware ensure easy setup.

Ultralight without Compromise.

Truly Light

Semi-freestanding architecture and precision DAC pole geometry deliver exceptional two-person weight efficiency without compromising stability.

Ultralight, Not Ultra Tight

Considered geometry maintains interior volume, large door access and sit-up comfort despite low pack weight.

High-Flow Apex Ventilation

Large, fully articulated vent opens at the highest point for maximum airflow, then seals completely when protection is needed.

Adaptable to Changing Conditions

Multiple pitch modes allow the tent to be configured for changing conditions, while 10/15D Ultra-Sil LS fabrics and adjustable metal hardware ensure easy setup.

Fully Articulated Vent

Large Internal Volume

DAC Archtecture Creates Usable Headroom

2027 SHELTERS

PURIST MESH SHELTER

Air Beam Support

Inflates in seconds to create a stable, elevated structure without the need for a central hang point.

Sit-Up Comfort Inside

Structured geometry provides genuine headroom, allowing you to sit upright on your sleeping mat.

Ultralight, Packs Small

Minimal structure and lightweight materials reduce pack size for easy carry.

Trekking Pole Compatible

Pitch using trekking poles for a fast, lightweight setup without additional components.

Easy Entry, Full Protection

Large zippered door allows easy access, then seals completely to keep insects out for an undisturbed sleep.

SEATOSUMMIT

BUG SHELTER
PURIST MESH

Insect protection, made easy.

Ultralight, Fully Enclosed Protection

No-see-um mesh and a waterproof floor seal out insects while maintaining excellent airflow.

Air Beam Simplicity

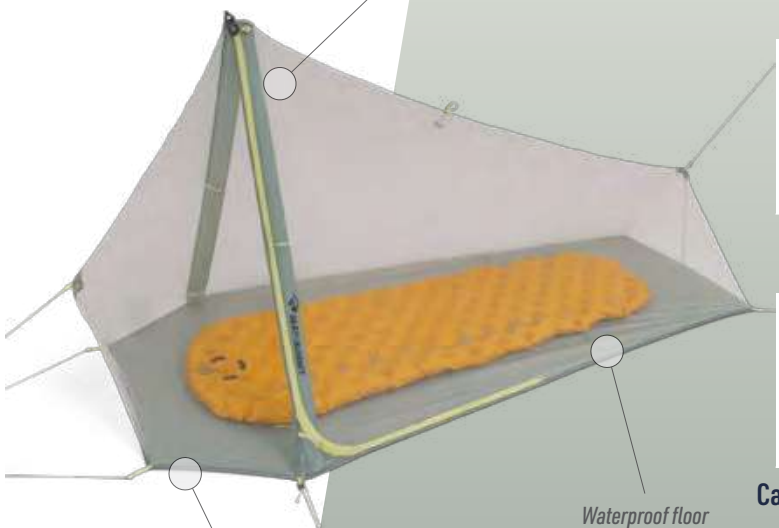

A few breaths create a stable, elevated structure that packs away with minimal added weight.

Sit-Up Liveability

Structured geometry delivers genuine headroom in a compact, ultralight shelter.

Three Ways to Pitch

Pitch with trekking poles, an inflatable air beam or a central hang loop for fast, stable setup anywhere.

Inflatable Air Beam support

Small Pack Size

Can be set up with Trekking Poles

ULTRALIGHT
MINIMALIST TARP

All the versatility of a flat tarp with improved weather protection.

Versatile Protection

Twin storm flaps can be closed to block wind and rain or opened to increase shade coverage, providing flexibility in changing conditions.

Improved Weather Resistance

The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch. Its curved catenary shape also reduces edge flutter in high winds.

Quick Adjustability

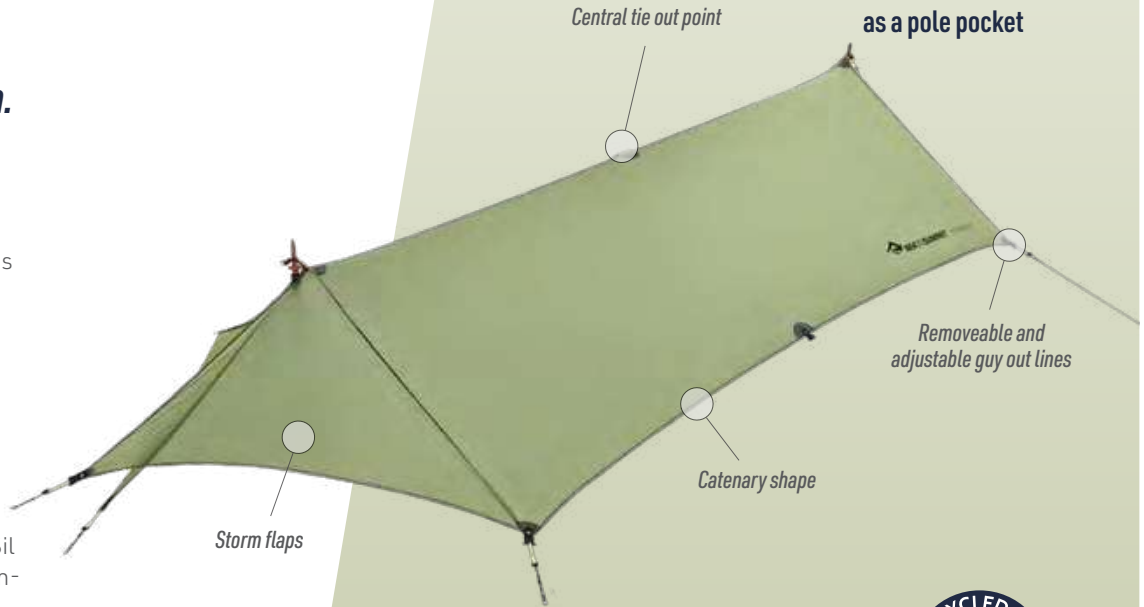

Easily pitched with hiking poles, it includes line tensioners at the reinforced tie-out points for quick adjustments beneath the tarp. Guy lines are also removable for tangle-free storage.

Lower-Impact Materials

Crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.

Stuff sack doubles as a pole pocket

ESCAPIST MESH BUG SHELTER

Adds protection to ultralight tarps.

Insect Protection

Featuring high-visibility 15D No-See-Um polyester mesh and a zippered door, the ultralight Escapist Mesh Bug Shelter provides essential protection from insects, mosquitoes, spiders and ants for long-distance hikers.

Waterproof Floor for Dry Comfort

The new Ultra-Sil LS 15D nylon/30D polyester ripstop fabric forms a bathtub-shaped floor that wraps around the shelter sides. Seam-taped, waterproof, quick-drying and with minimal fabric stretch, it ensures reliable protection from the ground up.

Simple Setup Options

The simple no-pole design easily hangs under Escapist and Minimalist tarps, offering reliable protection in buggy or wet environments. Its versatile setup also allows it to be pitched on its own using trekking poles, guy lines, tent stakes, or trees.

Lower-Impact Materials

The waterproof tub floor is crafted from the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric, using non-PFAS and non-fire retardant chemistry.

KEY FEATURES

Apex Vent

Mounted at the highest point of the tent (warm air rises); extends across entire width of tent.

Baseline vents draw air into the tent.

More Liveable Space

Where most tent poles angle down, the Tension Ridge angles up to achieve exceptional height and space.

Greater head and shoulder room and taller doors.

Unmatched Versatility Modes

1. Classic
2. Fly Only
3. Dry Set-Up
4. Inner Only
5. Partial Fly
6. Hangout

SEATOSUMMIT

ULTRALIGHT COMFORT

TELOS EVO TR2 & TR3

Liveability evolved.

Most Liveable Lightweight Tent

Tension Ridge raises the tent's shape upwards for more usable head-and-shoulder space and creates truly higher doors for easier entry.

Adaptable to Changing Conditions

With multiple setup options, the tent can easily transform to provide shelter from the sun, wind, rain, bugs and cold, making it perfect for environments ranging from mountains to deserts and rainforests.

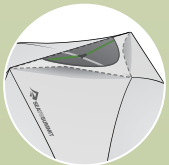

Upgraded Weather Resistance

Now featuring a waterproof zipper and air vent scoops that close and secure, the improved Apex vent provides significantly better ventilation and condensation management compared to other designs.

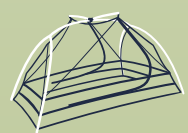

Improved Pitch

Supported by a DAC NFL poleset, the new RCS-certified recycled and bluesign APPROVED Ultra-Sil LS ripstop fabric reduces water absorption, dries faster and ensures a tighter pitch with minimal fabric stretch.

Updated closeable Apex Vent with waterproof zipper

2027 TENTS
SENTINEL XP

Wind and Weather Performance

Tested in winds over 50 mph / 80 km/h with a 25,000mm waterproof floor, the Sentinel XP stands firm when others fail. Self-equalising guylines and airfoil overhangs maintain a secure, stable pitch in severe conditions.

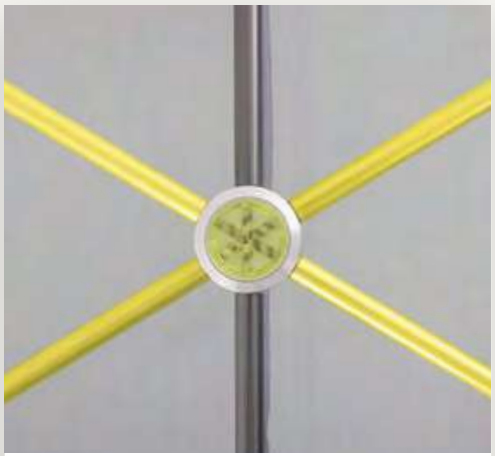

Wet Weather Liveability

Designed for comfort when you're tent-bound. Vertical walls, generous interior space, lighter fabrics and cross-flow ventilation create a bright, breathable environment, while large doors and ample headroom enhance everyday usability. Dry setup and pack-down simplify life in wet conditions.

Adaptable to Changing Conditions

Conditions change fast - your shelter should too. Multiple configurations provide ventilation and protection from sun, insects, wind and rain. Roll back the fly to stargaze, switch to hangout mode or seal it tight when the weather turns.

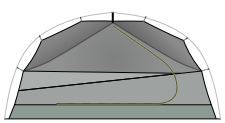

Better Pitch and Materials

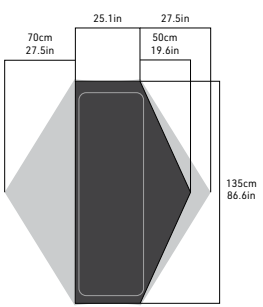

Premium materials and hardware deliver a more reliable pitch. DAC poles, all-metal components and recycled Ultra-Sil LS fabric reduce water absorption, minimise stretch and dry quickly to maintain a taut, dependable structure.

Sentinel XP1

Comes with a lightweight storage pouch

Protect your tent floor from abrasion tears and dirt with our durable and lightweight footprints.

Escapist
GROUND SHEET

Protect your shelter floor or sleeping mat from groundwater, thorns, mud, and dirt with this tough, lightweight and waterproof ground sheet.

FEATURES

- Sized to fit under both our Escapist Evo Tarp, Minimalist Tarp and Escapist Mesh Bug Shelter

Hangout Mode
POLESET

Activate Hangout Mode in your Telos tent with these custom DAC Featherlite NSL poles.

FEATURES

- Easy-to-use pole strap to keep the two-pole set bundled together
- Three-segment poles fold away to fit with the main tent pole set inside the Lightbar stuff sack

Telos
GEAR LOFT

Stash gear within easy reach and keep it off the tent floor.

FEATURES

- Perfect for clothes when delayering before bed
- Easily attach and detach with quick-connect V-Toggles

Ground Control
GUY CORDS

Make it easy to weather the storm with our quick-connect guy cords for tents and shelters.

FEATURES

- Quick-connect, knot-free V-Toggle attachment for ease of use
- Integrated cord length adjuster—multiple guy cords can also join together for extra length
- Tightly woven, reflective cord resists tangling

Ground Control
LIGHT TENT PEGS

Strong and ultralight premium 7 series aircraft alloy (7075-T6) tent pegs with a unique TriPoint shape.

FEATURES

- Rigid TriPoint design maximises grip in varied ground conditions
- Multiple notches keep guy cord low and secure in hard ground
- Reflective pull-cords for easy removal and improved visibility at night

Ground Control
TENT PEGS

Light and strong three-sided replacement pegs for your tent, tarp or shelter.

FEATURES

- Reflective cord and luminescent pull loop for peg extraction
- Multi-height guy points to reduce leverage on the peg
- Available as a pack of 8 pegs including Ultra-Sil stuff sack, or a bulk refill pack for individual sale

WHAT'S NEW IN 2027

Drybag DNA

The new DryLine range brings Sea to Summit's drybag expertise to backpacks. A roll-top closure, fully taped seams and TPU-laminated fabrics deliver dependable weather protection for commuting, travel and adventure.

Roll-Top, Without the Hassle

DryLine solves the usability challenges of roll-top packs. Magnetic-assist closure speeds opening and closing, while welded wet/dry pockets and quick-access compartments keep essentials within reach without exposing the main compartment.

Storm 30L: Adventure Ready

The Storm 30L is designed for active adventures in unpredictable conditions. Fully waterproof construction combines roll-top protection, taped seams and rugged fabrics with breathable carry and streamlined organisation.

Transit 24L: Everyday, All-Weather

The Transit 24L brings drybag protection to daily carry. A roll-top closure shields gear from rain, while side-zip laptop access, welded wet/dry pockets and travel-ready organisation keep essentials easy to reach.

SHARED FEATURES

Comfortable Carry, All Day

Lightweight HDPE back panel and breathable, fast-drying mesh harness provide structure, support and comfort in motion.

Waterproof Roll-Top Protection

Drybag-style closure with fully taped seams seals out water to keep contents protected in wet conditions.

External Wet/Dry Storage

Welded pocket separates wet items or water bottles from the main compartment to keep gear dry.

Quick-Access Tech Storage

(Transit 24L only)

Side zip entry provides fast access to padded laptop and tablet sleeves without opening the roll-top.

Easy-Access Essentials Pocket

Top-mounted zip pocket keeps small items protected and within reach on the move.

TRANSIT 24L ALL WEATHER DAYPACK

Ready for the Everyday.

All-Weather Protection for Everyday Use

Drybag-style roll-top with magnetic-assist closure, fully taped seams and TPU-laminated fabrics deliver reliable protection for commuting, travel and daily use in changing conditions.

Comfortable Carry

Lightweight HDPE back panel provides structure without bulk, while breathable mesh and ergonomically shaped shoulder straps ensure all-day comfort.

Easy Access, On the Move

Water-resistant side zip entry provides quick access to the main compartment and padded laptop and tablet sleeves.

Streamlined and Travel-Ready

Clean, snag-free design moves easily through crowds and transit, with a welded wet/dry pocket, top essentials pocket and trolley-handle compatibility for seamless travel.

BIG RIVER DRY BACKPACK

Big River Dry Backpacks are reliable, abrasion resistant, and waterproof. From the white water to alpine motorbike trails, this backpack keeps everything dry, together, and safe. A white interior laminate makes it simple to find your gear, while the oval shape and lash loops allow secure stacking or attachment to equipment. The hypalon non-wicking roll-top closure keeps water out, and the Field Repair Buckles can be replaced in seconds with just a Phillips screwdriver. So gear up, roll down and get after it.

FEATURES

- Low profile grab handles–easy to grab and carry
- Triple-coated oval base for increased water shedding and durability
- Hypalon non-wicking roll-top closure
- Adjustable sternum strap
- 420D ripstop nylon shrugs off water and abrasion

SIZES

30L | 50L | 75L

Our reusable Ultra-Sil Shopping Bag can comfortably carry 12 bottles of wine.

Ultra-Sil
DAY PACK

Our award-winning Ultra-Sil Day Pack is a minimalist must-have that provides surprising versatility and performance for such a small package. With a handy 20 litre capacity, it is equally at home as a summit pack on hiking adventures, as a sightseeing day pack while travelling, or for carrying an impromptu grocery shop while on foot or two wheels.

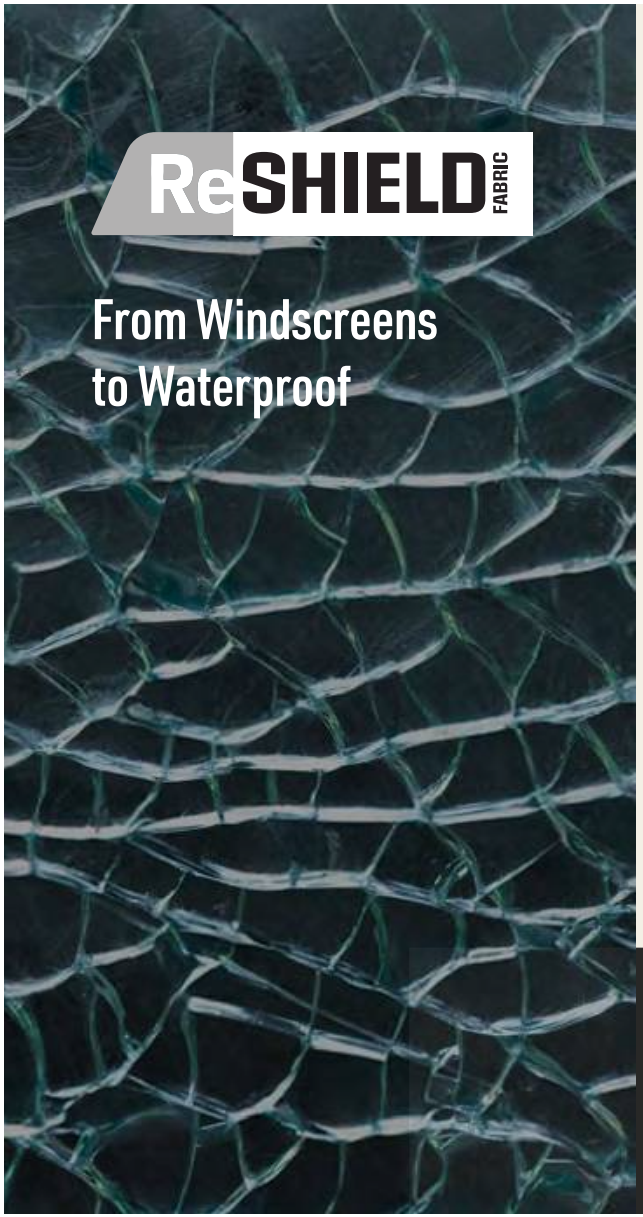

Ultra-Sil
DRY DAY PACK

An ultralight daypack that is waterproof and that stows away in its own tiny stuff sack.

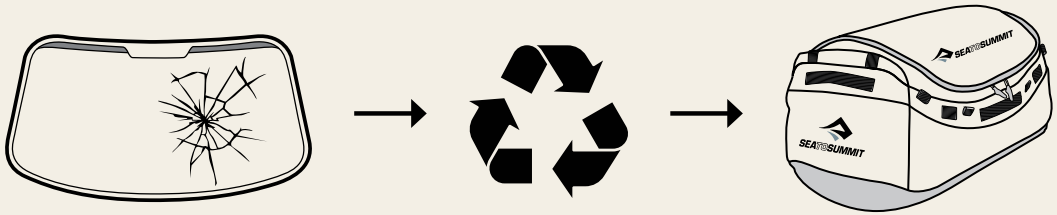

FEATURES

- 22 litre capacity
- Compression lacing system

ReSHIELD FABRIC

From Windscreens to Waterproof

What is ReSHIELD?

ReSHIELD is Sea to Summit's next-generation waterproof laminate, engineered for durability and environmental responsibility. It's created by recovering polyvinyl butyral (PVB) membranes from damaged automotive windscreens - material that would otherwise go to landfill - and repurposing them into a tough, waterproof barrier for technical travel gear. The PVB film is laminated to recycled base fabrics and tested to exceed 10,000 mm hydrostatic head, delivering long-term waterproof performance and structural integrity where it's needed most.

From windscreens to waterproof, ReSHIELD transforms waste into adventure-ready protection.

WATERPROOF TOTE PACK

MERIDIAN

Dry Bag Protection, Anywhere you Go.

Waterproof

Keep contents dry and protected with the integrated roll-top closure and taped seams. When not needed, the collar folds inside for clear, easy access to the main compartment

Hand Carry

Integrated, padded handles are always ready for use, offering a comfortable grip for short trips and quick transitions

Shoulder Carry

For longer trips or when you need your hands free, the webbing straps quickly lengthen to sit comfortably over the shoulder

Backpack Carry

For ultimate comfort and versatility, the webbing straps quickly convert into padded backpack straps, providing balanced, all-day comfort wherever you're headed

SEATOSUMMIT

WATERPROOF TOTE PACK
MERIDIAN

Dry Bag Protection, Anywhere You Go.

Reliably Waterproof

Fully taped seams, 10,000mm waterproof fabric and extendable collar keep water, sand, and everything else out - simply roll, clip and seal the closure to bring Sea to Summit's proven dry bag performance to everyday carry.

Comfortable and Dependable

Padded backpack straps with aluminium hooks detach in seconds for streamlined carry. Hypalon points reinforce key stress areas, while stretch-knit handles stay soft yet strong.

Everyday Carry, Your Way

Carry by hand, sling over your shoulder, or wear as a backpack when the distance stretches. From the store to the shore, or city streets to the canoe, it's at home in any environment.

Lower Impact, High Protection

Made from 600D RCS recycled polyester with ReSHIELD post-consumer PVB lamination reclaimed from vehicle windshields. Keep your impact low and your gear safe.

Roll top closure brings proven dry bag performance

Carry straps easily converts to a backpack

COMMON FEATURES

Carry It Your Way

Ergonomic, multi-density straps provide comfortable carry over longer distances and adjust to move naturally with you.

Comfortable Hand Carry

Padded, balanced grab handles make lifting and short-distance carry easy and controlled.

Ready for Check-In

Removable straps and a streamlined shape create a snag-free profile, built to handle the demands of baggage handling.

Compact Storage Cell

Packs neatly into its included storage cell for clean, compact storage when not in use.

Organised Packing System

Storage cell doubles as a packing cell, creating a simple, modular way to organise your gear.

SEATOSUMMIT

DUFFLE BAG
MERIDIAN

Check. Bag. Ready.

Carry your Way

Switch from hand carry to backpack with a quick-change harness built for comfort. Heavy duty aluminium hooks ensure reliability, while padded handles make short hauls easy. Meridian adapts to your journey.

Easy Packing

Oversized D-shaped lid with YKK #10 zip swallows gear, while the clean interior maximises space. The supplied storage bag doubles as a packing cube to start your packing system.

Checked Bag Ready

Built tough to survive baggage handlers. Stow straps in stealth pockets, grab padded handles on all sides, and check in with confidence. A padded base and streamlined profile keep it rolling with the punches.

Lower Impact, High Performance

Live life to the fullest with a bag made from second-life materials. 600D recycled polyester laminated with ReSHIELD PVB film from reclaimed windscreens and 1000D recycled nylon reinforcements keep your impact low while keeping your gear safe.

DUFFLE BAG
TALUS

Carry Anywhere. Trust Everywhere.

Expedition Ready

From custom metal clips to oversized zips, and a bomb-proof hypalon attachment rail that wraps around the entire bag, Talus combines heavyweight materials with solid engineering for unmatched durability.

Easy Packing, Easy Access

Designed to swallow your gear, the oversized D-shaped lid with a YKK #10 zip gives unmatched access to the cavernous interior. The stiff fabric holds its shape while you pack, and the included storage bag converts into a packing cell to keep gear organised and easy to find.

Adaptable Carry

Wherever your expedition takes you, changing modes of transport is part of the journey. The Talus straps convert quickly from hand grip to backpack style, and padded base and lid protect both your gear and your back.

Lower Impact Materials

Built from a 1500D recycled polyester laminated to ReShield - a PVB film reclaimed from vehicle windscreens - Talus is reinforced with 1000D recycled nylon for maximum durability. This construction ensures it can take you to the ends of the Earth while treading lighter on the planet.

Heavy Duty
EVAC BIKEPACK DRY BAG SET

Secure, rugged, waterproof dry bags built for bikepacking.

FEATURES

- Durable, double-stitched 420D HD ripstop nylon with a 10,000mm waterhead for rugged, weatherproof performance in demanding conditions
- Waterproof, air-permeable Evac laminate lets air escape while keeping contents dry and protected
- Easily compressible - squeeze out air through the Evac base for a smaller, more stable packed load
- Lash rails offer multiple attachment points for secure cargo cage mounting
- Includes Stretch-Loc straps with integrated keepers for fast, secure attachment to your bike

SIZES

CARE AND PROTECTION
WHAT'S NEW IN 2027

Poncho. Tarp. Shelter.

The new Tarp Ponchos combine rain protection with rapid shelter versatility. Wear them as full rain protection with pack coverage, then convert them into a tarp using trekking poles or guylines – creating lightweight emergency shelter when conditions demand.

Versatility, Built Tougher

The Lightweight Tarp Poncho adds durability and multi-function capability for longer trips. Waterproof recycled fabrics provide reliable rain protection, while multiple attachment points allow quick tarp setup for shelter, groundsheet use or adaptable coverage in changing conditions.

Ultralight Rain Protection

The new Ultralight Poncho delivers dependable waterproof protection in an exceptionally compact design. Fully taped seams, a brimmed hood and extended rear coverage shield both wearer and pack, while technical recycled fabrics keep weight and packed size to a minimum.

AIRLITE TOWEL

Ultralight, super compact and exceptionally fast drying, our minimalist Airlite Towel won't slow you down. Designed for everything from everyday activities to minimalist adventures, the AirLite Towel will absorb more than three times its own weight in water.

FEATURES

- 50% lighter than our Pocket Towel
- 85% recycled polyester /15% nylon
- Perfect for sweat management when on the trail or during exercise
- Tiny packed size
- Easy storage with its 15D Nylon stuff sack

SIZES

S / M / L

Lightweight
POCKET TOWEL

Our Pocket Towel really does fit in a jacket pocket–so you can always have it on hand for last minute trips to the gym or a lightweight backpacking adventure. Made of silky-to-touch recycled polyester DRY+ fabric, it absorbs three times its weight in water, then dries quickly.

FEATURES

- Absorbs up to three times its own weight in water
- 100% recycled polyester
- Ideal for travel, backpacking, or tucked away in your gym bag
- Technical microfiber fabric that's ultra-absorbent and remarkably fast drying
- Comes in a soft, zippered EVA case

Lightweight
DRYLITE TOWEL

The perfect hostel travel towel – compact, super soft, absorbent and fast drying. Made of our recycled polyester blend DRY+ fabric, our Drylite Towel is compact, soft, fast-drying and super absorbent. It always earns its place in your backpack, beach tote or carry-on.

FEATURES

- 'Ultrasuede'-finish fabric reduces weight, speeds up drying time and is soft to the touch
- 80% recycled polyester / 20% nylon
- Remarkably absorbent and fast-drying
- Very packable – half the weight of an equivalent-sized TekTowel

SIZES

S / M / L / XL

Deluxe
TEK TOWEL

The luxuriously soft and super-absorbent Tek Towel is made from DRY+ fabric, our recycled polyester blend. Perfect for camping, boating or beach adventures, this lightweight, packable towel comes with a handy hang loop for easy drying and a soft, zippered EVA carry case.

FEATURES

- Classic terry-towel knit fabric absorbs over six times it's own weight in water
- 80% recycled polyester / 20% nylon
- Soft and plush against your skin
- Super fast drying
- Greater surface area means great absorbency

UPDATED 2026

POCKET TROWEL

Minimise your backcountry impact with this compact and lightweight camping trowel.

FEATURES

- Tough, glass-reinforced nylon construction is 22% lighter than the prior model
- Larger buttons for easier release and one-hand removal of end cap
- Hollow handle will hold a lighter or some toilet paper
- Supports Leave No Trace ethics: depth measurement moulded into the trowel indicates proper cathole depth

THE CLOTHESLINE

Quick and easy to set-up no stretch, no peg, adjustable length clothesline.

FEATURES

- Clothesline measures 3.5 metres
- Dual cord with beads holds garments in place, even in the wind

POCKET SHOWER

Enjoy a well-earned eight minute shower at the end of a long sweaty day in the outdoors.

FEATURES

- Contoured shower head provides generous and even spray dispersion
- Simple and easy-to-use twist mechanism for turning on/off and for flow adjustment

Ultra-Sil OUTHOUSE

There's nothing more useless than wet toilet paper—keep yours dry and accessible.

FEATURES

- Toilet paper is suspended inside by a stiffening rod that allows the paper to dispense smoothly
- Accommodates full size toilet roll

CARE AND PROTECTION
GAITERS

GAITERS FEATURES:

FRONT OPENING

Hook-and loop adjustable front opening gives fantastic fit, easy access and shin protection.

LACE HOOK

Made with 316 grade stainless steel.

REPLACEABLE STRAP/CORD

Removable and replaceable underfoot strap or cord secures the gaiter around the instep.

NON-PFAS

All fabrics use a C0 DWR which is non-PFAS.

Alpine
EVAC GAITERS

Trimmed down for speed and lightweight appeal.

STRETCH-LOC STRAP

Versatile, Secure Load Control

Fasten, tighten and secure gear with confidence using a grippy, stretchable TPU strap designed for reliable hold across a wide range of applications. The integrated keeper strap manages excess, enhances grip and keeps the strap anchored in place - so there's no need to rethread between uses.

Built for versatility, it works as a compression strap or can be linked with others for added length, making it ideal for securing larger or bulkier gear in demanding outdoor conditions.

FEATURES

- Securely fastens and compresses gear of all sizes
- Integrated TPU keeper improves grip and manages excess strap
- Easy-release buckle for quick removal without rethreading
- 20mm width

SIZES

375mm / 500mm / 625mm / 750mm

Transport Accessories
STRETCH-LOC MINI STRAP

Ultralight, Precision Gear Security

Designed for smaller items and minimalist setups, this ultralight TPU strap delivers a secure, non-slip hold without adding unnecessary weight. The integrated keeper keeps excess tidy and maintains grip, even after unloading, eliminating the need to rethread.

Ideal for organising and securing compact gear, it links with other straps for added reach while maintaining a lightweight, streamlined system.

FEATURES

- Optimised for securing small and lightweight items
- Integrated keeper strap enhances grip and eliminates loose ends
- Quick-release buckle for fast, simple adjustment
- 12mm width

SIZES

300mm / 450mm

STRETCH-LOC STRAPS

- Burnt Olive
- Sulphur

Accessory
STRAPS

Lightweight and versatile straps for lashing gear together or attaching to your pack, deck or bag.

FEATURES

- High load rating
- Comes with either a simple ladder lock, or a quick release hook buckle
